Hon. C. A. Dunning, who has just become provincial treasurer of Saskatchewan, was formerly the local manager of the Saskatchewan Co-operative Elevator Company, Regina, and is English by birth, having been born in Leicestershire, England, the son of Samuel and Katherine Dunning. He was educated in the public schools and came to Saskatchewan in 1903, taking up farming at Beavertdale, Sask., where he still is interested in farming. He organized the Saskatchewan Co-operative Elevator Company in 1911, and has been general manager of the organization since.

Mr. Dunning was the Regina director of the Saskatchewan Grain Growers' Association, 1900; vice-president, 1910-

HON. CHARLES A. DUNNING.

12 inclusive; and honorary vice-president in 1913. He is also a member of the Canadian Council of Agriculture. He is 31 years of age and is married.

Mr. Dunning is the youngest provincial treasurer in Canada, but with a business experience of many men who have lived a decade longer. He is an alert, clean-cut type of Englishman, a type which western Canada, particularly, has been glad to know. He has an attractive personality, and a straightforward manner, which has given him the confidence of all those with whom he has come into contact.

Mr. A. R. Doble, since the Colonial Bank have decided to abandon their Canadian proposals for the present, has decided to devote himself to patriotic work during the war, particularly in connection with the Khaki League, of Montreal, which he organized and of which he is president. This institution has grown so big that it requires the entire time of a capable and energetic man, such as Mr. Doble, to guide it. The Khaki League has been established in Montreal for the purpose of looking after the welfare of our soldiers and sailors, both before going to the war and after their return. Recreation rooms have been opened for the men in barracks, where they can write letters, read, play games and obtain meals and light refreshments. A soldiers' club has been established where returned men who have no homes are taken care of while seeking employment. Three convalescent homes have been provided for the men returned from overseas, who are not yet fit to take positions, and who require further medical care. The league also has undertaken, in conjunction with other organizations, to arrange for employment for returned men.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Riordon Pulp and Paper Company.—The directors have declared the usual 1 per cent. quarterly dividend, together with 1 per cent. bonus, to be paid to shareholders of record November 7th.

Ontario Steel Products Company.—The directors have declared the regular quarterly dividend of 1½ per cent. on the preferred, payable November 15th to stock of record of October 31st.

Dominion Bridge Company.—The regular 2 per cent. quarterly dividend and 3 per cent. bonus declared indicates that from the twelve months' profits the shareholders will have received next month a total of 20 per cent., 8 per cent. in dividends and 12 per cent. in bonuses.

Abitibi Power and Paper Company.—Arrangements for financing in connection with additions have been completed by the company, \$1,500,000 three-year 6 per cent. notes having been sold to Messrs. Peabody, Houghteling and Company, Chicago. The extensions will bring the output of paper up to between 400 and 500 tons of paper per day.

Ford Motor Company of Canada.—At the annual meeting of the company it was decided to pass the dividend on account of business profits tax and large expenditures for improvements. Profits for the ten months ended September 30th amounted to \$1,825,458.14. The amount required for the war tax was \$716,136. The company will branch out in the manufacture of one-ton trucks. Mr. H. Ford was re-elected president; Mr. G. McGregor, vice-president and treasurer; and Mr. W. R. Campbell, secretary.

Canada Foundries and Forgings Company.—Directors of Canada Foundries and Forgings have declared the regular quarterly dividend of 1½ per cent. on the preferred stock and the usual 3 per cent. for the quarter on the common, with the 3 per cent. bonus, payable November 15th to stock record of October 31st.

Mr. W. M. Weir, president of the company, stated after the meeting that the company is booked with orders for eleven months ahead, and the volume of business has increased 70 per cent. this year. The company is sharing in the prosperity attending the steel trade.

Shawinigan Water and Power Company.—To furnish additional funds for some of its subsidiary enterprises, Shawinigan Water and Power Company has sold \$2,500,000 two-year 5 per cent. notes. The notes are dated October 2nd, and are being offered by Messrs. Stone and Webster and Curtis and Sanger at 99¼ and interest, at which price the yield is 5½ per cent. The notes are secured by bonds and stocks with a present market value of \$3,350,000, and under the terms of the indenture the market value of these securities must be at all times 25 per cent. in excess of the face value of the notes.

International Nickel Company.—The company has issued a semi-annual statement covering the half-year ended September 30th, which compares as follows:—

	1916.	1915.	Increase.
Gross earnings	\$7,775,145	\$6,667,755	+ \$ 1,07,390
Other income	137,628	102,953	+ 34,675
Total income	\$7,912,773	\$6,770,708	+ \$1,142,065
Administration and general expenditure	563,896	452,126	+ 111,770
Net	\$7,348,877	\$6,318,582	+ \$1,030,295
Depreciation and mineral exhaustion	1,004,630	751,163	+ 253,467
Surplus	\$6,344,247	\$5,567,419	+ \$ 776,828
Preferred dividends ...	267,371	267,378	
Balance	\$6,076,869	\$5,300,041	+ \$ 776,828
Common dividends	2,510,076	1,901,575	+ 608,501
Surplus	\$3,566,793	\$3,398,466	+ \$ 168,327

The company's balance sheet shows assets aggregating \$59,892,251.

TORONTO'S BOND OFFERING

The present offering of \$2,594,000 bonds of the city of Toronto is the most attractive, from a market standpoint, of any that have ever been made by the city. Apparently, unusual consideration has been given to the character of each one of the six issues; the form of the bonds; and the method in which the sale is to be made.

The interest rate which the bonds bear—5 per cent.—is the appropriate one, having regard to the yield of similar securities. The serial principle of repayment has been adopted, which is, unquestionably, the most economical for the city, and the most desirable from a market and investor's standpoint.

Like the recent Dominion loan, principal and interest are payable in gold, and provision has been made for the registration of principal. There has, however, been added the additional important feature of making both principal and interest payable in New York as well as in Canada, which will be attractive to American bond houses.

The desire of the market for bonds maturing within a short period has been met, in that no less than 90 per cent. of the \$2,594,000 is payable in from seven months to ten years, while the average duration of the whole is less than six years from the delivery date, November 27th, 1916. The statement giving particulars of the offering assures all those tendering that the same businesslike procedure will be followed that was so conspicuous when the previous offering was made.

The finances of the city are being handled in a way which has given confidence to the citizens and to those holding its securities. Under the care of finance commissioner Bradshaw, the finances of the city of Toronto are conducted in a very businesslike and conservative manner, a condition shared by only a few municipalities on this continent. For the bonds heretofore issued on the sinking fund system, there has been accumulated no less

than \$17,662,310 of a sinking fund for the repayment of such bonds.

The price received by the city for the last block of bonds marketed was 99.637 and interest, there being no less than 14 tenders received, in which 28 financial houses participated. No doubt there will be even keener competition for the present offering. It is understood that the present offering completes the city's immediate permanent financing, and that there will be no further bond issues for a considerable time.

ENEMY TRADE

The units of the British Empire will combine efforts in the commercial fight after the Great War. The signs of this condition are increasing. Competition there will always be between manufacturers in various parts of the Empire, but in many ways they are able to work together to their mutual advantage and in opposition to enemy trade. The visit of the Dominions Royal Commission to Canada is one example of the extension of this principle. Another is the extensive exhibition of enemy samples now in the Dominion. These were gathered by representatives of the British government the world over and shown to manufacturers in the principal cities of the United Kingdom. The complete exhibits, through the negotiations of Sir George Foster, were then loaned to the Canadian department of trade and commerce. They were shown in Montreal for two weeks and are being exhibited in Toronto this week and next. It is to be hoped, too, that the privilege may be extended so that the maritime provinces will have an opportunity of examining this collection of such value and service to Canadian manufacturers.

The exhibition is not open to the general public but is confined to manufacturers, their agents and others similarly interested. During the two weeks at Montreal, over 1,700 visited the exhibits. A lively interest has been apparent and the Canadian manufacturer is making considerable use of the information placed at his disposal. At Toronto, for instance, one day this week, half a dozen seekers of such information were observed not only examining the exhibit of lamps made in enemy countries but also testing these lamps for two hours with various wicks and oils, a practical appreciation of practical commercial intelligence.

In charge of the exhibition is Mr. H. Kershaw, deputed by the British government to supervise the exhibit, in co-operation with our own department of trade. A better man for the position could scarcely have been chosen, combining as he does the viewpoints of Canada and Great Britain in an Anglo-Canadian sentiment, pleasing and businesslike.

The lesson to be learned from this collection of enemy goods is the need for greater aggressiveness in the marketing of British Empire goods. The products of enemy factories have found their way into every part of the world. The requirements of each market have been closely studied and observed, with the result that trade has increased. Those of our manufacturers who are inclined to believe that new markets will be opened and old ones extended for them by the magic of legislative action, will be disappointed. Legislatures may be able to help pave the road to greater trade but the manufacturer must push himself along the commercial highway. The work, in the aggregate, of individual manufacturers throughout the Empire, and not legislation, will prove the most serious obstacle to the progress of enemy trade after the war.

THE EMPIRE'S MAKE-UP

Since the spring of 1912, the Dominions Royal Commission, composed of representatives of the British, Canadian, Australian, South African, New Zealand, and Newfoundland governments, have toured the British Empire to investigate its natural resources, trade and make-up. The war interrupted their important investigation which was resumed on the Pacific Coast of Canada last month. Since the appointment of the commissioners, war has brought questions of economic readjustment and reconstruction throughout the Empire. The final report of the Dominions Royal Commission, therefore, which will probably be issued early next year, will prove of great value for after-war work, a fact which naturally was not in mind when the sittings were commenced.

Sir George Foster, the Canadian representative on the commission, made the following statement while in Winnipeg, regarding its general purpose and work.

"Our report will probably come out just about the time the war is drawing to its close and all this added

activity and interest is thrown into the business of answering the question: On what lines must we proceed in the future? What reconstruction must we make? What allocation of powers, organized and co-ordinated, must we undertake so as to do the best for the Empire?

"We expect to have our report completed by the end of January. We will proceed from Canada to London, where our secretaries are at work tabulating the information and drawing out a sketch of the work. If we are fortunate in touching the imagination or the business sense of the Empire we will get a place for our information and our report which it could not have got if circumstances had been normal."

After the Western Canadian tour during the past few weeks, Toronto, Hamilton and Guelph and other points in Ontario were visited last week, and sittings at Ottawa, Montreal and Quebec cities this week and next will conclude the public hearings. The information which has been gathered by the commission will make an extremely valuable portfolio. It is to be hoped that the governments of the Empire will be able to take telling action on the report.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Athabasca, Alta.—October 9—Sacred Heart Hospital. Loss, \$20,000. Cause, exploded oil lamp. Three deaths.

Belleville, Ont.—October 19—Frankford cheese factory. Loss, \$8,000.

Blind River, Ont.—October 21—Casino Opera House, Mrs. McNamara's residence, Mr. R. J. Inkster's confectionery store, Mr. J. R. Albert's general store, Mr. M. Solomon's store. Loss, \$20,000.

Borden Camp, Ont.—October 16—Headquarters' mess-room, etc. Loss, \$4,000.

Brantford, Ont.—October 4—Shed at Brantford Golf and Country Club.

Brantford, Ont.—October 20—Mr. Cooper's building, 17 Sarah Street.

Bronte, Ont.—October 10—Grand Trunk Railway station. Loss, \$5,000.

Chatham, Ont.—October 4—Mr. F. Middleton's barns, 14th Concession Raleigh township. Loss, \$6,000. Cause unknown.

Cornwall, Ont.—October 20—Mr. A. Preshaw's farm buildings, between Hogansburg and Helena. Loss, \$10,000; insurance, \$3,000.

Fredericton, N.B.—October 2—Mr. R. Howard's residence, Gibson. Loss, \$1,500. Cause not stated.

Helena, Ont.—October 20—Mr. S. Lebarge's hotel barn and Mrs. Pealo's barn. Loss, \$1,500; insurance, \$1,000.

Lindsay, Ont.—October 5—Flavelles, Limited, produce plant. Loss, estimated, \$300,000. The following insurance was carried: On building and machinery: Caledonian, \$5,000; Commercial Union, \$5,000; Gore District Mutual, \$5,000; North British and Mercantile, \$9,500; Northern, \$5,000; Royal Exchange, \$5,000; Liverpool-Manitoba, \$5,000; total, \$39,500. On stock: Caledonian, \$10,000; Commercial Union, \$20,000; North British and Mercantile, \$25,000; Northern, \$15,000; Royal Exchange, \$15,000; Liverpool-Manitoba, \$10,000; Fidelity-Phenix, \$15,000; Globe and Rutgers, \$5,000; Mount Royal, \$6,000; National of Paris, \$4,000; Phoenix of London, \$20,000; St. Paul Fire and Marine, \$5,000; Sun, \$10,000; Central Manufacturers, \$4,450; North River, \$20,000; Peoples National, \$6,800; Merchants, \$5,000; Richmond, \$5,000; Lloyds of London, \$53,750; total, \$255,000.

October 17—Office and plant of Machine Automatic Telephone Company.

London, Ont.—October 20—Messrs. W. A. Jenkins Manufacturing Company's factory. Loss, \$30,000. Cause unknown.

Nashwaaksis, N.B.—October 7—Mr. M. Wills' residence. Loss, \$7,000. Cause, spontaneous combustion.

Newcastle, N.B.—October 10—Mr. A. McLean's barn, Douglstown. Loss, \$2,000; insurance, \$300.

Niagara Falls, Ont.—October 5—Barn rear of the Shredded Wheat Company's factory.

Ottawa, Ont.—October 5—Mrs. M. Finlis's boarding-house, 77 O'Connor Street. Loss, \$300.

Petrolia, Ont.—October 8—Petrolia Wagon Works. Loss, \$30,000. Cause unknown. Insured.

October 17—Mr. M. McCarroll's residence, North Monaghan. Cause, overheated stovepipe.

Pontypool, Ont.—October 12—Methodist church and four residences. Loss, \$10,000.

Port Hammond, B.C.—October 14—Business section, including Dale Hall, Dale store, hotel, Bank of Hamilton, etc. Loss, \$70,000.

Renfrew, Ont.—October 4—Messrs. Limbleau and Son's machine shop. Loss, \$3,000.

Rimouski, Que.—October 20—Monastery of the Brothers of the Cross of Jesus. Loss, \$25,000; insurance, \$3,000.

Saanich, B.C.—October 10—Prairie Hotel, Saanichton. Loss, \$2,000.

St. Stephens, N.B.—October 17—Messrs. Haley and Son's lumber and planing mill. Loss, \$100,000; insurance, \$58,500.

Saltcoats, Sask.—October 13—Commercial livery stables. Cause unknown.

Scarboro' Township, Ont.—October 22—Mr. C. C. Cummings' residence, Kingston Road. Loss, \$5,000.

South Middleton, Ont.—October 22—Mr. J. Francis' cheese-box factory.

Sutton, Que.—October 20—Mr. A. Lacroix's residence. One death.

Tofield, Alta.—October 5—High School. Loss, \$9,000. Insurance, building, \$7,500; equipment, \$1,000. Cause unknown.

Tranquillity, Ont.—October 17—Mr. P. Johnson's barns. Loss, \$5,000; partially insured.

Usborne Township, Ont.—October 11—Mr. C. Skinner's barns. Cause, suppose grain straw around windmill shaft caused heating.

Vancouver, B.C.—October 5—Mr. M. P. Cotton's residence, Shaughnessy Heights. Loss, \$3,000.

October 9—Braemar School, Shaughnessy Heights. Loss, \$20. Chinese restaurant, 91 Pender Street East. Loss, \$300.

INTER-IMPERIAL SHIPPING BOARD

Then Freight Rates Could Be Arranged by That Body— United States Immigration Figures in Error

At the opening sittings of the Dominions Royal Commission at Ottawa, Sir Alfred Bateman presiding, Mr. E. Blake Robertson, assistant superintendent of immigration, the first witness, stated that United States reports regarding the volume of emigration from Canada to that country since the outbreak of the war, were grossly exaggerated, not through padding, but owing to faulty system of records; 50 per cent. of those counted as immigrants were Canadians who returned to this country.

More attention might be given to guarding against the white slave traffic through protective measures among immigrants on shipboard. He said that on the whole the class of emigrants sent out from the United Kingdom was good, but the least desirable were those sent by charity organizations. He was opposed to the settlement of foreigners in colonies, which tended to delay them in forgetting their nationality and becoming Canadians.

To Fix Ocean Rates.

The suggestion that the ships and men now being used by the British admiralty between the United Kingdom and Canada and other parts of the empire be maintained in their present service for a period of five years after the war, but instead of carrying men and munitions they carry merchandise, was made by Sir Henry Drayton, chairman of the Board of Railway Commissioners.

This proposal was made by Sir Henry when asked for suggestions regarding the preservation of trade between the dominions and the mother country after the war was over. In order to determine rates Sir Henry suggested that an inter-imperial board be set up which would fix ocean freight rates so that undue advantage may not be taken of shortage of tonnage. He believed that no difficulty would be experienced in this direction if a maximum rate were set up in a manner that standard rates on railroads are fixed by the railway commission.

More Wheat Milled.

Sir George Foster questioned the possibility of inducing private owners to maintain their ships in the British-Canadian service, when perhaps they could get better rates between, say, New York and South America. Sir George said that with the use of the German ships captured during the war, he believed an inter-imperial board could organize such a service. Sir George gave other evidence relating to trade between England and Canada. He showed that during periods when ocean freight rates were low, the trade between England and Canada increased, but when they were high, the trade to the United States increased and vice-versa. He also expressed the opinion that more wheat should be milled in Canada in order to encourage commercial stability instead of it being shipped to England to be milled.

Systematize Livestock Industry.

Several recommendations regarding Canada's livestock industry were made by Mr. H. S. Arkell, assistant livestock commissioner of the Dominion government. First, he stated, there was needed an intelligent system of handling the industry. Annual statistics were required, and not as now every ten years. Statistics should also show the quality and conditions as well as the number of cattle. There should be definite periods during the year for marketing cattle, so that the farmers could raise cattle to suit that time. Statistics should be neutral and not biased for commercial reasons. Information and statistics should also be supplied regarding the condition in competitive cattle-raising countries, such as the Argentine and the United States. Field officers ought to be appointed in Canada, and at least one technically trained man should be stationed in Great Britain to organize the export trade.

Mr. Arkell suggested that there should be more co-operation between farmers in the cattle trade such as there now existed between those selling eggs and wool. A quarter of million dollars' worth of eggs were sold by one such co-operation last year. This had led to an improvement in the product. There should also be sale by grade and supervision of stockyards and exchanges, and commission agents should be controlled by the Canadian government.

Mr. F. C. T. O'Hara, deputy minister of trade and commerce, said to the commission, that British manufacturers did not get after the Canadian trade like the American manufacturers. "The goods won't sell themselves," he said, "and it needs someone to sell them."

Merchants in Canada could order their goods overnight from New York, and often they had to procure English products in that way. "With all due deference to the energy and ability displayed by the present British board of trade commissioners in Montreal," he continued, "I think Canada should be sub-divided into areas within which additional British commissioners should be appointed, reporting to and being directly responsible to the board of trade in London."

Such commissioners should be appointed in Vancouver, Winnipeg, Toronto, Montreal and Halifax.

"The United States leaves nothing undone to secure Canadian trade. There are some hundred consuls of the United States here, and thousands, I might say millions, of advertising circulars are sent into this country every year. There are also the innumerable trade and other magazines which carry advertisements of United States goods which all swell the trade."

The deputy minister of trade and commerce also recommended that the various overseas dominions have representatives in Canada.

That the recent Canadian government made-in-Canada toy exhibit at Toronto exhibition had done much good to interest manufacturers and give an impetus to trade was the information given by Sir George Foster and the deputy minister. Hon. J. H. Sinclair, New Zealand, wanted to know if the showing of German goods did not advertise the latter, but Mr. O'Hara said the opposite was the fact. It gave Canadian makers fresh ideas.

Mr. R. H. Campbell, Dominion director of forestry, said in answer to questions that the supply of timber had not materially decreased here.

OCTOBER RAILWAY EARNINGS

The following are the earnings of Canada's transcontinental lines for the first three weeks of October:—

Canadian Pacific Railway.

	1916.	1915.	
October 7	\$2,966,000	\$2,915,000	+ \$ 51,000
October 14	3,934,000	2,988,000	+ 46,000
October 21	2,932,000	3,068,000	— 136,000

Grand Trunk Railway.

October 7	\$1,319,090	\$1,019,826	+ \$299,264
October 14	1,300,095	1,067,819	+ 232,276

Canadian Northern Railway.

October 7	\$ 857,400	\$ 847,500	+ \$ 9,900
October 14	847,700	767,800	+ 79,900
October 21	839,700	792,800	+ 47,900

FIRE RATES INQUIRY

Before the Ontario fire rates inquiry, which had sittings again this week, there was discussion on the insurance of automobiles. The mutual fire insurance companies' representative, Mr. J. H. McEwen, of the Peel and Maryboro Company, gave interesting evidence in relation to farm fires.

Mr. J. B. Laidlaw, of the Norwich Union Fire Insurance Society, Limited, representing the Canadian Fire Underwriters' Association, was asked by Judge Masten, the commissioner, if it would not conduce to a better feeling between the insured and the companies and be in the interests of the community if there was provided an inexpensive summary method of ventilating any supposed grievances in the nature of discriminatory action on the part of the insurance companies.

Mr. Laidlaw replied: It seems to me that if you can be quite sure of the impartiality of the person who may be selected, perhaps the end desired might be accomplished, but what we fear, and what we understand has happened in the United States, is that from time to time an official may be appointed who would have a distinct bias one way or the other, and that it is not a fair tribunal because he is too much subject to temporary excitement or passion of the public. It is for that reason we suggest that the relief by competition is the safest and fairest to us, and to the public.

MORE PEOPLE IN WEST

Census Shows Addition of 90,000 Citizens Since 1911—
Urban Growth Slower

A preliminary return of the results of the quinquennial census of the western provinces, taken last June, gives the population of cities, towns and villages in the three provinces. In nearly all cases increases are shown, although the growth of urban population has not been nearly so great as was the case during the boom times of the two previous five-year periods. Swift Current, for which the count is not yet compiled, is omitted, and all the figures are subject to final revision. The total gain in population of the thirty cities and towns enumerated is approximately ninety thousand, as compared with a gain of over 150,000 between 1906 and 1911.

Capital Cities' Gains.

Winnipeg, the largest city in the middle west, increased its population from 136,035 in 1911 to 162,999 in 1916, being a gain of 26,964, or nearly 20 per cent., in five years. For the ten years 1906 to 1916 Winnipeg shows an increase of 72,852, or more than 80 per cent.

In Saskatchewan, Regina leads with 26,112, although a decrease of 4,108 has taken place. Both Saskatoon and Moose Jaw show material gains since 1911.

In Alberta, Calgary still stands first with a population of 56,353, followed by Edmonton with 53,792. Of the population of the latter, 12,420 represents that of the former city of Strathcona, now municipally part of the provincial capital. In 1911 Strathcona had a population of 5,579, and in 1906 one of 1,550.

Comparative Figures.

The comparative figures in detail are as follow:—

Manitoba.			
(Cities).	1906.	1911.	1916.
Winnipeg	90,153	136,035	162,999

Mr. W. A. Ross, of the Bank of Montreal staff, has been appointed manager of Calgary clearing house, to succeed the late John G. Crerar.

CROP AREAS AND RETURNS

Wheat Result is 159,000,000 Bushels — Labor and
Saskatchewan's Threshing Operations

The crop results now provisionally estimated by the census and statistics office are a total yield of wheat of 159,123,000 bushels from a harvested area of 10,085,300 acres, a yield per acre of 15.78 bushels as compared with 29 bushels last year and 15.67 bushels in 1914. The total yield of oats is now placed at 338,469,000 bushels from 9,795,000 acres, a yield per acre of 34.55 bushels, as against 45.76 bushels last year and 31.12 bushels in 1914. The yield of barley is 32,299,000 bushels from 1,328,800 acres, or 24.31 bushels per acre, and of rye 2,058,500 bushels from 101,420 acres, or 20.30 bushels per acre. For the three prairie provinces the estimated yield of wheat is 138,542,000 bushels; of oats, 232,409,000 bushels; of rye, 659,000 bushels; of barley, 22,862,000 bushels; and of flaxseed, 7,707,000 bushels. The yields of remaining crops are reported for the first time this year as follows: peas, 2,166,000 bushels from 150,280 acres; beans, 541,400 bushels from 32,500 acres; buckwheat, 6,720,000 bushels from 341,500 acres; flaxseed, 7,759,500 bushels from 710,000 acres; mixed grains, 10,333,000 bushels from 397,770 acres; and corn for husking, 6,271,000 bushels from 173,000 acres. For peas, beans, buckwheat, mixed grains and corn for husking these acreages represent the areas actually harvested after deduction from the areas sown in Ontario and Quebec of proportions estimated to have been entirely unproductive through drought.

Quality of Grain Crops.

Correspondents of the census and statistics office were asked to report on the quality of the grain crops at the time of harvest, as measured against a standard of 100, representing grain well headed, well filled, well saved and unaffected to any appreciable extent by frost, rust, smut, etc. The average results for the whole of Canada are as follows: Fall wheat 78, spring wheat 88, all wheat 70, oats 75, barley 72, rye 84, peas 66, beans 74, buckwheat 71, mixed grains 74, flax 76, and corn for husking 67. In Manitoba the quality of spring wheat is 44 per cent., in Saskatchewan it is 60, and in Alberta it is 73. The estimates of quality are high in the maritime provinces and in British Columbia, the average for Canada being reduced by rust in Manitoba and Saskatchewan and by drought in Quebec and Ontario.

The condition of root and fodder crops is about the same as a month ago, the average points in percentage of a standard or full crop ranging for all Canada from 71 for potatoes and sugar beets to 77 for fodder corn.

Thrashing Returns in Saskatchewan.

The most outstanding feature of the fortnightly crop report issued by the Saskatchewan department of agriculture is the shortage of labor to complete the thrashing. From all over the province reports show that when the thrashing operations were suspended owing to snow and rain the men started to return to their homes in Eastern Canada. This, added to the recall of the soldiers, will cause an acute labor shortage directly work is resumed by the machines. A careful calculation shows that only about 28 per cent. of the crop in the province is thrashed, and in a great many districts 90 per cent. of the crop is still in stook. The following estimates show the amount of grain still to be thrashed in the nine crop districts of the province:—

	Acreage.	Acres thrashed.	Acres to be thrashed.
1. South Eastern	1,215,128	486,051.6	729,076.4
2. Regina-Weyburn ..	1,532,407	536,342.9	996,054.1
3. South Central	1,641,542	328,308.2	1,313,233.8
4. South Western ...	304,484	30,448.4	274,035.6
5. East Central	1,221,737	250,347.2	1,025,389.8
6. Central	2,039,688	611,906.4	999,996.6
7. West Central	767,243	153,448.3	613,794.7
8. North Eastern	518,468	103,692.4	414,771.6
9. North Western ...	570,484	285,242.0	285,242.0

Mr. Charles K. Ives, Halifax, manager of the Sun Life Assurance Company of Canada, has been awarded the first prize offered for the largest percentage of increase in new business over allotment in a six months' competition, among all the company's Canadian agencies.

NEW INCORPORATIONS

Companies Are More Numerous This Week—Mining Interests Have Largest Capital

Canada's new companies incorporated this week number 53. The head offices of these companies are located in seven provinces. The total capitalization amounts to \$6,633,300.

The largest companies are:—

Bellbirk Porcupine Mines, Limited \$2,000,000
Thunder Mining Company, Limited 2,000,000'

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	18	\$5,361,400
Quebec	12	803,900
British Columbia	6	160,000
Manitoba	3	65,000
Saskatchewan	8	325,000
Alberta	4	90,000
New Brunswick	2	28,000
	53	\$6,633,300

The following is a list of charters granted during this week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Delisle, Sask.—The Delisle Farming Company, Limited, \$150,000.

Stratford, Ont.—Reliners, Limited, \$200,000. W. H. Adams, W. T. Folliott, W. H. Adams.

Melancthon, Ont.—Backline Telephone Company, Limited, \$1,400. D. E. Dean, F. H. Silk, S. H. Rutledge.

Timmins, Ont.—Hendun Lumber Company, Limited, \$40,000. F. A. Day, W. A. Gordon, Edna M. Reilly.

Chicoutimi, Que.—La Compagnie d'Usinage et Garage de Chicoutimi, \$20,000. A. Bilodeau, W. Dufour, H. Bouchard.

St. Joseph de Beauce, Que.—La Compagnie a Bois de la Petite Riviere Limitée, \$49,000. P. Grondin, J. L. Vachon, J. A. Bouffard.

Walkerville, Ont.—Universal Button Fastening and Button Company of Canada, Limited, \$20,000. J. M. Longyear, E. T. Tappey, H. W. Longyear.

Saskatoon, Sask.—The Empire Meat Market, Limited, \$10,000; the Dominion and Western Lumber Company, Limited, \$30,000; Franklin Produce Company, Limited, \$20,000.

Vancouver, B.C.—Weir Machinery Company, Limited, \$25,000; Eagle Timber Company, Limited, \$25,000; Trelawney, Limited, \$50,000; Cypress Lumber Company, Limited, \$10,000.

Winnipeg, Man.—American Linseed Company, Limited, \$40,000. H. P. Grundy, A. P. Allensworth, T. E. Meredith; Universal Car Company, Limited, \$20,000. J. Michwick, M. Koffman, J. Wilson; Women's Exchange, Limited, \$5,000. Minnie Allan, Gladys M. Field, Violet C. Fillmore.

Montreal, Que.—Hotel du Docteur Dupont, Limitée, \$50,000. L. J. Labrosse, J. M. A. Robitaille, J. G. Dupont; Dominion Automobile School Incorporated, \$20,000. C. Arnold, J. Kreg, H. J. Bank of Hamilton

Dividend Notice

Notice is hereby given that a Dividend of Three Per Cent. (Twelve per cent. per annum) on the paid up capital of the Bank, for the quarter ending 30th November, has this day been declared, and that the same will be payable at the Bank and its Branches on 1st December next.

The Transfer Books will be closed from the 23rd to the 30th November, both inclusive.

By order of the Board.

J. P. BELL,

General Manager.

Hamilton, 23rd October, 1916.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Municipal affairs in eastern and western Canada are well dealt with in two provincial reports just issued. With regard to Ontario, while the officials of many municipalities regularly make the returns required of them promptly and correctly, many others fail to give, or are unable to give, information desired by the Ontario bureau of industries, owing to the lack of proper records being kept. Even with proper financial returns in the possession of the bureau, the tabulation is no easy matter, as adjustments have to be made in order to bring about uniformity, owing to the varied judgment used in filling a necessarily condensed schedule.

We do not charge dishonesty, states Mr. W. O. Galloway, secretary of the bureau, in his recently issued report, but there are too many unrecorded transactions whereby money is transferred, as it were, from one pocket to another. A simple cross entry showing why it was taken from one pocket, and why it was placed in the other would be a perfect record.

The municipal act does not restrict the treasurer to the use of a cash book as many seem to imagine. He may in addition use any books that will help him to keep proper accounts. Complete accounting of municipal affairs is not to be accomplished with a cash book alone. A cash entry too often represents the difference between the accounts of two services for which statistics are desirable, but are not obtainable from such a record. It frequently happens that liabilities incurred in one year are not paid in the cash book until the following year and it is possible to show a large increase in a particular service in the latter year as compared with the former year, whereas the real liability chargeable to the year might actually be less.

Ideal annual statistics, therefore, should be obtained from another set of books which would enable the auditors to present statements showing the revenue for the particular year, whether received or not and the expenses incurred, whether paid or not. These would set forth the profit or loss on the operations of the year. Such books have been adopted by a number of municipalities and by several commissions in charge of public utilities. Municipal auditors would be then obliged to present both "cash" and "revenue" statements.

Much difficulty has been experienced in obtaining definite information regarding sinking funds, as records are often meagre, although as a rule taxes are regularly levied, but not always. Occasionally the treasurer denies all knowledge of these funds, as it has been made the duty of the clerk to look after debenture records and sinking funds. Municipalities take great liberties with these funds.

The following statement gives population, total assessment, amount of taxes imposed, the amount of debenture and floating debt, of all municipalities of the province of Ontario for the five years 1908-12:—

Year.	Population.	Total assessment.	Taxes imposed for all purposes, including schools.		†Debenture debt for all purposes.		Floating debt.
			Total.	Rate per head.	Total.	Rate per head.	
1912	2,442,866	\$1,525,858,478	\$29,068,304	\$11.90		Not completed.	
1911	2,358,720	1,417,367,117	26,363,325	11.18	\$119,067,550	\$48.74	\$21,210,269
1910	2,296,147	1,331,198,191	23,941,400	10.43	107,470,346	46.80	15,812,084
1909	2,280,438	1,253,080,739	22,386,619	9.78	100,441,779	43.87	13,256,765
1908	2,244,385	1,202,670,915	20,979,084	9.35	94,092,117	41.92	12,727,530

†The amount accumulated in sinking funds on December 31, 1911, was \$19,486,254, so that the net debenture debt was \$99,581,296, as compared with \$89,490,132 in 1910, an increase of \$10,091,164, while the floating liabilities increased \$5,308,185.

In Saskatchewan practically all municipal clerks and secretary-treasurers have their books so well up to date and in such neat form that the auditor has little difficulty in promptly issuing the financial statement required. There are a few unfortunate exceptions, but the number thus delinquent grows smaller each year, comments the very complete report on municipal affairs in the province of Saskatchewan, which has been issued by Mr. J. N. Bayne, deputy minister of municipal affairs. In the report are included tables showing the number of farmers, acres of assessable land, municipal assessment, surtax and debenture debt of rural municipalities; the population, assessment, taxes and debenture debt of villages and towns.

The figures for Saskatchewan's cities are:—

City.	Population.	Assessment.	Taxes levied.	Debenture debt.
Moose Jaw	20,000	\$35,083,579	\$ 871,229	\$6,138,164
North Battleford	5,000	8,275,741	167,034	1,116,370
Prince Albert	10,000	25,968,974	215,086	3,342,481
Regina	50,000	80,007,409	1,555,329	9,456,800
Saskatoon	25,000	51,987,298	986,982	7,481,610
Swift Current	5,000	10,046,559	209,583	182,689
Weyburn	5,000	9,370,964	177,005	779,512

And those for towns 2,000 population and over are as follow:—

Town.	Population.	Assessment.	Taxes levied.	Debenture debt.
Estevan	3,500	\$3,390,143	\$60,005	\$489,341
Humboldt	2,500	1,595,069	15,959	325,834
Maple Creek	2,000	1,482,460	14,824	124,486
Melville	2,700	3,107,828	54,391	375,993
Yorkton	5,000	6,525,220	86,132	702,874

Mr. Bayne states in part as follows: Never before in their existence were Saskatchewan's rural municipalities in better position than now. One result of this is the complete lack of applications to borrow money by debenture during the first four months of this year. The cash surplus, so often in evidence, has made such borrowing unnecessary, whereas the desire to curtail expenditure, excepting where absolutely necessary, is also a contributing factor.

There are in Saskatchewan 297 rural municipalities, 304 villages, 72 towns and 7 cities. Notwithstanding the fact that these came through, within the last five or six years, a period of development and rapid rises in valuation with conditions resembling a boom, only a few of them are found to be in a financial difficulty. Some of our urban centres developed from the bald prairie to thriving commercial centres within a period of less than one year. This always means, on the part of such centres, abounding optimism and an atmosphere of hopefulness on the part of all its citizens that often leads to heavy borrowing and an improper discounting of the future in the expectation that each of such new centres will speedily become a thriving metropolis. Every period of development is marked by a rosy outlook for the future. It is surprising, therefore, that at this date less than five out of a total of 680 municipalities find themselves somewhat awkwardly placed in meeting their debenture instalments. These are restricted to towns, but their condition is not hopeless although somewhat embarrassing. A struggle will mean relief from the difficulty. It is noteworthy, however, that the percentage of those in difficulty is only about two-fifths of 1 per cent., and there is no likelihood at all of anything in the nature of repudiation of their debts on the part of this small percentage, but, as already intimated, a little delay must necessarily occur in adjusting their debts; western municipal institutions quickly recover from a period of depression.

Oakville, Ont.—A by-law to issue a block of bonds has been passed.

Ridgeway, Ont.—The by-law to borrow \$1,318 for light purposes has been passed.

Truro, N.S.—Taxpayers have voted on a proposal to borrow \$2,500 to purchase property.

Calgary, Alta.—The feasibility of selling tax certificates instead of holding a tax sale, has been discussed by the civic finance committee.

Wallace R.M., Man.—Tenders close to-day for an issue of \$45,000 4½ per cent. 40-year bonds. W. Whiteford, secretary-treasurer, Virden.

St. John, N.B.—For an issue of \$75,000 5 per cent. 25-year school bonds, tenders close November 1st. A Gordon Leavitt, secretary, board of school trustees.

Medicine Hat, Alta.—That this city has no bonds for sale at present was the information given in reply to an enquiry of the Canadian Bank of Commerce.

Ottawa, Ont.—The \$500,000 which the city has to the credit of the interest and sinking fund account, may be invested in the new government debenture stock.

Waterloo, Ont.—A by-law authorizing an issue of \$3,500 for patriotic purposes has been passed by the council, and the offer of par by the Waterloo Loan and Savings Company for the issue has been accepted. The bonds bear 5½ per cent. interest.

Saskatoon, Sask.—Special legislation may be sought by the city at the next session of the provincial legislature to extend the flotation period of a number of bonds on by-laws authorized but unsold amounting to \$642,079 and to allow the city to divert to other purposes \$446,681, for the erection of a new hospital, etc.

Brandon, Man.—Members of the city council are unanimous as to the advisability of securing a larger share of the Canadian war loan if possible. City treasurer Sykes has obtained a quotation from a firm who are willing to dispose of a parcel of the bonds at an increase of 1 per cent. over the original cost. It is, however, thought that the increase is somewhat excessive and that they ought to be obtained at an increase of half or at most, three-quarters of 1 per cent. over the original sum.

Sorel, Que.—For the issue of \$100,000 5½ per cent. 20-year bonds, the bids were as follows, the first named receiving the award:—

A. E. Ames and Company, Toronto	96.786
L. G. Gauthier, Montreal	95.00
Municipal Debenture Corporation, Quebec..	94.778
Dominion Securities Corporation, Toronto..	94.129
A. Baril	94.05
National Bond Corporation, Montreal	92.85
Les Obligations Canadienne, Montreal	92.72
Canada Bond Corporation, Toronto	91.22

Saskatchewan.—The following is a list of bond applications granted by the local government board:—

School Districts.—Croft, \$1,800, 10-years, not ex. 8 per cent. annuity. C. F. Hayman, Crystal; Westdale, \$1,600, 10-years, not ex. 8 per cent. annuity. J. O. Larson, Bangsund; Cleaving, \$1,500, 10-years, not ex. 8 per cent. annuity. R. J. Fleming, Phippen; Moose Plains, \$1,200, 10-years, not ex. 8 per cent. instalment. C. F. Craig, Ravine Bank; Anglia, \$2,000, 10-years, not ex. 8 per cent. instalment. E. J. Jones, Anglia; Hat Creek, \$600, 6-years, not ex. 8 per cent. instalment. J. T. Schmitz, Annaheim; Turn Hill, \$600, 10-years, not ex. 8 per cent. instalment. H. F. Harder, Rush Lake; Cut Knife, \$3,000, 10-years, not ex. 8 per cent. instalment. B. T. Anderson, Cut Knife; Macrorie, \$5,500, 15-years, not ex. 8 per cent. annuity. H. Watson, Macrorie.

Rural Telephone Companies.—Dummer, \$2,800, 15-years, not ex. 8 per cent. annuity. F. G. Moses, Dummer; Rush Lake, \$10,500, 15-years, not ex. 8 per cent. annuity. J. J. H. Sawatzki, Rush Lake; Superb, \$12,000, 15-years, not ex. 8 per cent. annuity. H. T. Grain, Superb; Tessier, \$2,000, 15-years, not ex. 8 per cent. annuity. E. J. Young, Tessier.

Village.—Theodore, \$1,800, 10-years, not ex. 8 per cent. instalment. J. F. Baxter, Theodore.

The following bonds have been reported sold during the week:—

School Districts.—Hoosier, \$6,700. Kerr, Fleming and Company, Regina; East Ward, \$1,500. W. L. McKinnon and Company, Regina; Turtleford, \$1,600. W. L. McKinnon and Company, Regina; Major, \$1,500. W. L. McKinnon and Company, Regina; Cabri, \$8,000. W. L. McKinnon and Company, Regina; Cherry Grove, \$1,600. Goldman and Company, Regina; Piapot, \$4,750. W. L. McKinnon and Company, Regina.

Rural Telephone Companies.—Senlac, \$28,500. Geo. Foley and Sons, Saskatoon; Idaleen, \$11,000. Geo. Foley and Sons, Saskatoon.

Canadian orders for 25,000 cases of tomatoes were given in New York. Part of these were filled on the basis of \$1.25 factory for standard No. 3's.

INTERNATIONAL FINANCING AND STATES

American Investor Has Had Only a Local and National Outlook

Taking the form of two-year 5 per cent. notes, amply secured by collateral, and being intended for the payment of supplies purchased in America, the British loan of \$250,000,000 proved a highly popular investment and was widely taken up, so Mr. H. P. Davidson, of Messrs. J. P. Morgan, intimated, when interviewed in London. "It was especially gratifying to note the general interest taken in the issue throughout the country, and not merely in the eastern states. Chicago, for instance, was a handsome subscriber. But I should not like to leave the impression that the flotation of the recent credit loan was all plain sailing. You must remember that before the war the United States was a borrowing and not a lending nation, and that since the war we have not only absorbed an enormous quantity of United States securities formerly held in Europe, but have also furnished credits for foreign governments to the amount of several hundred million sterling.

New to United States.

"You must remember, too, that foreign loans are a new experience to the average United States investor. Home railways, home industrials, farm loans and United States national and municipal bonds are the securities he has hitherto almost exclusively purchased. His investment horizon, naturally enough, is pretty well bounded by his own country, and he has not yet had to look outside it to obtain a high and safe return on his money. Beyond Chicago, and still more beyond the Mississippi, the investor looks for a steady 6 or 7 per cent., and has little difficulty in getting it. That is why terms that may seem liberal and even generous to a European, may not particularly appeal to an American. Moreover, trade is extremely good in the United States, and people in general are more inclined to put their savings back into their businesses than to lock them up in securities. Again, in nearly all the states there are laws that limit the amount which a bank or a trust company may invest to a certain percentage of its capital and surplus, and in a great many cases that margin has already been reached. Then, too, we have no single dominating financial centre that controls the United States as London controls great Britain; no United States bank has branches outside its own city, and the size of the country makes it almost a physical impossibility to do business as cheaply as it can be done in England.

Importance of Foreign Loans.

"You will see, therefore, from all this that foreign government loans raised in the United States have to be unusually attractive to bring in the average United States investor. But the question is not merely one of terms and of the character of the security which, of course, permits of no discussion and of how these issues compare with the more familiar domestic securities. There is also the question of the capacity of the United States to undertake fresh commitments. Until the war the United States had practically no experience in international finance, and not much of the machinery for engaging in it. The people are only just beginning to appreciate the immense importance of foreign loans as an aid to foreign commerce. Their financial interests are still mainly national, and not international in scope. The educative influence of a wider contact with world-affairs will, no doubt, broaden them in time. But the process must necessarily be a slow one. We are adding, of course, all the time to our available resources, but the demand upon them has been so sudden and so tremendous that the problem of making further provision for the needs of foreign countries is becoming serious."

In view of various claims of world's record wheat crops for large areas, the Crowfoot Farming Company, of Crowfoot, Alberta, submit a sworn statement of their results for the year 1915. From 1,356 acres the Crowfoot Farming Company received an average yield of 51 bushels, 56½ pounds per acre of number one spring wheat, by actual selling weight; 400 acres wheat averaged 50½ bushels per acre. These records were established in the Canadian Pacific Railway irrigation block in Southern Alberta.

COLONIAL BANK AND CANADA

Bank's Financial Position in June—Bank's Desire to Enter Canada

The Colonial Bank, which decided about two years ago to enter the Canadian field, has just presented a statement of its affairs to the end of June. It shows a substantial increase in the bank's active trading accounts, bills receivable, bills discounted and advances being over 50 per cent. greater than in any year (corresponding half-year) in the recent record of the bank. There has been a corresponding increase in the deposits and current account balances, from which source, indeed, the funds for the expansion of the trade accommodation accounts have been obtained, although, of course, it must be recognized that there is also in a degree interaction between these accounts the other way round: advances to an extent create the fund which stands to the credit of clients, but for the most part the sequence of movement is the other way round: bills receivable, discounted, loans and advances express the employment of funds that have been placed with the bank, and are available for trade use.

Other funds have been obtained by the realization of investments. The incidental creditor accounts of the bank are not much above normal; bills payable, indeed, are actually less than usual; on the other hand, the note circulation has increased—by £71,000 during the half-year, and by £82,000 from the amount current just before the outbreak of war. The latter increase represents an expansion of 20 per cent. from pre-war amount.

Colonial Bank and Canada.

The Colonial Bank, with headquarters in London, England, decided about two years ago, to enter the Canadian banking field. In reviewing the year's business of the Colonial Bank at the annual meeting of the shareholders, the chairman, Mr. C. R. Gurney Hoare, stated in April, 1915, that the board of directors had made an application to the Canadian government to promote a bank in Canada. Every year the volume of business of the West Indies with Canada more and more tended to increase, and they had for some years intended to establish a branch there. In making application to the government they were met in so favorable a manner that the directors thought it desirable to take action at once, and thought they were unable to act without authority from the British government, they felt their hands would be strengthened in their application for such authority if they showed how readily the proposal to open a bank had been received in Canada. Mr. A. R. Doble, of Montreal, was later appointed as the bank's representative in Canada.

The directors of the bank are rather disappointed to find that probably they will not be allowed to establish branches in Canada under the new charter which they have just obtained from the Imperial government. They did not expect to be allowed to issue notes, but they expected to be allowed to transact under their own name a similar business to that which Canadian banks transact in London and in New York.

Throughout British Empire.

At the annual meeting of the bank held in London recently, Sir W. Maxwell Aitken, M.P., presided. He stated that the directors had seriously considered the future of the bank, and, in accordance with their defined policy, an act of parliament had been secured which authorized the bank to extend its operations throughout the British Empire. The New York office had also been moved to extensive quarters and reorganized and equipped for the transaction of a banking business there. Hitherto their branch in New York had confined itself to transactions relating to the West Indies, but it was now carrying on exchange business. The London office had also launched out and undertaken general banking business. A cash and bill department had been opened at 51 Threadneedle Street, and that office was in a position to carry on banking business of every description. The bank had decided to extend its business to British West Africa, and branches would be opened in the immediate future at Lagos and Kano, in Nigeria, and at Accra, in the Gold Coast Colony.

The prospects of the bank were as good as the opportunities, and it was intended to develop its business in every available direction. He hoped it would become the Colonial Bank in fact as well as in name. In reply to a question, he said that since their last meeting the Canadian parliament had given them the necessary authority to establish a branch

there. There was, however, great difficulty in securing the necessary staff, all their available men being required for their West African business.

The profit of the bank for the half-year is below the high level of that of the first half of 1915, but it is still above that of the average of the corresponding half-years immediately prior to the war.

The dividend was raised to a 7 per cent. basis (less income tax) last December, and it is now continued at that level; it compares with 6 per cent. (free of income tax) paid during the previous nine years. This latter dividend took £18,000 each half-year; a 7 per cent. per annum dividend less tax this half-year requires £16,800; December half-year £17,850. A distribution of £16,800 leaves a surplus of £8,591 from the half-year's earnings.

CANADIAN NICKEL DID NOT GO

Deutschland's Cargo Mentioned by Lord Robert Cecil—Blacklist Complaints Few

In a recent interview, Lord Robert Cecil, minister of war trade, referring to reports of meetings between Sir Richard Crawford, commercial attache of the British Embassy at Washington, with United States bankers and business men, said no departure in principle had been made from the British blockade measures, but it could be safely said that the general policy leaned in the direction of a modification rather than an extension of the blacklist.

Few Criticisms Sent.

The reply to the United States blacklist note was now on the way to Washington, and this answered the United States criticism of the principles behind the measure. As regards the administration of the blacklist, Lord Robert said Washington had forwarded very few individual complaints about it.

"Three weeks ago," he continued, "Americans might have argued that the presence of British cruisers in United States waters just outside the three-mile limit, was, in view of the present stage of the war, merely a petty annoyance. What has happened is a sufficient commentary on that argument. Again, Americans have suggested that our trading with the enemy regulation and our refusal to allow British goods to go to certain firms in the United States, is also petty and unnecessary."

Mined in Allied Territory.

"That sounded reasonable a week before the Deutschland appeared in a United States harbor, but when I tell you that the Deutschland took on board in the United States certain vitally necessary metals, of which there is a serious shortage in Germany for munition purposes, and that there is reason to believe these particular metals were a part of the small stock mined in allied territory, you will see again how important it is that we should take precautions to prevent allied property getting into the hands of those who we know will use it to help our enemies. We can only do this by preventing British subjects at home trading with firms that will help the enemy with supplies obtained from us."

The above reference Lord Robert Cecil later stated in no way referred to nickel from Canada, and he had no intention whatever to criticize the arrangements for controlling Canadian nickel or suggesting that any Canadian nickel reaches the enemy.

"The British government is perfectly satisfied with the precautions taken and arrangements made by the Canadian government with regard to nickel."

STANDARD BANK'S NEW STOCK ISSUE

The shareholders of the Standard Bank of Canada have been notified that an allotment of stock, totalling five thousand shares, will be made to shareholders of record of November 18th at a premium of 100 per cent.

HIGHER RATES FOR HAIL INSURANCE

Saskatchewan's Municipal Commission Experiences Heavy Losses—Line Companies Lose Also

According to the statement of Arthur E. Fisher, superintendent of insurance for the province of Saskatchewan, made to *The Monetary Times*, the year 1916 has been the most disastrous hail year ever experienced in that province.

Twenty-two companies were underwriting this class of insurance during the past season. Only a few have reported their figures to the superintendent, but the general results which can be approximated from these returns show exclusively that all the companies lost heavily. The ratios range from 125 per cent. to 200 per cent., one company having suffered to the extent of 250 per cent.

The municipal hail commission has reported a most unfavorable experience. The losses will total in the neighborhood of \$3,500,000, while its assets covers 1 per cent. surplus of \$542,000 from prior years and taxes due in 1916 totalling approximately \$1,000,000. A pro rata distribution of 5 per cent. is expected. Under the extended powers granted the commission by order-in-council whereby an additional \$5 per acre could be carried within the municipalities adopting the by-law the loss has been heavy and a 51 per cent. distribution will probably be made.

From Municipal Commission.

As a result of the heavy losses caused by hail through Saskatchewan this year, the Saskatchewan municipal hail insurance commission alone losing over \$3,000,000, Mr. J. E. Paynter, chairman of the commission, has advocated an all-round increase in rates, stating that such action is imperative if the past reputation of the commission is to be maintained. A four-cent flat rate as at present should be maintained on all lands under the insurance act, but this rate should carry \$5 per acre on land up to 80 acres only on a quarter section, and that a graduating scale of one cent per acre should be added on the whole quarter section for each additional 20 acres, or portion thereof, under cultivation. This would mean a flat rate of eight cents per acre where a full quarter section was under cultivation.

Provincial Loss of \$5,000,000.

The statement of Mr. A. E. Fisher, Saskatchewan's superintendent of insurance, is to the effect that the losses from hail throughout Saskatchewan would amount to \$5,000,000. Mr. Paynter stated that, if anything, the losses would exceed that amount, as the line companies had been hit fully as hard as the commission.

Cheques to the amount of \$100,000 have been sent out by the Saskatchewan commission in payment of claims for additional insurance. This amount will be increased by possibly an additional \$25,000 later on.

Claims for municipal hail insurance are all in and are being dealt with. The available assets of the commission, counting the current revenue and surplus from last year, amount to \$1,500,000, while the losses throughout the system are more than double that amount. So that 50 per cent. will be the highest amount the commission will be able to pay on claims.

Must Build Surplus.

While the hail losses this year had more than taxed the capital, this did not, in the opinion of Mr. Paynter, show any fault in the system. He was inclined to the opinion that it simply went to show the necessity to establish a good security for hail insurance and the necessity of building up a large surplus.

Dealing with the rate, the chairman of the Saskatchewan commission suggests that where there is 100 acres under cultivation on a quarter section the rate should be five cents, where there was up to 120 acres the rate should be six cents, where there were 140 acres the rate should be seven cents, and where an entire quarter section was under cultivation the rate should be eight cents per acre.

The British Columbia Manufacturers' Association propose to form a company to secure Russian trade. The committee of investigation are as follows: Messrs. George Bushby, J. E. Hall, S. A. Prenter, J. R. Duncan, Joseph Cairnes, Tanner and Gale. President Cunningham, of the association, is to call a meeting to arrange preliminaries.

MUST TEACH INSURANCE PRINCIPLES

Outline of Proposed Work of the Life Underwriters' Association of Canada This Year

Even if the programme outlined by Mr. J. Burt Morgan, president of the Life Underwriters' Association of Canada, is only partially carried out, the association will achieve one of its most successful years since its inception.

Mr. Morgan, after a successful tour of Canada, including Toronto, Hamilton and Peterboro', addressed the Toronto association last week, the home of so many of Canada's greatest insurance companies. In outlining his presidential programme Mr. Morgan said:—

Education, Legislation, Membership.

(1) That a largely increased membership was desirable in order to give to the work of the underwriters a higher status and enable the association to have a strong representation in their dealings with the companies and with the provincial and federal legislators and to cope with the many problems of the life underwriting profession.

(2) That uniformity of legislation regarding the licensing of agents, beneficiaries and other points was very necessary.

(3) That an educational campaign throughout the Dominion should be planned in view of the ignorance of the average man of the fundamental principles of life insurance, and of the lack of recognition by educators of the important economic position of insurance.

For the Field Man.

Mr. Morgan during his tour interviewed university presidents and educators, and had received various suggestions from these gentlemen. Among them was the idea of lecture courses in Canada's bigger centres, etc. As the outcome of his work, provisional arrangements for the day schools had been commenced for the inclusion of a chapter relating to insurance in a new text book being compiled for the four western provinces, and also in the new Ontario school book. Among the hints to the man in the field dropped by the president were: "Make January a banner month;" "Do not ask an agent what company he represents, but, Are you a member of the Life Underwriters' Association of Canada?" "Victoria, 1910 convention;" and "Win the Totem pole."

AUTOMOBILES USED IN SASKATCHEWAN

The name and number of the different makes of motor cars operated in Saskatchewan up to April 30th according to the provincial secretary's report:—

To Investors

THOSE WHO, FROM TIME TO TIME, HAVE FUNDS REQUIRING INVESTMENT, MAY PURCHASE AT PAR

DOMINION OF CANADA DEBENTURE STOCK

IN SUMS OF \$500 OR ANY MULTIPLE THEREOF.

Principal repayable 1st October, 1919.

Interest payable half-yearly, 1st April and 1st October by cheque (free of exchange at any chartered Bank in Canada) at the rate of five per cent per annum from the date of purchase.

Holders of this stock will have the privilege of surrendering at par and accrued interest, as the equivalent of cash, in payment of any allotment made under any future war loan issue in Canada other than an issue of Treasury Bills or other like short date security.

Proceeds of this stock are for war purposes only.

A commission of one-quarter of one per cent will be allowed to recognized bond and stock brokers on allotments made in respect of applications for this stock which bear their stamp.

For application forms apply to the Deputy Minister of Finance, Ottawa.

DEPARTMENT OF FINANCE, OTTAWA,
OCTOBER 7th, 1916.

FOR INVESTMENT OF SAVINGS

Wide Popularity of Mortgage Corporation Debentures—
Suitability for Small Investor

The investment of savings is as important as saving itself. The safe investment of money at a reasonable rate of interest is not easy, even for those fairly conversant with the way of the world. While for those whose occupations do not entail constant contact with financial business, it is often a lasting anxiety and not seldom a disastrous experience. In this class of investors are members of the medical profession, the clergy, farmers and widows.

The savings departments of the chartered banks of Canada fill a useful purpose, but the rate of interest paid can hardly be considered satisfactory as the return on a permanent investment.

Without doubt it is the duty of all patriotic citizens to subscribe as much as possible to the Canadian war loans and the interest return thereon is good. It is not, however, always practicable for the investor to put all his savings into this security, owing to the somewhat long period before the loans are repayable and the liability to fluctuation in the price of all government securities, should it be necessary to sell them in the public market.

The question then especially for the small investor is as to the safest and best paying investment for the balance of his savings. The ideal security is one that while absolutely safe, assists the government in this great world struggle for freedom, pays a good rate of interest, does not fluctuate in value (will return the exact sum invested), entails no expenses in buying or selling, requires no watching—as do mortgages, stock exchange and most other securities, where interest payments are certain to be made on the due date and the security accepted by banks and others as unquestionable.

The security that conforms most nearly to these requirements is probably the high class mortgage corporation debenture.

In Business for Fifty Years.

Mortgage corporations have been doing business in Canada for about fifty years, but it is in the last 25 years that they have attained the popular position recognized to-day. These corporations have been in existence in Europe for generations, and it was the success attained by them there that led to the adoption of the system here. Few, if any, business enterprises have done so much for the development of Canada, especially of agriculture, as have the mortgage corporations of to-day.

Some idea of this can be gained by noting the growth in assets, mortgages of real estate (that is mostly money loaned to farmers on security of their farms) and the value of the real estate upon which these loans are secured since 1875 to the latest available date.

Year.	Total assets.	Mortgages.	Value of land mortgaged.
1875	\$20,051,280	\$ 16,254,353	\$42,963,676
1880	69,088,635	73,820,320	116,368,280
1885	92,178,175	98,648,757	166,651,537
1890	122,886,515	127,894,401	216,769,604
1895	142,781,368	146,046,704	238,090,671
1900	152,640,265	130,836,606	190,092,476
1905	208,081,226	171,502,070	250,379,782
1910	347,547,514	234,415,163	345,892,093
1913	478,658,227	282,821,491	458,270,600

These figures tell their own tale and explain one source from which invaluable financial help was received in the development of the farming interests in Canada, which next to actual contribution to our domestic war loans is the greatest assistance that can be given to our cause to-day.

From English and Scotch Investors.

This money was first obtained from investors chiefly in England and Scotland, who placed their money in the hands of the mortgage corporations receiving in exchange a deed called by custom a debenture. This is so called because in olden days it used to start with the Latin words "Debentur mihi" which means "are given to me." That is the deed, or debenture, was given to the lender and in it was stated the security the borrower gave for the loan, the rate of interest he was to pay for it and the date on which the money was to be repaid.

These debentures subsequently became popular with Canadian investors, and the rapid growth of this appreciation is seen in the following table:—

Date.	Debentures payable in Canada.	Debentures payable in Great Britain and elsewhere.
1880	\$ 244,660	\$22,968,108
1885	4,341,703	30,456,335
1890	8,300,694	45,123,546
1895	11,272,570	45,854,391
1900	15,044,231	35,650,417
1905	21,394,845	43,555,832
1910	23,643,107	69,276,605
1913	64,490,240	95,534,720

This shows the amount of debentures payable in Canada and also those payable in Great Britain and elsewhere, issued by mortgage corporations doing business in the Dominion.

No Money Lost.

That both the Dominion and provincial governments are alive to the importance of these corporations is evidenced by the fact that certified yearly reports on government forms must be submitted and are published by the government under the acts by which the corporations are operated.

It is remarkable that in the history of Canadian mortgage corporations not one dollar has ever been lost in these debentures.

The directors of these institutions are men of standing, selected for their financial experience, and who collectively, have far greater knowledge than is at the service of any individual investor.

Thus for those who have neither time nor opportunity for seeking and watching their investments, the debentures of these institutions are suitable. While the rate of interest paid on these debentures, 5 per cent. must, with the many advantages included, may be regarded as satisfactory.

EXPORT TRADE HAS DOUBLED

The monthly return issued under the direction of the minister of customs shows an increase from \$92,487,862 to \$161,797,951 in the total trade for September, bringing the grand total for six months up to \$1,148,899,412, as compared with \$559,533,363 in the corresponding period of the previous fiscal year.

The customs revenue in this period has risen from \$44,421,033 to \$70,102,854.

Exports of domestic products, exclusive of coin and bullion, have more than doubled in six months, the figures for this year being \$536,721,514 and for last year \$246,392,148. September exports amounted to \$90,285,181, a gain of \$44,155,446.

Excluding coin and bullion, the September imports amounted to \$68,796,262, compared with \$38,030,320 in September of last year. In the six-month period the imports have reached a total of \$390,995,243, an increase of \$177,402,724.

The export expansion is found chiefly under the heads of agriculture and manufactures. The increase under the former was from \$11,139,935 in September, 1915, to \$25,164,034. Exports of manufactures in September increased from \$9,244,974 to \$37,801,177. In the six-month period these exports were: agriculture, \$206,141,326, a gain of \$146,794,343; and manufactures, \$190,823,240, a gain of \$119,346,421. Exports of forest and fishery products declined slightly during September.

That United States bankers are sending money over to London for investment on a much larger scale than has been generally known, states the Wall Street Journal. One large New York bank, for instance, it adds, has just sent over \$2,500,000 to be invested in various short-term issues of the British government, and also in time loans and acceptances. Many other large banks are making a similar disposition of their spare funds. Nor is this movement confined to New York banking institutions. Out-of-town banks have been doing the same thing in a smaller way. It is estimated that fully \$100,000,000 of bankers' funds are invested at the present moment in short-term maturities in London, in the government issues and in the money market.

It is generally recognized that Canadian Government and Municipal Bonds constitute the safest possible form of investment. Our

CONTROL OF FIRE INSURANCE RATES

Underwriting is Important Business and Legislative Enactments Must Go No Further Than Necessary

Reporting upon steps taken outside the province of Ontario to regulate fire insurance rates, Mr. E. P. Heaton, in his evidence submitted to the Ontario commission of inquiry, states:—

"As a general rule, conditions governing the conduct of the fire insurance business, and the establishment and maintenance of rates, are on parallel lines in both countries, but the attitude of the people to insurance rating associations has been much more demonstratively hostile there (as it has in matters of trusts and combines) than it has here. As a consequence, legislation of one kind or another has been general throughout the States, and, while much of it has been wholesome and sane, some of it has been oppressive, ill-advised and pernicious. While I shall briefly refer to both classes I shall more particularly confine myself to an outline of the legislation which seems to have commended itself to the good sense of the people, including the insurance companies, against whom the legislation was primarily directed.

Co-Operation of Insurance Companies.

"Before I left New York I took the opportunity of calling upon a number of representative managers and underwriters, and the general experience and testimony followed the opinion expressed by Mr. David Rumsey, vice-president and counsel of the Continental Insurance Company, who said, in effect:—

"We do not want to encourage state regulation of insurance rates, there is no necessity for it, but as the general trend of legislation throughout this country is to do something in that direction, we are not averse to the adoption of the New York law as it now stands. It has worked advantageously to the insuring public and has caused us the minimum amount of trouble."

"I could quote several similar opinions, but this one may be regarded as typical of all."

Business of Importance.

Mr. Heaton concludes his supplementary report with these paragraphs:—

"The supplementary information now given will, I hope, be of service in the further consideration of the measure that should be adopted to deal with the subject of the control of insurance rates within this province, and I cannot do better than inscribe in this record a few general remarks placed before the Honorable the Attorney-General in a memorandum recently prepared, as follows:—

1. "The business of fire insurance is of such commercial importance that it ranks with banking, railway, express and telegraph service, and public interests demand that the institution should be preserved; that its usefulness should be increased, and that its capacity for efficient public service should be unimpaired.

2. "It is in the public interest that stability in rates should be established to the end that unjust and discriminatory conditions should not be allowed to exist, and equally that adequacy of rate should be maintained for the purpose of securing the solvency of the insurance companies.

3. "The determination of just and adequate rates must be based upon two fundamental conditions, namely, first, an accurate statistical record of fire losses in classes and territories; and second, upon inspection and written surveys of properties to be insured.

4. "It is practically impossible, because of the enormous cost, for companies, large or small, to prepare their own rates and rate books, involving, as has been said, statistical information, surveying, inspecting and reporting. Co-operation between them is, therefore, in some degree essential.

5. "Legislation should, therefore, assist in the proper regulation of the agencies used for rate-making purposes, and, like all supervisory and restrictive laws, should go no further than is absolutely necessary for the protection of the people.

6. "Oppressive legislation, that is, legislation forbidding the association of companies for rate-making purposes, has

always failed, and has resulted in demoralized commercial conditions.

7. "In the State of Missouri, two years ago, such a law was passed by the legislature, whereupon all fire insurance companies, except those of domestic origin, retired from business and completely demoralized commercial credit. Conditions became so bad that the state executive called into conference bankers, manufacturers, merchants and insurance representatives, with the result that the oppressive legislation was withdrawn and a sane law controlling and regulating the rate-making body was substituted. The insurance companies thereupon returned to the state for active business.

"A condition exactly similar is now operating in the State of South Carolina. Sixty-seven insurance companies have withdrawn, and it is manifest that with demoralized commercial credit remedial legislation must be enacted.

"The whole matter of an effective, yet wise control of various insurance rate-making bodies is of tremendous importance, and requires the most thorough and careful consideration."

AFTER WAR IN MARITIME PROVINCES

Editor, *The Monetary Times*:

Sir,—Referring to the above subject in your issue of October 13th, you say that "from Canadian business men the response to the government's invitation to take stock of the national situation has been poor."

Because the hard-headed business men of Canada, who have their hands full in keeping their own enterprises afloat and in assisting in the multitudinous patriotic and military schemes that are almost daily projecting themselves for consideration, have not responded to Sir George Foster's "call to action" in greater numbers or with greater warmth, it does not follow that they are not giving serious thought to the national situation, or that there will be no concrete suggestions to submit to the national business conference when it meets.

Business men and statesmen realize that the close of the war will thrust great problems upon them, but with the day of peace uncertain and with the possibility that the complexion of these problems may undergo very decided changes in the meantime, they hesitate to recommend the adoption of any post-war scheme. But they are doing serious thinking, and when the time is ripe for action they will be heard from.

As an example, I might point out that an important branch of the manufacturers of the maritime provinces was summoned to meet at New Glasgow, Nova Scotia, last week to give consideration to the situation which may confront it when the war has closed.

The topic is also being considered by almost every board of trade in the maritime provinces.

A circular has been addressed to the members of the council of the St. John board of trade, which indicates a desire to make the proposed national business conference as successful as possible.

In order to give direction to thought and to stimulate a greater interest in the conference, Sir George Foster has been invited to address a meeting of business men at St. John, and he has promised to do so when his engagements with the Dominions Royal Commission will permit.

The St. John board has also been addressed by Mr. W. F. Hatheway, who was one of the trade commissioners to Great Britain and the continent, and a special meeting of the board council will give consideration to the subjects he has reported upon. Representatives of banking institutions and of some special trade branches met last week to discuss phases of the situation.

Representative business men of this province have been in conference with the local government on post-war settlement problems, and as a result a scheme of land settlement is being evolved under the auspices of the farm settlement board, assisted by the provincial advisory committee, so that there is no reason for despair over the outlook, so far as the business men are concerned. Initiation, however, must come from the government.

Yours, etc.,

R. E. Armstrong.

St. John, N.B., Oct. 23rd, 1916.

You are Alive To-day

But should you be suddenly taken away to-night would your wife, family, and dependents receive the protection that you have always intended they should have?

This protection can only be assured by a properly drawn up will and the appointment of executors who will administer its provisions in an efficient manner.

Let us prepare your will and attend to its administration.

The officers of this company will guard the interests of your estate and your heirs, and will be glad to correspond with you regarding wills, or any other trust business.

CANADA FURNISHES ARMY SUPPLIES

Equipping the Dominion's Troops—Britain and Allied Countries Buy Here

With regard to the purchase of army supplies for Canada's soldiers, Hon. A. E. Kemp, chairman of the war purchasing committee, has given the following information:—

The question having been raised as to whether or not Canadian troops in England were receiving clothing, boots and all kinds of equipment, from Canadian sources, it is thought that the public might be interested in knowing the extent to which the Canadian government has impressed upon the British authorities the desirability of purchasing as much supplies as possible in the Dominion.

All clothing, underclothing, boots, necessities, and all equipment, including transport vehicles and harness, issued to Canadian troops in England are of Canadian manufacture, and these supplies are to be found in the Canadian Ordnance Depot, located at Ashford, Kent, to which place all stores are shipped from Canada, and from there are issued to the different units in England.

Guns and their vehicles, also technical instruments, have been provided by the war office, not being obtainable in this country.

For Troops in France.

Supplies for the troops in France are issued by the British government, through that branch of the war office which provides for the whole British forces in France. This arrangement was obviously highly necessary in the interests of the efficiency of the army.

Since Canada has undertaken the obligation of paying the whole cost of the expeditionary force, and since the Canadian people have cheerfully entered into the sacrifice entailed by their participation in the war, the government have from the beginning taken the position, not merely that the Canadian producer should have the benefit of orders for such supplies and equipment as would provide for the Canadian troops, but, further, that in respect of all purchases for the purposes of the war for which the British government find it necessary to go outside the British Isles, the British Dominions should always, in preference to neutrals, be given the first opportunity of tendering.

During the prime minister's visit to England in the summer of 1915, in interviews with the heads of the purchasing branches of the various British departments concerned, he took occasion to impress upon them in unmistakable terms that the Canadian government would insist on this point. They stated that they had recognized the force of this position already put before them many times by the Canadian government, and that every effort had been made to adopt it. As a result it appears that purchases of supplies, equipment, clothing, etc., produced in Canada have reached an amount which is not merely proportionate to the requirements of the Canadian forces abroad, but is very greatly in excess of such requirements, varying in fact in respect of various articles from a ratio of two to one to a ratio of thirty to one.

Preference to British Dominions.

The position that the British government in making all war purchases for whatever purpose, whether purely Canadian or not, should, wherever it was necessary to go outside the British Isles, give a preference to the British Dominions over neutrals, has been insisted upon by the government on numberless occasions since the outbreak of war. The British government have agreed to this principle, and have repeatedly given assurance that it has in fact been carried out by them.

To cite evidence of the diligence of the Canadian government in bringing to the attention of the British government the desirability as far as possible to purchase in Canada, a cursory examination of the files during the first 11 months of the war shows that over 200 cablegrams had been exchanged between the prime minister and Sir George Perley, acting high commissioner for Canada in London, on this subject; while since that date there has been a constant exchange of cablegrams on the same subject. These cablegrams, it may be said, have reference not only to the requirements of Great Britain, but also to those of the allied governments, and general information as to supplies of various kinds obtainable in Canada. A large number of cable-

grams have been exchanged in connection with the efforts to secure adequate transportation facilities between Canada and English and foreign ports where Canadian supplies might be in demand. Still further representations have been made in the direction of devising means of financing this commerce entailed by the war. No reference is made to large shipments of produce, munitions or ingredients therefor, for the allied governments.

PACIFIC SHIPYARDS ARE BUSY

Vancouver, October 21st.

Shipbuilding in the Pacific North-west has received impetus during the past few months. Ships are under construction in almost every yard between Portland and Vancouver. Representatives of Norwegian interests now on the coast propose letting contracts for the construction of boats that will aggregate about \$10,000,000. There is a prospect of this business coming to British Columbia, but the builders want to be allowed to have the boats transferred to Norwegian interests after they are completed. Communication has been made with Ottawa in regard to this point, but it has not been settled. At the outbreak of the war the admiralty requested the Dominion government not to permit the transfer of ships to any other than the British flag, and an order-in-council was passed accordingly.

CANADIANS FOR BRITAIN'S PROTECTING NAVY

It was in silence that the British fleet disappeared from view on the 26th June, 1914, and made it unsafe for the Kaiser to despatch his squadrons, then quartered in Norwegian fiords, by way of the Atlantic, to destroy the French fleet in the Mediterranean. This silence, broken only once off Jutland, has veiled the battle squadrons of Great Britain from the gaze of the world since the war began. And yet, protected by those great unseen ships, the commerce of the world has gone on; troops from every dominion and British possession have sailed over thousands of miles; millions of British soldiers have gone to France, Greece, Egypt, East and West Africa, Mesopotamia and China, and the Entente allies have been supplied with coal, steel, oil, shells and guns, and all the other necessities of war, as well as everything required for their sustenance. In short, the silent navy has made possible the resounding blows delivered by the army wherever the enemy is at bay in his long and attenuated battle lines. Canada is asked now to supply men for the new superdreadnoughts. There ought to be an instant response.

COMPARATIVE COST OF LEATHER AND FINDINGS

The unprecedented advance in the price of materials entering into the manufacture of leather is dealt with in the monthly letter of the First National Bank of Boston, in which is shown the high prices of leather and findings in September, 1916, as compared with those for February, 1916, and July, 1915. We print the table below:—

Comparative Cost of Leather and Findings Entering into Construction of Shoes.

	July, '15.	Feb., '16.	Sept., '16.	% Inc. (14 mos.)
Tan calf	\$0.29	\$0.36	\$0.50-.54	80
Black dull calf	.29	.35	.46-.50	65
Colored kid	.40	.55	.65-.70	70
Men's glazed kid	.17-.35	.18-.40	.28-.50	65-43
Women's glazed kid....	.20	.28	.32	60
Full chrome side leather	.24	.29	.34	42
Patent side leather	.29	.32	.37	27

LEGAL NOTICES

THE WHITE COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 5th day of October, 1916, incorporating Willard Maynard Cox and Howard Armour Harrison, barristers-at-law, William John Beattie, student-at-law, and Richard George Roberts and John Frederick Van Lane, accountants, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, build, buy, sell, repair, convert, alter, let on hire, deal in, import and export, automobiles, motor cars, motor boats, motor trucks, stationary, portable and traction engines, tractors, tools, machinery, implements, gas engines, steam engines and all other types of engines, and the various parts and equipment thereof, and to carry on generally an automobile business in all its branches; (b) To carry on any other business, (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To acquire or undertake the whole or any part of the business, property, good-will and liabilities of any person or company carrying on any portion of the business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company, and to pay for the same in cash, bonds or paid-up shares or partly in cash and partly in bonds or paid-up shares of the company, as may be agreed upon; (d) To apply for, purchase or otherwise acquire any patents, copyrights, licenses, concessions and the like, conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights, or information so acquired; (e) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person, firm, association or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person, firm, association or company, and to take or otherwise acquire shares, bonds, and securities of any such company, and to sell, hold, issue or re-issue, with or without guarantee, or otherwise deal with or dispose of the same; (f) To take, acquire, lease, hold, sell and dispose of real estate and personal property of every nature and kind as security for or in satisfaction wholly or in part of debts, liabilities or obligations incurred or to be incurred in respect of or in connection with the business aforesaid, or any of the purposes or objects of the company; and to purchase, lease, erect, or otherwise acquire, exchange, sell, let, assign, transfer, or otherwise dispose of, own, maintain, develop and improve any and all property, real and personal, necessary to effect the carrying out of the purposes of the company; (g) To consolidate or amalgamate with any other company having objects similar in whole or in part to those of the company; (h) To accept in payment of any debt or debts due or owing to the company, the stock, shares, bonds, debentures of any other company or companies, and, notwithstanding the provisions of section 44 of The Companies Act, to use any of the shares, bonds, debentures or other securities, or the funds of the company, to purchase or otherwise acquire and to take, hold, assign, transfer or sell the shares, bonds, debentures or other securities of or in any other company or corporation, and to guarantee the payment of the principal of and interest on the bonds, debentures or dividends upon the shares of any other company or corporation, and while holding such shares, bonds, debentures or other securities of any other company or corporation to exercise all the rights and powers of ownership thereof, including the right to vote thereon through such agent or agents as the directors may appoint, and to distribute such shares, bonds, debentures or other securities or any assets of such other company in specie upon a division of profits or distribution of capital among the shareholders; (i) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (j) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors in business) or the dependents or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (k) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (l) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business and in particular any machinery, plant, stock in trade; (m) To construct, improve, maintain, work, manage, carry out or control any roads, ways, branches or sidings, bridges, reservoirs, water-courses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (n) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (o) To issue, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (p) To procure the company to be registered and recognized in any foreign country and to designate persons resident therein according

to the laws of such foreign country to represent this company and to accept service for and on behalf of the company of any process or suit; (q) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars or catalogues, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (r) To sell, lease, transfer or dispose of the undertaking of the company or any part thereof, to such person, firm or company for such consideration as the company may think fit, and in particular either for cash or for shares, bonds, debentures or securities of any other company (whether promoted by this company or not) having objects altogether or in part similar to those of the company, or partly for cash or partly for such shares, bonds, debentures or securities; (s) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares or whose bonds or debentures or obligations are held by the company, or with which it may have business relations, and to do any act or thing for the preservation, protection, improvement or enhancement of the value of any such shares, bonds, debentures or other obligations, and to act as employee, agent or manager of any such corporation and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (t) To lease, purchase, construct, own, maintain and alter any buildings or work necessary or convenient for the purposes of the company and to take options on lands and buildings belonging to others and to exercise such options or not as may be deemed expedient; (u) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the real and personal property, rights and franchises of the company and to give options thereon or any part thereof; (v) To invest and deal with the moneys of the company not immediately required in such manner as the directors may from time to time determine; (w) To employ brokers, commission agents and underwriters upon any issue of shares, bonds, debentures or other securities of the company and to provide for the remuneration of such person or any other persons rendering services of any kind to the company; (x) To remunerate any person, firm, association or company for services rendered or to be rendered in placing or assisting to place or guaranteeing the placing of any of the shares in the company's capital or any debentures or other securities of the company, or in or about the formation, promotion, organization or incorporation of the company or the conduct of its business; (y) To pay all or any costs, charges or expenses preliminary or incidental to or incurred in connection with the promotion, organization, formation, establishment, registration and incorporation of the company; and to purchase or otherwise acquire on such terms and in such manner as the directors of the company from time to time decide any shares of the capital stock of this company, provided that the consideration therefor be paid out of the company's profits or surplus, if any, and not out of the capital of the company; (z) The business or purpose of the company is from time to time to do any one or more of the acts and things herein set forth either alone or in conjunction with others or as principals, factors, contractors or agents, and to do all and everything necessary, suitable and convenient or proper for the accomplishment of any of the purposes or the attainment of any one or more of the objects herein enumerated or incidental to the powers herein named, or which shall at any time appear to be conducive to or expedient for the protection or benefit of the company; and it is hereby declared that in the interpretation of this clause the meaning of any of the objects of the company shall not be restricted by reference to any other object or by the juxtaposition of two or more objects, and that in the event of any ambiguity this clause shall be construed in such manner as to widen and not to restrict the powers of the company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The White Company, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 11th day of October, 1916.

THOMAS MULVEY,
Under-Secretary of State.

O. F. COLE COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 3rd day of September, 1916, incorporating James Steller Lovell and Charles Delamere Magee, accountants; William Bain, bookkeeper, and Robert Gowans and John Joseph Dashwood, solicitors' clerks, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, import, export, buy, sell and deal in all kinds of drawing and engineering instruments, supplies and scientific instruments; (b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (d) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (e) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any

LEGAL NOTICES

business capable of being conducted so as directly or indirectly to benefit the company; (f) To lend money to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (g) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (h) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company; (i) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (j) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated and necessary to enable the company to profitably carry on its undertaking. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere, by the name of "C. F. Cole Company, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 26th day of September, 1916.

Solicitors for the company.

THE MANOR ESTATES, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 17th day of October, 1906, incorporating Robert Abercrombie Pringle, Thomas Anderson Burgess and Louis Cote, barristers-at-law; Robert Hatfield Pringle, customs broker, and Mary Ida Keays, stenographer, all of the city of Ottawa, in the Province of Ontario, for the following purposes, viz.:—(a) To acquire by purchase, lease, exchange, concession or otherwise, city lots, farm lands, mining or fruit lands, town sites, grazing and timber lands, and any description of real estate and real property or any interests or rights therein, legal or equitable or otherwise, howsoever; to take, build upon, hold, own, maintain, work, develop, sell, lease, exchange, improve and otherwise deal in and dispose of such lots, lands, sites, real estate and real property or any interest therein; to deal with any portion of the lands and property so acquired, subdividing the same into building lots, and generally laying the same out into lots, streets and building sites for residential purposes or otherwise; (b) To construct streets upon the land of the company, necessary sewerage and drainage system, to build upon same for residential purposes or otherwise, and to supply buildings so erected with electric light, heat, gas, water or other requisites therefor; (c) To act as agents for the sale and purchase of real estate and all interests therein and to procure real estate investments for any person; to act as selling agents for the owners of any real estate, subdivision, building sites, town sites or lands of any kind or any interest therein, and to take over and acquire from any person or corporation any agency, inclusive or otherwise, for the sale of any such lands, sites or interest therein, and to accept an assignment of and perform any contracts made by any person with any other person or corporation for the sale of any such lands, sites or interest therein as agents or otherwise and generally to act as real estate, house and rental agents, and as incidental thereto to carry on the business of fire insurance agents; (d) To apply for, purchase or otherwise acquire, any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property rights or information so acquired; (e) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (f) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise, and comply with any such arrangements, rights, privileges and concessions; (g) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Manor Estates, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 19th day of October, 1916.

THOMAS MULVEY,
Under-Secretary of State.

17-2

The Cunard Steamship Company have chosen Halifax as their Canadian winter port for the new steamship service to be established between Bristol and Canada. Their steamers will call at both Halifax and New York on east and westbound voyages.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over \$5,000.00, and he has built up a future income of over \$3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

ACCOUNTANT, 31 years, twelve years' banking experience, wishes to make change. Would like position with financial or commercial firm having good prospects. Apply Box 9, *Monetary Times*, Toronto.

SUCCESSFUL BANKER, with wide experience as Manager and also four years as Manufacturer and in Wholesale, seeks investment in a sound financial or other Company where his services would be required. Is capable of taking over correspondence, advising on investments or acting as secretary-treasurer. Small capital at present, but can increase to a good round amount later. Box 11, *The Monetary Times*, Toronto.

SCOTCHMAN of good education and ability, with 6 years' residence in Canada and many years Secretarial and Commercial experience in London and Africa in positions of trust, seeks similar position in one of the Cities, East or West. Limited amount of Capital introduced if necessary. Correspondence invited. Retlaw, Box 254, Calgary.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

WANTED, by an experienced Fire Insurance Man, position as Special Agent for some good office. Accustomed to handling agents, and inspecting all kinds of risks. Best references as to ability and character. Box 13, *The Monetary Times*, Toronto.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended October 20th:—

Right of Way Mine, 84,052; La Rose Mines, Limited, 87,143; Dominion Reduction Company, 88,000; Beaver Consolidated Mines, 81,536; Nipissing Mining Company, 370,457; O'Brien Mines, 129,828; total, 841,016 pounds, or 420.5 tons.

The total shipments since January 1st, 1916, now amount to 25,564,567 pounds, or 12,782.2 tons.

Lieut.-Colonel C. H. L. Jones, of the Spanish River Pulp and Paper Mills, Limited, is in command of 227th Overseas Battalion C.E.F. and does not expect to be back at business until the war is brought to a successful conclusion and the German is put where he cannot hurt the trade.

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of December next for the right to cut pulpwood and pine timber on a certain area situated on the Pic River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet, board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honorable the Treasurer of the Province of Ontario, for twenty-five thousand dollars (\$25,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$25,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

Toronto, August 28th, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

THE CONSUMERS' GAS COMPANY OF TORONTO

The Annual General Meeting of the Shareholders of the Consumers' Gas Company, of Toronto, to receive the report of the directors, and for the election of directors for the coming year, will be held in the Company's Board Room, No. 17 Toronto St., on Monday, the 30th day of October, 1916, at 12 o'clock noon.

ARTHUR HEWITT,
General Manager.

THE MERCHANTS BANK OF CANADA QUARTERLY DIVIDEND

Notice is hereby given that a dividend of Two and one-half per cent. for the current quarter, being at the rate of Ten per cent. per annum, upon the Paid-up Capital Stock of this Institution, has been declared, and will be payable at its Banking House in this city and at its Branches, on and after the 1st day of November next to Shareholders of record at the close of business on the 14th day of October.

By order of the Board,
D. C. MACAROW,
General Manager.

Montreal, 26th September, 1916.

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of February, 1917, for the right to cut pulpwood and pine timber on a certain area situated on the Black Sturgeon River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure, for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honourable the Treasurer of the Province of Ontario, for ten thousand dollars (\$10,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$10,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,
Minister of Lands, Forests and Mines.
Toronto, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

BANK OF MONTREAL

Notice is hereby given that a Dividend of Two-and-one-Half per Cent., upon the paid-up Capital Stock of this Institution, has been declared for the current quarter, also a Bonus of One per Cent., both payable on and after Friday, the First Day of December next, to Shareholders of record of 31st October, 1916.

By order of the Board,
FREDERICK WILLIAMS-TAYLOR,
General Manager.

Montreal, 20th October, 1916.

ILLINOIS TRACTION COMPANY DIVIDEND NOTICE

A quarterly Dividend at the rate of Three per cent. (3%) per annum on the Common Stock of the Illinois Traction Company has been declared for the Quarter ending October 31st, 1916, payable November 15th, 1916, to Shareholders of record, October 31st, 1916.

GOVERNMENT, MUNICIPAL AND
CORPORATION BONDS

BANK OF NOVA SCOTIA BUILDING
TORONTO, ONT.

DEBENTURES FOR SALE

CITY OF TORONTO 5% SERIAL GOLD BONDS

Sealed Tenders endorsed, "Tenders for City of Toronto Bonds," addressed to **Thomas L. Church, Esq.**, Mayor and Chairman of the Board of Control, will be received by the undersigned until 12 o'clock noon, Thursday, the 2nd of November, 1916, for the purchase of the following bonds, payable in annual instalments:—

\$ 527,000 payable 1st July, 1917-1921
1,494,000 payable 1st July, 1917-1926
78,000 payable 1st July, 1917-1926
47,000 payable 1st July, 1917-1931
74,000 payable 1st July, 1917-1936
374,000 payable 1st July, 1917-1936

The bonds are an obligation of the city at large; are issued in coupon form with provision for registration of principal; bear date 1st of July, 1916, and are in denomination of \$1,000.

They are payable both as to principal and interest, in gold, in Toronto and New York, and carry interest at the rate of 5 per cent. per annum, payable half-yearly on the 1st of January and July, the first half-yearly instalment of interest being due and payable on the 1st of January, 1917.

Tenders will be received for all or none, or for all (but not for a portion) of the bonds under any one or more of the by-laws. Delivery of bonds will be made at the office of the undersigned, in Toronto, on or about the 27th day of November, 1916, and payment therefor must then be made, with accrued interest from the 1st of July, 1916, to date of payment. A certified cheque, payable to the undersigned, for 1 per cent. of the par value of the bonds tendered, must accompany the tender.

Tenders specifying for bonds other than those herein described, or containing conditions varying from the above, will not be considered.

The right is reserved to reject any or all proposals.

Statement giving full information, including maturity date of bonds, will be furnished on application.

T. BRADSHAW, Commissioner of Finance.
City Hall, Toronto, Canada, October 24th, 1916.

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

A Good Living Wage
A Profitable Future
A Provision For Old Age

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

Coin and bullion.....	11,923,927	5,567,289	50,066,254	45,743,887	217,311,973	276,171,748
Total trade.....	100,374,885	95,398,595	220,718,429	1,063,908,233	1,137,935,480	1,945,052,281

*Note.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending August, 1916, were: imports 1916, \$50,627,035; 1915, \$122,473,271, and exports 1916, \$225,544,713; 1915, \$94,838,702. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

September Bank Statement is Satisfactory

**DEPOSITS and Loans Again Reach High Totals—Savings
Were Undisturbed By War Loan Payment—Commercial
Funds Continue To Increase — Analysis of Bank Loans.**

	September, 1915.	August, 1916.	September, 1916.	Year's Inc. or dec.	Month's Inc. or dec.
Deposits on demand	\$359,315,280	\$443,317,275	\$454,148,049	+26.4	+ 2.4
Deposits after notice	693,339,851	806,774,687	816,374,171	+17.7	+ 1.2
Current loans in Canada	771,086,757	739,938,513	752,545,756	— 2.4	+ 1.7
Current loans elsewhere	49,147,877	66,556,371	69,949,215	+40.3	+ 5.1
Loans to municipalities	43,928,331	39,882,811	38,708,745	— 9.5	— 2.7
Call loans in Canada	71,578,886	86,351,216	88,145,851	+23.2	+ 2.08
Call loans elsewhere	135,108,412	171,380,353	173,877,586	+28.1	+ 1.4
Circulation	105,798,618	122,656,083	135,285,031	+28.5	+10.6

THE above are the principal items in the statement of the chartered banks made to the Canadian government for the month of September. All the principal accounts show expansion during the month as follows: Deposits on demand, 2.4 per cent.; deposits after notice, 1.2 per cent.; current loans in Canada, 1.7 per cent.; current loans elsewhere, 5.1 per cent.; call loans in Canada, 2.08 per cent.; call loans elsewhere, 1.4 per cent.; and circulation, 10.6 per cent.

The following table shows the course of domestic deposit accounts for the past thirteen months:—

	On demand.	After notice.
1915—September	\$359,315,280	\$693,339,851
October	392,042,193	701,330,850
November	406,735,171	714,219,286
December	423,690,384	720,990,267
1916—January	387,002,926	714,264,486
February	389,825,667	728,242,609
March	389,165,388	738,169,212
April	402,060,955	748,359,957
May	412,301,481	765,064,041
June	428,117,340	767,598,130
July	431,958,188	789,363,919
August	443,317,275	806,774,687
September	454,148,049	816,374,171

largely show how the payments of \$30,000,000, \$30,000,000 and \$27,500,000 respectively affect the record of bank savings deposits.

The deposits record for the past five years for the month of September is given in the following table compiled by *The Monetary Times*:—

September.	On demand.	After notice.	Total.
1912	\$374,368,917	\$640,536,652	\$1,014,905,569
1913	381,737,513	621,249,585	1,002,987,098
1914	348,284,206	658,401,501	1,006,685,707
1915	359,315,280	693,339,851	1,052,655,131
1916	454,148,049	816,374,171	1,270,522,220

Deposits of \$1,270,522,220 in Canada and \$149,744,985 elsewhere gave a total of \$1,420,267,205 in September. Total loans during the month by the banks were divided as follow:—

Call loans in Canada	\$ 88,145,851
Call loans elsewhere	173,877,586
Current loans in Canada	752,545,756
Current loans elsewhere	69,949,215
Loans to government	10,833,971
Loans to provinces	1,103,740
Loans to municipalities	38,708,745

\$1,135,164,864

The following table shows the trend of the Canadian loans account for the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1915—September	\$771,086,757	\$71,578,886
October	780,785,754	74,574,270
November	777,162,563	83,203,787
December	775,517,047	84,228,155
1916—January	758,500,402	82,584,659
February	760,873,181	81,949,125
March	770,139,526	81,747,512
April	777,764,682	82,527,448
May	763,136,917	84,826,636
June	747,470,541	86,776,474
July	740,040,741	87,355,648
August	739,938,513	86,351,216
September	752,545,756	88,145,851

Since the March statement was issued demand deposits, which in that month were \$389,000,000, have shown approximate monthly increases, in round millions, as follow: April, 13; May, 10; June, 15; July, 4; August, 11; September 11, or a total increase of \$64,000,000 in six months.

Monthly increases in savings deposits have been recorded since the beginning of the year. With a payment of 10 per cent. on the second Canadian domestic war loan, the subscriptions to which totalled \$200,000,000, and necessitating the withdrawal of the larger portion of \$20,000,000, it was anticipated that a diminution in savings might be recorded. A gratifying increase of \$10,000,000 in savings deposits, however, was the result. The returns for October, November and December will

Of the deposit in Central Gold Reserves \$7,210,000 is in gold coin: the balance is in Dominion Notes.

The course of call loans abroad for the period beginning two months before the declaration of war, is of interest and is shown in the following table:—

1914—June	\$137,120,167	March	\$101,938,685
July	125,545,287	April	121,522,971
August	96,495,473	May	136,098,835
September	89,521,589	June	124,604,875
October	81,201,671	July	117,821,174
November ...	74,459,643	August	120,607,677
December	85,012,964	September ...	135,108,412
1915—January .	85,796,641	October	120,681,624
February	89,890,982	November	135,530,562

December	\$137,157,869	May	\$163,406,059
1916—January .	134,248,552	June	182,757,015
February	139,138,651	July	177,121,733
March	141,880,989	August	171,380,353
April	147,146,443	September	173,877,586

In September, 1914, call loans were \$89,521,589, in September, 1915, \$135,108,412, and in the current return are \$173,877,586, being \$38,000,000 greater than a year ago, and \$2,500,000 more than in August.

The following table shows the course of the loan accounts for the past five years:—

Dominion Government---September, 1916

LIABILITIES

Loans from other banks in Canada secured, including bills re-discounted	Deposits made by and balances due to other banks in Canada	Due to banks and banking correspondents in the United Kingdom	Due to banks and banking correspondents elsewhere than in Canada or the U.K.	Bills payable	Acceptances under letters of credit	Liabilities not included under foregoing heads	Balances due to the Imperial Government	Total Liabilities	Aggregate amount of loans to directors, and firms of which they are partners	Average amount of current gold and subsidiary coin held during the month	Average amount of Dominion Notes held during the month	Greatest amount of notes in circulation at any time during the month

RETURNS OF THE MOLSONS BANK

For the year ended September 30th this well-known bank shows earnings, after the usual deductions, of \$582,656, as compared with \$556,193 last year. The earnings were equal to 14.55 per cent., and the profits after deductions for patriotic, relief and pension funds and war taxes on circulation were about 13 per cent.

Savings deposits have gained from \$33,781,358 in 1915 to \$39,288,335 in 1916. Other deposits showed a gain from \$5,040,010 to \$6,456,087.

Current coin and Dominion notes increased over a million dollars to \$5,435,112. The bank's deposit in the central gold reserve is \$500,000 and the deposit to secure note circulation increased is \$200,000.

The loan figures for the past five years period above are interesting, as they cover an unique period, including a Canadian real estate boom and its decline; two years of war; and war prosperity.

TORONTO GETS 99.47 FOR BONDS

High Price Paid for Block of \$2,594,000 Serial Fives
—Twenty-seven Firms Interested

A block of \$2,594,000 5 per cent. serial bonds, running from 1 to 20 years (an average duration of less than six years from the delivery date), was sold on Thursday to A. H. Martens and Company, Toronto, at 99.477 and accrued interest, from July 1st, 1916, the date of the bonds. This is about a 5.09 per cent. basis. The sale is conceded by financial men to be a splendid price. Mayor Church characterized it as "the best loan made in the British Empire." Finance Commissioner Bradshaw, who handled the loan, was the recipient of many congratulations.

The widespread interest taken in the present loan is evidenced by the large number of tenders submitted, in all 14, from no less than 27 different financial houses, located in New York, Chicago, Philadelphia, Cleveland, Cincinnati, Montreal and Toronto.

The following is a list of the bids received, all prices being with accrued interest:—

For all of the \$2,594,000 offered.

A. H. Martens & Co.	Toronto	99.477
R. M. Grant & Co., New York, Chicago and Boston		99.33
Harris, Forbes & Co., Inc.	Montreal	99.09
(Wood, Gundy & Co.	Toronto)	
(A. E. Ames & Co.	Toronto)	99.078
(Emilius Jarvis & Co.	Toronto)	
(Kissel, Kinnicutt & Co.	New York)	99.03
Brent, Noxon & Co.	Toronto	98.776
(W. A. Mackenzie & Co.	Toronto)	
(Breed, Elliott & Harrison.	Cincinnati)	98.76
(Provident Savings Bank	Cincinnati)	
(Dominion Securities Corp., Ltd.	Toronto)	
(Wm. A. Read & Co.	New York)	98.753
(Kean, Taylor & Co.	New York)	
(Bioren & Co.	Philadelphia)	98.675
(R. A. Daly & Co.	Toronto)

Macneill & Young	Toronto	98.21

For \$452,000 only.

Hayden, Miller & Co.	Cleveland	99.088
---------------------------	-----------	--------

For \$1,026,000 only.

G. A. Stimson & Co.	Toronto	99.03
--------------------------	---------	-------

The bonds sold this week are issued for the following purposes:—

Toronto Street Railway pavement	\$ 527,000
Grants for patriotic purposes	1,494,000
New registry office	47,000
Buildings, etc., for industrial farms.	78,000
Cherry Street highway bridge	74,000
Permanent improvements, sewers, etc. ...	374,000
	\$2,594,000

They are all an obligation of the city at large; are issued in coupon form, with provision for registration of principal; dated July 1st, 1916; and are in denomination of \$1,000.

Interest is 5 per cent. per annum, payable half-yearly on January and July 1st, the first half-yearly instalment of interest being due and payable on January 1st, 1917.

In May, 1914, the city of Toronto sold \$1,766,000 4½ per cent. 10-year and \$805,472 4½ per cent. 34-year bonds to Messrs. Wood, Gundy and Company, and A. E. Ames and Company at 97.16, as well as \$1,000,000 4½ per cent. 10-

years at 97 net, and \$500,000 4½ per cent. 10-years at 97.15 net to New York insurance companies.

In April, 1915, a block of \$4,533,696 4½ per cent. city of Toronto long-term bonds was sold to Messrs. A. E. Ames and Company, and Wood, Gundy and Company, Toronto, on joint account, their offer being 90.67.

In May last, the city of Toronto sold an issue of \$3,669,000 5 per cent. at 99.637 to Messrs. A. H. Martens and Company, Toronto, and Messrs. Hirsch, Lilienthal and Company, New York. Nine bids were received for the entire issue, ranging from 98.02 to 99.637. There were five other bids for parts of the issue, and twenty-eight financial houses were concerned in these offers. The bonds sold were: \$417,000, hydro-electric, July 1st, 1917-48; \$584,000, waterworks, January 1st, 1917-48; \$1,060,000, public schools, July 1st, 1917-45; \$1,231,000, hydro-electric, January 1st, 1917-44; \$377,000, street railway pavement, July 1st, 1917-21. The average term of the bonds runs close to 17 years.

Serial Bonds Popular.

The sale of the Toronto bonds in May was notable chiefly for the fact that it was the first large issue of serial bonds, and this is the second. Mr. T. Bradshaw, Toronto's commissioner of finance, for some time had advocated the serial plan of bond issue in preference to the sinking fund plan. This was the first public offering of Toronto bonds under his régime. The advantages of the serial plan were discussed in several issues of *The Monetary Times* last fall.

CANADIAN BANK CLEARINGS

The following are the returns of Canada's bank clearing houses for the weeks ended October 26th, 1916, and October 28th, 1915, with changes:—

	Week ended Oct. 26, '16.	Week ended Oct. 28, '15.	Changes.
Montreal	\$ 78,290,519	\$ 60,788,035	+ \$17,502,484

Totals	\$239,759,215	\$192,516,066	+ \$47,243,149
Sherbrooke	600,435		
Kitchener	436,200		

Mr. Chas. H. Neely, manager for Canada of the Ocean Accident and Guarantee Corporation, left last Saturday for a business trip through the western provinces.

Mr. Mark Workman, president of the Dominion Steel Corporation, has applied for \$200,000 of the new British loan in New York. Mr. Workman subscribed \$100,000 to each of the two Canadian war loans.

Mr. F. J. Shaidle, of Hamilton, has been appointed special representative of the Sun Life Assurance Company, for Ontario province. Mr. Shaidle is one of the best known business men of the province and will be a Conservative candidate at the next Dominion general election for an Ontario seat. The Sun Life has just closed a very satisfactory month's business and is \$6,500,000 ahead of the results of last year.

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870, The Trade Review, of Montreal; and the Toronto Journal of Commerce.

The Monetary Times does not necessarily endorse the statements and opinions of its correspondents, nor does it hold itself responsible therefor. The Monetary Times invites information from its readers to aid in excluding from its columns fraudulent and objectionable advertisements. All information will be treated confidentially.

SUBSCRIBERS PLEASE NOTE:

When changing your mailing instructions, be sure to state fully both your old and your new address.

All mailed papers are sent direct to Friday evening trains. Any subscriber who receives his paper late will confer a favor by complaining to the circulation department.

CONSERVATION OF SAVINGS

That in one county in Quebec province over \$100,000 have been thrown away by the farmers, is the statement made by Monseigneur Choquette, a member of the faculty of Laval University. Some of the farmers, seized by a fatal frenzy, have not hesitated to sell their farms, the heritage received from their forefathers, in order to barter the value for a scrap of paper which guaranteed them the ownership neither of an inch of land nor an ounce of silver.

The farmers of that particular county are not the only victims of the allurements of speculation. Men and women throughout the country have been victimized by salesmen of worthless stock. Monseigneur Choquette, speaking for his own county, says: "Few days pass when farmers, young and old, are not asked to take part in financial concerns, in speculations which dangle untold riches before their longing eyes. The agents are clever and persevering. They have a thousand strings to their bow. Town lots, mining claims, natural gas and oil wells, patent's, are all means of enticement, all the more alluring since the risk which accompanies them is hidden more or less honestly under the name of some master of finance, or by an advertisement cleverly inserted in a conspicuous place in a newspaper of wide circulation. It is a veritable scourge, a plague."

He asks whether the evil can be remedied. To some extent there has been an improvement in recent years,—first, because the average investor is becoming more educated as to the merits of suggested investments; secondly, because the trend of investment is towards national securities and to other securities of repute. If during the war, the people's savings are successfully turned into national channels, then after the war, a pronounced appetite will have developed for high-grade stocks and bonds. The road of the man selling worthless securities will be more thorny. Savings will be conserved.

A NATIONAL INVESTMENT

The Canadian people may now place their surplus funds, however small, with the government in order to help finance the war. In return, the government will issue the nation's debenture stock in sums of \$500 or any multiple of that amount and will pay 5 per cent. per annum to the lender. Holders of this stock will have the privilege of surrendering at par and accrued interest, as the equivalent of cash, in payment of any allotment made under any future war loan issue in Canada other than an issue of treasury bills or other like short-date security. Proceeds of the stock are for war purposes only.

This is an investment which will appeal to every Canadian citizen who wishes to see the war brought to a speedy and successful conclusion. The debenture stock is absolutely safe, gives the investor a good income and is an excellent medium for the placing of small amounts. The issue of Dominion debenture stock in small denominations removes the last obstacle in front of those who have not yet participated in Canada's share of war finance.

UNSOUND INSURANCE

The persistent campaign of *The Monetary Times* in regard to the unsound basis of the insurance schemes of most of the fraternal orders operating in Canada has been amply confirmed in recent discussions. Professor M. A. Mackenzie, of the University of Toronto, in a recent letter to the press, says:—

"There are many unreformed friendly orders in Ontario with very many thousands of members holding certificates for very many millions of dollars, which certificates are worth only a fraction of their face value. The holders of these certificates are all more or less nervous. They look sideways when they ask any young man to join them, and they want to know the truth, though they dread it. The executive officers of these unreformed orders have guilty consciences over every batch of new members, and they know that each year's delay reduces the value of the surviving certificates, yet these executive officers postpone the inevitable reconstruction, largely because they shrink from being attacked in the press."

What better argument is there for the insurance of lives in reputable life insurance companies which do their business on a sound actuarial basis?

PLANNING AHEAD

When Sir George Foster some months ago issued a call to action to the business men of Canada, they failed to respond. When the Canadian Manufacturers' Association gave its backing to a well-organized export bureau over a year ago, only a hundred Canadian manufacturers of many thousands took an active interest in the scheme. We as a people, are surprisingly slow in our work of planning ahead at this important period in the history of Canada and the British Empire. One is inclined to believe sometimes that the triple task of operating a nation, conducting part of a Great War and planning for the peace period, is too big for us. Great Britain is performing the task, although it has had to make the nation into one vast organized war institution.

In the United States—where nothing more warlike disturbs than the fine art of protecting the sensitive factor of neutrality—banks, traders, governments and other units are planning for the peace period in a way which we might well emulate to at least some extent.

SIX PER CENTS

The popularity of the 6 per cent. treasury bonds issued by Great Britain is reflected in the fact that within a recent two weeks period about \$180,000,000 worth were sold. These bonds are being bought in Canada and substantial blocks have found their way to the United States. When the British chancellor was criticized last week in regard to the high rate of interest payable on the new bonds and the fact that it would lead to their being largely held abroad, he replied: "That is the very thing we desire." As Great Britain has to find \$10,000,000 a day for 6 days every week for the purchase of its large supplies in the United States, it is naturally hoped that many millions of dollars' worth of the new treasury bonds will be purchased on this continent.

The 6 per cent. rate has naturally excited attention. It proves that we cannot apply pre-war standards to current borrowing. Chancellor McKenna stated that money might be raised at 5 per cent. or less if the government wanted only a little, or even the equivalent of the greatest sum ever raised before the war, but "it should be remembered," he added, "we have to raise a maximum sum about once a month, and it is only possible to find out by the daily examination of the results of borrowings and payments, whether we are successful in meeting our obligations. In order to meet all expenses, and to keep our undertakings with our allies, I have to make sure of getting money." In other words, it is often worth an interest rate fractionally higher, to insure the success of an issue. This has been the experience of Canada as well as of other countries during the present war.

The British government would have issued a long-term loan but the moment of competition for money is deemed undesirable for that purpose. The government, however, will resort to such a loan when the treasury considers it advisable, and the government will not shrink from the fulfilment of its promise in regard to the conversion of previous loans.

WAR AND THRIFT

Bank deposits are accumulating rapidly but this is not due to national economy. Automobiles have been bought freely this year. The millinery trade has flourished. Fashion has not taken to sackcloth and ashes. Trade returns show imports of many things without which we could very well get along in war times. Bankers urge thrift; so do government authorities. But the people have not yet cultivated the habit. Skilled and unskilled help is scarce, because much of our peace time labor is at war. Labor left at home is getting almost whatever it demands. Wages are high. Folks spend freely and point with pride to the swelling bank deposits. Their share in the increase may be small, if any.

The prosperity of war is upon us. Trade has doubled. Mills and factories are working day and night.

The placing of about \$1,020,000,000 of war orders in Canada since August, 1914, has given a substantial impetus to industrial machinery. Corporations have paid their war taxes, paid their debts, paid their dividends, and put something away for a rainy day. Have we all thought of that rainy day?

Prosperity seldom encourages thrift. The natural thing is to spend when we have it and to save when it is hardest. To-day, the cost of living is high, usually a sign that money is being freely earned and freely spent. When peace comes, a little reserve cash will be handy. How many will be able to point to such a reserve after this period of war prosperity? Thrift is necessary to bring the war to a successful conclusion. It will be necessary after the war, too.

CHARTERED ACCOUNTANTS

As the value of proper organization is more fully recognized, the services of the chartered accountant come into greater requisition. The desire on the part of many municipalities in Saskatchewan, for instance, to have the auditing performed by the best officials available is shown in the fact that a great many have engaged as permanent auditors a reputable firm of chartered accountants.

Mr. J. N. Bayne, deputy minister of municipal affairs of Saskatchewan, in a recent report, states that the Institute of Chartered Accountants of that province "is performing a work among our municipalities which should be lasting. The efforts of its members in raising higher the standard of municipal auditing will have its effect on our municipal life for all time. In order to become a chartered accountant of Saskatchewan, it is necessary for the applicant to have had much experience in the keeping of books, and before he receives his degree each candidate must pass a rigid examination on general commercial and municipal accounting. Naturally each member of the institute is jealous of his reputation. He has often a greater incentive to perform work that is masterly in its thoroughness than a transient auditor who, although efficient, may have his attention diverted by other lines of work."

Mr. Bayne pays a tribute to the labor performed by many local auditors who are not chartered accountants. The value of a chartered accountant's work, however, stands alone. While his services have been utilized considerably in the past, the demand for his skilled labor during the next decade will be very pronounced.

The Grand Trunk Railway has arranged for the showing of moving pictures of life in Western Canada throughout the United States. The films will include a variety of pictures in the prairie harvest fields and through the Canadian Rockies, the arrival of a fishing-boat at Prince Rupert with 80,000 pounds of halibut on board, which enabled the photographer to secure a series of views showing the expeditious method of transferring the fish from the boat to the cars for eastern shipment.

Canadian wheat is worth about \$1.75 per bushel. In Russia it is worth about 50 cents a bushel. A large part of the difference in price can be credited directly to the fact that the world markets are kept open for Canadians and Americans alike by the absolute supremacy of the British navy. Even a partial success of the German navy and the breaking away into the Atlantic of half a dozen cruisers after the battle of Jutland might have largely paralyzed shipping on the Atlantic. Canada is recruiting her sons for naval service as well as for the military.

NEW INCORPORATIONS

Company List is Smaller—Thirty-three Additions
This Week

Canada's new companies incorporated this week number 33. The head offices of these companies are located in four provinces. The total capitalization amounts to \$4,246,000.

The largest company is:—The H. Fortier Company, Limited, \$1,000,000.

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	11	\$1,240,000
Quebec	14	2,695,000
British Columbia	7	151,000
Manitoba	1	160,000
	33	\$4,246,000

The following is a list of charters granted during this week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Regina, Sask.—Crescent Fuel Company, Limited, \$10,000.
Kamloops, B.C.—McArthur and Harper, Limited, \$10,000.
Moose Jaw, Sask.—Whitlock-Marlatt, Limited, \$70,000.
Edmonton, Alta.—Edmonton Cigar Factory, Limited, \$20,000.

Wayne, Alta.—The Wayne Supply Company, Limited, \$30,000.

Victoria, B.C.—Sidney Canning Company, Limited, \$40,000.

Cadillac, Sask.—J. A. McGillivray Company, Limited, \$20,000.

Argo, Sask.—The Argo Trading Company, Limited, \$15,000.

Lacombe, Alta.—The Lochinvar Cattle Company, Limited, \$20,000.

Peace River, Alta.—The Peace River Drug Company, Limited, \$20,000.

New Westminster, B.C.—New Westminster Foundry Company, Limited, \$10,000.

Montreal East, Que.—F. and B. Shoe, Limited, \$30,000.
H. Pepin, F. Favreau, J. A. Blais.

Winnipeg, Man.—System Farms, Limited, \$160,000. J. A. Machray, J. Kerr, B. C. Parker.

Renfrew, Ont.—The Renfrew Curling Rink, Limited, \$20,000. D. Barr, T. A. Low, J. M. Austin.

St. John, N.B.—Nova Sales Company, Limited, \$20,000.
W. B. Wallace, J. J. Stothart, H. D. Payson.

Kitchener, Ont.—Grosz and Hohmeier, Limited, \$40,000. W. H. Grosz, G. Hohmeier, M. E. Bollgert.

Sussex, N.B.—J. A. McArthur Company, Limited, \$8,000. F. A. McArthur, H. A. McArthur, B. Freeze.

Brantford, Ont.—Canada Gelatine Company, Limited, \$250,000. S. P. Davies, G. Upton, J. Lyman.

Kingston, Ont.—Army and Navy Store, Limited, \$100,000. Katherine R. Kelly, Ada M. Sharman, A. W. McCarthy.

Brockville, Ont.—The Brockville Homes Building Company, Limited, \$40,000. W. H. Davis, A. C. Hardy, J. G. Gardner.

Victoria, B.C.—The Universal Smokeless Heat Generator Company, Limited, \$50,000; Brown and Heath, Limited, \$10,000; the Shell Garage, Limited, \$10,000.

Fort William, Ont.—The Roy Elevator Milling Company, Limited, \$100,000. J. King, F. P. Germain, C. M. Dickinson; Newcombe's Limited, \$40,000. J. W. Newcombe, Verna Sterch, Lillian Newcombe.

Vancouver, B.C.—The David Evans Shipping Company, Limited, \$25,000. T. W. B. London, M. H. Thorburn, W. B. Johnson; Western Canada White Lead, Limited, \$40,000; W. W. Moore, Limited, \$6,000; Dumas Club Company, Limited, \$10,000.

Toronto, Ont.—The Cannon Canadian Company, Limited, \$100,000. R. Ellis, A. Ellis, G. L. Smith; Reliance Motor and Tool Company, Limited, \$60,000. W. B. Sturupp, J. S. Duggan, C. A. S. McKay; Frank Mapes Crittenden Company, Limited, \$50,000. G. A. Young, Elsie Whitehead, Leonora C. Leigh; Canadian Molydenite, Limited, \$100,000. F. M. McDowell, G. R. Sproat, C. H. Kemp; Van der Linde Rubber Company, Limited, \$350,000. Sophia Tutty, Ella L. Kelly, Susie Ross; Commercial Chemicals, Limited, \$50,000. E. A. Seburn, P. Robinson, Ethel M. Lennox.

Montreal, Que.—Dominion Crucible Company, Limited, \$200,000. G. R. Drennan, F. G. Bush, A. G. Yeoman; Continental Construction Company, Limited, \$10,000. G. E. Chart, L. Choquette, L. C. Chouinard; Empire Electric Company, Limited, \$20,000. G. Jarry, A. Vaillancourt, A. Langlois.

CONSUMERS' GAS COMPANY'S REPORT

A revenue of \$3,637,805, with larger sales of gas and more customers were some of the strong features of the report presented at the annual meeting of the Consumers' Gas Company of Toronto this week. Gas sales accounted for \$2,487,673 of the company's income, residuals produced \$851,119, merchandise sold, piping and burner rentals \$263,326, and miscellaneous revenue totalled \$35,686.

The cost of providing Toronto with gas is shown in the following figures: Coal, bituminous, \$895,203; coal, anthracite, and coke, \$346,317; gas oil, \$155,336; oxide, \$9,138; steam, \$142,248; wages—manufacturing, \$131,435; miscellaneous wages and general expenses at works, \$180,786; street department expense, \$16,483; meter settings, \$42,145; government fees inspection of gas and meters, \$13,262; meter department expenses, \$16,108; reading meters and delivering bills, \$19,096; customers accounting, \$31,015; collection, commissions and salaries, \$37,913; sundry collection and accounting expenses, \$16,417; administration salaries and expenses, \$20,911; directors, \$15,000; auditors, \$1,500; general salaries and expenses, \$90,100; patriotic donations and gratuities to dependents of enlisted employees, \$38,008; taxes, including workmen's compensation tax, \$128,329; insurance premiums, \$22,436; advertising, \$16,346; arc lamp and reflexolier expense, \$44,515; cost of merchandise sold, and piping work for customers, \$175,927; merchandise storage and selling expense, \$54,757; commercial department expenses, \$57,487; balance carried down, \$919,576.

Interest charges totalled \$50,008, dividends \$488,200, plant and building renewal fund \$478,170, making a total of \$1,017,368. The company's assets are valued at \$11,001,790.

President A. W. Austins, in presenting his report, said: "Having in mind the keenness of competition, and the fact that a large number of citizens are absent from the city on military service, the effectiveness of the company's policy of advertising and proving the value of gas for illuminating, as well as for fuel for domestic and industrial purposes, has been fully demonstrated. A few years ago gas was used principally for illuminating purposes. It has now a thousand other uses, and it has been the company's policy to develop and sell appliances for any, and all, of the purposes for which gas may be advantageously used. The continued and increasing rise in the price of raw materials, and the higher wages demanded for labor, have materially increased operating costs, but the shareholders will realize that these are matters beyond the control of the directors."

The Consumers' Gas Company, one of the best-managed public utility corporations of America, continues to make good progress in the unusually exacting days and to give its clients excellent service at a low cost.

PROTECTION OF LIFE AND PROPERTY

Needs of Public Met by Underwriters of Life, Fire and Accident Insurance

Analysing the statistics relating to insurance in Canada Mr. A. E. Blogg, of the London and Lancashire Fire Insurance Company, in his presidential address before the Toronto insurance institute said in part:—

Fire insurance premiums paid for the year 1915 show a falling off as compared with 1914, of 3 and 8/10 per cent., or a total of \$1,025,000.

Comparing the two years before the war with the years 1914 and 1915, the result shows a substantial increase of \$5,034,000, or over 10¼ per cent. This is a fair average of increase in normal times, and as there is only a slight increase in loss ratio, we may conclude that the fire insurance business has not been affected by war conditions.

The destruction of property in Canada by fire during the nine months of this year has been considerably below the average for the last four years. In round numbers thirteen millions, as against an average of sixteen millions. Our aim in Canada, by government and people, must be to bring this high average of fire waste down, and this is a work at which every one can help.

Economy is the order of the day. One might be surprised to find that the expense ratio for fire and allied insurances in Canada shows a slight increase in 1915, compared with 1913. This, however, is more than accounted for by war taxes, and comparing the two years preceding the war with the years 1914 and 1915, there is a reduction of 1½ tenths of 1 per cent. on a total income of sixty-three and one-half millions.

United States Companies Industrial Business.

Of the life insurance companies reporting to Ottawa that transacted more or less new business in 1915 there were 26 Canadian, 8 British and 13 United States companies.

Of the \$121,033,310 of new insurance issued by Canadian companies \$6,037,537 (taken by one company) was industrial insurance and \$114,995,773 was on ordinary plans. Of the \$5,727,313 taken by other British companies, \$746,168 was industrial insurance taken by one company, and \$4,961,145 was on ordinary plans. Of the \$94,358,935 of new insurance taken by the United States companies \$41,821,703 was industrial insurance (taken by two companies) and \$52,537,232 was on ordinary plans.

The industrial business of the United States companies was 86.4 per cent. of the whole of the new business of this class secured in Canada while their ordinary business was only 30.4 per cent. of the new business of that class.

Of the total ordinary business in Canada amounting to \$1,164,950,951, Canadian companies carry \$813,902,759, or almost 70 per cent.; British companies carry \$57,434,538, or 5 per cent., and the United States companies carry \$293,613,654, or 25 per cent. of the total.

Only a very small share of the industrial business of Canada is transacted by our home companies, as only one of our companies does any of that class of business. While in 1915 only 12.5 per cent. of the new insurance on industrial plans was secured by a Canadian company, 66.6 per cent., or two-thirds of what is known as ordinary business was secured by our home companies.

Results for Insuring Public.

Of the \$145,665,726 industrial insurance in force in Canada on December 31st, 1915, Canadian companies carried \$16,070,050; British, \$652,480, and United States companies, \$129,943,196.

At the end of 1900 the Canadian companies had \$261,971,401 of ordinary business and \$5,179,685 of industrial business in force; the British companies had \$39,485,344 of ordinary business and the United States companies, \$124,433,416 of ordinary business and \$11,201,843 of industrial business in force.

From December 31st, 1900, to December 31st, 1915, the Canadian companies increased their ordinary business in force by \$551,931,358 or 210.7 per cent., and their industrial business by \$10,900,365 or 208 per cent.; the British companies increased their ordinary business in force by \$17,949,104, or 42.9 per cent.; and the American companies increased their ordinary business by \$293,613,654 or 236 per cent. and their industrial business by \$117,741,353 or 105.1 per cent.

It may be a question worthy of their attention by representatives of our Canadian companies, why the American companies secure so large a proportion of the Canadian life insurance business. I have always been led to understand that mortality is much lower amongst Canadian lives, interest earnings are higher on high-class securities in Canada, and expenses should not be higher. Are not these the main factors involved in obtaining results for the insuring public?

Accident Insurance.

With the growth of the country and the increased vehicular traffic on public highways, the extensions of electric lines, both for radial and other purposes, the necessity for accident insurance becomes daily more apparent and forms a very necessary adjunct for a working basis in an agency insurance office.

The need of the public has in the last two years resulted in many forms of accident insurance—for instance, workmen's compensation by the government seems to be becoming more popular in the Dominion of Canada. Ontario, Manitoba and Nova Scotia have already adopted such an act and British Columbia has legislation to this end now under consideration. In Quebec province a workmen's compensation act has been in operation for several years and has apparently given satisfaction both to workmen and employers.

Automobile Insurance.

With the present craze for rapid transit, the purchase of automobiles has so increased during the past few years that automobile insurance has now become a real factor in the insurance business and forms a good paying class.

There are many other forms of insurance that are assimilated with the accident business, designed for the protection of contractors, manufacturers, landlords, and the public generally, classed as liability insurance, and in connection with the accident business the issue of guarantee bonds has been found a paying proposition and very useful to employers in the safeguarding of their interests; personal accident and health insurance have also proved most beneficial to the carriers thereof, and are a great aid to people not receiving large salaries as it enables them to bridge over a period of stress caused by illness or accident.

PRODUCERS ARE COMBINING FORCES

It is now stated the consolidation of farmers' organizations in Western Canada, previously mentioned in these columns, is nearing completion. The organizations involved are Grain Growers' Grain Company of Manitoba, the Alberta Farmers' Co-operative Elevator Company, the Grain Growers' Association, the United Farmers of Alberta, the Saskatchewan Co-operative Elevator Company, and the Manitoba Grain Growers' Association. The Canadian Council of Agriculture is interested in this movement.

The scheme embraces a system of transferring of shares of the Alberta and Saskatchewan organizations for shares of the Grain Growers' Grain Company of Manitoba. A subsidiary company of the Grain Growers' Grain Company, the New York Exchange Exporting Company, will also be engaged in the gigantic plan. The merger will comprise a membership of more than 100,000 farmers.

The Douglas Fir Exploitation Export Company as a permanent organization is being formed, with thirty-eight out of sixty lumber mills on the Pacific coast as holders in the company, which is planned as a selling combination.

In the off-shore shipping trade provision is being made on the coast for fifty-two auxiliary sailing vessels, which, when completed, will have a capacity for about 75,000,000 feet of lumber. The Canadian government recently bought plans and specifications of the steamship City of Portland, and nine vessels, costing about \$15,000,000, will be built at Vancouver and Victoria under a subsidy arrangement between the William Brown Company, of Montreal, and Canadian government. A subsidiary company, to be called the Brown Auxiliary Lumber Company, has been organized with a capital of \$5,000,000.

The city of Quebec, which is holder of \$76,000 of stock in the Quebec Bank, will agree to the amalgamation of the Quebec and Royal Banks. This was decided by the finance committee, and the city treasurer was authorized to communicate the city's assent, as a stockholder, to the directors of the Quebec Bank.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Winnipeg Electric Railway.—The earnings for September were \$87,854.

Dome Mines Company.—When the war tax policy of the Canadian government was announced Dome Mines shares dropped \$6, from \$29.50 to \$23.50. The actual tax amounts to about seven cents a share.

Coniagas Mines, Limited.—During the company's fiscal year the following dividends have been paid: February 1st, 5 per cent.; August 1st, 5 per cent.; and on Wednesday another dividend of 5 per cent. was paid.

British Columbia Electric Railway Company, Limited.—This company and its subsidiaries report aggregate net earnings from July 1st to September 30th, \$200,384, compared with \$86,393 in the corresponding period last year.

Montreal Arena Company.—The company has declared a dividend of 2 per cent. for the quarter ending October 31st, payable to shareholders of record October 25th. The annual general meeting of the company will be held in the Arena on November 14th.

Canada Steamships, Limited.—The launching of the steamship Sir Trevor Dawson at the drydock of the Superior yard of the American Shipbuilding Company at Duluth, Mich., will add one of the largest freighters in service on the upper lakes. It is expected that the boat will be in commission early in November, and will be of American register at Duluth, and will be operated by one of the Steamships subsidiaries.

Russell Motor Car Company.—No dividend action is to be taken by the directors at present. Mr. Lloyd Harris, the president, pointed out at the annual meeting that repeat

orders from the imperial government would not command the price received for initial contracts. These orders were large, but that necessitated heavy increases in borrowings from the banks.

Standard Bank of Canada.—The new issue of stock—\$500,000 at 200—mentioned in *The Monetary Times* last week, will add \$1,000,000 to the bank's capital which will then be \$3,500,000, with a rest of \$4,500,000.

The bank has been obliged to maintain large deposits in the central gold reserves to cover excess circulation. In the September bank statement this was \$1,100,000. When the capital is enlarged the power of issue without special security automatically increases by \$500,000, thus releasing funds from the gold reserves, all of which will be advantageous to this well-known institution.

Barcelona Traction, Light and Power Company.—In the company's first annual report President E. R. Peacock states that the directors consider the enterprises which this company controls in Spain are developing in a sound and satisfactory manner, and if no unforeseen difficulties arise during the present year, the result of the year's working should, notwithstanding the delay and adverse conditions referred to above, show a very satisfactory increase over the results of the year 1915.

The market for power is a remarkable one and indicates an increasing demand, and, in order to meet the growth, the distribution system has been, and is being, considerably extended and strengthened, and it is contemplated that a large part of the surplus earnings for the next two years will be applied in carrying out this work.

Dr. H. F. Parshall, in his report, estimates that when the new transmission line, which is designed for greater current capacity and higher working voltage, has been brought into service, the company will be in a very strong position as regards giving an efficient and reliable supply to Barcelona, since it will have two transmission lines over separate routes, which will provide a wide margin to meet all emergencies that may arise. As an example of the conditions under which this work has had to be done, specific mention may be made of the special towers required for the completion of the second transmission line. A ship was chartered from New York, but on reaching Tenerife she found it more advantageous to discharge her cargo there, with the result that the towers were held up at Tenerife for some months. All the material, however, has now been shipped or delivered in Barcelona.

The distribution system in Barcelona has been extended, and many safety devices and improvements are in course of installation, which will add very greatly to the reliability and efficiency of the service. Further extensions in the distribution system are planned for the coming year, which should materially strengthen the position of the company in Barcelona.

(Continued on page 32.)

CITY OF MONTREAL

\$3,800,000

Forty Year 5% Gold Bonds

The Bank of Montreal, Montreal, is authorized to receive on behalf of the City of Montreal, sealed tenders for the purchase of the undermentioned securities:

\$3,800,000 forty-year gold bonds dated 1st November, 1916, due 1st November, 1956, bearing interest at the rate of 5% per annum, payable half-yearly on 1st May and 1st November each year. Principal and interest payable in gold at the City Treasurer's Office, Montreal, or at the Agency Bank of Montreal, 64 Wall Street, New York, at the option of holder. Bonds will be in the denomination of \$1,000 each with interest coupons attached.

Delivery and payment to be made at the Agency Bank of Montreal, New York, on or about the 20th November, 1916, with accrued interest to date of payment. Every tender must be accompanied by a certified cheque payable to the City Treasurer, Montreal, for one per cent. of the total amount of the issue. Tenders must be addressed to the Manager, Bank of Montreal, Montreal, Canada, marked "Tender for City of Montreal Bonds" and be delivered not later than 12 o'clock noon on the 13th November, 1916. Tenders must be for the whole amount offered. No tender for any part of the issue or for securities not precisely as described above or varying the terms of payment and delivery will be considered.

The highest or any bid will not necessarily be accepted.

Further information and particulars may be obtained upon application to the Bank of Montreal, Montreal, the Agents Bank of Montreal, 64 Wall Street, New York, or to the City Treasurer, Montreal.

CANADA'S PLACE IN IMPERIAL AFFAIRS

Canadian Pacific Railway and Settlers—Ocean Traffic and St. Lawrence Route—Manufacturers on Transportation, Paper Industry, Etc.

At the Montreal sittings of the Dominions Royal Commission, Mr. J. S. Dennis, assistant to the president of the Canadian Pacific Railway, and head of that railway's department of natural resources, stated that the flow of United States settlers into western Canadian points since the beginning of the war has been constant and is increasing.

Commissioner R. Sinclair, of New Zealand, enquired if the United States settlers in western Canada became Canadian citizens in the technical sense of the term, and Mr. Dennis replied that a large number of them became citizens of Canada to this extent, that they became naturalized Canadians and took an interest in provincial and municipal politics, but they were not concerned as other Canadians were in the great struggle the empire was making to-day.

Mr. Dennis said the total land grants to the company were 27,787,921 acres, all situated in Manitoba, Saskatchewan and British Columbia. There has been sold to date 21,276,527 acres, leaving a balance available for sale of 6,511,394 acres. The sale of the 21,000,000 acres approximately realized \$100,396,817. Some of the land sold had come back to the company through the failure of the purchasers to pay their instalments, about 7,000,000 acres.

Campaigns in Europe and United States.

Mr. Bosworth, vice-president of the Canadian Pacific Railway, gave an outline of what his company had done to encourage immigration to the Canadian north-west, referring particularly to its advertising campaigns in Europe and the United States, and explained the company's system of promoting trade.

Mr. Dennis said the Canadian Pacific Railway was anxious to obtain as large a number of colonists as possible from Great Britain, and established an organization in Great Britain covering 150 agencies in an endeavor to induce people to come to western Canada. It prepared 100 "ready-made farms" to start with. They comprised an area of 160 acres each, and were restricted entirely to British colonization. The company secured 100 families from Great Britain to take up these farms, but it did not have very much success, because it was unfortunate in its selection.

Via St. Lawrence Route.

Messrs. W. H. Harling, of Messrs. Thos. Harling and Son, steamship agents, and R. J. Dale, president of R. J. Dale Company, Limited, marine insurance agents, gave evidence relating to ocean traffic.

On being questioned by Sir Alfred Bateman and the other members of the commission, Mr. Harling said that the most serious handicaps suffered by the grain trade on the St. Lawrence route at the present time in the matter of ocean insurance are:—

1.—The exaction by the underwriters of an additional premium of one guinea per cent. or more, according to the season of the year, over and above the annual premium on hulls of tramp steamers for one or more voyages to the St. Lawrence, and

2.—The yearly date at which the advance in the rate takes place—viz., 1st October.

As the regular line vessels have not sufficient tonnage to handle all the grain offering from the port of Montreal, shippers are compelled to charter tramp steamers for a considerable portion of the grain freight offering, and, while the difference between the insurance rates on cargoes in tramp vessels from Montreal as compared with the United States Atlantic ports is comparatively immaterial, amounting to from decimal 15 (3-20 of 1 cent) to decimal 20 cents (1-5 of 1 cent) per bushel, the extra insurance on the hulls of such vessels constitutes a very serious handicap.

For instance, assuming that the average value of a tramp vessel is \$200,000, the additional insurance charged for one or more voyages would amount to \$2,000 up to October 1st, or equal to about $\frac{1}{4}$ cent per bushel.

Explaining the above, Mr. Harling said that a difference of a fraction of a cent in freight charges or otherwise was sufficient to divert some of the trade to the United States, more particularly the port of Buffalo. He was of opinion that if the government would undertake to pay the extra premium demanded after October 1st, the extra business obtain-

ed would surely compensate the extra expenditure. He was also under the impression that an international commission, similar in its purpose to the railway commission, would be a good thing, although, as Mr. Sinclair, one of the commissioners, interposed, the ocean route being the property of the whole world, presented many difficulties in the accomplishment of the idea.

Mr. R. J. Dale, speaking as a marine insurer, said that the insurance companies have to charge an extra premium after October 1st, for shipments by way of the St. Lawrence. He believed that if the government would take upon its own shoulder the extra premium charged the shippers, the insurance companies would not object to the change, but as he was sceptical as to the willingness of the federal authorities to entertain such a proposal.

Removal of Handicaps.

Speaking in the name of the Corn Exchange Association, of which he was a delegate, Mr. Harling offered the following suggestions as to the removal of the above-mentioned handicaps: That the underwriters be requested to remove the clause in their marine insurance policies on the hulls and machinery of steamers, known as the B.N.A. clause under which steamers (not regular liners) are debarred from trading to Canada during the open season of navigation unless at an additional premium—and to resume the original form of policy in existence prior to 1900—limiting the period under which additional premiums be charged.

Secondly, that no extra insurance should be charged either on steamers or cargoes to, or from Canadian ports except later than October 15th in the St. Lawrence—and that maritime province rates be reduced to the basis of United States ports.

Some Manufacturers' Ideas.

Mr. G. A. Murray, secretary of the Canadian Manufacturers' Association, was questioned on a paper of ideas which he had formulated and filed with the commission.

The question of a uniform empire system of weights and measures and form of currency was first taken up by the commission. Mr. Murray declared that while he did not wish it to be understood that he advocated anything, he expressed himself in favor of the decimal system in currency. He stated that the United Kingdom and the United States by adhering to the present system and methods in business matters were gradually getting into isolation with the rest of the world. France, Belgium, Serbia, Rumania, Russia—all the allies—employed the metric system, and if the English were to compete with foreign countries, and especially Germany after the war, who used the metric system also, England would be at a disadvantage.

It was pointed out that there would be great opposition in England to a change. Mr. Murray then stated that if it was decided to change and to make this system compulsory, a period of not less than five years should be allowed in which to give business men time to change their systems.

The question of a uniform statistical year within the empire was another subject discussed. It was pointed out that great advantages would result if upon government reports an extra column was provided for the calendar year in addition to the individual fiscal year and would do away with all objections to difference. The uniform classification of exports and imports was also dealt with.

Mr. J. E. Walsh, manager of the transportation department of the Canadian Manufacturers' Association, declared that under normal conditions the freight rates eastbound were favorable to the importer, while westbound they were against him.

He advocated an international commission to take up the questions of uniform freight rates. He stated that the idea of his association was to supervise conditions, regulate service and get a continuity of rates.

Sir Alfred Bateman asked him if he realized the enormous difficulties there would be in the way of getting all marine nations together for a conference on freight rates, and also asked if he did not intend an inter-imperial conference.

In the matter of a service via the Panama Canal, Mr. Walsh stated that in his personal view, there should be some sort of triangular service established between Great Britain and the Pacific coast, via the Panama Canal, touching the West Indies and the Atlantic.

The question of the establishment of a Canadian mercantile marine was also mentioned by Mr. Walsh, but no discussion ensued as he declared it was more of a domestic problem, and he thought the time had come when Canada

should be in line with her neighbor, who had recently voted \$50,000,000 to this end.

The evidence with regard to ship scarcity was given by Mr. James Carruthers, Montreal. He also spoke with reference to freight rates on wheat and on flour. The side of the ship owners on these points was presented by Mr. W. I. Gear, Montreal.

In dealing with the shortage of ocean tonnage, Mr. Carruthers said that it would be possible to ship twice the quantity of grain from Montreal if the ocean tonnage were available. His explanation of the shortage was the increased insurance on the St. Lawrence route and the great disadvantage of the port being closed during winter.

Mr. Sinclair: "Is anything being done in Canada to supplement the tonnage? Are you building any boats here?"

Mr. Carruthers: "No, not so far as I know."

Mr. Sinclair: "It is about time that you were up and doing something in Canada."

Mr. Black quoted figures to show the big difference in freight rates between wheat and flour.

Mr. Gear admitted the difference, but argued that shippers did not consider the larger space occupied on ships by flour. The average cost of handling flour on ship and on shore was four times that of wheat.

Mr. J. N. Jamieson, elevator engineer, suggested that colliers which came from Sydney to Montreal with coal and go back light should carry grain. This could be stored at Sydney and could be shipped to England at any time of the year.

Mr. Clarence I. De Sola, Belgian consul in Montreal, stated that Canada was losing much from the fact that she could not enter into a direct competition with the United States in the way of a fast service such as is furnished to New York, and that a large percentage of Canadian trade went via New York simply because the service to the Dominion was not speedy enough. He thought a system of "all red-route" trains and steamers could be operated successfully.

Pulp and Paper Industry.

The disappearance of the wood pulp supply in Canada during the next 25 years, if conservation measures were not adopted, was prophesied by Mr. Ellwood Wilson, of the Laurentide Company, an expert on the paper industry. Mr. Wilson stated that three things were essential to protection of pulp industry in this country: one was the adoption of a scientific scheme of reforestation, another a proper system of fire protection such as had been adopted in British Columbia, and on the lands under the control of the Laurentide interests on the Ottawa and St. Maurice Rivers, and also a system that would do away with the dangerous disposal of waste that now prevails in the forests throughout Canada. Mr. Wilson stated that during the past 35 years, 30 per cent. of the pulp wood lands of Canada had been burned over and rendered useless for generations to come.

Mr. Carl Riordan explained how the long haul to Europe with its consequent high freight rates, made it almost impossible for Canadian paper or pulp manufacturers to compete with the manufacturers of pulp in Europe, who are located principally in Sweden and Norway. He stated, however, that when the war was over it was expected that with the higher taxes that would prevail in Europe, the higher cost of production and the higher cost of capital, the price of the European pulp would increase materially with the result that the Canadian manufacturer might find a new field for his output.

Mr. J. A. Cunningham has been re-elected president of the British Columbia Manufacturers' Association. The other officials are: Vice-president, Mr. J. Hanbury; vice-presidents, Vancouver, Mr. G. G. Bushby, New Westminster, Mr. J. R. Duncan; honorary-treasurer, Mr. E. G. Baynes; reception and membership committee, Vancouver, Mr. J. W. Curran, New Westminster, Mr. W. R. High Rate of Interest Said to be Essential to Success of This Plan

Mr. J. W. Brislaw, of the state board of tax commissioners, Olympia, Wash., writing to the Calgary Herald, says: "This method of tax certificates results in encouraging the payment of taxes as a preferred claim because the rate of interest on delinquent taxes is much higher than the rate of interest than money will earn for the average business man. This seems to be the chief reason for the issuance of certificates of delinquency bearing 15 per cent. interest. Another advantage is that the tax certificate is a desirable form of investment and the county issuing them has little or no trouble in disposing of the certificates and consequently never finds itself with its funds depleted by reason of tax delinquencies and also the county rarely has to take over the land, because someone is willing to purchase the certificates and foreclose the lien.

High Rate of Interest.

"Those who oppose this method of collecting the delinquent taxes say that the rate of interest, 15 per cent., is exorbitant, usurious and an unfair discrimination against the man who may be in straitened circumstances. There have been repeated attempts made to have the rate of interest borne by these delinquent certificates reduced from 15 to 10 per cent., but the argument that the present method gets the money usually seems sufficient to over-balance the objections that are raised against it. We are unable to advise you as to a better system in use in other states."

From this it would seem that the success of the scheme depends in a large measure on a high rate of interest on the certificates as an inducement to investors and an incentive to the delinquent taxpayers to pay off their obligations.

Seattle's Experience Given.

This view is confirmed by a communication from Mr. George B. Suttlefield, secretary of the municipal league, of Seattle, who says:—

"There has been some agitation during the last year or so with regard to the matter of tax certificates. The main point of this agitation has been that the rate of interest, 15 per cent. per annum, was extortionate, and an attempt has been made to reduce the figure.

"The habitual purchasers of tax certificates profess to be entirely easy upon the matter, and state that after considering the amount of property which they are obliged to hold for long periods of time, the irregularity of payments to them, and the difficulty of keeping all their funds working, they do not secure more than about seven per cent., although the certificates draw 15 per cent. They say, if the rate of interest is reduced by law to anything like seven or eight per cent., the result will be that no large purchases of tax certificates will be made, and consequently the county will be without the funds which are produced by the present arrangement. In response to the suggestion that the state or county invest surplus funds in these tax certificates, they point out that after a short time this will dispose of all the surplus funds and the situation will be as bad as before.

Many Foreclosures Recently.

"Generally speaking, the purchasers of tax certificates do not seek to acquire the property and are willing to give any reasonable amount of time to the owner to redeem, so that up to this time there has been little cause for complaint. At present, however, some of the largest buyers have for almost the first time in their experience found themselves so heavily loaded with investments of this kind that they have been following a general policy of foreclosure, with the idea of securing the return of some of the invested funds."

Baron Sakatani and associates, who were returning to Japan after attending the allied trade conference in Paris, were guests at a luncheon at Vancouver, at which Hon. Mr. Abe, Japanese consul, was host. Among those who made speeches were the mayor of Vancouver, Mr. F. W. Peters, president of the Canadian Club and general superintendent of the Canadian Pacific Railway, and Mr. C. Gardner-Johnson.

OCTOBER FIRE LOSSES

Month's Waste Was Over \$1,000,000—Several Lives Lost

The *Monetary Times'* estimate of Canada's fire loss during October amounted to \$1,078,815, as compared with September loss of \$981,703 and \$1,290,325 for the corresponding period of last year. The following is the estimate for the October losses:—

Fires exceeding \$10,000	\$ 865,000
Small fires	73,100
Estimates for unreported fires	140,715
	\$1,078,815

The *Monetary Times'* record for the past four years shows the following monthly losses:—

	1913.	1914.	1915.	1916.
January	\$3,913,385	\$2,796,312	\$1,249,886	\$1,649,217
February ..	2,037,386	2,920,749	1,019,556	3,275,600
March	1,710,756	2,660,666	1,631,696	1,406,501
April	1,470,622	1,916,235	1,463,747	1,460,437
May	2,123,868	1,935,516	881,855	1,850,205
June	3,069,446	1,267,416	1,157,156	494,557
July	2,579,698	2,033,139	773,269	1,159,285
August ...	3,034,775	2,921,379	403,693	803,109
September ..	1,468,324	1,356,281	1,116,109	981,703
October ...	1,383,572	1,326,565	1,290,325	1,077,815

The fires reported in October at which the losses amounted to \$10,000 and over were:—

Lindsay, Ont., Oct. 5.....	Produce warehouse...	\$300,000
Petrolia, Ont., Oct. 8.....	Factory	30,000
Athabasca, Alta., Oct. 9.....	Hospital	20,000
Acton, Ont., Oct. 11.....	Tannery	65,000
Pontypool, Ont., Oct. 12....	Church and residences	10,000
Port Hammond, B.C., Oct. 14	Business section	70,000
St. Stephens, N.B., Oct. 17..	Lumber mill	100,000
Blind River, Ont., Oct. 19..	Stores, etc.	20,000
Cornwall, Ont., Oct. 20....	Farm buildings	10,000
Lohdon, Ont., Oct. 20.....	Factory	30,000
Rimouski, Que., Oct. 20....	Monastery	25,000
Farnham, Que., Oct. 25.....	Hospital	135,000
Aylmer, Ont., Oct. 26.....	Stores	20,000
Waterford, Ont., Oct. 26....	Block	60,000

The structures damaged and destroyed included 15 residences, 12 stores, 10 barns, 7 factories, 3 hotels, 3 lumber mills, 2 schools, 2 hospitals, 1 bank, 1 opera house, 1 mess-room, 1 railway station, 1 church, 1 monastery.

Among the causes were 1 exploded lamp, 2 spontaneous, 2 overheated stove pipe, 2 incendiary.

The following table compiled by *The Monetary Times*, shows deaths caused by fire during the first nine months of 1916 compared with previous returns:—

	1909.	1910.	1911.	1912.	1913.	1914.	1915.	1916.
January	16	27	27	27	14	26	3	10
February ..	8	15	12	11	21	18	11	20
March	16	20	18	24	22	27	23	23
April	18	37	20	15	11	22	14	6
May	21	15	28	18	33	8	11	14
June	16	52	13	6	18	12	2	6
July	4	15	110	9	9	8	13	268
August	17	11	22	16	29	3	14	30
September ..	10	10	13	6	27	9	27	6
October ...	26	16	17	21	15	9	7	37

The fires at which fatalities occurred were:—

Adamsville, Que., Sept. 29..	Set clothing alight.....	1
Richard, Sask., Sept. 29...	Burning building	3
Ville Roy, Que., Oct. 3.....	Burning building	4
Prince Albert, Oct. 3.....	Burning building	1
Toronto, Ont., Oct. 6.....	Lighting fire with gasoline.	1
Athabasca, Alta., Oct. 9....	Exploded oil lamp	3
Marsden, Sask., Oct. 9.....	Set clothing alight	1
Montreal, Que., Oct. 10....	Playing with matches	1
Sutton, Que., Oct. 20.....	Burning residence	1
Belmont, Ont., Oct. 23.....	Burning calcium carbide..	1
Farnham, Que., Oct. 26....	Burning hospital	19
Port Williams, N.S., Oct. 31.	Burning building	5

RECENT FIRES

The *Monetary Times'* Weekly Register of Fire Losses and Insurance

Acton, Ont.—October 11—Acton Tanning Company. Loss, \$65,000. Insured.

Aylmer, Ont.—October 26—Central gas office, Cline's implement store, Jones' repair shop, Robert Karns' blacksmith shop, Leeman Parker's store, the Elgin Reformer printing office and Howe's implement store, and damage was done to adjoining stores. Loss, \$20,000.

Burnaby, B.C.—October 25—Mr. P. W. Fauvel's shingle mill, Sterling Avenue. Loss, \$3,000.

Farnham, Que.—October 25—St. Elizabeth's Hospital. Loss, \$135,000. Insurance, \$35,000. Nineteen deaths.

Clifford, Que.—October 27—Mr. T. E. Rosseau's residence.

Killarney, Man.—October 25—Grand Central Hotel and Red Store.

Saanich, B.C.—October 24—Two residences, Maywood Road. Loss, \$3,000.

St. Catharines, Ont.—October 25—Messrs. Baldry, Yerburch and Hutchinson's frame machine shop, Section 2, Welland Canal.

Waterford, Ont.—October 26—York Block. Loss, \$60,000, including Col. I. E. York, building, \$25,000, stock, drug, hardware and paints, \$18,000; H. A. Saunderson, general store, \$13,000; R. K. Robinson, jeweler, \$6,000. Cause, supposed burglars.

West Vancouver, B.C.—October 24—Mr. E. Bourdon's residence. Loss, \$1,000.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Victoria, B.C.—Fire Chief Davis' figures for September are as follow: Loss on buildings, \$2,782; loss on contents, \$6,000; total loss, \$8,782; insurance, buildings, \$16,600; insurance, contents, \$1,000; total insurance, \$17,600; property at risk, \$58,000.

Saskatoon, Sask.—Fire Chief Heath's report for September is as follows:—

September 7—Chicken shed of St. Paul's Hospital. Cause unknown. Loss, \$55. Insurance, Canada National; stock, \$100; building, \$500.

September 11—Crates of crockery, owned by Mr. J. F. Cairns. Cause, smoking cigarette. Loss, \$175.

September 13—Binder twine of International Harvester Company. Cause, match dropped in binder twine. Loss, \$1,200. Insured.

September 20—Straw stack. Cause unknown; prairie fire.

September 21—Prairie fire.

September 22—Boxes and rubbish. Cause, children playing with matches; household goods. Cause, head flying off burning match. Loss, \$25. Insurance, Canada National, contents, \$1,500.

Quebec, Que.—During September there were 41 alarms by signal boxes, including 10 false alarms; 17 alarms by messengers and telephones. Of these, 24 fires were in buildings and 34 were chimney fires, making a total of 58. There were 525 chimneys cleaned during the month of September. The following insurances and losses were reported: Insurance on properties, \$286,500; insurance on stocks and furnitures, \$29,750; losses on properties insured, \$6,392; losses on stocks and furniture insurance, \$7,029.25; losses on properties, stocks, furnitures not insured, \$1,637.

Vancouver, B.C.—The estimated loss by fire during the month of September was \$3,014; the insurance loss was \$2,854, leaving the property loss above insurance, \$160. The total value of property involved was \$161,225. The department responded to 47 alarms during the month, divided as follows: Fires where no damage occurred, 12; false alarms, 6; chimney fires, 11; fires where damage resulted, 15; smoke scares, 2; fires outside city limits, 1. The following list shows the causes of fires: Flying sparks, 9; defective fire-place, 1; defective brickwork around boiler, 1; unknown origin, 3; bush and grass fires, 4; upsetting oil stove, 1; electrical origin, 1; children playing with matches, 1; boys playing with torch, 1; exhaust pipe set fire to gasoline, 1; rubbish fire, 1; spontaneous combustion, 1; electric iron left turned on, 1; fire broke out again, 1.

MANUFACTURERS AND FIRE INVESTIGATION

Government Cannot Force Companies to Carry Undesirable Risks—Practice of Control May be Wrong

Just because some political opponents of Sir Adam Beck tried to belittle the waterworks system he installed for the city of London, on the ground that it had not had the effect he promised it would have on insurance rates, the Canadian Fire Underwriters' Association is now under investigation in Ontario by a commission, consisting of Judge Masten, and all sorts of wild rumors are in circulation that an attempt may be made to dissolve it, suggests Industrial Canada, the journal of the Canadian Manufacturers' Association.

The Canadian Fire Underwriters' Association, this authority adds, is probably well able to take care of itself. It is not altogether a philanthropic institution, and at times the insuring public may think it arbitrary and autocratic, but nevertheless the Canadian Fire Underwriters' Association has done a great deal towards placing insurance ratings on a scientific basis, and, while the truth of this statement may not be generally accepted, we know it to be a fact that the operations of the Canadian Fire Underwriters' Association have resulted in cheaper insurance through co-operation on the part of its members in reducing their expenses.

Safety Valve of Competition.

Presumably the object of this investigation is to enable the public to purchase insurance at a lower cost, but it is likely to prove a boomerang if it results in the initiation of any policy to control rates. The way things are at present, the insured is always protected by the safety valve of competition. If the rate of the tariff companies is considered too high, recourse can be had to the non-tariff companies, who are usually ready to underbid the board rate. If licensed companies refuse to quote a satisfactory rate, or are unable to give sufficient cover, the market of the unlicensed companies is always available. Business men have a vital interest in seeing that nothing is done to interfere with the effectiveness of that competition. But if rates are to be controlled in any way, if the law is to be laid down to licensed companies that, with respect to a certain class of risk, "thus much may you charge, and no more," there is certain to be trouble all around.

Rate Control May be Wrong.

Insurance companies may, perhaps, be restrained from discriminating unfairly between risks in the same general class, and of similar construction, occupation and exposure, but insurance companies cannot be compelled to carry any risk they don't want to carry, and they won't want to carry an individual risk, or a class of risk, at a rate which their experience has shown them to be unprofitable. Now, the returns filed with the superintendent of insurance will show that for the past thirty years the companies have not averaged more than 6 per cent. profit on their Canadian business. If, with a free hand, they are not able to do better than that for themselves, it is reasonable to assume that under a system of rate control their profits would be even less. The question, therefore, for buyers of insurance to ask themselves is, "Can we afford to see competition lessened by the withdrawal of any of the licensed companies from the field? Can we afford to invite a situation where none of the licensed companies will give us a cover?"

In theory, rate control may look all right, but in practice it may prove to be all wrong, as some of the states across the border have found out to their sorrow.

Mr. H. E. Morgan, of the labor supply department of the British ministry of munitions, has been temporarily detached by the minister for the purpose of proceeding to Canada, at the request of the imperial munitions board, to advise the board on British procedure in connection with labor in munition factories.

Mr. W. M. Ackworth, London, England, is to be appointed as a member of the Canadian railway board of inquiry, which is investigating the railway situation in the Dominion, in consequence of the resignation through ill-health of Sir George Paish. Mr. Ackworth has had much experience in railway matters. He was a member of several commissions on railway questions in Great Britain, and is the author of several works on the railways of the United Kingdom.

INSURANCE COMPANIES INVEST IN ALBERTA

Over \$29,000,000 Have Been Placed By Companies Doing Business There

Investments by insurance companies in Alberta total \$29,468,140, divided as follows:—

Life companies	\$26,789,992
Fire and miscellaneous companies	2,678,148

\$29,468,140

Twenty-seven Life Companies.

The various life companies' investments are as follow:—

Alberta-Saskatchewan, \$58,918; British Columbia, \$8,493; Canada, \$6,660,143; Continental, \$55,369; Crown Life, \$347,543; Confederation, \$509,847; Dominion, \$500,580; Equitable, \$1,349,075; Excelsior, \$744,585; Great-West, \$2,639,417; Gresham, \$8,500; Imperial, \$1,518,763; Independent Order of Foresters, \$687,521.

London and Lancashire, \$243,724; London, \$134,441; Manufacturers', \$2,586,617; Metropolitan, \$3,993,167; Mutual, \$1,108,958; Monarch, \$90,151; National, \$155,075; New York, \$124,750; North American, \$870,862; Northern, \$225,356; Prudential, \$420,602; Standard, \$664,592; Sovereign, \$62,315; Sun, \$1,020,516.

Fire and Other Companies.

The investments of the fire and miscellaneous companies are as below:—

Etna, \$24,625; American Central, \$30,000; Beaver, \$13,732; British Colonial, \$31,866; British Crown, \$20,000; Boiler Inspection and Insurance, \$65,500; Canada National, \$236,566; Commercial Union, \$188,063; Canada Hail, \$11,047; Continental, \$7,565; Canadian Surety, \$21,000; Canadian Casualty and Boiler, \$10,042; Dominion of Canada Guarantee and Accident, \$122,278; Fire Association of Philadelphia, \$25,000; General Accident, Fire and Life, \$66,684; General Accident, \$26,936; Globe and Rutgers, \$105,000; Globe Indemnity, \$30,000; Guardian Accident and Guarantee, \$10,000; Home, \$250,000.

Hudson Bay, \$32,434; Insurance Company of State of Pennsylvania, \$5,000; Imperial Guarantee and Accident, \$26,000; Law Union and Rock, \$203,988; Liverpool and London and Globe, \$8,000; Liverpool-Manitoba, \$25,000; London Mutual, \$2,150; Lloyds Plate Glass, \$4,350; London Guarantee and Accident, \$107,000; Merchants' Casualty, \$38,000; National Plate Glass, \$3,173; North American Accident, \$15,011; North Western National, \$35,000; National Ben Franklin, \$32,260; Northern, \$24,333; National Union Fire, \$45,222; North British and Mercantile, \$389,330; North Empire, \$2,100; Occidental, \$9,551; Protective Association of Canada, \$4,513; Phoenix of London, \$166,440; Pacific Coast, \$54,246; Springfield Fire and Marine, \$49,125; St. Paul Fire and Marine, \$75,000; United States Fidelity and Guaranty, \$25,000.

BRITISH COLUMBIA SULPHITE FIBRE COMPANY

An offering of \$650,000 first mortgage 6 per cent. serial gold bonds of the British Columbia Sulphite Fibre Company, Limited, is being made by Messrs. Peabody, Hough-teling and Company, 10 South LaSalle Street, Chicago. This is a part of the authorized issue of \$1,000,000. The bonds are secured by a first mortgage on all property now owned and that may be acquired by the company. The valuation of the security is timber limits, \$840,000; sulphite mill and water-power, \$1,235,980; tugs, scows, etc., \$29,006, a total of \$2,104,986, which, with the \$305,000 working capital, makes \$2,409,986. The cash investment of stockholders is \$940,000, the bond issue of \$650,000 making the total investment \$1,590,000. The prospectus states that the plant in 1912 was built with a capacity of 12,000 tons. It is now producing 22,000 tons of sulphite fibre per annum. The sulphite company's earnings at the present time is at the rate of \$700,000 per annum. For business already contracted for the earnings in 1917 will be in excess of \$1,000,000. It is estimated that the fair, normal earning capacity during the life of the bonds will be \$300,000.

The bonds are offered at par and accrued interest, except first maturity, which is on a 5 per cent. basis, and the second maturity is offered to net 5½ per cent.

LEGISLATION IS AFFECTING ALBERTA

Unfavorable Attention Attracted by Act Termed Volunteers and Reservists Relief Act

The serious and far-reaching effects of Alberta's Volunteers and Reservists Relief Act, both in the cities and country, does not appear to have received the careful consideration that such legislation would warrant. While ostensibly to protect the soldier, it has prevented the circulation of much capital in the province, and has, generally speaking, attracted unfavorable attention and caused injurious comment from outside sources.

At a meeting of the Mortgage Loans Association of Alberta it was decided to send copies of the following petition to the mayors and presidents of the boards of trade of the principal cities of Alberta, to the farmers' organizations and to every member of parliament, in the hope that sufficient pressure will be brought to bear to improve the present unsatisfactory state of affairs.

Petition to be Presented.

The petition is in the following terms:—

"That the Mortgage Loan Association of Alberta is in sympathy with every assistance, consideration and leniency being extended to bona fide soldiers.

"That the said Volunteers and Reservists Relief Act has been judicially interpreted as affording the same protection to members of local militia units, engaged in ordinary civil occupation, as to the bona fide soldier.

"That insolvent persons, mortgagors and other citizens, are joining these home battalions or units with the sole object of taking advantage of protection intended for the bona fide soldier.

"That the extension of the statute is prejudicial to the commercial interests of the province, and consequently seriously affecting the interests of the volunteer bona fide soldier whom we should all be endeavoring to protect.

"That the act prohibits sale or foreclosure proceedings not only where the mortgagor is a bona fide soldier, but also when a second, third, fourth and subsequent transferee, or a judgment creditor has joined a home unit.

"That the effect of the amendment to the land titles act which prohibits the issuing of an execution on a personal judgment in proceedings to enforce a mortgage or agreement of sale until after sale or foreclosure of the land, taken in conjunction with the Volunteers and Reservists Relief Act, has the effect of depriving the mortgagee or vendor of the opportunity of collecting from all parties personally liable when a volunteer or reservist appears to be in any way interested.

"That such delay is only deferring and not benefiting the class of citizen whom we consider is not entitled to the protection of the act.

Restrains Circulation of Money.

"That the delay and consequent accumulation of interest, taxes, legal and other charges, is depriving agents, managers and relations of opportunities of clearing titles, getting vacant properties occupied and productive, and thereby saving equities for the bona fide soldiers and their dependants, which are now being frittered away.

"That the interpretation of the act, as practically applying to any one who wishes to join one of the home units, is seriously restricting the loaning and circulation of money in the province.

"That the recent decision of the Honourable the Chief Justice of Alberta in Canada Life Assurance Company vs. Dickson, shows that the right reserved mortgagees under section 8 of the Volunteers and Reservists Relief Act, to take possession and collect rents, and generally protect the security, cannot be taken advantage of by reason of the wording of section 3 of said act.

"That section 10 of said act states:—

"This act may be repealed at any time in whole or in part by proclamation of the lieutenant-governor in council.

"Your petitioners therefore earnestly request that your government give the foregoing representations your careful consideration to the end that the act be so repealed as to protect only, and not injure, the interests of bona fide soldiers."

The petition is signed on behalf of the association by Mr. W. Toole, president, and Mr. J. S. McMurchy, secretary.

TO GET GERMAN TRADE

Enemy Sample Exhibition Has Been Practical Success—How Germans Traded

The German and Austrian samples collected by the British board of trade and brought to Canada at the request of Sir George Foster were on exhibition in Montreal from September 28 to October 7, and in Toronto this week and last. The exhibition may be shown at Halifax prior to its return to England. Both at Montreal and Toronto it has proved a great success. In the former city, there was an attendance of over 1,700, nearly all of whom were manufacturers. The Duke and Duchess of Connaught visited the exhibition on September 29th and spent some time in inspecting the samples. His Royal Highness expressed the hope that Canadian manufacturers would not neglect the opportunity of examining these samples of German and Austrian goods with a view to considering whether any of them can be made in Canada.

To Develop Overseas Trade.

In an interview given to the press, Mr. Herbert Kershaw, who is in charge of the display, said:—

"In developing overseas trade the question of elevating native races never entered the mind of the Teuton. He never hesitated to pander to their lower instincts and supplied them with manufactured articles which were the scum of human ingenuity and the very negation of civilized progress.

"While we must not emulate any of their evil methods there are two things we can do; prosecute trade with the combined genius we possess and maintain a vigorous outlook for any traps set by the enemy in the future. Military exhaustion is not synonymous with industrial exhaustion.

"I think that in the future our representatives should study with great care not only the language of a country, but also the colours, marks, designs and finish of articles in demand. If they are men with a particle of imagination they will study the manners and customs and even the symbols in vogue.

Some Important Details.

"It is highly important also, in the case of countries such as I have mentioned, to send out catalogues printed in the vernacular, to quote prices in the currency of the country, to employ the dimensions in common use and to pack things in the way which pleases the importer.

"Germany's cunning has extended still further. She has developed her trade in these countries by giving long credit. Particularly in the Orient and in Latin America the natives refuse to do business on a 30-day basis. Germany has made it a practice to give them plenty of time to meet their bills."

FOR THIRTY YEARS

"I have been reading *The Monetary Times* for nearly thirty years, and under no consideration would I like to do without it, for even one week, as I get much valuable information from its pages."—Letter from an Ontario bank manager.

PROSPERITY IN THE WEST

"All indications show that the volume of immigration into Canada from the United States at the close of war will be large," said Mr. W. P. Hinton, traffic manager of the Grand Trunk Pacific Railway, at Montreal.

There has been a gratifying movement of settlers into Western Canada during the past summer. These settlers have been possessed of means and good equipment. They were doubtless attracted by the lower prices of farm lands which generally prevailed and by the certainty that even if one crop can be secured, equal to the general yield of last year, the entire purchase price of the land will be regained. Western Canada is on the eve of much development and prosperity.

Farmers are prosperous; their purchasing power was never so great. An illustration of this fact is that approximately \$2,000,000 more than any other year has been expended by the rural population in the purchase of automobiles. In fact, the automobile seems to have become a farm necessity.

YEAR ENDING 30TH SEPTEMBER, 1916.

ARTHUR HEWITT,
General Manager.

We beg to report the completion of the audit of the books and vouchers of the Consumers' Gas Company of Toronto, for the year ending 30th September, 1916, and certify to their correctness.

Toronto, 21st October, 1916.

(Signed) W. E. SAMPSON,
EDMOND GUNN, F.C.A., } Auditors.

The following gentlemen were unanimously re-elected Directors for the ensuing year:—A. W. Austin, A. H. Campbell, Sir Wm. Mortimer Clark, K.C., LL.D., Herbert Langlois, Thomas Long, Sir Edmund Osler, M.P., Wellington Francis, K.C., F. LeM. Grasett, M.D., John Hoskin, K.C., LL.D., D.C.L.

At a meeting held subsequently Mr. A. W. Austin and Mr. Wellington Francis, K.C., were unanimously re-elected President and Vice-President, respectively.

SOVEREIGN FIRE TO WITHDRAW DEPOSIT**New York State Has Completed Its Examination—
Reinsurance of Outstanding Policies**

The report on an examination of the Sovereign Fire Assurance Company, Toronto, by the New York insurance department has been completed and placed on file. The company requested the examination in order that it might be permitted to withdraw a part of its deposit in New York state. It is probable that the insurance department will permit the company to do this, as the examination showed that most of the policy obligations had been terminated by the assureds' acceptance of the policy of the Globe and Rutgers, which reinsured the Sovereign's business.

The report states that the New York insurance department holds total assets of the Sovereign to the amount of \$215,516 as of May 31st, 1916. Again these assets were liabilities of \$1,605 for an outstanding loss and a possible small claim filed against the company by the receiver for the Franklin Fire. These liabilities, however, still leave assets in this country in excess of \$200,000. The report in part is as follows:—

Assured with Globe and Rutgers.

From an examination of the company's reinsurance schedules at the home office in Toronto, Canada, it was found that the total outstanding policy liability on contracts issued by the Sovereign, including those issued by the Acme Fire Insurance Company and not yet terminated, on May 31st, 1916, amounted to the sum of \$314,937. Of this amount, \$221,612 expires during the remaining seven months of 1916; \$89,225 during the year 1917, and \$4,100 in the year 1918.

The company has been anxious, and has expressed a desire to withdraw a part of its capital deposit, and to such end,

with the approval of this department, made an effort to replace its policies by substituting those of the Globe and Rutgers and to cancel the balance before the terminating date. That its efforts in this direction have been largely successful is evidenced by the fact that policy obligations on May 31st, 1916, amounting to \$225,645, of a total outstanding of \$314,937.50, have been assumed by the Globe and Rutgers under a certificate signed by the assured in each case. The provisions of the certificate, it is assumed, relieve the Sovereign from any liability and preclude any action against the company for claims that may be presented on account of the original contract having been executed between the Sovereign and the assured.

Evidence of Cancellation.

For the balance, or \$89,292.50, the company was unable to present actual evidence of cancellation, although \$17,655 of said amount presumably is canceled, for the reason that canceled checks for the return premium have been returned, properly endorsed, by the assured in answer to the company's request for cancellation, in the form of a registered five-day cancellation notice, the policies evidently having been lost or mislaid.

Assuming the cancellation of such policy obligation, there still remains outstanding \$71,637.50, for which no evidence was submitted canceling direct the Sovereign policies. Such amount includes \$25,854 policies of the Franklin Fire Insurance Company reinsured by the Sovereign. It must be understood that, notwithstanding the efforts of the company to cancel its policy obligation, the fact remains that the Globe and Rutgers Fire Insurance Company of New York reinsured this liability under the several contracts enumerated above, and are legally liable and financially responsible to provide for the payment of any claim that may become due thereunder.

COMMERCIAL AND INSURANCE COMBINATIONS

Wherein They Differ is Explained to Ontario Fire Insurance Commission by Fire Underwriters' Secretary

At the Ontario fire insurance rates inquiry, before Judge Masten, Mr. John A. Robertson, the secretary of the Underwriters' Association, presented the following statement, which had been asked for at the previous sitting of the commission:—

I am asked to explain the essential differences between an ordinary combination controlling the price and output of commodities and an insurance combination, and why the latter in some form has been admitted by all inquirers into the subject to be necessary to the successful carrying on of the fire insurance business.

The first difference lies in the fact that the manufacturer or dealer in any specified article knows when he sells it what its cost is, and, therefore, whether or not he will make a profit on it. An insurance policy, on the contrary, may either result in a loss or a profit, and the price can only be fixed on the past average of as large a number as possible of similar transactions. Any one or a number of these transactions may result in loss, due either to what may be termed the normal course of the business or to such occasional, but certain, disasters as conflagrations, the incident and extent of which can never be determined. The companies, therefore, combine so as to obtain the widest possible range of experience, and on this wide average, rates are named, and the companies' members of the combination agree in the interest of their continued solvent existence that they will require these rates.

Less than Approved Rates.

The element of chance, however, is so strong in fire insurance and the competition for greater revenue so keen that there are always companies, or their officers, who, under pressure from agents or from large insurers, are willing to accept business, particularly big business, at less than the approved rates, in the hope that the particular transaction may not result in loss. This pressure is felt most strongly by the smaller and weaker companies, who are under the necessity of keeping up income in order that the fixed charges required for offices, salaries, and such like are maintained at a reasonable percentage of the income. In Ontario, many companies have been organized to demonstrate that tariff rates are too high, and what has been the melancholy result? Since 1890 no less than thirty have been compelled to go out of business, and if we take the wider field of North America, we find that no less than one hundred and forty-nine companies have failed or retired since January, 1910.

It may be pointed out that in the United States, where by short-sighted legislation associations of insurance companies have been prohibited, it has been found necessary, as, for instance, in Iowa, Michigan and New Jersey, afterwards to authorize the establishment in one form or another of rating bureaus, which, while useful in checking discrimination, do not provide that prompt response to changing conditions that regular meetings of companies, who are in direct contact with the insuring public and agents, bring about.

Methods of Improving Conditions.

The second feature that distinguishes associations of insurance companies from other combinations is that their methods of doing business automatically bring about constantly improving conditions by which the public benefits. The methods particularly referred to are the various services of inspection for municipalities and individuals, the expert free information and advice respecting construction and protection given to property owners, architects and builders, and the rating of risks by schedules which definitely penalize defects and give credit for every detail of merit. It is plain that single companies acting individually would be unable to maintain staffs of experts competent for these various services, and it is equally plain that an individual company would be powerless in making recommendations to municipal authorities, or even to the owner of an important plant. In fact, it is certain, and experience has proved it, that co-operation on the part of the companies is the only plan by which improvement may be brought about, or even good conditions maintained. It has been demonstrated in the United States that where there has been unrestricted com-

petition in fire insurance, conditions have always deteriorated and losses increased.

This brings us to the last point—the solvency of the companies as affecting the buyer of indemnity. When an individual purchases an article from a manufacturer or dealer he seeks to obtain it at the lowest price. Having secured it, it is then a matter of perfect indifference to him whether the seller, as a consequence of this low price, loses money on the transaction, or even becomes bankrupt. It is entirely different with an insurance policy, which has its only value in case of loss, and this value depends absolutely on the standing of the company at that time.

Maintenance of Rates is Necessary.

The maintenance of adequate rates, therefore, is necessary for the continued existence of solvent insurance companies, upon which the whole commercial existence of the country is dependent, and these rates, owing to the peculiar characteristics of the business, can only be properly made by the combined experience of a number of companies. The past has shown that the absence of combinations for fire insurance rating (and this condition has not been infrequent in the United States) resulted, first, in lower rates in the particular section affected; second, in the falling off of good conditions, owing to the loosening of united control, and the consequent increase of losses; third, to the weakening and elimination of smaller companies and the eventual lessening of competition; and fourth, to enormous discriminations between risks of similar character, the large insurer always obtaining the advantage.

Necessary to Combine.

The only one of these that on the surface appears to benefit the community is the first, viz., the temporary reduction of rates, but even this has been of so partial and discriminatory a character that no real good resulted from it. It must be recalled also that insurance companies are only collectors and distributors, and if, therefore, in any section too low rates are obtained, some other section must unquestionably make this good.

The argument, in short, therefore, is this, that owing to the price value of any single fire insurance contract being unknown, it is necessary for the companies to combine in order, by their united experience, to fix rates, which, in the average, will cover the aggregation of risks of a similar class; that this combination enables effective services to be given that is to the advantage and in the interest of the public; and finally, that only by combination and by agreement to maintain adequate rates can the companies remain in such a financial condition as will enable them to fulfil their duty of providing the necessary security to the public in the event of any and every fire disaster.

CUSTOMS OFFICER AT NEW YORK

Editor, *The Monetary Times*:

Sir,—In your issue of the 20th inst. you state that the Hon. Dr. Reid has refused the request of British Columbia for the appointment of a customs officer in New York. I understand that, so far as is known here, the position has not yet been definitely settled, and British Columbia still believes that Ottawa will do the right thing.

Sir Geo. Foster in his interview here clearly showed us he thought there was a good deal in our contention, though the Hon. Dr. Reid tried to sidetrack it by promising at some future date a subsidized Canadian steamship line from eastern Canadian ports to the Pacific with an eye to procuring traffic for the Intercolonial Railway, and incidentally hauling goods many hundreds of miles out of their course—an obviously wasteful proceeding. Undoubtedly the cost of subsidizing such a line would be enormous for some years to come.

If the request is refused, it simply means British Columbia is being sacrificed by those in power in Ottawa for the benefit of the Canadian railway corporations, with the practical result that, owing to various causes, the benefits of water transport between eastern manufacturers and western markets, and vice versa, are denied to this province, and goods that cannot stand the heavy railway haul across the continent will be obtained from our neighbors across the line.

Yours faithfully,

Julius H. Griffith.

Vancouver, B.C., October 25th, 1916.

She's Daddy's Girl-

The very sunshine of his life. He's planning great things for her—if he lives.

And if he dies---well, he's proud of the fact that she will then receive---regularly---each month---as long as she lives---a cheque from The Imperial Life to provide for her every need.

You can provide in this way for *your* little girl. Our free booklet tells all about it. Write for a copy. Address—

To Investors

THOSE WHO, FROM TIME TO TIME, HAVE FUNDS REQUIRING INVESTMENT, MAY PURCHASE AT PAR

DOMINION OF CANADA DEBENTURE STOCK

IN SUMS OF \$500 OR ANY MULTIPLE THEREOF.

Principal repayable 1st October, 1919.

Interest payable half-yearly, 1st April and 1st October by cheque (free of exchange at any chartered Bank in Canada) at the rate of five per cent per annum from the date of purchase.

Holders of this stock will have the privilege of surrendering at par and accrued interest, as the equivalent of cash, in payment of any allotment made under any future war loan issue in Canada other than an issue of Treasury Bills or other like short date security.

Proceeds of this stock are for war purposes only.

A commission of one-quarter of one per cent will be allowed to recognized bond and stock brokers on allotments made in respect of applications for this stock which bear their stamp.

For application forms apply to the Deputy Minister of Finance, Ottawa.

DEPARTMENT OF FINANCE, OTTAWA,
OCTOBER 7th, 1916.

OCTOBER MUNICIPAL BOND SALES

Home Market Absorbed Average Amount of Securities—
Factors Affecting Trading Noted

The municipal bond sales in Canada for October, as compiled by *The Monetary Times*, amounted to \$1,461,665, compared with \$960,455 for September and \$1,245,874 for the corresponding period of last year.

Comparing the record of October, 1915, with that of the month just ended, the bond sales are as follow:—

	1916.	1915.
Canada	\$1,461,665	\$1,245,874
United States		1,589,000
	<u>\$1,461,665</u>	<u>\$2,834,874</u>

The municipal bond sales for the past month reflect quiet business in these securities due to various factors including the allotment of the war loan, the absence of the larger municipalities from the market, the absorption of British exchequer bonds, Anglo-French bonds, and Russian bonds, and Dominion debenture stock.

The municipal bond sales in Canada during the first ten months of the past five years, according to *The Monetary Times'* bond record, were as follow:—

	1912.	1913.	1914.	1915.	1916.
Jan. ...	\$2,133,531	\$1,337,500	\$1,953,137	\$1,784,947	\$1,909,441
Feb. ...	2,596,378	1,038,806	5,995,336	3,047,011	1,419,909
Mar. ...	1,926,716	335,492	5,123,176	2,572,357	2,027,741
April ...	927,160	3,693,857	2,847,953	8,603,094	1,979,852
May ...	1,928,748	880,630	6,400,755	3,464,281	2,649,000
June ...	1,690,344	2,435,726	4,617,857	2,395,744	3,395,583
July ...	1,967,476	1,591,924	2,180,758	1,618,422	1,485,225
Aug. ...	1,649,547	526,300	395,395	1,087,415	852,447
Sept. ...	1,998,605	1,663,260	535,050	2,768,484	960,435
Oct. ...	1,396,664	2,481,062	622,049	1,245,874	1,461,665

Canadian municipal bonds sold in the United States during the first ten months of 1916, compared with sales of 1914 and 1915, were as follow:—

	1914.	1915.	1916.
January	\$ 340,000		\$3,183,215
February	\$ 50,000	6,471,000	899,500
March	18,000	6,543,947	595,000
April	25,000	7,100,825	2,158,000
May	1,750,000	600,000	7,219,000
June	2,100,000		3,168,743
July	1,130,000	890,000	3,540,000
August	35,000	750,000	97,300
September	90,000	6,748,342	317,000
October		1,589,000	

The following are the particulars of the sales in Canada by provinces:—

Quebec	\$955,000
Nova Scotia	226,000
Ontario	134,725
Saskatchewan	54,590
Manitoba	42,300
British Columbia	25,000
Alberta	24,050

\$1,461,665

The following are the details:—

Quebec.			
Quebec R.C. Schools	\$200,000	5	1921-36

Mr. W. M. Martin, M.P. for Regina, upon invitation of the Lieutenant-Governor, accepted the responsibility of forming a new cabinet as follows for Saskatchewan: Premier and minister of education, Hon. W. M. Martin; president of council and minister of railways, Hon. J. A. Calder; attorney-general and provincial secretary, Hon. W. F. A. Turgeon; minister of agriculture, Hon. W. R. Motherwell; minister of public works, Hon. A. P. McNab; minister of telephone, Hon. Geo. Bell; minister of municipal affairs, Hon. George Langley; provincial treasurer, Hon. Charles A. Dunning.

Fifty Years in Business

"I am very pleased to see that *The Monetary Times* will soon celebrate its fiftieth birthday. This is certainly a fact to be proud of in Canadian journalism. It is one of the few financial papers which we receive regularly, and it is never filed until I look thoroughly through it."—*Extract from letter of the manager of an important investment and loan corporation.*

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

(Continued from page 16.)

Brazilian Traction, Light and Power Company, Limited.—Messrs. Wm. A. Read and Company have purchased \$7,500,000 of three-year 6 per cent. secured gold notes of the Brazilian Traction, Light and Power Company, Limited. This is the first offering of South American securities, other than government or municipal bonds, made in New York.

Canada Steamships Lines, Limited.—Mr. J. W. Norcross, vice-president and managing director; Mr. F. S. Isard, comptroller; and Mr. C. A. Barnard, director of Canada Steamships Lines, have sailed for London. The trip is in connection with English business relating to the ships that have been chartered for service on the other side during the war.

North Atlantic Fisheries, Limited.—This Halifax Company has sold its Port Hawkesbury plant to Messrs. Leonard Brothers, of Montreal and St. John, and is thus enabled to pay off the claim of the bank for a sum approximating \$100,000, and for which the bank was pressing. This money had been loaned, and liquidation of the company was threatened. The directors had given their personal guarantee for the debt.

To meet the situation previous to this sale the company held a special meeting and authorized the issue of \$250,000 in 6 per cent. bonds at 75 of par. This issue has been withdrawn.

Ford Motor Company of Canada, Limited.—Writing *The Monetary Times*, Mr. W. R. Campbell, secretary of the company, gives the following information: For about a year and a half prior to December 1st, 1915, this company paid dividends at the rate of 10 per cent. quarterly on the old capitalization, which would be approximately at the rate of 6 per cent. on the present capitalization. The last dividend at this rate was paid on December 1st of last year. Shortly prior to that date the company had paid a cash dividend of 500 per cent. on the old capitalization.

Since December 1st last it has not appeared expedient to the directors of the company to pay cash dividends, consequently the regular dividend was suspended at that time, since when no cash dividends have been paid.

International Paper Company.—This company, which has large Canadian interests, will in the next two months renew contracts or the greater part of its 1917 output of newsprint. Mr. P. T. Dodge, president of the company, has notified customers that the price would not be less than three cents per pound, f.o.b. mill.

The price, three cents per pound, f.o.b. mill, is equivalent to about one and a quarter cents per pound over the price and terms at which it is understood last year's contracts were closed. If the company's mills maintain their output at 1,800 tons daily, the increase of one and a quarter cents would mean additional gross next year of almost \$25,000,000 from newsprint alone.

In the last four months, during which time the profits from newsprint were not materially larger than they were in 1914, the company earned more than \$2,000,000.

International Nickel Company.—When the plans for its proposed construction and improvement work in Canada have been completed the International Nickel Company will have increased its capacity approximately 40 per cent., or from an annual output of 60,000,000 pounds of nickel to between 80,000,000 and 90,000,000 pounds.

Original plans called for the expenditure of \$2,000,000 on a Canadian refinery. The management, however, decided later to increase facilities all along the line through a single appropriation, and \$5,000,000 was then decided upon as the prospective investment. The refinery will cost about \$2,000,000. Smelting facilities at the Canadian Copper Works will be enlarged and water-power capacity will be increased.

The nickel company handles about 850,000 tons of ore annually, the average grade of which runs about 4½ per cent. nickel. Copper values average about one-half the nickel

content, or 2¼ per cent. The company saves about 92 per cent. of the nickel.

The nickel turned out in the Canadian plant will be for the use of Great Britain and its dominions. This output, it is estimated, will be from 20,000,000 to 30,000,000 pounds a year. With an increase in nickel output copper yield is expected to automatically increase from about 30,000,000 pounds to better than 40,000,000 pounds per annum.

North American Pulp and Paper Company.—Interest has been shown in the common stock of this company on the Toronto and Montreal exchanges unlisted departments. The company was organized in May, 1915, and controls, through stock ownership, the Chicoutimi Pulp Company, the St. Lawrence Pulp and Paper Corporation, and the Tidewater Paper Mills Company. The two first-named companies have 510,000 acres of freehold land and 850,000 acres on Crown licenses, which are estimated to contain 22,000,000 cords of pulpwood. They are at present operating on long-term contracts for the disposal of their product, of which the present production is said to be about 120,000 tons yearly, and plan to ultimately increase their output to 300,000 tons of mechanical and sulphite pulp. The Tidewater Paper Mills Company has its mills in New York and Brooklyn, and plans to shortly increase its output to 120,000 tons of newsprint yearly.

The capitalization of the companies is \$2,000,000 6 per cent. preferred stock, cumulative from April 1st, 1917, and 1,000,000 shares of common having no par value. There are no bonds. The directors of the companies are:—

Trustees—Rufus L. Wilfor and Gilbert Hodges, Jr., Boston, Mass.

Officers—J. E. A. Dubuc, president; John H. Duffy, vice-president.

Executive Committee—W. H. Clark, George W. Robertson, W. H. Sharp, Philadelphia, Pa.; John H. Duffy, New York; J. E. A. Dubuc, Chicoutimi; P. W. Herrick, Cleveland; G. T. Oliver, Pittsburgh, Pa.

The names of four prominent Canadians, Senator Wilson, Hon. Rodolphe Lemieux, Mr. C. S. Wilcox and Mr. Wallace Nesbitt are mentioned as being added to the directorate.

Nova Scotia Steel and Coal Company.—One important decision regarding new developments by the company was reached at the recent meeting, namely, to enlarge the company's shipbuilding activities by building a second ocean-going vessel about 25 per cent. larger than the first ship, now under construction. The frames of the first are all up and the double bottom practically placed. It should be ready for launching in the spring, and work on the second will be started immediately.

In the Eastern Car Company's works a drop forgings plant and an electric furnace are being installed. These will make the works self-contained in practically every respect, and will obviate delays now unavoidable in the securing of special parts required for car construction. In addition to some foreign business, the company is busy on an order for 500 fifty-ton cars for the Transcontinental Railway. The cars are intended for the carrying of oats, and are of an exceptionally large type, the largest ever constructed in Canada, and call for a capacity of 3,265 cubic feet. This order will be finished towards the end of the year.

"You have only to read the reviews of the iron and steel markets in the United States to understand what the position is here," was a remark of Col. Cantley. "Demand continues to outrun supply, and with costs rising the natural tendency of prices is higher. There is nothing in sight just now to check that tendency. It is not a runaway market, for a runaway market implies swift reactions. The movement has been steadily upward, practically without interruption."

As regards forward business, the company is booked practically to capacity to the middle of 1917. Business had been offered for the second half of the year, but the company had seen no reason for making haste in accepting contracts further ahead than the first half of the year; rather the contrary.

Beyond stating that there had been no discussion on the subject at the meeting, Col. Cantley gave no information about the prospects of a dividend on the common shares.

The directors and officers present were: Col. Thomas Cantley, president; Hon. J. D. McGregor, first vice-president, New Glasgow; William D. Ross, second vice-president, Toronto; J. Walter Allison, George S. Campbell, Halifax; Frank Stanfield, Truro; Frank W. Ross, Quebec; Lorne C. Webster, Montreal; and N. B. McKelvie, New York.

The Most Important Point

after making your will, is to arrange so that its provisions will be properly carried out, and that your estate will receive efficient and economical management.

If you appoint a friend or relative as your executor, you have only the good health, strength, and honesty of such individual to rely on.

By having a Trust Company administer your will, you overcome those risks, and give your heirs the benefit of the experience gained in the management of many estates

One of our Officers will be pleased to arrange an interview or correspond with you in regard to your will or its administration.

INTERNATIONAL INSURANCE SUPERINTENDENTS

An international organization, comprising chiefly the life insurance companies' superintendents in Canada and the United States, was formed at Chicago last week. It is known as the Association of Life Agency Officers. At the organization meeting, six Canadian companies were represented as follows: Mr. A. G. Ramsay, Canada Life; Mr. A. N. Mitchell, Canada Life; Mr. George H. Hunt, Imperial Life; Mr. E. J. Harvey, North American Life; Mr. L. J. Spalding, Manufacturers' Life; Mr. Fred. Halstead, Dominion Life; and Mr. E. E. Reid, London Life.

About seventy Canadian and United States companies were represented at the meeting. Mr. George H. Hunt, of the Imperial Life, Toronto, was elected a member of the executive council. Among the objects of the association are the betterment of salesmanship conditions in the life insurance business, the better training of salesmen, and the elimination of undesirable practices. Most of the Canadian companies will probably be represented in the new association in due course. The Canadian members hope to bring to Canada one of the association's annual conferences within the next year or two.

SEPTEMBER RAILWAY RETURNS

The Canadian Pacific Railway's September return shows the following results: Gross earnings, \$12,134,160; working expenses, \$7,004,401; net profits, \$5,129,759. For three months ended September 30th figures are: Gross earnings, \$37,652,068; working expenses, \$23,037,430; net profits, \$14,614,638. In September, 1915, net profits, \$4,745,301, and for three months ended September 30th, 1915, \$10,988,018.

The returns for the calendar year to date follow:—

Month.	Gross.	Change.	Per cent.
January	\$ 8,588,826	+ \$2,479,799	40.6
February	8,795,830	+ 2,060,151	31.0
March	10,380,981	+ 2,527,992	32.2
April	10,881,306	+ 3,425,446	45.9
May	12,472,167	+ 5,210,671	71.8
June	11,892,609	+ 4,380,575	58.3
July	12,247,440	+ 4,352,064	55.1
August	13,270,467	+ 4,460,015	50.7
September	12,134,159	+ 1,860,994	18.11

The Grand Trunk Railway's figures for the same month are:—

	Earnings.
Gross	\$4,616,997
Expenses	3,028,943
Net September, 1916	\$1,508,054
Net September, 1915	1,176,649
Increase	\$ 341,405

Those of the Canadian Northern Railway System are as below:—

	1916.	1915.	Inc. or dec.
Total gross earnings. \$	3,187,900	\$2,757,000	+ \$ 430,900
Operating expenses . . .	2,455,300	1,847,100	+ 608,200
Net earnings	732,600	909,900	— 177,300
Aggregate gross earnings from July 1st..	10,707,000	6,702,300	+ 4,004,700
Aggregate net earnings from July 1st..	3,002,000	1,854,000	+ 1,148,000

Three copper properties west of Port Arthur, Ont., on the line of the Canadian Northern Railway, are attracting attention. The holdings are located at Mine Centre, Rocky Islet, and at a point eighty-four miles west of this place. At the latter place the owners are constructing a narrow-gauge railway to cross the six miles of country intervening between the property and the railway line. There is at Mine Centre a vein of copper 80 feet in width exposed for 350 feet. Three shafts have been sunk and several branches have been cut across. The first carload of ore shipped returned a percentage of 5.46 copper, a second car ran 6.81 per cent., and the third car more than 8 per cent. From the deposit to which the narrow-gauge railway is being constructed 342 tons of ore, averaging 7.11 per cent. copper, have been shipped.

SIX PER CENT. EXCHEQUER BONDS

Details of Britain's Newest Securities—Unlimited Amount at Par

Much interest is shown here in the issue of 6 per cent. exchequer bonds in Great Britain. These securities have proved very attractive to investors, and many sales of these bonds have been made in Canada. They are being issued at par through the Bank of England, and interest will be payable half-yearly from the date of purchase, on February 16th and August 16th—the whole to be repayable at par on February 16th, 1920.

The principal and interest are chargeable on the consolidated fund of the United Kingdom. The bonds are issued in denominations of £100, £200, £500, £1,000 and £5,000, and bear interest at 6 per cent. per annum, payable half-yearly by coupon, the first coupon on each bond representing interest from the date upon which payment for the bond is made until the next succeeding day on which a half-yearly payment of interest is due.

In Event of Future Loans.

In the event of future loans (other than issues made abroad, or issues of exchequer bonds, treasury bills or similar short-dated securities) being raised by His Majesty's government for the purpose of carrying on the war, bonds of this issue, if accompanied by all undue coupons, will be accepted as the equivalent of cash to the amount of their face value for the purpose of subscription to any such loan. Interest accrued to the date of the surrender of a bond will be paid in cash.

Bonds may be registered in either of the following forms, viz.:—

1. Registered 6 per cent. exchequer bonds, 1920, transferable in the bank transfer books.
2. Registered 6 per cent. exchequer bonds, 1920, transferable by deed.

Without Income Tax Deduction.

Holdings of registered bonds, which will be transferable in any sums which are multiples of £5, may be re-converted at any time, in whole or in part (in multiples of £100) into bonds to bearer with coupons attached, such re-conversion being effected by means of a transfer executed under the provisions ordinarily applying to the transfer of government stocks.

Dividends on registered bonds of this issue will be paid without deduction of income tax, but the income derived from such dividends will be assessable to income tax in the hands of the recipients at the rates of tax appropriate to their respective incomes. Dividend warrants will be transmitted by post. A warrant for the amount of the first dividend payable will be forwarded when due to the holder, or, in the case of a joint holding, to the first holder in whose name the bonds are originally registered.

Exempt from Taxation.

Bonds of this issue, and the interest payable from time to time in respect thereof, will be exempt from all British taxation, present or future, if it is shown, in the manner directed by the treasury, that they are in the beneficial ownership of a person who is neither domiciled nor ordinarily resident in the United Kingdom of Great Britain and Ireland. Further, the interest payable from time to time in respect of bonds of this issue will be exempt from British income tax, present or future, if it is shown, in the manner directed by the treasury, that the bonds are in the beneficial ownership of a person who is not ordinarily resident in the United Kingdom of Great Britain and Ireland, without regard to the question of domicile.

Where a bond belongs to a holder entitled to exemption under these provisions the relative coupons will be paid without deduction for income tax or other taxes, if accompanied by a declaration of ownership in such form as may be required by the treasury.

The issue of these bonds has turned funds from investment in a large number of other securities.

Evidence of interest manifested in the sheep industry in Southern Alberta was furnished at the Canadian Pacific Railway sale at Coaldale, when 3,600 sheep were sold at prices ranging from \$8 to \$14 per head.

8% NET FARM MORTGAGES

We want \$1,000 on each of thirty-two quarter sections of first-class land. Principal re-payable in five years; interest payable the First of January and the First of July. All expenses paid by the Mortgagors. Titles examined by MacDonald, Craig, Tarr & Ross.

LEGAL NOTICES

THE WHITE COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 5th day of October, 1916, incorporating Wilfrid Maynard Cox and Howard Armour Harrison, barristers-at-law, William John Beattie, student-at-law, and Richard George Roberts and John Frederick Van Lane, accountants, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, build, buy, sell, repair, convert, alter, let on hire, deal in, import and export, automobiles, motor cars, motor boats, motor trucks, stationary, portable and traction engines, tractors, tools, machinery, implements, gas engines, steam engines and all other types of engines, and the various parts and equipment thereof, and to carry on generally an automobile business in all its branches; (b) To carry on any other business, (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To acquire or undertake the whole or any part of the business, property, good-will and liabilities of any person or company carrying on any portion of the business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company, and to pay for the same in cash, bonds or paid-up shares or partly in cash and partly in bonds or paid-up shares of the company, as may be agreed upon; (d) To apply for, purchase or otherwise acquire any patents, copyrights, licenses, concessions and the like, conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights, or information so acquired; (e) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person, firm, association or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person, firm, association or company, and to take or otherwise acquire shares, bonds, and securities of any such company, and to sell, hold, issue or re-issue, with or without guarantee, or otherwise deal with or dispose of the same; (f) To take, acquire, lease, hold, sell and dispose of real estate and personal property of every nature and kind as security for or in satisfaction wholly or in part of debts, liabilities or obligations incurred or to be incurred in respect of or in connection with the business aforesaid, or any of the purposes or objects of the company; and to purchase, lease, erect, or otherwise acquire, exchange, sell, let, assign, transfer, or otherwise dispose of, own, maintain, develop and improve any and all property, real and personal, necessary to effect the carrying out of the purposes of the company; (g) To consolidate or amalgamate with any other company having objects similar in whole or in part to those of the company; (h) To accept in payment of any debt or debts due or owing to the company, the stock, shares, bonds, debentures of any other company or companies, and, notwithstanding the provisions of section 44 of The Companies Act, to use any of the shares, bonds, debentures or other securities, or the funds of the company, to purchase or otherwise acquire and to take, hold, assign, transfer or sell the shares, bonds, debentures or other securities of or in any other company or corporation, and to guarantee the payment of the principal of and interest on the bonds, debentures or dividends upon the shares of any other company or corporation, and while holding such shares, bonds, debentures or other securities of any other company or corporation to exercise all the rights and powers of ownership thereof, including the right to vote thereon through such agent or agents as the directors may appoint, and to distribute such shares, bonds, debentures or other securities or any assets of such other company in specie upon a division of profits or distribution of capital among the shareholders; (i) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (j) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors in business) or the dependents or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (k) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (l) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business and in particular any machinery, plant, stock in trade; (m) To construct, improve, maintain, work, manage, carry out or control any roads, ways, branches or sidings, bridges, reservoirs, water-courses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (n) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (o) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (p) To procure the company to be registered and recognized in any foreign country and to designate persons resident therein according

to the laws of such foreign country to represent this company and to accept service for and on behalf of the company of any process or suit; (q) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars or catalogues, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (r) To sell, lease, transfer or dispose of the undertaking of the company or any part thereof, to such person, firm or company for such consideration as the company may think fit, and in particular either for cash or for shares, bonds, debentures or securities of any other company (whether promoted by this company or not) having objects altogether or in part similar to those of the company, or partly for cash or partly for such shares, bonds, debentures or securities; (s) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares or whose bonds or debentures or obligations are held by the company, or with which it may have business relations, and to do any act or thing for the preservation, protection, improvement or enhancement of the value of any such shares, bonds, debentures or other obligations, and to act as employee, agent or manager of any such corporation and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (t) To lease, purchase, construct, own, maintain and alter any buildings or work necessary or convenient for the purposes of the company and to take options on lands and buildings belonging to others and to exercise such options or not as may be deemed expedient; (u) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the real and personal property, rights and franchises of the company and to give options thereon or any part thereof; (v) To invest and deal with the moneys of the company not immediately required in such manner as the directors may from time to time determine; (w) To employ brokers, commission agents and underwriters upon any issue of shares, bonds, debentures or other securities of the company and to provide for the remuneration of such person or any other persons rendering services of any kind to the company; (x) To remunerate any person, firm, association or company for services rendered or to be rendered in placing or assisting to place or guaranteeing the placing of any of the shares in the company's capital or any debentures or other securities of the company, or in or about the formation, promotion, organization or incorporation of the company or the conduct of its business; (y) To pay all or any costs, charges or expenses preliminary or incidental to or incurred in connection with the promotion, organization, formation, establishment, registration and incorporation of the company; and to purchase or otherwise acquire on such terms and in such manner as the directors of the company from time to time decide any shares of the capital stock of this company, provided that the consideration therefor be paid out of the company's profits or surplus, if any, and not out of the capital of the company; (z) The business or purpose of the company is from time to time to do any one or more of the acts and things herein set forth either alone or in conjunction with others or as principals, factors, contractors or agents, and to do all and everything necessary, suitable and convenient or proper for the accomplishment of any of the purposes or the attainment of any one or more of the objects herein enumerated or incidental to the powers herein named, or which shall at any time appear to be conducive to or expedient for the protection or benefit of the company; and it is hereby declared that in the interpretation of this clause the meaning of any of the objects of the company shall not be restricted by reference to any other object or by the juxtaposition of two or more objects, and that in the event of any ambiguity this clause shall be construed in such manner as to widen and not to restrict the powers of the company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The White Company, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 11th day of October, 1916.

THOMAS MULVEY,
Under-Secretary of State.

THE MANOR ESTATES, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 17th day of October, 1906, incorporating Robert Abercrombie Pringle, Thomas Anderson Burgess and Louis Cote, barristers-at-law; Robert Hatfield Pringle, customs broker, and Mary Ida Keays, stenographer, all of the city of Ottawa, in the Province of Ontario, for the following purposes, viz.:—(a) To acquire by purchase, lease, exchange, concession or otherwise, city lots, farm lands, mining or fruit lands, town sites, grazing and timber lands, and any description of real estate and real property or any interests or rights therein, legal or equitable or otherwise, howsoever; to take, build upon, hold, own, maintain, work, develop, sell, lease, exchange, improve and otherwise deal in and dispose of such lots, lands, sites, real estate and real property or any interest therein; to deal with any portion of the lands and property so acquired, subdividing the same into building lots, and generally laying the same out into lots, streets and building sites for residential purposes or otherwise; (b) To construct streets upon the land of the company, necessary sewerage and drainage system, to build upon same for residential purposes or otherwise, and to supply buildings so erected with electric light, heat, gas, water or other requisites therefor; (c) To act as agents for the sale and purchase of real estate and all interests therein and to procure real estate investments for any person; to act as selling agents for the owners of any real estate, subdivision, building sites, town sites or lands of any kind or any interest therein, and to take over and acquire from any person or corporation any agency, inclusive or otherwise, for the sale of any such lands, sites or interest therein, and to accept an assignment of and perform any contracts made by any person with any other person or corporation for the sale of any such lands,

LEGAL NOTICES

sites or interest therein as agents or otherwise and generally to act as real estate, house and rental agents, and as incidental thereto to carry on the business of fire insurance agents; (d) To apply for, purchase or otherwise acquire, any patents, licences, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property rights or information so acquired; (e) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (f) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise, and comply with any such arrangements, rights, privileges and concessions; (g) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Manor Estates, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 19th day of October, 1916.

THOMAS MULVEY,
Under-Secretary of State.

17-2

VAN DER LINDE RUBBER COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 26th day of October, 1916, incorporating Sophia Tutty, bookkeeper, Ella Lester Kelly, Susie Ross and Myrtle Etoile Thurgarland, stenographers, William Archibald McFarlane and Vincent Thomas Aloysius Foley, students-at-law, and Lester Millman Keachie, barrister-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on the business of manufacturers of and dealers in rubber and moulded goods and goods and products in which rubber of any kind whatsoever or any analogous substance may be used and to manufacture and deal in plastic goods, materials and products of all kinds whatsoever, and to cultivate rubber plants, guayule and all other plants capable of being used for the manufacture of rubber or similar products and plastic goods, and to carry on the business of rubber plantations in all of its branches, and to carry on and work the business of manufacturers, winners and buyers of every kind of rubber plants and vegetable, mineral or other product of the soil; to prepare, manufacture and render marketable any such product, and to sell, dispose of and deal in any such product, either in its prepared, manufactured or raw state, either by wholesale or retail, and to carry on the business of chemists and electricians, and manufacturers of and dealers in all kinds of chemicals and electrical goods; (b) To buy, sell, manufacture, refine, manipulate, import, export and deal in all substances, apparatus and goods capable of being used in any such business as aforesaid or required by customers of or persons having dealings with the company, either by wholesale or retail; (c) To own, construct, operate, manage and deal with ships, barges, vessels and other marine craft, and so far as may be expedient to carry on the business of general merchants and buy, lease or otherwise acquire and to clear, plant and work rubber estates and plantations or any interest therein, as may be deemed advisable in the interests of the company; (d) For the purpose of supplying the needs of the company's business, to purchase, lease or acquire any interests in lands, water powers and water privileges and to develop therefrom any power, electrical or other energy needed for said business on or outside the lands of the company and to use and transmit the same and to sell, lease or dispose of said lands or interests therein and to sell or dispose of surplus power or energy not required for the needs of the company and to enter into working arrangements with other companies, persons, firms or corporations for the use or transmission of such surplus and to establish, operate and maintain any electric, gas or other lighting, heating or power plant and to sell or dispose of such surplus electric, gas or other light, heat and power and all the residual products of such plant; provided, however, that any sale, distribution or transmission of electric energy for light, heat and power beyond the lands of the company shall be subject to all provincial and municipal laws and regulations in that behalf; (e) To acquire by purchase, lease, concession, exchange or otherwise, land, buildings and hereditaments of any tenure or description and any estate or interest therein, and any right over or connected with land, and to turn the same to account as may seem expedient, and to construct, reconstruct, erect, alter, operate, maintain and manage all buildings, erections, factories, shops, storehouses, depots, machine shops, engine houses and other constructions and erections for its business and to hold, improve, decorate, furnish such buildings and erections as may be deemed proper, and to acquire as aforesaid all other property, movable and immovable, necessary and useful for carrying on any of the purposes of the company, and with power to sell, lease, exchange or otherwise dispose of any such property, lands or interests therein or rights thereover as the company may deem proper; (f) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (g) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (h) To apply for, purchase or otherwise acquire and use, any inventions, patents, brevets d'invention, trade marks, trade names, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited

right to use, or any secret or other information as to any invention or discovery which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop, improve or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (i) To enter into partnership or any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (j) To take, or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company, notwithstanding the provisions of section 44 of the said Act; (k) To enter into any arrangement with any government or authorities, supreme, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such government or authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (l) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors in business) or the dependents or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (m) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (n) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business and in particular any land, buildings, easements, machinery, plant, stock in trade, as may be required and to construct, maintain and alter any buildings or works necessary or convenient for the purposes of the company; (o) To construct, improve, maintain, develop, work, manage, carry out or control any roads, ways, tramways, branches or sidings, bridges, reservoirs, watercourses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (p) To invest and deal with the moneys of the company not immediately required in such manner as may from time to time be determined, and to lend money to such persons and on such terms as may seem expedient, and in particular to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (q) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company; (r) With the approval of the shareholders, to remunerate any person or company by the issue of fully paid-up stock or otherwise, for services rendered or to be rendered in placing or assisting to place or guaranteeing the placing of any of the shares in the company's capital, or any debentures, bonds or other securities of the company, or in or about the formation or promotion of the company or the conduct of its business; (t) To issue paid-up shares, bonds, debentures or other securities of the company in payment or part payment for any property or rights which the company may desire to acquire or, with the approval of the shareholders, for any services rendered or to be rendered or for any work done or to be done for the company or in or towards the payment or satisfaction of debts or liabilities owing by the company; (u) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (v) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (w) To do all such other things as are incidental or conducive to the attainment of the above objects; (x) None of the powers given by any paragraph aforesaid are to be restricted or limited by reference to or inference from any other paragraph. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "van der Linde Rubber Company, Limited," with a capital stock of three hundred and fifty thousand dollars, divided into 3,500 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 26th day of October, 1916.

THOMAS MULVEY,
Under-Secretary of State.

18-2

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended October 27th:—

Dominion Reduction Company, 83,000; Nipissing Mining Company, 305,925. Total, 388,925 pounds, or 194.4 tons.

The total shipments since January 1st, 1916, now amount to 25,953,492 pounds, or 12,976.7 tons.

DIVIDENDS AND NOTICES

Tenders will be received by the undersigned up to and including Thursday, the 9th day of November next, for the right to cut the Red and White Pine timber on lots 1 and 2, concession 5; lots 1 and 2, concession 6, Township of Janes; lots 1 and 2, concession 1, Township of McNish, and lot 12, concession 1, Township of Pardo, in the District of Nipissing, which timber has been partly damaged by fire.

Tenderers will state the price they are prepared to pay per M. ft. B.M. for the Red and White Pine timber, in addition to the Crown dues of \$2 per M. ft. B.M.

The burnt Pine is to be removed during the present season of 1916-17, and all the merchantable Red and White Pine by the 30th April, 1918.

Each tender is to be accompanied by a marked cheque for \$2,000, payable to the Order of the Honorable the Provincial Treasurer, and the successful tenderer will be required to enter into bonds in a sufficient amount, with sureties, as a guarantee of the payment of the price and the due performance of terms and conditions of sale.

Tenderers are not to tender for each area separately, but are to make one tender for the combined areas, comprising 3½ square miles, more or less.

For further particulars and Blue Print showing the area in question, apply to the undersigned.

G. H. FERGUSON,

Minister of Lands, Forests and Mines.

Toronto, October 20th, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

BARCELONA TRACTION, LIGHT AND POWER COMPANY, LIMITED.

NOTICE.

Notice is Hereby Given that the Annual General Meeting of the Shareholders of **Barcelona Traction, Light and Power Company, Limited**, will be held at the office of the Company, Manning Arcade, King Street West, Toronto, Canada, on Wednesday, the 29th day of November, 1916, at the hour of 12 o'clock, to receive the First Annual Report of the Board of Directors for the year ended 31st December, 1915, approve agreement of 9th April, 1915, referred to in Directors' Report, and the carrying out of the same, for the election of Directors for the ensuing year, and the transaction of such other business as may be transacted at a General Meeting, and that at the conclusion of the Annual Meeting a Special General Meeting of the Shareholders will be held for the purpose of sanctioning an amendment to By-law No. 2 of the Company, removing the prohibition therein contained on the issue of bonds, debentures or other securities for sums of less than one hundred dollars each.

Should you be unable to attend the meetings in person, kindly sign the proxy, returning same to this office, at your earliest convenience.

Holders of Bearer Warrants wishing to attend and vote at the meetings must, on or before the 13th day of November, 1916, deposit their warrants at the offices of the Company, Manning Arcade, King Street West, Toronto, Canada, or 34 Bishopsgate, London, E.C., who will deliver to the depositor a certificate in the prescribed form, entitling him to attend and vote at the meetings in the same way as if he were a registered member of the Company in respect of the shares specified in the certificate.

By order of the Board.

U. deB. DALY, Secretary.

Toronto, Canada, 26th October, 1916.

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of February, 1917, for the right to cut pulpwood and pine timber on a certain area situated on the Black Sturgeon River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure, for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honourable the Treasurer of the Province of Ontario, for ten thousand dollars (\$10,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$10,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,

Minister of Lands, Forests and Mines.

Toronto, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

BANK OF MONTREAL

Notice is hereby given that a Dividend of Two-and-one-Half per Cent., upon the paid-up Capital Stock of this Institution, has been declared for the current quarter, also a Bonus of One per Cent., both payable on and after Friday, the First Day of December next, to Shareholders of record of 31st October, 1916.

By order of the Board,

FREDERICK WILLIAMS-TAYLOR,

General Manager.

Montreal, 20th October, 1916.

THE ROYAL BANK OF CANADA.

DIVIDEND No. 117.

Notice is hereby given that a Dividend of Three per cent. (being at the rate of Twelve per cent. per annum) upon the Paid-up Capital Stock of this Bank, has been declared for the current quarter, and will be payable at the Bank and its Branches on and after Friday, the first day of December next, to Shareholders of record 15th November.

By order of the Board.

C. E. NEILL,

General Manager.

Montreal, P.Q., October 17th, 1916.

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of December next for the right to cut pulpwood and pine timber on a certain area situated on the Pic River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet, board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honorable the Treasurer of the Province of Ontario, for twenty-five thousand dollars (\$25,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$25,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,

Minister of Lands, Forests and Mines.

Toronto, August 28th, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

THE CANADIAN BANK OF COMMERCE.

DIVIDEND No. 119.

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this Bank has been declared for the three months ending 30th November next, together with a bonus of one per cent., and that the same will be payable at the Bank and its Branches on and after Friday, 1st December, 1916. The Transfer Books of the Bank will be closed from the 16th to the 30th of November next, both days inclusive.

By Order of the Board,

JOHN AIRD,

Toronto, 27th October, 1916.

General Manager.

CANADA CEMENT COMPANY

PREFERENCE SHAREHOLDERS

DIVIDEND No. 27.

Notice is hereby given that a dividend of 1¼% for the three months ending September 30th, 1916, being at the rate of seven per cent. per annum, on the paid-up Preference Stock of this Company has been declared, and that the same will be paid on the 16th day of November next, to Preference Shareholders of record at the close of business October 31st, 1916.

The Transfer Books of the Company will be closed from November 1st to 10th, both days inclusive.

By order of the Board of Directors.

H. L. DOBLE,

Secretary.

UNION BANK OF CANADA.

DIVIDEND No. 119.

Notice is hereby given that a Dividend at the rate of eight per cent. per annum, upon the Paid-up Capital Stock of the UNION BANK OF CANADA, has been declared for the current quarter, together with a bonus of 1 per cent., and that the same will be payable at its Banking House, in the City of Winnipeg, and also at its branches on and after Friday, the 1st day of December, 1916, to Shareholders of record, at the close of business, on the 15th day of November, 1916.

The transfer books will be closed from the 16th to the 30th of November, 1916, both days inclusive.

By Order of the Board,

G. H. BALFOUR,

General Manager.

Winnipeg, October 19th, 1916.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over \$5,000.00, and he has built up a future income of over \$3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

ACCOUNTANT, 31 years, twelve years' banking experience, wishes to make change. Would like position with financial or commercial firm having good prospects. Apply Box 9, *Monetary Times*, Toronto.

SUCCESSFUL BANKER, with wide experience as Manager and also four years as Manufacturer and in Wholesale, seeks investment in a sound financial or other Company where his services would be required. Is capable of taking over correspondence, advising on investments or acting as secretary-treasurer. Small capital at present, but can increase to a good round amount later. Box 11, *The Monetary Times*, Toronto.

SCOTCHMAN of good education and ability, with 6 years' residence in Canada and many years Secretarial and Commercial experience in London and Africa in positions of trust, seeks similar position in one of the Cities, East or West. Limited amount of Capital introduced if necessary. Correspondence invited. Retlaw, Box 254, Calgary.

WANTED, by an experienced Fire Insurance Man, position as Special Agent for some good office. Accustomed to handling agents, and inspecting all kinds of risks. Best references as to ability and character. Box 13, *The Monetary Times*, Toronto.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

The following table compiled by *The Monetary Times*, gives the bank loans to municipalities since August, 1913, to the latest month this year for which figures are available:—

	1913.	1914.	1915.	1916.
January	\$29,301,620	\$35,952,805	\$32,015,371	
February	30,372,854	38,437,903	35,149,915	
March	31,890,843	41,227,449	38,649,462	
April	30,168,812	43,031,360	44,371,050	
May	33,689,577	43,948,436	43,924,036	
June	37,260,571	46,889,816	46,773,032	
July	36,372,334	44,029,446	42,385,096	
August	\$41,310,281	39,664,534	46,020,730	39,882,811
September ..	37,465,383	44,338,873	43,928,331	38,708,745
October	37,846,369	47,316,076	45,682,230	
November ..	35,173,817	44,706,055	41,064,550	
December ..	30,518,573	38,256,947	30,878,028	

Port Arthur, Ont.—A by-law ratifying the agreement with Mr. A. G. McIntyre, for the erection of a pulp mill has been carried.

Sherbrooke, Que.—An issue of \$75,000 5 per cent. 1945 Protestant school bonds have been sold to Messrs. W. A. Mackenzie and Company, Toronto, and Messrs. Nesbitt, Thomson and Company, Montreal.

Bruce County, Ont.—Tenders are required for an issue of \$42,000 5½ per cent. 10-installment bonds. The closing date for bids is November 24th. N. Robertson, county treasurer, Walkerton. (Official advertisement appears on another page.)

Montreal, Que.—A loan of \$5,000,000 has been authorized, but for the present an issue of \$3,800,000 5 per cent. 40-year gold bonds is to be made. The Bank of Montreal is making the offering on behalf of the city. The bonds will be in denomination of \$1,000, with interest coupons attached. The securities will be dated November 1, 1916, and will fall due November 1, 1956, at 5 per cent., payable half-yearly. Tenders for the whole amount close on November 13.

Vancouver, B.C.—One of the proposed amendments to the city charter is that the council be authorized to raise by debentures \$5,000,000 in yearly instalments of \$1,000,000 each for the purpose of relieving taxation during the next five years, from 1917 to 1921, inclusive, by money by-laws voted on by the electorate. It was pointed out that under this the burden of improvements that have been made would be extended over five more years, which would give a measure of immediate relief to the ratepayers.

Saskatchewan.—The following is a list of bond applications granted by the local government board:—

School Districts.—Springbrook, \$2,600, 20-years, not ex. 8 per cent. annuity. Secretary-treasurer, G. E. Seymour, Fort Qu'Appelle; Sich, \$400, 10-years, not ex. 8 per cent. annuity. J. B. Chartrand, Marcellin; Eyre, \$1,700, 10-years, not ex. 8 per cent. annuity. J. J. Daley, Eyre; Speers, \$2,000, 10-years, not ex. 8 per cent. annuity. S. C. Wilson, Speers; Dollard, \$5,500, 20-years, not ex. 8 per cent. instalment. H. Cressy, Dollard; Wabash, \$1,600, 10-years, not ex. 8 per cent. annuity. E. J. Suedtke, Willmar; Sibbald Lake, \$1,500, 10-years, not ex. 8 per cent. annuity. J. Davidson, Glasslyn.

Rural Telephone Companies.—Tribune, \$10,600, 15-years, not ex. 8 per cent. annuity. E. T. Spera, Tribune; Borden, \$4,000, 15-years, not ex. 8 per cent. annuity. W. W. Hoffman, Borden; South Ceylon, \$4,500, 15-years, not ex. 8 per cent. annuity. R. L. Boal, Ceylon; Dandy Rose, \$4,000, 15-years, not ex. 8 per cent. annuity. F. B. Seibold, Kendal; La Fleche, \$12,500, 15-years, not ex. 8 per cent. annuity. D. J. Toland, La Fleche; Eclipse, \$14,000, 15-years, not ex. 8 per cent. annuity. F. I. Wright, Success; North Bienfait, \$1,600, 15-years, 8 per cent. annuity. A. Nelson, Bienfait; Lac Pelletier, \$10,000, 15-years, not ex. 8 per cent. annuity. C. R. Hunter, Swift Current; South Melaval, \$8,700, 15-years, not ex. 8 per cent. annuity. R. A. Crosby, Melaval.

Villages.—Blaine Lake, \$500, instalment, 5-years, interest not ex. 8 per cent. J. J. Coffin, Blaine Lake; Sneers, \$1,250, instalment, 7-years, interest at 8 per cent. S. C. Wilson, Speers.

DEBENTURES FOR SALE

TENDERS FOR DEBENTURES

Tenders will be received up to 2 o'clock p.m. on Friday, 24th November, 1916, for \$42,000.00 debentures of the County of Bruce. Debentures are issued for Patriotic purposes, payable in ten annual instalments. Interest 5½%. Principal and interest payable 20th December each year at Bank of Commerce, Walkerton. Coupons attached. Equalized assessment of County \$28,192,131.00. Debenture debt \$202,039.39, including this issue. Delivery to be accepted and payment to be made at Walkerton on delivery of debentures on December 20th, 1916.

Tenders will be opened at County Treasurer's office, Walkerton, on Friday, November 24th, 1916, at 2 p.m. Tenders to be marked "Tender for debenture," and addressed to

NORMAN ROBERTSON,
County Treasurer, Walkerton.

LEGAL NOTICE

COMMERCIAL CHEMICALS, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 23rd day of October, 1916, incorporating Earl Adlai Seburn, accountant; Percy Robinson, student; Ethel May Lennox and Margaret Jane Martin, stenographers, and Marcus Smith, student-at-law, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz:—

(a) To manufacture, buy, sell and deal in goods, wares and merchandise; and in particular and without in any way restricting the generality of the foregoing to manufacture, buy, sell and deal in chemicals; (b) To carry on any other business (whether manufacturing or otherwise) which may be deemed necessary for the company's business; (c) To sell or dispose of the undertaking of this company or any part thereof for such consideration as this company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of this company; (d) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account, or otherwise deal with all or any part of the property rights of the company; (e) To do all or any of the above things, as principals, agents, or otherwise, and either alone or in conjunction with others; (f) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Commercial Chemicals, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 24th day of October, 1916.

THOMAS MULVEY,
18-2 Under-Secretary of State.

SHAWINIGAN WATER & POWER STOCK

In May, the company issued to shareholders \$1,361,250 common stock at 115 in the ratio of one share of new stock to 10 shares of old. The British treasury's permission was obtained to allow English holders to participate, which they did freely. As to the amount of new capital received by the company in this way from the United Kingdom, Mr. James Wilson, secretary, in a statement to *The Monetary Times*, says:—"It is difficult to determine this owing to the fact that subscriptions from English shareholders were in many cases received from Canadian and New York bankers. It is difficult for us to determine any figure that would be approximately correct before all the interim certificates are turned in."

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

**A Good Living Wage
A Profitable Future
A Provision For Old Age**

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

Coin and bullion.....	16,236,672	741,660	730,290	61,530,774	201,813,961	276,160,378
Total trade.....	93,351,338	92,484,262	161,797,951	1,061,594,273	1,136,979,384	2,014,364,634

*Note.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending Sept., 1916, were: imports 1916, \$50,608,343; 1915, \$107,185,428, and exports 1916, \$225,552,085; 1915, \$94,628,533. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

BRITISH LOAN IN NEW YORK

As in the previous British loan in the United States, Canadian securities are being used as collateral in the loan floated this week, those of the Dominion government and Canadian Pacific Railway being mentioned in the official announcement of Messrs. J. P. Morgan and Company, managers of the underwriting syndicate, in the details of the new \$300,000,000 5½ per cent. collateral gold loan of the British government, the subscription books for which were opened on Tuesday and which are to close November 8, or earlier, in their discretion. One-half of the loan, \$150,000,000, will mature in three years and the other half in five years. The three-year notes will be sold at 99¼ and interest, yielding about 5¾ per cent., while the five-year obligations will be offered at 98½ per cent. and interest, netting about 5.85 per cent. The notes which are coupon in form, and in denominations of \$1,000, \$5,000 and \$10,000, will be dated November 1, 1916. Principal and interest (May 1 and November 1) will be payable without deduction for any British taxes, present or future, and will be payable either in New York at the office of Messrs. J. P. Morgan and Company, in United States gold coin, or, at the option of the holder, in London in sterling at the fixed rate of exchange of 4.86¼ to the pound. Each maturity is to be subject to redemption, in whole or in part, at the option of the government, on 30 days' notice, as follows:—

From	To		Three-year	Five-year
Nov. 1, 1916	Oct. 31, 1917, inclusive		103 & int.	105 & int.
1917	1918, "		102 & int.	104 & int.
1918	1919, "		101 & int.	103 & int.
1919	1920, "			102 & int.
1920	1921, "			101 & int.

The loan will be secured by the deposit of miscellaneous collateral having a value of at least \$360,000,000, divided into two groups of \$180,000,000 each, and will be deposited with the Guaranty Trust Company, of New York. The pledged securities are: Group I. Stocks, bonds and other securities of American corporations (including the Canadian Pacific Railway Company) and bonds and other obligations (either as maker or guarantor) of the government of the Dominion of Canada, the colony of Newfoundland, or Provinces of the Dominion of Canada, and Canadian municipalities, aggregate value not less than \$180,000,000. (Of the foregoing there will be somewhat over \$100,000,000 in aggregate value of securities of corporations of the United States and of the Canadian Pacific Railway Company.) Group II. Bonds and other obligations (either as maker or guarantor) of any or all of the several following governments, to wit: Commonwealth of Australia, Union of South Africa, New Zealand, Argentina, Chile, Cuba, Japan, Egypt and India, and approximately \$25,000,000 value in bonds or other obligations of dividend-paying British railway companies: Aggregate value not less than \$180,000,000.

Vickers, Limited, Montreal, has an order for two 7,000-ton steamers for Norwegian owners.

War Risks of Canadian Life Companies

NUMBER of Soldiers Being Recruited in Canada, and the Heavy Casualty Lists Have Rendered it Advisable for Life Companies to Adopt Strict Regulations in the Interests of Policyholders as a Group—Experience of Other Wars is not a Guide for Actuaries.

NO data based upon insurance experience were available from which to ascertain the rate of war mortality thus far experienced in Canada, so Mr.

Arthur B. Wood, actuary of the Sun Life Assurance Company of Canada, told the members of the Actuarial Society of America, in an address, from which the following interesting information has been secured.

Figures relating to war claims from nine companies were obtained by Mr. Wood. The combined business of the nine companies, in force in Canada on December 31, 1915, amounted to \$691,916,933, or over 83 per cent. of the total Canadian business of Canadian companies.

The prolongation of the war, the large number of men being recruited in Canada and the heavy casualties have rendered it advisable to adopt stringent regulations. Accordingly new clauses have been introduced by all of the companies. In considering the form in which these clauses are drawn reference should be made to the provision of section 95 (b) of the Dominion insurance act and also to a ruling of the superintendent of insurance in regard thereto. Section 95.(b) requires that every policy delivered in Canada shall contain in substance a provision, "that the assured may without the consent of the company engage in the active service of the militia of Canada, notice thereof, however, to be given by, or on behalf of, the insured to the company within ninety days after the date of his so engaging in such service and such extra premium to be paid during the continuance of such service as the company shall fix in pursuance of the terms of the policy." Most of the Canadian companies were prepared to permit service in the militia of Canada for the defence of Canada without any restriction. One company, in fact, had adopted a clause containing the express provision that "the assured may engage in the service of the militia of Canada without extra premium or reduction of the sum assured." This was done in the belief that section 95 (b) applied only to service in the militia of Canada under the militia act, as ordinarily interpreted; that is to say, for the immediate defence of Canada, and not to service with forces specially recruited for overseas duty. There appears to be considerable doubt, however, as to the exact status of Canada's overseas forces, but the superintendent of insurance, following a ruling of the department of justice, has notified the companies that these forces are deemed to fall under the designation "militia of Canada," in that they are "mili-

tary forces" of Canada. The new clauses have therefore been drafted with this ruling in mind.

The points covered by the new clauses resolve themselves under the following headings:—

(a) Service in the militia of Canada within Canada. Seven of the nine companies impose no restriction on such service. In the remaining two cases no distinction is drawn between service in the militia and other military or naval service.

(b) Service in the militia of Canada outside of Canada. All of the companies permit service in the militia of Canada outside of Canada provided that the company be notified and the extra premium paid within ninety days after entering upon such service, or, where service within Canada is permitted without restriction, before leaving Canada, whichever date may be the later.

(c) Other military, naval or aeronautic service. The regulations of three companies are the same as those which apply to service in the militia outside of Canada, while six require also that the consent of the company shall be obtained.

(d) Extra premiums. Six companies require such annual extra premiums as the company may fix, two provide that the extra premiums shall not exceed 15 per cent. per annum of the sum assured, and one, whose clause is quoted in full above, charges a single extra premium, graded according to the amount of the insurance. The last company also agrees to refund, after the conclusion of the war, such portion of the extra premium as shall be determined by the company according to its experience under such policies.

(e) Conditions if provisions of clause be not complied with. On failure to comply with the provisions of the war clause, one company's policy is rendered null and void, three provide for the return of all premiums paid with 5 per cent. compound interest if death occurs during such service or within three (or six) months thereafter, three return the legal reserve and two agree to pay 25 per cent. of the face value of the policy.

(f) Duration of the restriction. In eight of the companies the operation of the clause is not limited in duration. One company limits the restriction to the duration of the present war between Great Britain and Germany and other enemy countries.

Three companies do not at present accept applicants who have enlisted for overseas service, or who state that

they intend to do so. Six companies accept, usually on the 20-year endowment plan, for an amount not exceeding \$5,000. The extra premiums now charged range from 7½ per cent. to 15 per cent. per annum of the sum assured. Individual risks only are accepted and then only provided the applicant declares that it is his intention to pay the premiums himself and to continue the policy permanently.

Several of the companies have attempted to estimate the amount of assurance at risk on the lives of persons who have enlisted for overseas service, but as permits are not required under policies issued prior to August, 1914, it has been found impossible to obtain even an approximate idea of the amount of the exposures. The general effect of the war claims upon the mortality as a whole may, however, be observed by comparing the actual claims of the year with the expected by the standard valuation table. In the following table the percentages which the net death losses (sums assured less reserve thereon) during the year ended December 31, 1915, were of the expected by the $O^{(6)}$ table are shown for eight of the nine companies, (a) excluding war claims, and (b) including war claims. The percentages which the gross war claims were of the mean business in force in Canada are also shown. The companies are not referred to by name, but are tabulated in the order of the percentages in the second column.

**Effect of War Claims of Nine Canadian Companies
During the Year Ended December 31, 1915.
Canadian Business Only.**

No.	Percentage Total Canadian Claims of Expected by $O^{(6)}$ Table		Net War Claims. Per Cent. of Expected by $O^{(6)}$ Table.	Gross War Claims. Per Cent. of Mean Total Canadian Business in Force.
	(a) Excluding War Claims.	(b) Including War Claims.

9	Not given		—	.098
Total...	46.1	58.4	13.3	.134

Mortality is Favorable.

The total mortality including war claims is seen to have been remarkably favorable in every instance, the ratio of actual to expected ranging from 42.6 per cent. to 72.9 per cent., while for the eight companies combined it was 58.4 per cent. The net loss under war claims for the combined companies was 13.3 per cent. of the expected claims. The gross war claims for the nine companies combined were .134 per cent. of the mean Canadian business in force. The corresponding figures for the Mutual Life of New York as given to the Actuarial Society were .107 per cent. for Canada, and .196 per cent. for the combined business in all countries engaged in the war. The gross Canadian claims incurred by the nine companies were \$5,834,822, of which \$900,869, or 15.2 per cent., were due to the war. The corresponding ratio for ten British offices is 8.7 per cent., but as the annual reports from which the figures were taken were for the year 1914, the war claims in the case of those companies whose year ends on December 31, would be those incurred during the first five months of the war only. The war claims reported by the Canadian companies include deaths from all causes among combatants and also deaths among non-combatants through acts of war, such as the sinking of the "Lusitania" and other vessels.

In the annual statement for 1915, recently received from one of the large British offices, the total death claims for the year are reported to have been £472,672, of which £67,541, or 14.3 per cent., were war claims. The actual mortality was 90.3 per cent. of the expected and excluding war claims 76.4 per cent. The war claims of this particular company were therefore 13.9 per cent. of the expected mortality as compared with 13.3 per cent. for the Canadian companies. The report stated that the mortality apart from war claims was above the average, the reason advanced being the increased death rate among elderly people due to the anxiety and strain caused by the war. The Canadian companies, on the other hand, appear to have experienced a particularly favorable mortality apart from war claims, but the proportion of aged policyholders in Canadian companies is probably much lower than in the British company. The preceding figures show that as far as the Canadian companies are concerned the war claims during 1915 have had no disturbing effect upon the mortality as a whole.

Exposed to Risk.

What we are chiefly interested in, however, is the rate of mortality among persons actually exposed to the war risk. The results of an attempt to ascertain the rate of war mortality, by making an estimate of the war exposures of the Mutual Life of New York. For the combined business in the six countries principally affected by the war, there was obtained a loss ratio of only 2.7 per cent. This on its face appears to be low. The rate of mortality in the British army during the whole period of the South African war, as ascertained by Messrs. Schooling and Rusher, was 5.3 per cent. per annum among officers and 3.8 per cent. among non-commissioned officers and men. Considering the deadly nature of the present conflict, one would naturally expect a much higher death rate than in the South African war and this opinion is confirmed by such experience as is at present available.

Not Fixed Extra Premiums.

The general consensus of opinion among British and Canadian actuaries, as reflected by the extra premiums charged to cover the war risk, is also in accord with the view that a much heavier death rate than 5 per cent. per annum may be anticipated. At the outbreak of the war the extra premium recommended by the British Life Offices Association in connection with new assurances was 7 guineas per cent. for the combatant branches of the service. This rate was shortly afterwards increased to 10 guineas, and later on it was decided to leave the question of extra premium to the individual judgment of each office. The extra premiums charged at the present time by the British offices vary from 10 guineas to as high as 30 guineas per cent. This latter rate, of course, is practically prohibitive.

Statistics of previous wars are no indication of the mortality rate likely to be experienced in the present European war. Such information as is available indicates that the rate of mortality has already been high, and no one can predict what the future experience will be.

Considering the uncertainty attached to the question, Mr. Wood thinks it is a wise precaution not to fix the extra premium definitely in advance when issuing a policy, but to retain the right to readjust the rate from time to time according to the judgment of the company.

Up to October 31st, 9,275 automobile licenses have been issued by Alberta's provincial secretary, against 5,500 for 1915. A large percentage of the new licenses have been granted to farmers.

MANUFACTURERS SEEK INFORMATION

Enemy Samples Will Be Shown at Halifax and St. John —Over 2,500 Visited Exhibit in Toronto

The exhibition of enemy samples, loaned to Canada by the British government's board of trade, at the request of Sir George Foster, minister of trade, Ottawa, closed its doors in Toronto on Tuesday. Arrangements are now being made for the exhibits to be shown in Halifax and St. John. During the two weeks the exhibition was in Toronto it was attended by 2,591 persons. Of this number all but 391 were manufacturers and business men. The 391 were students.

The visitors to the exhibit came from 115 cities. Toronto naturally headed the list of attendance by cities, with 950 visitors. Hamilton and Kitchener each brought 100 men, 20 came from London, 20 from Guelph, 22 from Galt, 18 from Brantford, 20 from Peterborough and 12 from Montreal.

Toronto was Third.

The largest attendance at the exhibit was in Manchester, when 3,400 manufacturers visited it. Birmingham was second with 3,200. Then came Toronto and following it Glasgow with 2,014. In Montreal there were 1,714 registrations and 1,200 in Sheffield.

Mr. Herbert Kershaw, of the British board of trade, who is in charge of the exhibit, was enthusiastic over Toronto's response to the collection.

"The manufacturers have taken great interest in the whole thing," he said. "I expect to see several new industries locate in Toronto as a result. Seeing the labels on the various articles has had the effect of directing the attention of manufacturers to several parts of the world for markets.

Buyers and Manufacturers.

"Buyers have been put into touch with manufacturers and manufacturers have been put into touch with buyers. Technical men have hit upon new ideas through visiting the exhibition. The sub-trade commissioners have come into personal contact with a large number of manufacturers and traders.

"But above all the visitors were impressed with what the department of trade and commerce at Ottawa is doing and will do for them. It is surprising how large a per cent. of the exporters did not know of the intelligence branch of the department. The manufacturers too realize that the two government departments: the British board of trade and the Dominion department of trade and commerce, are co-operating with the common object of developing trade in the empire."

Trade Commissioners' Activities.

After the exhibition has been shown in the maritime provinces, it will be returned to England in charge of Mr. Kershaw, who is being assisted here by Mr. A. E. Bryan and Mr. A. W. Kennedy, two able sub-trade commissioners of the Canadian government now working in the department of trade at Ottawa. Both are graduates of the University of Toronto. They will make a tour of Canadian industrial centres next summer, after which Mr. Bryan is likely to go to Japan and Mr. Kennedy to South America as Canadian trade commissioners.

TORONTO FURNITURE COMPANY'S BONDS

The Instalment Investment Company, Limited, of Montreal, are offering an issue of \$200,000 of the 30-year 6 per cent. gold bonds of the Toronto Furniture Company, Limited. The capitalization of the company is as follows: \$300,000 30-year 6 per cent. bonds, authorized. Of this amount, \$200,000 are being issued and \$100,000 are held in escrow for the future purposes of the company. Preferred stock, authorized, \$200,000, issued \$100,000. Common stock, authorized, \$300,000, issued \$300,000. The bonds are being offered at 90, with a bonus of 25 per cent. of common stock.

The company's directors are: Messrs. D. K. Ridout, Toronto; W. T. Bradshaw, Toronto; G. Bird, Montreal; Wm. Lyall, Montreal; A. E. Clark, Toronto.

CANADA IS ASLEEP, SAYS FOSTER

Minister of Trade Says We Are Not Planning for Period After the War

The moment the war ended the wheels of munition industries would cease to turn. Then the manufacturer would have to hustle for the customers he had not known for two years. "Is it best to wait until that time comes," asked Sir George Foster, minister of trade and commerce, in an address before the Empire Club, Toronto, "and in the maze of dislocated activities try and work out what we should do for the future? Or shall we prepare for it as best we can?"

"There is not a great country that I know of which is so sound asleep in that regard as Canada." Proof of the statement could be found in England, where, in spite of business beyond imagination, there was a wealth of activity shown in the search for solutions for the very problems which he had been endeavoring to outline. The world had learned that old business crusts, like old social crusts and old class crusts, had been pretty well shot to pieces. The crusts of business custom had been rent from centre to circumference and would never be mended. The war had taught that mobilization, standardization, organization and co-operation were required.

Must Apply Principles.

"The application of those principles is winning the war. They must be applied to business." This had been realized in England, in the United States, in France, in Russia, in Italy and in Japan. All these countries were preparing for what would succeed the war. "What is Canada doing? She may be thinking, but there is not much that can be scanned on the surface as yet."

The man with small plans and a small capital, he continued, would not have a chance to go into Russia and do big business. He and others would have to combine. "You have got the pluck, the heart and the brain, but if you have not got the munitions of war you will go into this great war of peace and find yourself up against better mobilized business and it may take years to overcome the handicap. Why not get ready now?"

Wealth by Production.

When the war was over, he continued, up would jump the parasites, the army of middlemen and the speculators, and would want things as they were before. Prince Rupert, for instance, he said, had been placed under a curse which would keep business away from it. When it was known that that town would be the Pacific coast terminus of the Grand Trunk Railway, railway corporations, governments, business men, financiers, so-called, and speculators had loaded it with a burden of fictitious values. "The only way we shall ever make good in Canada is by getting down to the basic principle that wealth is made by production and development. Middlemen are required only as handmaids, as it were, to distribution. The only way Canada can make good as a country is to go to the work of production with knowledge, with high purpose, with scientific training, with method, organization and with mobilization. On that line Canada will be made a country second to none in the wide world. The clarity and selflessness of the earlier part of the war is being blurred by business and full employment; Canadians are drifting away from the spirituality of the earlier part of the war. Guard against that and Canadians will snatch something good from the present ill."

LIFE AGENTS IN WESTERN CANADA

Mr. J. Burt Morgan, president of the Life Underwriters' Association of Canada, in continuance of his tour through Canada, recently visited Brandon, Man., and Moose Jaw, Sask. At Brandon, President Wilson, of the Brandon association, was in the chair, and was presented by vice-president D. J. Johnston, of the Dominion association, with the John R. Reid cup for the largest percentage of increase in membership of any association in Canada. Mr. C. C. Ferguson, general manager of the Great-West Life, who was present, spoke briefly. The association decided to attend the Dominion convention in Winnipeg in 1917 in a body.

RECENT FIRES

Actinolite, Ont.—November 6—Mr. J. Stewart's barns. Loss, \$3,000; insurance, \$1,000.

Barrie, Ont.—November 6—Barrie Carriage Company. Loss, \$3,000.

Belleville, Ont.—November 6—Mr. W. O. Simmons' residence. Loss, \$4,000. Cause, overheated stovepipe.

Bolton, Ont.—November 6—Ontario Hotel, Messrs. Taylor, Fisher and Company's store and Mr. G. H. Estance's residence. Loss, \$10,000.

Edmonds, B.C.—November 1—Mr. W. N. Chapman's residence, Sixteenth Avenue and Kingsway. Loss, \$2,000. Cause, firecrackers.

Frankford, Ont.—November 1—Graham Company's evaporator. Loss, \$8,000; partially insured.

Grand Coulee, Sask.—October 30—Electric light plant.

Montreal, Que.—November 1—Canadian Rubber Company's plant, Papineau Avenue and Notre Dame Street. Loss, \$1,000. Seventh outbreak in five days.

November 5—Steamer Helbron, of the Valleyfield Navigation Company. Loss, \$7,000.

STEEL FOUNDRIES NOTE ISSUE

The Canadian Steel Foundries, Limited, has redeemed its issue of \$1,000,000 par value one-year debenture notes, which matured on October 11th, 1916.

The Royal Securities Corporation, Limited, has purchased from Canadian Steel Foundries a new issue of \$500,000 par value 6 per cent. debenture notes, guaranteed as to principal and interest by Canadian Car and Foundry Company, Limited, maturing serially in equal amounts monthly, up to March, 1917, and it has already sold these notes.

BANKERS' ASSOCIATION OFFICERS

Mr. George Burn, general manager of the Bank of Ottawa, who has been president of the Canadian Bankers' Association for two years, was again tendered the presidency, but declined its acceptance for reasons of health. Mr. E. L. Pease, of the Royal Bank, has been appointed president. The other officers elected were: Hon. presidents, Sir Edmund Walker, Sir Vincent Meredith and George Burn; vice-presidents, Sir Frederick Williams-Taylor (Bank of Montreal), C. A. Bogert (Dominion Bank), H. A. Richardson (Bank of Nova Scotia), and G. H. Balfour (Union Bank). The executive offices of the association will now be moved to Montreal.

CANADA CAN ARRANGE CREDITS

Sir Thomas White has entered upon a discussion with Reginald McKenna and the treasury officials regarding the past and future of Canadian credits to the British government for munition commitments.

Sir Thomas says he is confident that Canada will continue able to provide her own war expenditure in Canada, and also arrange further substantial imperial credits, cables Windermere to the Montreal Star.

Canada's financial position is exceptionally strong, and he is very hopeful that a greater part of Canada's national debt, due to the war, will be held in Canada.

Another order for a steel stern-wheel vessel, similar to one now under construction, has been placed with the firm of Yarrows, Limited, Victoria, B.C.

Mr. Allan H. Wetmore, who has just been elected president of the St. John (N.B.) board of trade by acclamation, is a member of the wholesale grocery and spice manufacturing firm of Puddington, Wetmore and Morrison, which has extensive trade connections in the maritime provinces. He is secretary of the Canadian Club, a member of the maritime branch of the Canadian Manufacturers' Association, and of the Fortnightly Literary Club. He has given much study to the tax question and kindred economic problems, and possesses a wide fund of general information.

CANADA'S BANK CLEARINGS

The following are the returns of Canada's bank clearing houses for the weeks ended November 2nd 1916, and November 4th, 1915, with changes:—

	Week ended Nov. 2, '16.	Week ended Nov. 4, '15.	Changes.
Montreal	\$ 86,774,279	\$ 67,135,927	+ \$19,638,352
Toronto	61,433,599	47,621,971	+ 13,811,628

Kitchener	2,325,392		

CANADIAN NORTHERN EARNINGS

For the week ended November 7th the earnings were \$885,000 as compared with \$806,500 in the same week last year, an increase of \$78,500.

The assessment committee of St. Mary's, Ont., town council has made a reduction of \$15,000 on the hotel properties and \$7,000 on other appeals, making a total reduction of \$22,000.

FINANCING TRADE

The participation of the Canadian Bank of Commerce in the British-Italian Corporation is an important development in Canadian banking. It marks also a new departure on the part of the British government, business men and bankers. The British-Italian Corporation and similar organizations which will be formed, are intended to carry on the sort of financial business conducted by continental banks and more especially by the banks of Germany, for the fostering of trade and assisting manufacturers. The plan is explained in some detail in another column. The British-Italian Corporation and its Italian counterpart will develop economic relations between Great Britain and Italy,—and through the Canadian banking connection, with Canada—and will promote undertakings in the commercial and industrial field in Italy.

It frequently happens that contracts for the supply, for example, of electrical apparatus for new factories or for the electrification of railways running into many millions of dollars are offered to manufacturers on the understanding that payment will be made in securities on the completion of the contracts. Hitherto it has not been possible for British manufacturers to accept these contracts in the same manner that German manufacturers have been willing and able to accept them. In Germany, bankers have always been ready to finance operations of this kind, and have been willing to accept the securities received by manufacturers in payment of contracts in satisfaction of their loans. This has been the case to some extent also in United States trade with Canada. In England, the process has been first to issue securities to investors, and only to construct the works after investors have provided the money, whereas the continental method is to construct the works first and find the money after. The sounder of the two schemes is obvious; but if the British countries are to do a greater business successfully and obtain a large share of trade which hitherto went to Germany, they must be more adaptable to circumstances, studying the requirements of each market.

"CANADA IS ASLEEP"

Canada is sound asleep, as compared with other countries, in preparing for the period to follow the war. This was the statement made by Sir George Foster in his address to the Empire Club, Toronto, this week. It was made deliberately and with full conviction. It was informally criticized afterwards, but the fact remains that the statement is true.

For nearly two years, *The Monetary Times* has advocated strenuous preparation by Canada's business men for the peace period. Sir George said that unless they begin soon, their position will be as participants in a great commercial fight, Canada with bare fists against nations armed and prepared. There is no good excuse for this condition. Other countries long ago set us an example. Conditions may be different in those countries but nevertheless future conditions will require commercial preparation in this country to-day.

Are not our business men and manufacturers being misled by the prosperity of war, a factor which has increased factory production 50 per cent., export trade 100 per cent.; has brought profits on capital ranging from 5 to 300 per cent., and has piled up bank deposits to a billion and a quarter of dollars? That prosperity will cease with a jolt when peace comes. Then should the national machinery be practically ready, as it will be in other countries, to change gear, with little delay, to new conditions. Sir George Foster's condemnation of our national inaction is richly deserved. At the same time, we think the government should exercise greater initiative in this matter.

PROOF OF INSURANCE CLAIMS

Discussion as to delay of payment of a war claim by the London Life Insurance Company, has tended to arouse doubt in the public mind as to the likelihood of prompt payment of claims by Canadian life insurance companies. This is unfair to all these companies which have a remarkably good record in this matter. It is true of other companies as well as the London Life, that they are inclined to accept any sort of evidence that seems reasonably to establish the death of an enlisted policyholder.

The worst advertisement any insurance company can have is a dispute or delay in connection with the payment of a claim. That is why some fire insurance claims are paid wrongfully. The best advertisement of a life insurance company is prompt payment. But the life insurance companies are trustees and the interests of the whole body of policyholders are involved in the methods employed by the company in settlement of claims.

Any company paying claims upon unsatisfactory proofs is guilty of jeopardizing the interests of all its policyholders. Proof of death must be established before a claim is paid. The companies do everything possible to facilitate the matter.

A suggestion has been made that the government stand behind the life insurance companies, so that the latter will be reimbursed should action be improperly taken on the strength of the notice received from Ottawa as to the death of war risks. The companies would welcome that arrangement under the circumstances, and would then undoubtedly pay claims promptly upon notification from Ottawa. In the meantime, the companies are doing everything that the policyholders as a group think they should do in this connection.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Sherwin-Williams Company of Canada.—The erection of plant at Sydney, N.S.W., Australia, is planned by this company.

Donnacona Paper Company, Limited.—The plant extensions, which give a double capacity, were put into operation this week.

Canadian Niagara Power Company.—The Ontario hydro-electric commissioners have intimated to the Canadian Niagara Power Company that they desire the last block of 12,500 horsepower of the 50,000 horsepower by December 1.

North American Pulp and Paper Company.—The Canadian directors elected are: Mr. C. S. Wilcox, chairman of the board of the Steel Company of Canada; Mr. Paul J. Myler, vice-president of the Canadian Westinghouse Company, and Hon. J. M. Wilson, vice-president of La Banque d'Hochelaga. A fourth Canadian director is to be elected.

Hollinger Consolidated Gold Mines, Limited.—During the month ended October 6 the company made a gross operating profit of \$241,293, or \$1,293 more than the dividend of 1 per cent. on the issued capital of \$24,000,000. This is the first time the dividend has been earned since the Hollinger, Acme and Millerton properties were merged.

Dominion Marble Company.—A meeting of the holders of the first mortgage 15-year 6 per cent. sinking fund gold coupon bonds of the Dominion Marble Company, Limited, has been called for December 4, at the offices of the Prudential Trust Company in Montreal. The meeting is for the purpose of instructing the trustee to sell the property for the benefit of the bondholders.

Dominion Steel Corporation.—Mr. J. K. L. Ross has confirmed the statement that he had sold a large block of Dominion Iron common which he purchased towards the end of September. The block was close to 20,000 shares; most of it was bought in the big market of September 29, when upwards of 32,000 shares changed hands in the one day, and the price moved up from 61¼ to 65½. On his purchase Mr. Ross realized an average profit of about six points.

Dominion Bridge Company.—The statement is credited to Mr. P. Johnson, president of the Dominion Bridge Co., in an interview, that 20 per cent. of the work being done by the Dominion Bridge Company consists of bridge work, the balance being munitions. As to the outlook after the war, Mr. Johnson indicates that the company is looking towards foreign, particularly Russia, rather than domestic markets, inasmuch as Canada is already well supplied with bridges.

Dome Mines Company.—In the month of October operating costs advanced ten cents per ton and the average grade of the ore was reduced eight cents per ton. Bullion produced was \$185,000, which, with the exception of May, was the company's largest output. The mill treated 40,200 tons of ore, which was almost 200 tons better than the previous record made in August. With operating charges of \$2.69 per ton the total operating cost would be \$108,138, which would leave the profits for the month at \$76,862.

Cape Breton Electric Company, Limited.—The earnings of the company are as follow:—

Earnings.	1916.	1915.
September gross	\$ 33,804	\$ 33,639
Net	15,614	15,455
Surplus after charges	9,046	8,861
Twelve months' gross	385,443	344,372
Net	159,506	137,102
Surplus after charges	80,999	57,906

Western Canada Flour Mills, Limited.—The annual report of the Western Canada Flour Mills showing profits for the year ended August 31st, 1916, of \$376,260 compared with \$340,062 in 1915, gives further convincing evidence of the prosperity which is attending the milling industry at the present juncture.

After paying bond interest of \$93,500 and dividends at the rate of 8 per cent. of \$160,976, a balance of \$688,268 is carried forward into the current year, compared with \$502,262 a year ago.

Twin City Rapid Transit Company.—The company's revenues and expenses are as follow:—

	September.		Year to date.	
	1916.	1915.	1916.	1915.
Gross revenue	\$854,747	\$817,922	\$7,594,988	\$7,014,857
Operating expenses	504,809	502,568	4,692,776	4,531,391
Net revenue	349,937	315,353	2,902,211	2,483,465
Fixed charges and taxes	149,827	140,417	1,292,994	1,272,247
Net income	200,109	174,935	1,609,216	1,211,218

National Steel Car Company, Limited.—The securities of the National Steel Car Company, Limited, have been listed on the Toronto Stock Exchange. There is an issue of \$2,000,000 common and \$1,500,000 preferred.

The construction of the company's plant at Hamilton was commenced in September, 1912, and the first shipment of completed cars was made the following January. The company has laid six miles of railroad tracks and all the buildings are of steel construction throughout. A complete sprinkler system of an approved type has been installed, which eliminates danger from fire and results in a considerable saving in insurance premiums. The capacity of the company's works is between 6,000 and 7,000 cars per annum.

British-American Nickel Company.—This company's selection of site will, it is stated, be probably in the Welland district, Ontario. The company has secured as general manager, Mr. E. P. Matheson, who will also occupy a position on the board, and who has resigned from the managership of the Washoe Reduction Works of the Anaconda Copper Mining Company, at Anaconda, which produces 10 per cent. of the world's supply of copper. Mr. Matheson is one of the best known metallurgists in America. Work is proceeding on a power plant in the Sudbury locality and in the mines. An arrangement by which the British government would take the output of the new smelter and refinery and in return would guarantee the interest on its bonds, was announced some time ago.

Messrs. E. R. Wood, James P. Dunn, of London, and other interests connected with the British-America Company, are at work on completing the organization of the company.

Dominion Steel Corporation.—"Since the appointment of Mr. D. H. McDougall as general manager of the corporation, efforts have been directed towards the upbuilding of an efficient administration at Sydney. As a result of this, Mr. R. F. Randolph and Mr. W. H. Bishop have recently allied themselves with the activities of the Dominion Steel Corporation, the former as general superintendent of the steel works, and the latter as steel expert. For several years past they occupied similar positions with the Bethlehem Steel Company, of Bethlehem, Pa. Mr. Bishop assumes the title of assistant general superintendent, and takes charge of the coke ovens, blast furnaces and open-hearth departments. A further change has been made by promoting Mr. H. E. Rice to the position of assistant general superintendent, his jurisdiction to extend over the various mills of the steel company. Mr. Geo. D. McDougall, mechanical superintendent of the steel works, has also received promotion, having now assumed the position of chief engineer. Several other changes have been made."

Nipissing Mines Company.—The company has closed an important contract for the handling of its by-products. Formerly the company handled the by-products itself. The principal by-product is cobalt, used extensively in the manufacture of chrome nickel steel. At present there is a record-breaking demand for chrome nickel steel for automobile parts, shells and steel rails.

The company's financial statement as of October 2nd showed cash on hand and bullion of \$2,228,440, which is the biggest showing this item has made in the history of the company.

Ore reserves have materially increased since the last statement as the result of discovery of two new veins. One of these veins is estimated to contain 1,000,000 ounces of silver, while the second vein is estimated to run 1,500 ounces to the ton. This vein extends for 3,000 feet in the company's property.

With silver selling at approximately 68 cents an ounce, the company is operating its plant at capacity. The company continues to pay its quarterly dividends of 5 per cent. on the \$6,000,000 stock, and last quarter paid an extra 5 per cent.

IN THE BOND MARKET

The Monetary Times' Weekly Register of Bond Activities and Financing

By a more general distribution of national securities in Canada, a greater interest will be shown by the people in the fiscal administration of their governments. This was suggested by Mr. William Molson Macpherson, president of The Molsons Bank, at the annual meeting this week. "A more general distribution of government bonds," he said, "will lead the people to watch more closely the expenditures of the country, and to put a check upon any extravagance. We cannot too strongly urge a policy of economy, both in public and private expenditure."

The people are willing to save, to finance their share of the war and to purchase government bonds. The people are not willing to have their savings, largely accumulated by means of personal sacrifices, squandered by governments in reckless expenditures, political pilfering and costly patronage. The holder of government bonds has intimate reasons for desiring to know that the nation's business is being run on sound and economical lines, with enough foresight to mitigate any approaching adverse conditions. The increasing number of bondholders is multiplying the number of independent voters. They will have no hesitation in turning out of office governments which deserve that fate.

Acton, Ont.—Tenders close on November 13th for \$25,000 6 per cent. bonds. Mr. A. J. Mackinnon, clerk.

St. Thomas, Ont.—It is possible that the taxpayers will vote on a by-law to borrow \$75,000 for public works.

Sydney, N.S.—An issue of \$160,000 5 per cent. 30-year bonds was sold to the Eastern Securities Company, St. John.

St. John, N.B.—An issue of \$75,000 school bonds has been sold to Dominion Securities Corporation, Toronto, at 99.50.

Shallow Lake, Ont.—A loan of \$4,000 to Mr. R. Caesar to develop a wood working industry has been passed by the taxpayers.

Wallace R.M., Man.—The issue of \$45,000 4½ per cent. 39-year bonds, was awarded Messrs. G. A. Stimson and Company, Toronto.

Edmonton, Alta.—For an issue of \$719,000 6 per cent. 2-year bonds, tenders close on November 17. F. Barnhouse, city treasurer. (Official advertisement appears on another page.)

Peterborough, Ont.—That the city could make better arrangements for temporary loans was suggested at the council meeting. The city was now paying 6 per cent. for money borrowed and received 3 per cent. for deposits.

Saskatoon, Sask.—The city's finance committee has decided to recommend for the approval of the council the submission of a by-law to the burgesses for \$100,000 to enable the city to take the Y.M.C.A. building off the hands of the guarantors.

Whitby, Ont.—For the recent issue bids were as follows: Messrs. W. A. Mackenzie and Company, \$28,209; Messrs. Mulholland, Bird and Graham, \$28,171.15; Messrs. G. A. Stimson and Company, \$28,068.41; Messrs. Emilius Jarvis and Company, \$28,060; Messrs. R. C. Matthews and Company, \$27,947.76; Messrs. Wood, Gundy and Company, \$27,855; Canada Bond Corporation, \$27,767.61; Messrs. W. L. McKinnon and Company, \$27,734.50; Messrs. Brent, Noxon and Company, \$27,671; Messrs. A. H. Martens and Company, \$27,477; Messrs. C. H. Burgess and Company, 98.54; Messrs. Kerr, Bell and Company, 98.29; Messrs. Macneill and Young, 97.22.

Saskatchewan.—The following is a list of bond applications granted by the local government board:—

School Districts.—Wauchope, \$2,000, 10-years, not ex. 8 per cent. annuity. Secretary-treasurer, M. Quennelle. Wauchope; Winona, \$1,500, 10-years, not ex. 8 per cent. an-

nunity. W. Sherk, Stranraer; Gnadenau, \$900, 10-years, not ex. 8 per cent. instalment. J. E. Priebe, Morse.

Rural Telephone Companies.—Marine, \$600, 15-years, interest 7 per cent. annuity. J. A. Meyer, Torquay; Eagle Hills, \$18,000, 15-years, interest 7 per cent. annuity. H. J. Nelson, Battleford; Richard, \$15,000, 15-years, interest 7 per cent. annuity. H. G. Graham, Richard; Little Quill, \$15,600, 15-years, not ex. 7 per cent. annuity. E. J. Hopper, Wynyard.

Toronto, Ont.—Messrs. Wood, Gundy and Company have bought from Toronto harbor commissioners bonds to the face value of \$1,500,000, on which the interest will be 5½ per cent., a little more than will be paid by the city on the \$2,500,000 city bonds sold by the board of control on Thursday last. The harbor board's bonds are 4½ per cent. and the city's were 5 per cent. The amount of Wood, Gundy and Company's bid for the harbor bonds was 89.814, or 9.034 better than it was when the loan was floated. The success of the flotation is regarded as a vindication of Mayor Church's policy in having city finance commissioner Bradshaw look after the harbor board's loans. While the debentures were not advertised, competitive bids were called. The bonds are a charge on the property of the harbor commissioners, which when the scheme is completed will have been mortgaged to the extent of \$25,000,000.

Saskatchewan.—The following is a list of bonds reported sold by the local government board:—

School Districts.—Golden Sheaf, \$1,600. Kerr, Fleming and Company, Regina; Piccadilly, \$1,600. W. L. McKinnon and Company, Regina; Scotia, \$1,600. W. L. McKinnon and Company, Regina; Dry Forks, \$1,600. Goldman and Company, Regina; Friesen, \$1,600. Sterling Bank of Canada, Regina.

Rural Telephone Companies.—Norden, \$6,800. J. A. Thompson, Winnipeg; Marienthal, \$4,000. Regina Public School Sinking Fund; Tribune West, \$13,000. W. L. McKinnon and Company, Regina; North Weldon, \$19,000. J. A. Thompson, Winnipeg, Man.; North Meyronne, \$10,500. W. L. McKinnon and Company, Regina; Martin, \$2,700. Neil MacDougall, Moosomin; Marquis, \$2,000. W. L. McKinnon and Co., Regina; Guernsey, \$4,000. H. O'Hara and Company, Toronto.

Saskatchewan.—The local government board reports the following bonds sold:—

School Districts.—Alva, \$1,600. Kerr, Fleming and Company, Regina; Marx, \$1,200. Tomenson, Forwood and Company, Regina; Treelon, \$1,700. Goldman and Company, Regina; Rose Mound, \$1,600. W. L. McKinnon and Company, Regina; Ingoldsby, \$1,600. W. L. McKinnon and Company, Regina.

Rural Telephone Companies.—Fielding, \$10,000. Wood, Gundy and Company, Saskatoon; North Kisbey, \$16,500. Kerr, Fleming and Company, Regina; Quill Plains, \$2,000. Nay and James, Regina; Dew Drop, \$16,500. W. L. McKinnon and Company, Regina; Buck Lake, \$10,700. Canada Trust Company, Regina; Weyburn Plains, \$6,700. H. O'Hara and Company, Toronto; Viewfield, \$8,500. H. O'Hara and Company, Toronto; Golden Valley, \$6,400. Wood, Gundy and Company, Saskatoon.

DOMINION FLOUR MILLS BOND OFFERING

Industrial securities have been attracting attention in the Canadian market. Among the offerings this week a block of Dominion Flour Mills, Limited's, 6 per cent. consolidated first mortgage 30-year sinking fund bonds is being offered by Messrs. Macdonald, Bullock and Company, Toronto. The price of the bonds is par and interest with a 50 per cent. stock bonus.

The new debenture stock of the Canadian government is listed in the attractive range of bond offerings included in the November list of Messrs. Wood, Gundy and Company, Toronto.

The Guardian Accident and Guarantee Company will apply to the Dominion parliament for an act to change its name and to amend and extend its powers.

PERSONAL NOTES

Mr. J. W. Woods, chairman of the honorary Canadian trade commission (which will present its report to the government next week), past president of the Toronto board of trade, and president of the wholesale drygoods house of Gordon, MacKay and Company, director of the National Trust Company and other companies, was tendered a banquet by the National Club, Toronto, last week. Mr. Woods gave to the members an instructive story of his European trip. In introducing the guest of the evening Mr. R. S. Gourlay paid him many well-deserved tributes. The occasion, he said, was to mark admiration and appreciation of Mr. Woods and his life work in our midst and the modest and yet ever outstanding service that he has rendered in response to every duty call in our national development.

"Mr. Woods," said Mr. Gourlay, "a Canadian boy, born in the county of Oxford of Irish parentage, came to this city 40 odd years ago and began work in the entry desk of the Gordon, MacKay firm. From that starting point his advancement was rapid, his energy, capacity and personality

J. W. WOODS,

Chairman, Canadian Government Trade Commission (whose report will be presented to the government next week) who was honored by the National Club, Toronto, last week.

so impressing the officers of the company that 36 years ago he was requested to take charge of the buying for the firm. To the surprise of the president of the company he would accept it only upon the condition that if he did the buying he must also have the right to hire and direct the men who sold the goods he bought. This has been the keynote of his outstanding success—a vision large enough to see an enterprise through to its consummation, a courage ready to tackle any possible adverse condition and whip it into line, with best use of every favorable condition or circumstance; a willingness to study and investigate and to reject or assimilate the experience and researches of all expert minds and their efforts in the realm of all his enterprises; a capacity to select and retain young men of promise for his organization and by his generous treatment of them to retain them under his leadership with ever increasing loyalty and capacity and in larger fields of usefulness; and a persistency so British that even an early defeat is made a stepping stone to final success.

"Mr. Woods has been the head for years of one of the greatest of Toronto's wholesale houses—a house with a splendid history dating back to 1855, and which from the day, 36 years ago, that placed both buying and selling in his care, has grown wonderfully in volume of trade and in ever-increasing influence in commercial circles and has added

much to the annals of what is best and noblest in Toronto merchant traditions. It is remarkable that though this house has absorbed the business of many one-time competitors during the past 30 years, it has been on such terms as to make buyers and sellers fast friends. His company owns or controls and operates nine industrial plants, a variety of industries and some of which are in the largest class of their line in this country.

"He is actively interested on the directorate of banking and trust corporations, limited only in number because they would interfere with his public and humanitarian services in other directions. He is the known friend of every good cause for the uplift and betterment of his brother man, who may be in need collectively or individually. Convince him of the need, the worthiness of the object and the practicality of the remedy proposed, and you have for years had at command the personal service and liberal purse of an enthusiast as long as it was without publicity."

Sir William Maxwell Aitken has been gazetted a baronet.

Mr. J. S. Irvin, president of the International Portland Cement Company, is to move his office from Ottawa to Montreal.

Mr. O. R. Rowley, chief inspector of the Bank of British North America, has been appointed superintendent of eastern branches, succeeding Mr. H. A. Harvey, who is retiring.

Mr. Alex. Lawson, manager and secretary of the Gresham Life Assurance Society, London, England, is paying a visit to Canada and is expected in Montreal early next week. Mr. Arch. R. Howell is the Canadian manager of this progressive company.

Sir George E. Foster, minister of trade and commerce, will probably leave again for England about the end of the present month to assist in the compiling of the report of the Dominions Royal Commission, with which he has been touring Canada for the past month or so, and because of his absence the proposed trade and commerce conference will be indefinitely postponed.

SHIPBUILDERS AND DUTY DRAWBACK

Whether Canadian shipbuilders would be allowed to build boats for delivery to owners under a neutral flag on account of the Imperial edict which has been acquiesced in in the Dominion is one of the obstacles to the growth of Canada's shipbuilding business. Another is the duty on machinery and plates imported into Canada, stated Mr. H. H. Stevens, M.P., Vancouver, in an interview at Toronto.

An order-in-council passed recently provides:—

"A drawback not exceeding 99 per cent. of the customs duty paid may be granted by the minister of customs on materials used in the original construction of ships and vessels measuring over 500 tons gross tonnage built in Canada when such ships or vessels are authorized by order-in-council to be exported for registry outside Canada, or are British registered in Canada, and are constructed so as to obtain a class in Lloyd's, Bureau Veritas, British Corporation, or other recognized classification satisfactory to the minister of customs, provided that the drawback payable under this section shall be in lieu of any drawback based on a specific rate per registered ton.

"The claimant for the drawback must be the builder of the ship or vessel."

The Canadian government has provided that this 99 per cent. need not be paid into the hands of the government where the construction takes place under the eye of a government customs officer in charge of the works. All liable articles are to be placed under the control of this official until they are embodied in the vessels.

Following the receipt of the assurance from the Dominion government that the ships could be transferred to the Norwegian flag, subject to the final approval of the Dominion government, contracts have been signed for three steel ships to be built on Burrard Inlet. The Norwegian interests are represented by Mr. Otto Dohl and Capt. Frederick Christian Dedrick, the contracts being signed with the Wallace shipyards for two and one with Messrs. John Coughlan and Sons. The ships will cost about \$1,250,000 each.

NEW INCORPORATIONS

Forty-one Companies Receive Charters—Two Mining Incorporations

Canada's new companies incorporated this week number 41. The head offices of these companies are located in six provinces. The total capitalization amounts to \$8,514,000.

The largest companies are:—

Aurum Mines, Limited	\$1,500,000
Pacific International Copper Company, Limited	3,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	15	\$2,800,000
Quebec	9	778,000
British Columbia	6	3,550,000
Manitoba	4	110,000
Saskatchewan	6	776,000
Alberta	1	500,000
	41	\$8,514,000

The following is a list of charters granted during this week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Meyronne, Sask.—Bourassa and Company, Limited, \$25,000.

Watrous, Sask.—Western Farm Implements, Limited, \$25,000.

Regina, Sask.—The Regina Daily Post Publishing Company, Limited, \$75,000.

Alice Arm, B.C.—Alice Arm Mining and Development Company, Limited, \$500,000.

Calgary, Alta.—Foundry Products, Limited, \$500,000. C. W. Coole, P. D. McAlpine, D. L. Redman.

Swift Current, Sask.—Non-Partisan Leader Publishing Company, of Western Canada, Limited, \$1,000.

Fort William, Ont.—Anglo-Canadian Associates, Limited, \$500,000. C. H. Philpot, F. R. Morris, A. Sear.

Preston, Ont.—Dominion Porcelain Corporation, Limited, \$150,000. G. Grant, M. MacDonald, B. Williams.

Steeltown, Ont.—Lyons Fuel and Supply Company, Limited, \$40,000. J. Lyons, O. J. Jewell, Angelina Lyons.

Sherbrooke, Que.—Sherbrooke Footwear Company, Limited, \$50,000. W. T. Hamilton, C. W. Cate, J. P. Wells.

Kingston, Ont.—Kingston Smelting Company, Limited, \$30,000. A. MacKinnon, E. M. Cromewell, J. E. Ingram.

Windsor, Ont.—Monarch Land Building Company, Limited, \$40,000. G. D. Horn, W. J. Jordan, H. A. Webster.

Sorel, Que.—Canadian Juvenile Shoe Company, Limited, \$50,000. J. B. W. Leclaire, J. N. A. Leclaire, J. E. Harpin.

Trois Pistoles, Que.—La Compagnie Electrique de Trois Pistoles, Limitée, \$15,000. L. Beauchemin, J. Ouellet, J. S. Gagnon.

Moose Jaw, Sask.—The J. A. Caulder Company, Limited, \$150,000; the Dominion Fire Brick and Clay Products, Limited, \$500,000. A. Hitchcock, H. G. Love, A. R. Turnbull.

Vancouver, B.C.—Pacific International Copper Company, Limited, \$3,000,000; Kutzie Development Company, Limited, \$10,000; Winram Motor Company, Limited, \$20,000; Fraser River Shingle Company, Limited, \$10,000; Canadian Beet Sugar Company, Limited, \$10,000.

Winnipeg, Man.—Canada Club, Limited, \$5,000. A. Lazure, A. Daven, I. Baril; Dudley Grain Company, Limited, \$40,000. H. S. Scarth, C. E. Lindsay, C. S. A. Rogers; Williams Motor Company, Limited, \$40,000. W. H. Williams, M. McMillan, L. Haney; the Sterling Engine Works, Limited, \$25,000. R. M. Wolvin, G. Coulter, F. Nilan.

Montreal, Que.—The Land Securities Company of Canada, Limited, \$200,000; Henry McMullen, Limited, \$50,000.

H. McMullen, J. W. Blair, F. J. Laverty; E. A. Cole and Company, Limited, \$45,000. J. Panneton, W. S. Gordon, Dora Lenoble; Hodgins and Roberts, Limited, \$300,000. G. R. Drennan, A. G. Yeoman, H. W. Jackson; Phenarsenyl Company, Limited, \$48,000. L. A. Normandin, T. Viau, E. A. Ouimet; Medical and Surgical Supply Company, \$20,000. H. C. G. Mariotti, E. W. Westover, C. M. Cotton.

THE MOLSONS BANK'S SATISFACTORY YEAR

As noted in *The Monetary Times* last week the profits of The Molsons Bank showed an increase on the previous year's return. Some interesting features are found in the report which is printed in full on another page.

The balance sheet of the bank shows satisfactory extensions in the business transacted by this enterprising institution. Deposits are larger by about \$7,000,000 and the circulation is \$1,300,000 more than in the previous annual return. The total of liquid assets is \$24,186,608, as compared with \$17,408,333. These are a few indications of the highly satisfactory position held by one of the most substantial and progressive banks in Canada.

The address of the president of the bank, printed in part elsewhere in this issue, is well worthy of perusal, especially as it makes the first bank review of the year.

Mr. J. S. Dennis, assistant to the president of the Canadian Pacific Railway, who has been located at Calgary as head of the railway's department of natural resources, has been transferred to Montreal. Mr. Dennis, it is understood, will retain his connection with this department in an advisory capacity, but the administration of the department will be turned over to Mr. P. L. Naismith, who has been manager for some years. Mr. Dennis goes to Montreal as assistant to Lord Shaughnessy, to take up special duties, among which are the colonization and the development of the resources of the Dominion adjacent to the company's system.

A Greater Success

"I congratulate you on the fiftieth anniversary of your valuable publication, *The Monetary Times*."

"I trust the forthcoming Annual will prove even a greater success than its predecessors."

J. B. FORGAN,
Chairman,
The First National Bank of Chicago

SUGGESTS TAX ON EXPORT OF PREMIUM

Ontario Fire Insurance Inquiry Resumed—Mr. Mark Irish Gives Evidence—Control by C.F.U.A.

An export tax on all fire insurance premiums going outside the province was advocated by Mr. Mark H. Irish, M.P.P., partner in the insurance brokerage firm of Irish and Maulson, Toronto, in giving evidence in the Ontario insurance investigation before Mr. Justice Masten, resumed at Toronto on Monday. A large number of fire insurance men were present at the sittings. The evidence of Mr. Irish attracted considerable interest. One of his statements, when Commissioner Masten was reading from fire marshal Heaton's report, was: "I have not seen the report."

That Justice Masten may suggest to the provincial government that the superintendent of insurance be given power to declare rates to be discriminatory was indicated by the commissioner's comments upon similar legislation in the United States.

After comparing, for Justice Masten, the methods of insurance brokers and insurance underwriters, Mr. Irish said that when a broker's firm placed insurance with a certain company, the blame for loss rested on the company, the company having quoted the rate upon the broker's application. "We sometimes give them business involving losses that might have been open to censure and we do not want to be in that position," said Mr. Irish.

Commissioner Masten suggested that insurance brokers were in a difficult situation, placing insurance for the public and being paid commissions by the insurance companies. It was as if they were serving two masters. Mr. Irish replied that no difficulties were experienced in that way. The business was given to the company in an expert way, and the assured should feel confident that his risk had been placed in an expert way. He thought the advantage was with the assured because if the brokers did not put the business in one place, they put it in another.

Non-Tariff Companies.

Commissioner Masten asked whether the non-tariff companies were strong and important enough as a business factor to afford reasonable competition in this country. "Do they afford a check upon exorbitant rates?" To which Mr. Irish replied, "No, I do not think they do."

Commissioner Masten: "What purpose in the market do they serve?" Mr. Irish: "They enlarge the market to the extent of their business, but I do not think this results in a general reduction of rates."

Commissioner Masten: "They do not form a very effective competitor to the tariff companies?" Mr. Irish: "No, they are not of sufficient right or power to affect the situation."

Unlicensed Insurance.

The commissioner then inquired whether unlicensed insurance provided some competition, to which the witness gave an affirmative reply. In answer to a further question he stated that his firm did not do business with unlicensed companies, "unless you call Lloyds unlicensed." The commissioner cited a theoretical case of a man going down to New York from Toronto to place his insurance. Mr. Irish interrupted: "Theoretically, he goes down; practically he stays where he is." Upon Justice Masten remarking that this, apparently, was unlawful, and inquiring whether anything had been done to stop such practices, Mr. Irish said: "There may be something to stop it, but it has not been practised yet." Asked for suggestions on this point, the witness said there were many things known to insurance men, but they did not want to become in the position of informants.

Commissioner Masten then asked whether the amount of unlicensed insurance carried could be ascertained.

Mr. Irish: "Yes, let the government put a tax on the export of premium. There is now a tax on the assured and therefore we know of unlicensed insurance only when there is a loss. Our expense ratio in Canada is about 30 per cent. The American company gives a rate in this country enough to make it, plus the commission, equal to the Canadian company's rate. The American company has no local responsibility; it does not support this country in any way and yet it can do here precisely what the Canadian companies do. The Americans brokers thus have an advantage over the domestic brokers."

Discussing the regulation of rates in reply to questions, Mr. Irish said: "Some regulation of rates by agreement is indispensable to carry on the fire insurance business with a financial backing to give confidence to the assured. I object, however, to difficulties in regard to the control of forms." Commissioner Masten asked for suggestions as to control or fixing of rates. The commissioner stated that in Iowa, the statute provides that the insurance commissioner shall have power to determine whether the rate is unjust. Suppose, he said, that a complaint were made to the insurance commissioner and the rate was reduced, and that a further complaint was made and the rate was reduced again. Was not that, he asked, the fixing of rates by the government? The witness answered that it was theoretically possible, but practically it was not so. There was no injustice, he added, if the same schedule were applied to all classes.

Government Control of Rates.

Commissioner Masten suggested that it would not be difficult for an insurance commissioner to have power to say: "You are not applying the same rate to this condition as you are to that condition," but when it came to the next point of actually determining the rate, the insurance commissioner, he thought, must be a qualified insurance man to enable him to fix rates. Mr. Irish thought that by leaving out of the statutes the word "unjust" and using instead the word "discrimination" there was opened a way out of the difficulty. "I have in mind," he added, "cases where peculiar circumstances surround, so that a higher rate would be exacted and would be paid."

Commissioner Masten: "In such a case, there should be an official to whom that could be brought?" "Yes."

After reading from page 17 of fire commissioner Heaton's report, that part respecting the regulation of forms of insurance and special clauses and endorsements, Justice Masten asked: "Have you had any experience of similar interference?" "All the time." The commissioner asked for specific cases.

Question of Form Control.

Mr. Irish: "A customer that we have had for a number of years placed his business on a form printed perhaps 10 years ago. The business does not always mature at one date. We wanted some more insurance for that customer. We went to place it. We went to company A.B. 'We cannot pass that form,' the company said. 'This clause must come out now.' The answer was that our customer had had it for years. He had many thousands of dollars of insurance. But that insurance had to be placed on a form acceptable to the latest idea of the association. What they are cutting out from their forms continually is something which should be to the advantage of the assured. The result of this form control is this. Canadian applicants are unable to secure in their form of protection in tariff companies in this country exactly what they could secure from the identical company in the United States. What that company in Canada on its own individual judgment would be willing to grant, it cannot do by reason of the association."

Mr. McCarthy (counsel for the association), stated that Mr. Irish had got to give specific cases, not general allegations.

Mr. Irish: "I have always maintained that a form never burns a risk. The association seems to think that there is such friction between forms that it causes a spark. There is no reason why a man with a \$10,000 risk should not get a blanket form on it as well as any other risk."

Prohibition of Certain Covers.

It was agreed by Justice Masten, the witness, and Mr. McCarthy, that the witness should submit specific cases for the reply of the association. Mr. Irish said: "We will also at the same time, I presume, go into the question of classes. In this country, one is prohibited from getting certain covers because the association will not permit them to be written." Asked by the commissioner whether he could state in general terms the various forms of cover which the association prohibits, Mr. Irish said: "I have always felt the association should quote a price on its goods. They should not simply say, 'You cannot write that class at all.'"

Commissioner Masten asked Mr. Irish whether he was alone in the position he took in making these statements. "I do not know, but whether I am or not, my opinion holds good just the same." The commissioner added: "I was only seeking to fortify my own opinion or your views. My idea is to get to the bottom of the thing to the best of my ability."

"If you want real data," said Mr. Irish, "you can get it from the assured. It would be unfair to the association to call my clients or to give their names. They would be entirely too hostile to the association."

Mr. McCarthy (counsel for the association): "The burden of your real complaint is that you think that the association should name a rate on any form you submit."

Mr. Irish: "A man or a corporation which is carrying out the laws of the province should be placed in the position of being unhindered by the association."

When Mr. Irish was asked as to how many specific cases of these complaints should be cited, he replied: "I can give you a coal scuttle full or a half a dozen." The latter quantity was chosen.

Agents' Territory.

Mr. J. A. Kennedy, representing the insurance agents of Port Arthur and Fort William, appeared to urge the adoption in Ontario of legislation similar to that now in force in the western provinces, by which insurance within the province can be secured only by provincial agents. It was pointed out that agents at Port Arthur and Fort William have business taken away from them by agents from Manitoba, representing the same companies as the Ontario agents. Legislation could be framed to meet this, Mr. Kennedy claimed, without in any way interfering with the right of the insurer to get insurance on the most favorable terms.

To Confer at London.

City clerk Baker, London, Ont., has been instructed by the board of control to communicate with the municipalities in western Ontario, inviting them to come to London to take part in a conference with Judge Masten relative to fire insurance rates. The date of the conference will be given out in the near future.

LONDON LIFE PAID PROMPTLY

Statement of the Company Shows that No Unreasonable Delay Occurred

Considerable publicity has been given to certain delay in the settlement of a claim by the London Life Insurance Company, London, Ont., in regard to the death at the front of a soldier, insured by the company. The facts of the matter are set forth in the following statement by Mr. E. E. Reid, assistant manager of the company:—

(1) "The policies in this case, as do all policies of a similar kind, contain a clause requiring consent of the company for the purpose of keeping the policies in full benefit on such conditions as might be specified in the event of the insured engaging in active service outside of Canada.

(2) "The company voluntarily waived the right to charge any extra premium or impose any restriction on account of such service. Because of this generous action alone hundreds of claims have already been admitted and paid by this company.

(3) "The refusal to accept the official notice as being sufficient in this instance has been based on an actual experience of paying claims on such notice, and afterwards having to require repayment because of proof coming to hand that the insured was still alive.

(4) "Unusual delay having occurred in getting some information direct from the front, this office wrote the relatives on September 28th, asking if something could not be furnished that would help us to close the case.

(5) "As a direct result of this inquiry on our part the envelopes, to which reference was originally made, were sent to this office and reached here October 24th.

(6) "These envelopes, containing the signature of an officer at the front, offered sufficient excuse for us to settle the claim, and a cheque was made out promptly.

"So far in Toronto alone we have paid fifty-nine claims on the lives of soldiers and there are eight claims outstanding. In the case of these eight claims the earliest notice reached us only on September 15th. Where reasonable co-operation is offered by the claimants all cases are being settled, I believe, with the utmost satisfaction to the claimants themselves."

This matter is commented upon elsewhere in these columns.

GREAT BRITAIN, A DESIRABLE CUSTOMER

What a Banker Tells United States Manufacturers and Investors

That if the United States regarded Great Britain and France as desirable customers and wished to continue to sell them United States products, the States must treat them as a producer usually treats a desirable customer, in which event, Mr. H. P. Davison, of Messrs. J. P. Morgan and Company, after his return from Europe, states he is confident that the United States will continue to supply them largely, not only during the war, but for the reconstruction period which will follow.

"I have been wondering," said Mr. Davison, "how we in this country would feel if the tables were reversed. Suppose, for instance, we suddenly found ourselves plunged into war, and finding ourselves wholly unprepared, sought at once \$500,000,000 worth of materials and munitions. Say we placed our orders with Great Britain and France, and were then told by them that they would require in payment \$100,000,000 in gold, that they would accept \$100,000,000 in United States government bonds, and that the remainder must be paid in United States government bonds secured by bonds of certain South American governments. I believe that this is a fair parallel to our present attitude, and I also believe that if our creditors took that position we would meet their requirements as to payment and at once set about to place ourselves in a position of independence as far as possible to do so.

Sure to be Paid.

"It naturally would be inconceivable to us that the people of Great Britain or France could question the obligation of the United States government in peace or in war. In this connection it is my unqualified opinion that the unsecured government bond of Great Britain or of France, free from home income tax and payable in dollars in the United States, is just as sure to be paid as the unsecured bond of the United States government, no matter how the war terminates. In making this statement I am not unmindful of the cost of this war, and that that cost must be met and can only be met through taxation. It is on this very question of after-war taxation that we must note the great difference between external and internal obligations of the warring countries. When I asked one of the highest authorities in Great Britain how he would express the difference between an external and an internal obligation, he replied that "an internal obligation of the government is a debt owed by the government to its own people; an external obligation of the government is a debt of all of the people through the government to holders without the country." In other words, an external bond of any of the governments is in effect an obligation of all the people constituting the government, from which no deductions are to be made and for which the assets of all the people are liable.

Investors Must Enlarge View.

"If we are to make assured our present prosperity and increase it, as we properly can, it seems to me important that our people should realize these facts and meet this opportunity, the like of which, let us fervently hope, will never again be presented. If this prosperity is to be shared by the country at large our investors, our bankers and the public generally must take a broad, intelligent view of the opportunities before us and assure the peoples of these foreign governments that we desire their trade and have confidence as to their financial soundness. It is not a question of wealth or value, but purely one of exchange, the solution of which lies with us now and will continue to for a long future if we show ourselves competent to handle it. It is simply a matter of holding and developing our increasing foreign trade and of acquiring in this country a security as sure to be paid as any known in the world."

No soldier or shell could have left Canada but for the work of the British navy; and this fact alone should appeal to Canadians enjoying, even in these war times, prosperity made possible only by the protection of the British navy, as good and sufficient reason for identifying themselves with the navy as well as with the army in the present great struggle for the life and liberty of the British Empire.

To Eastern Investors in British Columbia Property

This Corporation's New Branch Office in Vancouver is prepared to take charge of investments of all descriptions in British Columbia, manage properties, make collections, sales, etc.

A strong advisory board of well-known business men, an experienced manager and a well-organized office assure promptness and efficiency in handling financial agencies.

BANK OF COMMERCE AND EXPORT TRADE

Well-known Canadian Institution Acquires Interest in British-Italian Corporation—Important Departure in Relations of British Trade and Finance

That the Canadian Bank of Commerce has acquired an interest in the British-Italian Corporation, is the statement made to *The Monetary Times* this week by Mr. John Aird, general manager of this enterprising bank.

An agreement was signed in London in March last between the London County and Westminster Bank, Limited, and Lloyds Bank, Limited, on one side, as representing a British financial group, and the Credito Italiano on the other side, as representing an Italian financial group, for the constitution of a British company, to be called the British Italian Corporation, with an authorized capital of £1,000,000, and the constitution also of an Italian company under the style of the Compagnia Italo-Britannica, with a capital of 10,000,000 lire. The object of the two companies is the development of the economic relations between Great Britain and Italy and the promotion of undertakings in the commercial and industrial field in Italy. The companies will work in close association. They will carry on the kind of financial business conducted by continental banks, and more especially by the banks of Germany, for the purpose of fostering trade and assisting manufacturers. The organization marks a new departure of great importance and the participation of the Canadian Bank of Commerce in the undertaking is the welding of a financial link which ultimately will be of considerable benefit to Canadian trade and commerce.

Funds Will Be Provided.

Through this Anglo-Italian bank, funds needed by British and Canadian manufacturers to develop their business with Italy will be provided. When a manufacturer, for example, obtains a contract for electrical or other works, the new companies will provide funds during development, and subsequently will obtain repayment for advances by placing issues of bonds or stocks with the British investing public, so that while the capital of the corporation is confined to £1,000,000, the funds that the corporation will probably be able to command will be practically unlimited. Not only will the capital be turned over continuously, but the Corporation will enjoy high credit, and therefore be able to secure substantial banking funds without risk to bankers, and, beyond this, it will enjoy the goodwill of the British investing public, which will gladly provide Italy with the capital she needs for her development upon good security and at reasonable rates of interest.

Governments are Interested.

Behind the two corporations stand the British and Italian governments. Exactly how far government credit will be at the service of the new institution has not been disclosed. The new corporations may need only the friendly offices of the governments, but if necessary the two governments will probably give more tangible assistance to the new corporations than merely co-operation. Whatever may be the attitude of the governments, however, the fact remains that these powerful British, Italian and Canadian banks are co-operating in order to assist British and Canadian traders to obtain and to carry out contracts in Italy, and to enable Italy to obtain capital.

Benefits to Canada.

Interviewed by *The Monetary Times*, Mr. John Aird, general manager of the Canadian Bank of Commerce, said:—

"The Canadian interests of this business will be entrusted for their development to our bank. This matter was fully investigated during my visit to England last summer and it was decided that we would take care of the business on this side. Canadian Italian trade has largely gone through foreign channels in the past, and its financing has been transacted through foreign banks. Canada has not received all the benefit it should have done and Canadian financial institutions have received none of the benefits. The new arrangement seeks to extend trade between the two countries through Canadian channels in every way, and its financing will be transacted through a Canadian bank."

"Is there a possibility of your bank becoming interested in the proposed British-Russian Corporation of a similar nature?" Mr. Aird was asked. "We thoroughly approve of

anything of that character," he replied, intimating also that the bank might become interested in other international financial corporations to encourage trade; as in the case of the Anglo-Italian enterprise. Mr. Aird also thought the British government were working along right lines in regard to the proposed establishment of a British trade bank as recommended by a special committee under the chairmanship of Lord Farringdon. This bank will have for its object the development of British trade throughout the world and undoubtedly it will have Canadian connections.

ALLIES' TRADE AFTER WAR

Minister of Trade and Commerce Outlined Conclusions of Allied Economic Conference

The conclusions reached by the Allied Economic Conference at Paris were divided, said Sir George Foster addressing the Canada Club at Toronto, into three categories. The first related to the action of the allies during the war, in prohibiting all trade exchanges and business transactions between any of the allied nations and the enemy. The great problem that had to be faced here was determining how much trade should be enjoyed by neutral countries like Norway, Sweden, Denmark, Holland and Switzerland, which were like sponges surrounding the central powers of Europe. "The rights of neutrals have been studied in every possible way, and it is due to Great Britain's earnest attention and great fairness in dealing with this question that the rights of neutral countries have been so well preserved."

During Reconstruction.

The second set of conclusions referred to the course of action to be taken by the allied countries in the reconstruction period, following the war. "The war has broken into shreds the treaties and conventions containing arrangements with favored nations, by which Germany bound certain countries to her in such a way as to gain great advantages for herself. The allied delegates resolved that these should remain scraps of paper, and that they shall not be renewed. In short, this allows the allied countries to be free to make any arrangements they like without considering the central or enemy powers." The second category included provision against the dumping of products from enemy countries during the period of reconstruction. The first call for materials should be made by the allies upon the supplies of the allied nations themselves, and not upon the enemy or neutrals.

Matter of Permanent Policy.

The third conclusion to be reached concerned the matter of a permanent policy between the nations at present allied against Germany. What attitude should the allies assume towards the enemy following the period of reconstruction? It was agreed that all their natural resources and industries should be developed by co-operation and mutual good-will and self-help, so as to make the allied nations entirely independent of the central enemy powers. "Whether it shall be by government enterprise, or co-operative effort assisted by governments, or restrictive tariffs up to the point of efficiency, it was agreed that such a policy should be adopted. There shall be uniform, constant and honorable use of one, or all, or any of these different means, as may be best suited to the purpose."

BRITISH LOAN WAS GREAT SUCCESS

The new issue of \$300,000,000 United Kingdom of Great Britain and Ireland 5½ per cent. secured gold notes in the United States proved more popular with the public than any previous war issue. The books were closed on Friday afternoon last week. The books could have been closed on Wednesday last, but the bankers desired to extend the time for the benefit of western and southern subscribers.

Subscriptions were made in about even proportions for the three-year and five-year notes. Every section of the country sent in a large volume of inquiries. The number of responses surprised even the most optimistic of the underwriters.

Considerable Canadian interest was shown in this issue. Among the Montreal subscriptions were those of the Sun Life Assurance Company for \$1,500,000 and Mr. Mark Workman for \$200,000.

PROOF OF DEATH IS NECESSARY

Why the Life Insurance Companies Must Be Sure that Claims Are Good—Safety of the Policyholders

BY R. W. BARTON, A.I.A.

The question of the proof of death required by life companies in certain cases, has recently aroused some comment in the public press. As was expected this has brought forth abundant evidence that the companies are dealing in the most liberal spirit with claims arising out of the great war, in respect of which unusual difficulty is experienced in securing confirmatory evidence of deaths reported.

In the case of soldiers and sailors dying while on active service such difficulties have always arisen, but especially is this so in the present war.

The enormous number of troops engaged, the huge territory over which operations are carried on, the vast fleet spread over the oceans of the world and the frequent shifting of men in both services to some other detail or some other sphere of activity, all make for liability to error in the early reports of casualties so eagerly demanded by anxious relatives and friends of those engaged.

Similarity of name, a misread or misplaced figure in a number of one of the rank and file, the partial destruction of records by exposure, owing to their often having to be compiled in the open field, under difficult and nerve racking conditions, are alone sufficient explanation of cases of mistaken identity and premature reports of casualties.

Frequency of Errors.

Unfortunately, owing to the frequency of these errors, the torture of uncertainty is now too often added to the sense of bereavement, on receipt of the dreaded official telegram. It is the unreliability of these reports which has increased the difficulties of life companies in dealing with these claims. Dependants of those fallen on the field of honour should, least of all, have to endure the added hardship of lack of money in their hour of grief, the officials of life companies, however, would be false to their trust, if they paid claims for sentimental reasons, or before their experienced judgment was satisfied with the proof of death submitted. The companies are helping the public in every way possible.

Reputation for Prompt Settlements.

Apart from the sympathetic feeling which must prompt all having business dealings with relatives of the gallant dead, to save them unnecessary delay and expense, it has long been recognized by life assurance officials, that a reputation for the prompt settlement of claims is the best advertisement a company can have. The companies, consequently, vie one with another to secure this. The fact is the companies have done so much for the public, that the public too often usurps the right to ask for more.

Claims lacking any real proof of death are not an unusual experience of life companies in ordinary times of peace. These are sometimes due to ignorance, or lack of business training by the claimants, in which case they receive patient and sympathetic hearing by the company concerned.

More often they are made by those aware of the unwillingness of life companies to defend a claim in court. An unwillingness due to the fact that life companies, in common with railways and customs officials, are too often condemned by the public, without a hearing and without experience of the moral hazard to which the companies are always exposed.

Policyholders who Disappear.

Such claims are usually in respect of policyholders who have disappeared in some unexplained way. No proof of death can be furnished, but because the company cannot prove the disappearant to be alive, they are asked and expected, not only to forego the receipt of premiums, but also to pay over the policy money.

The fact that it is no part of the contract that a company should have to prove a policyholder to be living, but it is part of the contract that unquestionable proof of death shall be furnished by claimants, is ignored by those claiming, and too often by the public when passing judgment upon a company defending itself against an unjust or even fraudulent claim.

Domestic unhappiness, financial difficulties and moral delinquencies are common reasons of these disappearances

and much trouble is taken by those who would vanish to mislead those left behind, even to the extent of feigning death from various causes.

To Establish Existence.

It is, of course, to the interest of companies to establish the continued existence of the missing, but it would be an injustice to other policyholders to incur expenses for that which neither law nor justice holds them liable and which they could not defend if called to account.

One of many of these incidents will serve to illustrate how companies are exposed to these claims.

A lawyer, at one time well known, committed a breach of trust and fearing arrest disappeared, leaving a note stating he was about to end his own life. The body was not found, nor did enquiries at the time result in any trace of the missing man.

A policy on his life was held by a creditor who then claimed the policy money. The company pointed out how improbable it was that the missing man, who was in the prime of life, was dead and how unjust it would be to their other policyholders to admit proof of the claim upon such unsatisfactory evidence.

Under protest the creditor paid the premiums for a few years and then on the pretext that further search and advertisement had failed to locate the missing man, made another application for payment of his claim.

The company, thereupon carefully investigated its records and discovered that the lawyer had at one time acted as agent for a company in another country, and, upon enquiry, it was found he had recently drawn in person, commission upon business introduced there in earlier days. Existence was thus established and admitted.

The lawyer is still living, the policy is still in force and the claim was first made more than 15 years ago.

WHEAT CITY IS STILL BUSY BRANDON

(Staff Correspondence.)

Brandon, November 3rd, 1916.

The wheat city of the west has gone back on its name to some extent this year, or at least the district round about it has, for the wheat is not to be found in such abundance as it usually is, more particularly in southern Manitoba. General conditions are fairly good in Brandon. A number of substantial buildings have been put up this year. Ex-Mayor Hughes heads the list with five stores and a theatre on 10th Street costing about \$60,000. Mr. Geo. Patterson is also building a wholesale warehouse on 10th Street costing about \$50,000. Mr. Curran, of the Brandon Hardware Company, has built a block costing about \$40,000. Mr. Coldwell also built a business block costing about \$20,000. The optimism of these men has been fully realized, as the buildings have been all rented and will be fully occupied.

Mr. A. A. Evans and a prominent loan man has negotiated loans in Brandon this year to the extent of \$250,000. Mr. Evans remarked, in discussing the loan situation with *The Monetary Times*, that he had been in business in Brandon for eighteen years and in all that time he had never had a mortgage sale proceeding.

The municipality has been conservatively taking care of all fixed charges and doing only necessary work. The city has invested \$400,000 of its sinking fund in the Dominion war loan.

The crops in the Brandon district were poor, but the farmers, on account of last year's large crop, were able to clear up much floating indebtedness, and the banks are assisting farmers with loans where assistance is needed. There is scarcely any demand for farm loans.

Logs scaled in British Columbia during September amounted to 105,795,387 feet. This is the fourth consecutive month when the amount has exceeded the one hundred million mark, and brings the total for the year to September 30 to 734,087,410 feet. This is an increase of 45,275,712 feet over the total for the whole of 1915, and with three months to go the production for 1916 should be close to the ten hundred million mark. The total for 1916 should also be close on to double the production of 1914, when the figure was 555,891,197 feet. As compared with the first nine months of 1915, production for the corresponding period in 1916 is 196,000,000 feet more.

DISCRIMINATE BETWEEN CANADIAN LOANS

British Bankers are Watching Activities of Provincial Legislators Regarding Promises and Contracts

Under the heading, "Two Canadian Scandals," the London *Financier* comments in its leading article as follows:—

Since we last discussed the Ontario Power scandal and the British Columbia Breweries scandal the course of events has not been such as to reassure British investors. With regard to the former, the refusal of the attorney-general of the province of Ontario to grant a fiat permitting the Electrical Development Company to institute proceedings against the government and the hydro-electric commission is not by any means regarded as the last word in the controversy. The Canadian mails to hand report that a writ was issued summoning the attorney-general and the hydro-electric commission to an Ontario court to have it declared, in brief, that the government has no right to abrogate a contract entered into by it without the consent of the other party to the contract. The result of these proceedings will be awaited with great interest by the British bondholders.

Violation of Contract.

Meanwhile, the agent-general for Ontario has seen fit to issue for publication on this side what amounts to an advertisement of the facilities offered by the hydro-electric commission, which, he states, is undertaking extensions and improvements involving an expenditure of over a million and a quarter dollars. He omits to add that these extensions and improvements are being made in violation of a solemn contract entered into between his government and the syndicate which afterwards became the Electrical Development Company of Ontario. On the strength of this contract British investors subscribed to the bonds, and they now see their security threatened, owing to the fact that the government of Ontario does not find it convenient to keep its pledged word.

In order that the transaction shall be presented in its proper light, we briefly recapitulate the facts as set forth in our issue of October 30th. The hydro-electric commission, needing more power and wishing to undertake a new power development, applied to the government for the necessary legislation to enable it to do so. The government replied that it was bound by an agreement not to exercise any right it might have to take water from the Niagara or Welland Rivers for the generation of power. Notwithstanding this answer, the hydro-electric commission insisted on their Chipewewa Power project, and called upon the government to break its contract.

Agreement Not Worth Paper.

Accordingly, an act of absolution was rushed through the legislature containing the following extraordinary clause:—

"The exercise of the power shall not be deemed to be the making use of the waters of the Niagara River to generate electric or pneumatic power within the meaning of any stipulation or condition contained in any agreement entered into by the commissioners for the Queen Victoria Niagara Falls Park."

In other words, water is not water and a contract is not a contract. The situation would be Gilbertian if it were not such a serious matter for those who have invested their money on the faith of an agreement which they now find is not worth the paper it was written on. As we have already explained, strong efforts have been made to obtain the annulment of this iniquitous piece of legislation, and it is to be hoped, for the sake of the credit of the government of Ontario, that these efforts will prove successful.

Prohibition and Bondholders.

An even more scandalous situation exists with regard to British Columbia Breweries. The electors of the province of British Columbia have voted in favor of total prohibition, which means that the company's business is threatened with extinction without the slightest suggestion of compensating those who have invested their money in it. We do not question the right of the British Columbians to "go dry." We are concerned only with the interests of the British public who have invested in the debentures of the Breweries Company, and who are entitled to compensation for the loss of their business. Their interests have not been left to take care of themselves. They have found a strong champion in

Mr. E. Mackay Edgar, of Messrs. Sperling and Company, who has been to Victoria to lay the case of the debenture holders before the British Columbian premier. Mr. Edgar contended that it was very unfair to leave the matter of settling compensation until after the company's rights had been taken away. The reply of Mr. Bowser was that if prohibition were carried a commission would be appointed to settle on the terms of compensation, if any. Since then the electors have voted for prohibition, and Mr. Bowser, the Conservative premier, has been defeated by Mr. Brewster, the Liberal leader. It remains to be seen what value now attaches to Mr. Bowser's promise to appoint a commission. The debenture holders may rest assured that every possible effort will be made to obtain justice for them. They invested their money under the laws of the province, and they have every right to expect the protection of those laws. If the policy of prohibition were accompanied by that of compensation for vested interests there would be no cause for complaint, but there is nothing at present to indicate that anything in the way of compensation is contemplated. Should the debenture holders fail to obtain redress the consequences, as in the case of the Ontario Power scandal, would be far-reaching. Canada was a big borrower on the London market before the war, and will want to borrow again after peace is signed. But bankers on this side who are agents for Canadian loans will discriminate very strictly between those provinces which have dealt fairly with British investors in the past and those which have not.

LIFE INSURANCE AND THE STATE

Life insurance requires the particular attention of the state, because the beneficiaries are not the people who pass the contract, said Senator A. P. Casgrain at the Montreal convention of the Metropolitan Life Insurance Company. The man that takes out life insurance is actuated by the highest motives. He is performing a most meritorious act, an act of self-denial. He is depriving himself of some luxury, some pleasure, for the purpose of caring for his wife, or his children, or someone else dependent upon him. He is doing an act of altruism, no doubt, and if there is one thing that appeals to me, it is the industrial policy. The mere fact of an insurance company going to the home of the artisan, and making him agree to lay something aside for his wife and his children, or some other dependant, that mere act is a good act. It might be difficult for a wage-earner to put aside a sufficient amount so that at the end of the year he would have that amount to pay an annual premium.

Conventions of the Metropolitan agents were also held by Mr. Haley Fiske, vice-president of the company, at St. John, N.B., and Quebec, Que.

HAIL INSURANCE IN ALBERTA

The advance figures relating to hail insurance business in Alberta, as supplied to *The Monetary Times* by Mr. R. S. Nicolson, provincial deputy superintendent of insurance, are as follows:—

	Premiums.	Losses.
Acadia	\$ 622	
British Crown	145,000	\$145,200
British America	48,700	41,760
Canada Hail	41,913	29,483

The North-Western National Company has not reported yet.

The Molsons Bank

The Sixty-first Annual General Meeting of the Shareholders of The Molsons Bank was held in the Board Room of their Banking House, 200 St. James Street, Montreal, November 6th, 1916, at 3 o'clock.

The President, Mr. William Molson Macpherson, took the chair, and there were also present the Vice-President, Mr. S. H. Ewing, and Messrs. George E. Drummond, F. W. Molson, W. A. Black, W. M. Birks, E. J. Chamberlin, E. Fiske (Joliette, Que.), A. Browning, A. Piddington, C. E. Spragge, J. W. Loud, G. N. Moncel, A. D. Fraser, W. R. Miller, G. W. Badgley, J. W. Molson and W. B. Blackader, and others.

The President called upon the General Manager, Mr. E. C. Pratt, to read the Annual Report, as follows:—

THE ANNUAL REPORT.

Gentlemen:—

Your Directors beg to submit to the Shareholders this, the Sixty-first Annual Report of The Molsons Bank, and Statement of its position on 30th September, 1916.

The net Profits for the year after making ample provision for Bad and Doubtful Debts amounted to \$582,356.14, from which has been deducted \$440,000.00 in Quarterly Dividends at the usual rate of 11 per cent. per annum; \$21,036.75 to Officers' Pension Fund; \$15,000 to Patriotic and Relief Funds; and \$40,000 War Tax on Circulation, leaving an amount of \$66,319.39 to add to the balance of Profit and Loss carried forward, which now amounts to \$127,619.71.

There has been an increase of over \$1,250,000 in circulation, and of nearly \$7,000,000 in deposits.

On the other side of the Balance Sheet: Current Loans are \$1,150,000 more than a year ago. The Dominion and British Government Securities show an increase of \$5,500,000.00, occasioned by the large amount of Government financing for War expenses.

During the year we have opened a Branch at Three Rivers, P.Q., and have closed the Branch at Ste. Marie, Beauce, P.Q.

The Auditors, Messrs. George Creak, Lemuel Cushing and Charles A. Hodgson, whose Report is appended to our Balance Sheet, offer themselves for re-election.

As usual, all the Branches of the Bank have been carefully inspected during the year, and I have pleasure in testifying to the zeal and efficiency of our Staff.

GENERAL STATEMENT

Of the Affairs of The Molsons Bank on the 30th September, 1916.

LIABILITIES.

Capital Stock paid in	\$ 4,000,000.00	
Reserve Fund	\$ 4,800,000.00

		35,955,495.80
		<u>\$60,142,104.69</u>

WM. MOLSON MACPHERSON,
President.

EDWARD C. PRATT,
General Manager.

We have checked and verified the Cash, Investments, and Securities of The Molsons Bank at the Chief Office in Montreal on 30th September last, and also at another time as required by the Bank Act, and we have at different times during the year checked and verified the Cash and Securities held at four other important Branches of the Bank.

We have compared the Certified Returns from all the Branches with the entries in the Books at the Chief Office of the Bank as at 30th September, 1916, and find that they agree therewith; and all the transactions which have come under our notice have been, in our opinion, within the powers of the Bank.

We have obtained all the information and explanations we have required and we certify that in our opinion the above Statement is so drawn up as to exhibit a true and correct view of the Bank's affairs at the close of business on 30th September, 1916, according to the best of our information and the explanations given to us, and as shown by the Books of the Bank.

GEORGE CREAK, C.A.
LEMUEL CUSHING, C.A.
CHAS. A. HODGSON, C.A.

PROFIT AND LOSS ACCOUNT

Balance at credit of Profit and Loss Account, 30th September, 1915	\$ 61,300.32	Appropriated as follows:

			\$643,656.46

WM. MOLSON MACPHERSON, EDWARD C. PRATT,
President. General Manager.

PRESIDENT'S ADDRESS.

The President, Mr. William Molson Macpherson, then presented his Annual Address, as follows:—

The Sixty-first Annual Statement of The Molsons Bank now submitted to you is the third since the commencement of the War. Our 1914 Statement was presented a few months after the War began, and when we all felt very uncertain as to the future. At the time of our last year's Statement business had begun to improve; War Orders were contributing to the prosperity of this country, and we were looking forward with hope to the future. At present we cannot say when the War is likely to end, still we look forward with full confidence to final victory for the Allies.

The improvement in business noted in our last Report has continued. With few exceptions our factories are fully employed; large orders for war materials continue, and there is work for everyone. Good wages and high prices have stimulated home trade through the increased purchasing power of the people.

At the end of our year the loans of all the Banks in Canada stood at \$891,338,063, a decrease of \$4,800,000 during the year.

Deposits by the public in Canada in the Chartered Banks have increased \$218,000,000 in the year, and at the end of September, 1916, were \$1,270,522,000. At the same time the circulation of the Banks increased by \$29,000,000, and now stands at about \$135,285,031. This is a good indication of greater business activity.

It is gratifying to see that the record of business failures is very favorable as compared with the preceding year, the total for the first nine months of this year amounting to 1,426, with liabilities of \$12,704,000, a reduction of 589 in number and \$11,135,000 in amount, as compared with the same period of 1915.

This is an agricultural country, and our prosperity depends to a large extent upon our farmers. They have benefited not only by the exceptionally large grain crop of 1915, but by the increase in production and price of butter, cheese, poultry, hay, etc. The returns they will now receive from their farms must greatly stimulate production, and should be the best attraction this country can offer to immigrants when the War is over. We urge most strongly that the farmers should adopt more mixed farming. The demand for all they can produce is unlimited, and will bring money into the country, not only to the benefit of the farmer, but to the whole community. While this year's wheat crop seems dis-

appointing in quantity following the unusually large crop of the previous year, it is really not much below the average, and owing to the high prices prevailing for grain and farm products generally, the monetary return is likely to prove as great as that of the previous year, and much more than usual.

The pulp and paper industries have developed very largely during the last two years. All our mills are working to their full capacity to supply the demand from Europe and the United States, at prices which a year ago would have been considered fabulous. Many new mills have been established, and existing ones enlarged. The quantity of pulpwood being used has enormously increased, and the present is a most opportune time for the Government to exercise every precaution to protect our forests against fires and waste of valuable timber. Steps should also be taken to replenish our forests.

We are possessed of the finest spruce limits on the Continent, but unless protected and reforested they will be rapidly depleted, and that great source of revenue will be lost to the country.

The water powers of the country are an exceedingly valuable asset, more particularly to this Province, and the cheapness by which they are operated enables pulp mills and other factories to be worked at exceptionally low cost.

The Conservation Commission at Ottawa is publishing many excellent addresses and papers on timber, water power, and on the protection of the fisheries. We trust that these publications are reaching the proper quarters. A more thorough system of educating the fishermen to protect the fish, more particularly at spawning times, and also to instruct them as to the most improved methods of marketing their fish, is desirable.

A year ago the Finance Minister invited subscriptions to a Dominion of Canada 5% War Loan for \$50,000,000, which at that time seemed a large amount to expect from the Canadian people, but it was doubly subscribed, and the Government, accepting \$100,000,000 of the people's money, used \$50,000,000 of it to assist the Imperial Government to finance War purchases here. During the year the Canadian Banks have lent the Imperial Government \$100,000,000 for the same purposes, and out of the loan of \$100,000,000 recently issued, we believe it is the intention of the Government to still further assist the Munitions Board. This assistance has enabled the Imperial Government to give heavy orders to Canadian manufacturers, and these large credit operations have naturally been attended by a very heavy increase in the deposits in Canadian Banks.

We are pleased to see the general public so eager to invest in such high class securities as the Dominion and Allied Governments are offering, and now that the Finance Department are arranging a method by which small Savings Certificates may be distributed to the people, we trust that all will avail themselves of the opportunity offered by the Finance Minister to help in the financing of the War, by placing their savings at the disposal of the Government. There is plenty of employment; wages are very good; farm products, and in fact all the goods we export, fetch the highest prices, and it is quite within the power of the people to save a large amount of money.

It is desirable that greater interest should be taken by the people in the fiscal administration of their Governments. It is hoped that a more general distribution of Government Bonds will lead the people to watch more closely the expenditures of the country, and to put a check upon any extravagance. We cannot too strongly urge a policy of economy, both in public and private expenditure.

A part of the war expenses are covered by taxation, but much the greater part must be borrowed. The Canadian banks are helping, and I am sure it is the desire of the shareholders that they should continue to help the Allies' financing to the fullest extent of their power, but a similar duty rests on the public, and we trust they will do their duty as well as the banks have done theirs.

While it is gratifying to know that the balance of trade, which has for years been running against us, is now in our favor, yet we must remember that this is due to the very large export of munitions, and is likely to suddenly change when peace is proclaimed.

The high prices for all our products, wood, pulp, paper, grain, live stock, etc., will, we hope, so stimulate their production that we shall be able to hold the markets we now have when more moderate prices prevail. These are the things we are so favorably fitted to produce, and upon which we

must rely to meet our heavy interest bill, which will be greater than ever after the war.

Since the London money market has been closed to outside borrowers, our governments and municipalities have developed a market for their loans in the United States. It is gratifying to see that Canadian securities rank higher in the New York market than any other foreign investment.

In closing, I refer with pride to those members of our staff who have so bravely responded to the call of their country. In some cases, I regret to say, their devotion to the great and good cause has cost them their lives, and, while we mourn their loss, we cannot but feel proud that their names stand coupled with others on the "Roll of Honor," an imperishable testimony to the loyalty and love of our Canadian brothers for the Empire. Such noble sacrifices cannot but bear fruit in the future.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended November 3rd:—

Kerr Lake Mining Company, 60,455; Buffalo Mines, 63,385; Trethewey Silver Mines, 41,010; Hudson Bay Mine, 79,362; Nipissing Mining Company, 348,660; Dominion Reduction Company, 146,000; McKinley-Darragh-Savage Mines, 165,535; Coniagas Mines, 209,400. Total, 1,113,807 pounds, or 556.9 tons.

The total shipments since January 1st, 1916, now amount to 27,067,299 pounds, or 13,533.6 tons.

CANADA'S EXPORTS AND IMPORTS

Canada's total trade for the last fiscal year amounted \$1,424,949,863. This total is based on the returns of goods entered for consumption and exported. All goods imported and exported make an aggregate of \$1,447,378,298, the exports being \$882,872,502, and the imports \$564,505,796. The percentage of duty collected on these imports, including the war tax, was 19.60. The percentage cost of collecting this duty decreased from 4.77 to 3.55.

Exports to the United Kingdom rose more than 100 per cent. in the fiscal year. In the year covering the first war period they showed a slight shrinkage, but in 1916 they rose from \$211,758,863 to \$463,081,241. Exports to the United States have also risen, though to a less extent, the increase being from \$215,409,326 in 1915 to \$320,225,080 in 1916. Exports to France have risen from \$3,810,562 in 1914 to \$14,595,705 in 1915, and \$36,085,813 in 1916. Exports to Italy have been multiplied more than five times.

Imports from the United Kingdom, which touched their maximum in 1913 at \$138,749,998, dropped in 1916 to \$80,108,795. Canada also decreased her purchases in the United States during the fiscal year, the goods imported for consumption from the United States in 1916 having a value of \$398,693,720, a drop of thirty millions, in round figures.

In 1916, an adverse trade balance which stood at 77.38 a few years ago, was converted into a favorable balance of 56.40. During the year the tonnage of new vessels built declined to 13,497, the third lowest point in history. Away back in 1878, the tonnage of new vessels was as high as 188,098. On the other hand, the tonnage of vessels registered was nearly double that of 1915, amounting to 102,239, the highest in fifty years.

Mr. Richard P. Gough, president of the Sellers-Gough Fur Company, Limited, has been elected a director of the Home Bank of Canada.

The next pulp and paper company to come on the market will be the Brompton Falls Pulp and Paper Company, which has been reorganized.

Cochrane, Ont., has rescinded its by-law to raise \$40,000 by debentures to repair fire damage and to grant a rebate on taxes on burned buildings.

Mr. W. J. Sheppard, of Waubashene, Ont., has been elected to the directorate of the Standard Chemical Iron and Lumber Company.

BANK BRANCHES OPENED AND CLOSED

During September, 1916, there were 6 branches of chartered banks opened and 6 closed, according to Houston's Bank Directory:—

Branches Opened—6

Almonte, Ont.	Merchants Bank of Canada.
†Coalhurst, Alta.	Standard Bank of Canada.
Denholm, Sask.	Imperial Bank of Canada.
Manyberries, Alta.	Canadian Bank of Commerce.
Moose Creek, Ont.	Banque d'Hochelaga.
New Toronto, Ont.	Bank of Nova Scotia.

Branches Closed—6

Edmonton, Alta., North End..	Imperial Bank of Canada.
Goodwater, Sask.	Standard Bank of Canada.
†Lesage, Que.	La Banque Nationale.
Marquis, Sask.	Bank of Hamilton.
Montreal, Que., St. Catherine and St. Christophe Streets...	Union Bank of Canada.
Valcartier Camp, Que.	Bank of Montreal.

† Sub-branches.

OCTOBER RAILWAY EARNINGS

The following are the weekly earnings of Canada's transcontinental lines during October:—

Canadian Pacific Railway.

	1916.	1915.	Inc. or dec.
October 7	\$2,966,000	\$2,915,000	+ \$ 51,000
October 14	3,034,000	2,988,000	+ 46,000
October 21	2,932,000	3,068,000	— 136,000
October 31	4,170,000	4,340,000	— 170,000

Grand Trunk Railway.

October 7	\$1,319,090	\$1,019,826	+ \$299,264
October 14	1,300,095	1,067,810	+ 232,276
October 21	1,200,044	1,043,088	+ 156,956
October 31	1,841,092	1,535,958	+ 305,134

Canadian Northern Railway.

October 7	\$ 857,400	\$ 847,500	+ \$ 9,900
October 14	847,700	767,800	+ 79,900
October 21	839,700	792,800	+ 47,900
October 31	1,172,000	1,271,400	— 99,400

INSURANCE BUSINESS IN ONTARIO

Ontario's insurance report shows that there are now 162 companies licensed by the Dominion and registered to transact business in the province. Of these, 81 are transacting fire insurance, 47 life insurance and 34 accident, sickness, automobile and various other branches of the business. There are 22 companies registered for the transaction of ocean and inland marine insurance and two companies registered for the investment of surplus funds in the province of Ontario. The companies licensed by this department are: 70 purely mutual companies, 10 cash mutual and five stock companies. The mutual companies are principally located in the farming community of Ontario and are licensed to transact farm and non-hazardous business. The amount at risk at December 31st was \$288,858,552, and the assets were \$9,785,510. The total cost of management was only \$124,821, which was a little higher than the year previous, when it was only \$115,922. The amount of fire losses paid by this class of companies was \$446,553.

The cash mutual companies are divided into two classes: (1) companies without share capital, (2) companies with share capital. The first-mentioned class paid for losses during the year \$305,283. The assets at the end of the year amounted to \$3,274,410, while the total amount at risk was \$111,906,312. In the second class the amount of assets was \$651,580; the amount at risk was \$38,520,121, and the amount of losses paid during the year was \$263,055.

The licenses issued to agents transacting insurance business in the province of Ontario all expired on September 30th, and some 4,500 agents have renewed their licenses, leaving about 4,000 still unaccounted for.

PEAT IS A CANADIAN ASSET

Valuable By-products Are Obtainable — Market for Artificial Fertilizers

Attention is being drawn to the possibility of expansion of Canadian commerce and industry as a result of the war. This may take the form of domestic production of articles, for a supply of which we have been dependent upon foreign sources, or of increased exports to other countries of products hitherto supplied by Germany and Austria.

Among other things this emphasizes the importance which development of the latent resources of Canadian peat bogs might readily assume if full advantage of the new conditions arising from the war were taken, suggests the Journal of the Canadian Peat Society. Ammonia sulphate, the chief by-product of European peat plants, is a valuable fertilizer, worth about \$60 per ton.

Sulphate of Ammonia Production.

The world's production last year is estimated at 1,365,000 tons, worth about \$80,000,000. The chief importing countries are as follows, the figures representing excess of consumption over production:—

	Tons.	Value.
United States and Canada ..	58,000	\$3,500,000
Japan	115,000	7,000,000
Java	57,000	3,500,000
France	15,000	900,000
Spain and Portugal	42,000	2,500,000
Italy	15,000	900,000

302,000 \$18,300,000

Of these amounts the portion supplied by Germany and Austria was:—

	Tons.	Value.
Germany	90,000	\$5,400,000
Austria	30,000	1,800,000
	120,000	\$7,200,000

These figures show the existence of extensive markets which might be supplied in part, at least by Canada, and of an opportunity to capture some share of the trade of Germany and Austria in this product.

Market for Artificial Fertilizers.

The extent and rapid growth of the domestic market for artificial fertilizers is shown by the following statement of Canadian imports for 1902 and 1903 and the past six years:—

Year.	Value.
1902	\$ 84,996
1903	112,256
1908	403,171
1909	529,660
1910	548,493
1911	586,453
1912	620,147
1913	737,656

Many Canadian peat bogs are rich in nitrogen, and, therefore, suitable for this industry, and enquiries have already been made by British capitalists with a view to establishing chemical works in Canada, provided that a sufficient supply of peat can be guaranteed.

Mr. Frank Yeigh, the well-known Toronto author and lecturer, is to lecture on the Dominion of Canada in the chief centres of the United States, and before representative bodies such as universities and colleges, commercial and industrial organizations, Canadian clubs over the border, commercial clubs, rotary clubs, and similar groups. The bureau of commercial economics is an important organization, having for its object the making known of various countries and processes of manufacture to interested gatherings, and is responsible for supplying thousands of lectures on a wide variety of themes. It has the co-operation of the United States government, through the department of education, and is directed by an advisory council of men of international distinction in many lines of life.

To Investors

THOSE WHO, FROM TIME TO TIME, HAVE FUNDS REQUIRING INVESTMENT, MAY PURCHASE AT PAR

DOMINION OF CANADA DEBENTURE STOCK

IN SUMS OF \$500 OR ANY MULTIPLE THEREOF.

Principal repayable 1st October, 1919.

Interest payable half-yearly, 1st April and 1st October by cheque (free of exchange at any chartered Bank in Canada) at the rate of five per cent per annum from the date of purchase.

Holders of this stock will have the privilege of surrendering at par and accrued interest, as the equivalent of cash, in payment of any allotment made under any future war loan issue in Canada other than an issue of Treasury Bills or other like short date security.

Proceeds of this stock are for war purposes only.

A commission of one-quarter of one per cent will be allowed to recognized bond and stock brokers on allotments made in respect of applications for this stock which bear their stamp.

For application forms apply to the Deputy Minister of Finance, Ottawa.

DEPARTMENT OF FINANCE, OTTAWA,
OCTOBER 7th, 1916.

UNIFORM MUNICIPAL METHODS

Suggestions Regarding Accounting, Purchasing, Banking, Bond Sales and Taxation

In taking up the work of looking after a city's finances, one of the great difficulties to cope with, and which probably is a common defect, is that cities do not show a statement that enables one, without a great deal of study, and a great deal of examination and explanation, to have an accurate idea of just where they stand.

The financial statement issued by most of the cities seems to me to be a mass of figures poorly arranged, and it does not permit one to take a bird's-eye view of the affairs of a municipality, was a statement of Mayor C. S. Walters, of Hamilton, at the conference of the Civic Improvement League of Canada. A provincial department which would compel the municipalities to adopt a uniform accounting system and to make an annual return of such information as might be desired, would be of great benefit not only to the municipality sending the information, but to all municipalities who desired to exchange statements. A central authority could send officers to visit the different municipalities to make an examination of their books and their securities and to have some control over the method of investment of the sinking funds of the corporation. City auditors do not have sufficient authority, or, if they do, that authority seems to be ignored by those in power.

Proper Financial Statements.

A proper financial statement, it seems to me, would assist in buying. It is interesting to exchange figures with municipalities and learn the differences between the prices paid. The late Alderman Wickett, of Toronto, who took a great interest in purchasing, as well as in the general affairs of his city, exchanged prices with Hamilton. The city of Hamilton was then buying certain commodities in smaller quantities, yet at lower prices than the city of Toronto. This problem of the purchasing of supplies for a municipality could be solved, or methods of buying could be improved, by an exchange of ideas.

The mayors of other cities when asked, "What is your big financial problem?" answer: "Well, we have no financial problems. We can get all the funds we require from the bank, our taxes came in well last year, people are satisfied with the assessments, and, therefore, we have no financial problems." But very often, although they do not think they have financial problems, they are creating them for posterity in borrowing money and capitalizing items that properly should be paid for at the time that they are constructed.

Selling Bonds.

As regards the selling of bonds, early last year the city of Ottawa sold some 4½ per cent. bonds at 93.03; for a similar issue just a few days or weeks afterwards the city of Hamilton received 94.875. Not attempting to say that the credit of Hamilton is better than that of Ottawa, but why is it that the bonds of the capital city of the Dominion are not sold at a price as high as the bonds of the leading manufacturing city of the Dominion? If any of you will figure up what we might call the loss on the sale of bonds in the last ten or twenty years in your city, he will be astounded at the amount of money it totals; and surely this civic improvement league will do well to try to discover some more uniform method of marketing bonds. (Controller Fisher, Ottawa, stated the average term of the bonds was different.)

Similarly, different municipalities have different banking arrangements. The rate of interest charged to one city is greater than that charged to another, and the handling of the sinking fund, which, of course, has something to do with the rate of interest paid, is a matter that seems to arouse little public attention, or, for that matter, little attention from the mayor, controllers and aldermen. It seems to be handled as it was twenty or thirty years ago.

New Districts Add to Debt.

The construction of local improvements in newly annexed districts or newly developed districts is a matter that has swelled the public debt and has raised the tax rate, and it has been difficult sometimes to collect the taxes there. People are desirous of improving their property. They petition the municipal authorities and the improvements are laid, but, on inquiry, one finds that the petitioners had

simply a small equity in their property, they were really not the owners, they could not pay the taxes, and had not paid them for two or three years past. Yet, on their petitions, expensive improvements were made in front of their property.

Collection of Taxes.

The penalty for delay in payment of taxes is too small. Instead of having a penalty of simply 5 per cent. for the non-payment of taxes, the penalty should be increased to 5 per cent. per annum. As it is now, a man may let his taxes run for three years with no addition to them except the 5 per cent. The tax which has been the hardest to collect and a tax that has been almost universally dodged, particularly by the well-to-do people of the country, is the income tax. The machinery of the cities ought to be put into operation to collect the income tax, and the patriotism of the people should be appealed to in order that they will not, just because their neighbor is doing it, cut down the return of their income, as has been practised in many cities.

BRITISH CANADIAN TRUST COMPANY

The annual report of the British Canadian Trust Company shows net revenue of \$76,750 after paying interest and expenses on borrowed money, expenses of investment and management and income tax. From the previous return \$16,570 was brought forward. Of the amounts, dividends took \$49,844, the sum of \$25,000 was carried to contingent account, and \$18,481 was the balance carried forward. The company's assets total \$2,616,286, of which investments in mortgage loans, real estate securities account for \$2,536,511. Included in the liabilities are debentures and deposits amounting to \$1,242,573. The Royal Trust Company are the Canadian representatives of the company.

TWO THOUSAND ACCIDENTS PER MONTH

During the month of August, 2,220 accidents were reported to the Ontario Workmen's Compensation Board, and in September, 2,435 notices were received. These figures show an appreciable increase over the corresponding months in 1915, when the accidents reported were 1,568 and 1,619, respectively. The increase is attributed largely to the pressure under which workmen are laboring in industries engaged in the production of munitions and war materials, and to the fact that the scarcity of labor has compelled employers to utilize the services of many young and unskilled hands. There has been an increase in the number of accidents to young boys and girls and to workmen during the first week of their employment in the factory or foundry before they have become accustomed to their machines.

ROYAL COMMISSION AT QUEBEC

Paper Makers, Shippers and Agricultural Interests Tell of Resources and Developments of Province of Quebec

"Help us in the development of this great country, help us to direct its trade through our own ports, send us your steamships, help us to populate our great interior with men who are or will become good British subjects," said Mr. J. G. Scott, president of the Quebec board of trade, when giving evidence before the Dominions Royal Commission.

Mr. Scott favored the system of government control for at least one transcontinental railway line in Canada. It tended to keep the freight rates down to the proper level. For this reason he thought that it was better for the government to have taken over the National Transcontinental Railway than for the Grand Trunk to have done so. A considerable reduction had been made on rates from the north-west, which was a decided advantage to western farmers. Quebec was the shortest route from the west to the seaboard; and given efficient, economic terminal facilities, the country's export and import trade should be attracted in this direction. He would like to see arrangements made that would induce faster steamships to come to Quebec. This would involve better insurance rates and possibly a liberal government subsidy.

Bills of Lading.

Mr. O. W. Bedard, vice-president of the board of trade, in relation to bills of lading, drew the attention of the commission to the "London clause," written in all the out-going bills of lading, which, he said, is a discrimination against the Canadian seaports, inasmuch as the United States shippers had this same clause taken out of United States bills of lading in 1902, therefore the Canadian shippers selling their goods f.o.b. English seaport have to pay that extra charge which the United States have not.

Mr. G. B. Ramsey considered the bill of lading at present in use was a fairly satisfactory and reasonable one. He contended that the claim of the ship owners to decide the conditions upon which they were prepared to enter the market and sell transportation appeared to him to be on as solid ground as the right of any manufacturer to state to a buyer the conditions upon which he would sell his goods, and the class of goods he was prepared to offer at a given price.

Marine Insurance.

Mr. J. B. Morissette said that the marine insurance between Quebec and Liverpool was 10 per cent. lower than that between Montreal and Liverpool. The insurance from New York to Great Britain was 12 per cent., while from Quebec it was 22½ per cent. Mr. Morissette explained that the navigation risk was greater from Quebec. The commissioners asked if there was any comparative statement of the loss between New York and Quebec, to which Mr. Morissette could not reply, but stated that the rates were made by the head offices. However, he did not know whether they kept track of the losses by the various routes.

It has been said that the government should take over part of the insurance risks of the St. Lawrence, and regulate the rates in consequence, was a comment of the commission.

Imports and Shipping.

Mr. Ramsey also presented a statement of the quantity and value of merchandise imported into Quebec for the year 1915, which showed that the leading classes of imports were: First, iron and steel, manufactured or not, of which only 7 per cent. came from Great Britain and 93 per cent. from the United States; second, cotton manufactures, of which 67 per cent. came from Great Britain and 31 per cent. from the United States; third, brass and copper manufactures, of which 10 per cent. came from Great Britain, and 90 per cent. from the United States; fourth, manufactures of leather, of which 5 per cent. came from Great Britain and 92 per cent. from the United States; fifth, wool fabrics of all kinds, of which 93 per cent. came from Great Britain and 6 per cent. from the United States; and a number of other items.

He also said that the number of steamers calling at Quebec during the present season were only 169, exclusive of transports and coasting steamers, as compared with 382 during the season of 1913, and instead of 12 regular lines being represented in the sailings, there were only seven at

present. When conditions became normal, the trade with the mother country would assume larger proportions than ever, the reasons for this being the very strong and practically universal sentiment in favor of British trade which he had found to exist among importers in Quebec; second, that freight rates, were as a rule, in normal times, lower from the United Kingdom than from the sources of supply in the United States; third, that the duty gave a decided advantage to British exporters.

Mr. Joseph Picard testified as to the manufacture of tobacco. He said his company handled about 2,000,000 pounds a year, including domestic and imported material. A considerable quantity of raw leaf came from Ontario and a good deal was grown in Quebec province. The consumption of smoking tobacco was on the increase. There were six or seven large general manufacturers of the weed in Canada and many small firms that manufactured cigars only.

Importance of Paper Industry.

Mr. Frederick Sabbaton, assistant manager of the Laurentide Paper and Pulp Company, Grand Mere, stated that his company possessed 25,000 miles of freehold lands, and practically made nothing but newsprint.

There were 10 to 15 large mills producing newsprint in Canada. The Laurentide Company made 200 tons of newsprint and 50 tons of cardboard per day. They have not changed their output for six years.

The cost of getting out logs, after the war broke out, was not materially increased as there was a surplus of labor, but the increased cost of labor was now approximately 23 per cent. This was the cost of carrying the product of the mill, but in the manufacturing end, the cost of labor had increased 18 per cent. since the 1st of May last. There was an increase in the materials used in the making of newsprint of about 30 per cent. The materials used in a ton of paper average about 40 per cent. of the entire cost.

The price of paper before the war was a trifle under \$40 per ton. The ruling price mentioned to go into force shortly is \$60 per ton. The huge amount of paper consumed in the United States will be a determining factor at this point. The demand is greater than the production.

For the first nine months of this year the Laurentide Paper Company shipped paper as follows: 7 per cent. to New Zealand, 3 per cent. to Australia, 23 per cent. to Canada, 50 per cent. to the United States, 5 per cent. to Great Britain, 9 per cent. to Africa and 3 per cent. to miscellaneous countries.

Where Paper Goes.

The three great paper consuming countries of the world are Great Britain, the United States and Canada, and the greatest producing countries are Canada, Scandinavia and the United States.

Mr. J. M. McCarthy, representing Messrs. Price Brothers, Limited, paper manufacturers, said the price of paper before the war was \$35 to \$36 per ton at the mills. They turned out 52,000 tons of newsprint per annum before the war, and about 58,000 tons now. The price now at the mill was \$37.50 or \$37.60 net. But the company was not looking for new business. They were only able to take care of the old customers, who were being supplied at old contract prices. Witness could not say what the real market price was, but thought \$60 would be a fair price. Only about 6 or 7 per cent. of the company's output went to Canadian consumers, the balance went to the United States. Prices in the United States usually regulated the price of the exported product.

Prohibit Breeding Cattle?

That the time is opportune for the federal government to pass an order-in-council prohibiting the sale of breeding cattle from the Dominion to the United States, and that farmers should have a special minimum rate on railways on transportation of farm implements, malt, manure, etc., was suggested by Hon. J. E. Caron, provincial minister of agriculture.

Mr. G. E. Marquis, head of the provincial bureau of statistics, was of the opinion that uniformity of weights and measures in all parts of the British empire would facilitate statistical exchanges and comparisons and that the calendar year was the ideal statistical year.

An empire trade mark was favored by various witnesses. Other evidence was given with special reference to Quebec's fisheries, mineral resources, imperial cable service, etc.

CANADA AND THE WAR TEST

Through the Sacrifices Involved in the European Struggle
Dominion Will Be Born Anew

Mr. John Stuart Thomson, a Canadian-born resident of the United States, and author of "China Revolutionized," "The Chinese," etc., writes *The Monetary Times* in the following eulogistic terms regarding Canada's share in the European war:—

The admiration for Canada's contribution of an army of 370,000 men is unbounded in the United States. It is appreciated that this is the most patriotic spectacle ever exhibited on the American continent. Canada thus takes leadership in the Americas in preparedness and protection of civilization. She should, and will, reap whatever fruits result from her wisdom, courage and sacrifice. This fruit is now ripening for the harvest.

Canada will now have an important voice in future interpretations of the Monroe doctrine. She will stand for the expansion of Anglo-Saxon civilization.

Canada will be the giant binding link between British and American relations, so often threatened by Teutonic intrigue. Canada will interpret, approximate, reconcile and strengthen these relations. She will be both a diplomat and a partner.

Canada will also turn to the west and bind chain, as great and more romantic. She will solve, mould and transmute the almost irreconcilable Oriental question, with British and American policy.

Canada will rank first among the world's nations as the discoverer of the proper proportions of militarism and democracy, mixed in that divine wisdom, so that democracy will not vitiate preparedness (as in the United States to date); and so that militarism will not destroy individualistic liberty (as in Germany).

Vision of New Canada.

Genius is built on and generated from character, not from wealth. Canada, now having qualified in the supremely heroic tests, which produced the galaxy of statesmen, authors, architects, painters, sculptors, etc., of ancient Greece, I expect to see great intellects evolved in the New Canada out of all proportion to her population, but not inconsistent with the vast circumference of her unconquerable soul. Canada should, therefore, provide tutors for the world in letters, international politics, administration, trade industry, oratory, art, architecture, invention, exploration, etc.

Canada to-day leads the world in the proportionate equalization of her wealth. Without pressure of either governmental fiat or anarchistic rebellion she has already thus achieved the dreams of socialism and happily been saved all the agonies of industrial alteration.

This is said to be the age of organization—the machine age. Yet if all the world were cast into one huge machine, it would still require a super-individual to direct it. Therefore, there never was an age which called for individual greatness as does this age. "A man; my kingdom for a man!" comes the cry from every quarter of the globe; from mistaken Germany; from the new Africa; from the awakened Orient; from depressed America, shamed because of her "Lusitania" surrender; from the broadened British Empire; from star-crowned Australia; from the empurpled Seven Seas; from Latin America; from aroused Russia; from capital; from labor; from letters, art, law, industry; from every new field of human endeavor opened up by, and every old field to be reconstructed because of, the world's greatest and most awful war, in which heroic Canada has taken a brilliant part.

Experience teaches me, after a world tour and visits to almost every country and state, that I expect to see Canada send out men of mark, men of genius, men of precise training, to do a large and necessary work of tutorship because of her unique experience in the vast world-war. These men will add lustre to Canada; will clothe themselves with glory; will benefit their fellows, all in the spirit of altruism, equally mixed with common sense. And the reason large nations of the world have failed in the past is that heretofore commonsense and altruism have not been *equally* mixed. Heretofore it has been either all commonsense, which is selfishness (as in Germany); or all altruism, which is inefficiency (Bryanism, for instance).

I cannot conclude without again paying the tribute to the Canadian army that I wrote in *The Monetary Times* of

December 3rd, 1915. In the great, fighting Southern States, where Lee's and Bragg's men each held back two Northern men; in the Western States, whose Iron Brigades broke through the Southern steel wall; in Yankee-land, where the blood of Cromwell's Ironsides runs pure, cold and brave, I found this tribute paid, that the British navy and *Canada's army* remain, at the last analysis, the chief bulwark of the protection of America's civilization and of the Monroe doctrine. Never did a pure democracy raise such a huge army as Canada's 370,000 heroes. Such efficiency, such courage, such modest manliness have never been surpassed. Such unusual service has never been equalled. No honors, no praise, no encouragement, no friendship, therefore, can ever be enough for Americans to offer Canadians in future for the work they have done, the heroic sacrifices they have endured for the English-speaking race and for the principle of democracy.

Success to Efforts.

May Canada's efforts soon be crowned with success. At the feet of God lies the decision *now*, but since our Lord has built His throne on justice, we know now what the judgment soon will be. *Sic Semper Tyrannis!*

If there lies in my heart one regret, or in my mind one criticism regarding the conduct of the war, it is that Japan long ago has not been asked to bring her army to Russia's aid. I think I know Japanese opinion. I have visited that land. For three years I had intimate dealings with Japanese connected with Nipponite expansion in the Orient. I know that the Japanese want to serve further in this war. I know that if they so serve, it will solve many dangerous problems of the present and future. Let Canada, therefore, take up this slogan: "Why not add Japan and make the world's verdict unanimous against Teutonism?" and after that, as the adored General Grant said, "Let us have peace."

TRADE WITH CAPTURED GERMAN COLONIES

The Canadian High Commissioner in London has been asked by the Colonial Office to ascertain whether any Canadian firms wish to export goods direct to the former German colonies in the Pacific now in Australian occupation. Communications forwarded the department of trade, Ottawa, will be transmitted to the High Commissioner's office in London.

Peterboro' was stated to have no complaints re fire insurance rates at a council meeting when a communication from Judge Masten, who is at present engaged in investigating insurance rates in Ontario, was read, asking if there was any local dissatisfaction on this head, to send delegates to Toronto to formulate a protest before the commission. The matter was referred to the fire, water and light committee, and is likely to go no further.

LEGAL NOTICES

THE WHITE COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 5th day of October, 1916, incorporating Wilfrid Maynard Cox and Howard Armour Harrison, barristers-at-law, William John Beattie, student-at-law, and Richard George Roberts and John Frederick Van Lane, accountants, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, build, buy, sell, repair, convert, alter, let on hire, deal in, import and export, automobiles, motor cars, motor boats, motor trucks, stationary, portable and traction engines, tractors, tools, machinery, implements, gas engines, steam engines and all other types of engines, and the various parts and equipment thereof, and to carry on generally an automobile business in all its branches; (b) To carry on any other business, (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business, or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To acquire or undertake the whole or any part of the business, property, good-will and liabilities of any person or company carrying on any portion of the business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company, and to pay for the same in cash, bonds or paid-up shares or partly in cash and partly in bonds or paid-up shares of the company, as may be agreed upon; (d) To apply for, purchase or otherwise acquire any patents, copyrights, licenses, concessions and the like, conferring any exclusive or non-exclusive or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights, or information so acquired; (e) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person, firm, association or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person, firm, association or company, and to take or otherwise acquire shares, bonds, and securities of any such company, and to sell, hold, issue or re-issue, with or without guarantee, or otherwise deal with or dispose of the same; (f) To take, acquire, lease, hold, sell and dispose of real estate and personal property of every nature and kind as security for or in satisfaction wholly or in part of debts, liabilities or obligations incurred or to be incurred in respect of or in connection with the business aforesaid, or any of the purposes or objects of the company; and to purchase, lease, erect, or otherwise acquire, exchange, sell, let, assign, transfer, or otherwise dispose of, own, maintain, develop and improve any and all property, real and personal, necessary to effect the carrying out of the purposes of the company; (g) To consolidate or amalgamate with any other company having objects similar in whole or in part to those of the company; (h) To accept in payment of any debt or debts due or owing to the company, the stock, shares, bonds, debentures of any other company or companies, and, notwithstanding the provisions of section 44 of The Companies Act, to use any of the shares, bonds, debentures or other securities, or the funds of the company, to purchase or otherwise acquire and to take, hold, assign, transfer or sell the shares, bonds, debentures or other securities of or in any other company or corporation, and to guarantee the payment of the principal of and interest on the bonds, debentures or dividends upon the shares of any other company or corporation, and while holding such shares, bonds, debentures or other securities of any other company or corporation to exercise all the rights and powers of ownership thereof, including the right to vote thereon through such agent or agents as the directors may appoint, and to distribute such shares, bonds, debentures or other securities or any assets of such other company in specie upon a division of profits or distribution of capital among the shareholders; (i) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (j) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors in business) or the dependents or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (k) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (l) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business and in particular any machinery, plant, stock in trade; (m) To construct, improve, maintain, work, manage, carry out or control any roads, ways, branches or sidings, bridges, reservoirs, water-courses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (n) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (o) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (p) To procure the company to be registered and recognized in any foreign country and to designate persons resident therein according

to the laws of such foreign country to represent this company and to accept service for and on behalf of the company of any process or suit; (q) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars or catalogues, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (r) To sell, lease, transfer or dispose of the undertaking of the company or any part thereof, to such person, firm or company for such consideration as the company may think fit, and in particular either for cash or for shares, bonds, debentures or securities of any other company (whether promoted by this company or not) having objects altogether or in part similar to those of the company, or partly for cash or partly for such shares, bonds, debentures or securities; (s) To raise and assist in raising money for and to aid by way of bonus, loan, promise, endorsement, guarantee or otherwise any corporation in the capital stock of which the company holds shares or whose bonds or debentures or obligations are held by the company, or with which it may have business relations, and to do any act or thing for the preservation, protection, improvement or enhancement of the value of any such shares, bonds, debentures or other obligations, and to act as employee, agent or manager of any such corporation and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; (t) To lease, purchase, construct, own, maintain and alter any buildings or work necessary or convenient for the purposes of the company and to take options on lands and buildings belonging to others and to exercise such options or not as may be deemed expedient; (u) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the real and personal property, rights and franchises of the company and to give options thereon or any part thereof; (v) To invest and deal with the moneys of the company not immediately required in such manner as the directors may from time to time determine; (w) To employ brokers, commission agents and underwriters upon any issue of shares, bonds, debentures or other securities of the company and to provide for the remuneration of such person or any other persons rendering services of any kind to the company; (x) To remunerate any person, firm, association or company for services rendered or to be rendered in placing or assisting to place or guaranteeing the placing of any of the shares in the company's capital or any debentures or other securities of the company, or in or about the formation, promotion, organization or incorporation of the company or the conduct of its business; (y) To pay all or any costs, charges or expenses preliminary or incidental to or incurred in connection with the promotion, organization, formation, establishment, registration and incorporation of the company; and to purchase or otherwise acquire on such terms and in such manner as the directors of the company from time to time decide any shares of the capital stock of this company, provided that the consideration therefor be paid out of the company's profits or surplus, if any, and not out of the capital of the company; (z) The business or purpose of the company is from time to time to do any one or more of the acts and things herein set forth either alone or in conjunction with others or as principals, factors, contractors or agents, and to do all and everything necessary, suitable and convenient or proper for the accomplishment of any of the purposes or the attainment of any one or more of the objects herein enumerated or incidental to the powers herein named, or which shall at any time appear to be conducive to or expedient for the protection or benefit of the company; and it is hereby declared that in the interpretation of this clause the meaning of any of the objects of the company shall not be restricted by reference to any other object or by the juxtaposition of two or more objects, and that in the event of any ambiguity this clause shall be construed in such manner as to widen and not to restrict the powers of the company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The White Company, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 11th day of October, 1916.

THOMAS MULVEY,
Under-Secretary of State.

THE MANOR ESTATES, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 17th day of October, 1906, incorporating Robert Abercrombie Pringle, Thomas Anderson Burgess and Louis Cote, barristers-at-law; Robert Hatfield Pringle, customs broker, and Mary Ida Keays, stenographer, all of the city of Ottawa, in the Province of Ontario, for the following purposes, viz.:—(a) To acquire by purchase, lease, exchange, concession or otherwise, city lots, farm lands, mining or fruit lands, town sites, grazing and timber lands, and any description of real estate and real property or any interests or rights therein, legal or equitable or otherwise, howsoever; to take, build upon, hold, own, maintain, work, develop, sell, lease, exchange, improve and otherwise deal in and dispose of such lots, lands, sites, real estate and real property or any interest therein; to deal with any portion of the lands and property so acquired, subdividing the same into building lots, and generally laying the same out into lots, streets and building sites for residential purposes or otherwise; (b) To construct streets upon the land of the company, necessary sewerage and drainage system, to build upon same for residential purposes or otherwise, and to supply buildings so erected with electric light, heat, gas, water or other requisites therefor; (c) To act as agents for the sale and purchase of real estate and all interests therein and to procure real estate investments for any person; to act as selling agents for the owners of any real estate, subdivision, building sites, town sites or lands of any kind or any interest therein, and to take over and acquire from any person or corporation any agency, inclusive or otherwise, for the sale of any such lands, sites or interest therein, and to accept an assignment of and perform any contracts made by any person with any other person or corporation for the sale of any such lands,

LEGAL NOTICES

sites or interest therein as agents or otherwise and generally to act as real estate, house and rental agents, and as incidental thereto to carry on the business of fire insurance agents; (d) To apply for, purchase or otherwise acquire, any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property rights or information so acquired; (e) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (f) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise, and comply with any such arrangements, rights, privileges and concessions; (g) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Manor Estates, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 19th day of October, 1916.

THOMAS MULVEY,
Under-Secretary of State.

17-2

VAN DER LINDE RUBBER COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 26th day of October, 1916, incorporating Sophia Tutty, bookkeeper, Ella Lester Kelly, Susie Ross and Myrtle Etoile Thurgarland, stenographers, William Archibald McFarlane and Vincent Thomas Aloysius Foley, students-at-law, and Lester Millman Keachie, barrister-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on the business of manufacturers of and dealers in rubber and moulded goods and goods and products in which rubber of any kind whatsoever or any analogous substance may be used and to manufacture and deal in plastic goods, materials and products of all kinds whatsoever, and to cultivate rubber plants, guayule and all other plants capable of being used for the manufacture of rubber or similar products and plastic goods, and to carry on the business of rubber plantations in all of its branches, and to carry on and work the business of manufacturers, winners and buyers of every kind of rubber plants and vegetable, mineral or other product of the soil; to prepare, manufacture and render marketable any such product, and to sell, dispose of and deal in any such product, either in its prepared, manufactured or raw state, either by wholesale or retail, and to carry on the business of chemists and electricians, and manufacturers of and dealers in all kinds of chemicals and electrical goods; (b) To buy, sell, manufacture, refine, manipulate, import, export and deal in all substances, apparatus and goods capable of being used in any such business as aforesaid or required by customers of or persons having dealings with the company, either by wholesale or retail; (c) To own, construct, operate, manage and deal with ships, barges, vessels and other marine craft, and so far as may be expedient to carry on the business of general merchants and buy, lease or otherwise acquire and to clear, plant and work rubber estates and plantations or any interest therein, as may be deemed advisable in the interests of the company; (d) For the purpose of supplying the needs of the company's business, to purchase, lease or acquire any interests in lands, water powers and water privileges and to develop therefrom any power, electrical or other energy needed for said business on or outside the lands of the company and to use and transmit the same and to sell, lease or dispose of said lands or interests therein and to sell or dispose of surplus power or energy not required for the needs of the company and to enter into working arrangements with other companies, persons, firms or corporations for the use or transmission of such surplus and to establish, operate and maintain any electric, gas or other lighting, heating or power plant and to sell or dispose of such surplus electric, gas or other light, heat and power and all the residual products of such plant; provided, however, that any sale, distribution or transmission of electric energy for light, heat and power beyond the lands of the company shall be subject to all provincial and municipal laws and regulations in that behalf; (e) To acquire by purchase, lease, concession, exchange or otherwise, land, buildings and hereditaments of any tenure or description and any estate or interest therein, and any right over or connected with land, and to turn the same to account as may seem expedient, and to construct, reconstruct, erect, alter, operate, maintain and manage all buildings, erections, factories, shops, storehouses, depots, machine shops, engine houses and other constructions and erections for its business and to hold, improve, decorate, furnish such buildings and erections as may be deemed proper, and to acquire as aforesaid all other property, movable and immovable, necessary and useful for carrying on any of the purposes of the company, and with power to sell, lease, exchange or otherwise dispose of any such property, lands or interests therein or rights thereover as the company may deem proper; (f) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (g) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (h) To apply for, purchase or otherwise acquire and use, any inventions, patents, brevets d'invention, trade marks, trade names, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention or

discovery which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop, improve or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (i) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (j) To take, or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company, notwithstanding the provisions of section 44 of the said Act; (k) To enter into any arrangement with any government or authorities, supreme, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such government or authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (l) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors in business) or the dependents or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (m) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (n) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business and in particular any land, buildings, easements, machinery, plant, stock in trade, as may be required and to construct, maintain and alter any buildings or works necessary or convenient for the purposes of the company; (o) To construct, improve, maintain, develop, work, manage, carry out or control any roads, ways, tramways, branches or siliings, bridges, reservoirs, watercourses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (p) To invest and deal with the moneys of the company not immediately required in such manner as may from time to time be determined, and to lend money to such persons and on such terms as may seem expedient, and in particular to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (q) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company; (r) With the approval of the shareholders, to remunerate any person or company by the issue of fully paid-up stock or otherwise, for services rendered or to be rendered in placing or assisting to place or guaranteeing the placing of any of the shares in the company's capital, or any debentures, bonds or other securities of the company, or in or about the formation or promotion of the company or the conduct of its business; (s) To issue paid-up shares, bonds, debentures or other securities of the company in payment or part payment for any property or rights which the company may desire to acquire or, with the approval of the shareholders, for any services rendered or to be rendered or for any work done or to be done for the company or in or towards the payment or satisfaction of debts or liabilities owing by the company; (t) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (v) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (w) To do all such other things as are incidental or conducive to the attainment of the above objects; (x) None of the powers given by any paragraph aforesaid are to be restricted or limited by reference to or inference from any other paragraph. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "van der Linde Rubber Company, Limited," with a capital stock of three hundred and fifty thousand dollars, divided into 3,500 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 26th day of October, 1916.

THOMAS MULVEY,
Under-Secretary of State.

18-2

Mr. G. H. Hees, president of the George H. Hees, Son and Company, Limited, window shade and upholstery manufacturers in Canada, died at his home, 180 St. George Street, Toronto, last week. Mr. Hees was born near Syracuse, N.Y., in 1841, and established a factory in Toronto in 1887, taking as partner his son, William R. Hees. He was president of the Merchants' Fire Insurance Company, vice-president of Adams Furniture Company, the Sterling Realty Company, and a director in the Chartered Trust and Executor Company, the Crown Life Insurance Company, and the Columbia Mills Incorporated.

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of February, 1917, for the right to cut pulpwood and pine timber on a certain area situated on the Black Sturgeon River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure, for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honourable the Treasurer of the Province of Ontario, for ten thousand dollars (\$10,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$10,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,
Minister of Lands, Forests and Mines.
Toronto, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

BANK OF MONTREAL

Notice is hereby given that a Dividend of Two-and-one-Half per Cent., upon the paid-up Capital Stock of this Institution, has been declared for the current quarter, also a Bonus of One per Cent., both payable on and after Friday, the First Day of December next, to Shareholders of record of 31st October, 1916.

By order of the Board,
FREDERICK WILLIAMS-TAYLOR,
General Manager.

Montreal, 20th October, 1916.

THE ROYAL BANK OF CANADA.

DIVIDEND No. 117.

Notice is hereby given that a Dividend of Three per cent. (being at the rate of Twelve per cent. per annum) upon the Paid-up Capital Stock of this Bank, has been declared for the current quarter, and will be payable at the Bank and its Branches on and after Friday, the first day of December next, to Shareholders of record 15th November.

By order of the Board.

C. E. NEILL,
General Manager.

Montreal, P.Q., October 17th, 1916.

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of December next for the right to cut pulpwood and pine timber on a certain area situated on the Pic River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet, board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honourable the Treasurer of the Province of Ontario, for twenty-five thousand dollars (\$25,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$25,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,
Minister of Lands, Forests and Mines.
Toronto, August 28th, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

THE CANADIAN BANK OF COMMERCE.

DIVIDEND No. 119.

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this Bank has been declared for the three months ending 30th November next, together with a bonus of one per cent., and that the same will be payable at the Bank and its Branches on and after Friday, 1st December, 1916. The Transfer Books of the Bank will be closed from the 16th to the 30th of November next, both days inclusive.

By Order of the Board,

JOHN AIRD,
Toronto, 27th October, 1916. General Manager.

ILLINOIS TRACTION COMPANY

DIVIDEND NOTICE

A quarterly Dividend at the rate of Three per cent. (3%) per annum on the Common Stock of the Illinois Traction Company has been declared for the Quarter ending October 31st, 1916, payable November 15th, 1916, to Shareholders of record, October 31st, 1916.

By order of the Board,

GEO. M. MATTIS,
Champaign, Ill. Treasurer.

DIVIDENDS AND NOTICES**UNION BANK OF CANADA.****DIVIDEND No. 119.**

Notice is hereby given that a Dividend at the rate of eight per cent. per annum, upon the Paid-up Capital Stock of the UNION BANK OF CANADA, has been declared for the current quarter, together with a bonus of 1 per cent., and that the same will be payable at its Banking House, in the City of Winnipeg, and also at its branches on and after Friday, the 1st day of December, 1916, to Shareholders of record, at the close of business, on the 15th day of November, 1916.

The transfer books will be closed from the 16th to the 30th of November, 1916, both days inclusive.

By Order of the Board,

G. H. BALFOUR,

General Manager.

Winnipeg, October 19th, 1916.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 8c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over \$5,000.00, and he has built up a future income of over \$3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

ACCOUNTANT, 31 years, twelve years' banking experience, wishes to make change. Would like position with financial or commercial firm having good prospects. Apply Box 9, *Monetary Times*, Toronto.

SUCCESSFUL BANKER, with wide experience as Manager and also four years as Manufacturer and in Wholesale, seeks investment in a sound financial or other Company where his services would be required. Is capable of taking over correspondence, advising on investments or acting as secretary-treasurer. Small capital at present, but can increase to a good round amount later. Box 11, *The Monetary Times*, Toronto.

SCOTCHMAN of good education and ability, with 6 years' residence in Canada and many years Secretarial and Commercial experience in London and Africa in positions of trust, seeks similar position in one of the Cities, East or West. Limited amount of Capital introduced if necessary. Correspondence invited. Retlaw, Box 254, Calgary.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

DEBENTURES FOR SALE**TENDERS FOR DEBENTURES**

Tenders will be received up to 2 o'clock p.m. on Friday, 24th November, 1916, for \$42,000.00 debentures of the County of Bruce. Debentures are issued for Patriotic purposes, payable in ten annual instalments. Interest 5½%. Principal and interest payable 20th December each year at Bank of Commerce, Walkerton. Coupons attached. Equalized assessment of County \$28,192,131.00. Debenture debt \$202,039.39, including this issue. Delivery to be accepted and payment to be made at Walkerton on delivery of debentures on December 20th, 1916.

Tenders will be opened at County Treasurer's office, Walkerton, on Friday, November 24th, 1916, at 2 p.m. Tenders to be marked "Tender for debenture," and addressed to
NORMAN ROBERTSON,
County Treasurer, Walkerton.

CITY OF EDMONTON**TENDERS WANTED**

Sealed tenders will be received up to 5 o'clock p.m. on 17th day of November, 1916, for the purchase of the following debentures:—

By-law No. 683.....	\$363,000.00
By-law No. 684.....	\$356,000.00

These debentures are issued against arrears of 1914 and 1915 Taxes.

The above debentures are each for \$1,000.00, dated July 1st, 1916, and run for two years, maturing July 1st, 1918. They bear interest at 6 per cent. payable semi-annually. Interest and Principal payable at the Imperial Bank of Canada, Edmonton, Alberta, or Toronto, Ontario, or at the holder's option at the Bank of the Manhattan Company, New York.

The debentures are a liability of the City at large.

Tenders required for net Edmonton delivery and payment, and to include accrued interest to date of payment.

The City reserves the right to reject any or all tenders.

F. BARNHOUSE,

City Treasurer.

HIGH INTEREST RATES AFTER WAR

The most salient economic fact of the European war, points out Professor Irving Fisher in the *Annals of the American Academy of Political and Social Science*, is that the nations engaged in it are suffering an immense reduction in the income of their people. It is estimated that the people of Great Britain, France and Germany had an aggregate income before the war of approximately \$80,000,000 a day, and that the current cost of the war to these three countries is now about \$60,000,000 a day, or three-quarters as much. This cost does not include the destruction of private property nor the loss of productivity.

"Most of the \$60,000,000 a day (four-fifths in England)," says Professor Fisher, "comes, in the first instance, from loans, that is, from the accumulated wealth of the world, mostly of the belligerent countries. Exactly what the reduction in real current incomes has been (i.e., from taxes, destruction of goods and lessened consumption) no one knows, but it is undoubtedly a large percentage. It is estimated that the annual interest charge on war loans will, after the war, equal or surpass the total national budgets before the war.

"But, as soon as the war is over, the thoughts of all will be directed to reconstruction, and all Europe will be in the position of a new country, poor in immediate comforts, but (relatively) rich in future expectations. Such a condition will make for a high rate of interest. The spirit of Europe will be one of eagerness and impatience, just as is the spirit during the upbuilding of a new country; and this eagerness and impatience will be registered in a high rate of interest as they were while our forefathers were making America."

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

A Good Living Wage
A Profitable Future
A Provision For Old Age

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

*Note.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending Sept., 1916, were: imports 1916, \$50,608,343; 1915, \$107,185,428, and exports 1916, \$225,552,035; 1915, \$94,628,533. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

LEGAL NOTICE

COMMERCIAL CHEMICALS, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 23rd day of October, 1916, incorporating Earl Adlai Seburn, accountant; Percy Robinson, student; Ethel May Lennox and Margaret Jane Martin, stenographers, and Marcus Smith, student-at-law, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—

(a) To manufacture, buy, sell and deal in goods, wares and merchandise; and in particular and without in any way restricting the generality of the foregoing to manufacture, buy, sell and deal in chemicals; (b) To carry on any other business (whether manufacturing or otherwise) which may be deemed necessary for the company's business; (c) To sell or dispose of the undertaking of this company or any part thereof for such consideration as this company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of this company; (d) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account, or otherwise deal with all or any part of the property rights of the company; (e) To do all or any of the above things, as principals, agents, or otherwise, and either alone or in conjunction with others; (f) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Commercial Chemicals, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 24th day of October, 1916.

THOMAS MULVEY,
Under-Secretary of State.

18-2

RUSSIA NEEDS CANADIAN MACHINERY

Mr. C. F. Just, Canadian trade commissioner in Russia, again draws attention to the opportunities that await the Canadian manufacturer in that country. He shows that the use of agricultural machinery in Russia has increased greatly in recent years—in the last thirteen years it has quadrupled—but is still far below that which obtains in other countries. In 1913 the value of the entire factory production in Russia of farm implements and machinery was 63,000,000 roubles, while that of the imports was about 50,000,000 roubles. At present, when the manhood of the country, mostly engaged in agriculture, has been called up for military service, the need for replacing manual by mechanical labor has become more pressing than ever. The output of the local factories has been greatly reduced owing to their engagements to furnish war supplies; and at the same time the imports of the higher or more complex types of farm machinery have fallen far below the average, notwithstanding the intervention of the Russian government, which obtained a credit last autumn of 5,000,000 roubles for the purchase abroad of this kind of machinery. It is understood that similar action will again be taken by the government for the requirements of 1917. The scarcity of mechanical appliances for farm work extends to all kinds of implements. In 1913 Germany and Austria supplied simpler varieties of agricultural implements to the value of 13,000,000 roubles, and of that sum 5,000,000 roubles represented the value of the imports of ploughs alone.

Under a ruling of the finance department all contributions by business firms to Red Cross funds or to the National Patriotic Fund are to be considered as an expense against profits, and consequently such contributions will reduce the amounts such firms are required to pay into the Dominion treasury under the business tax. The government takes the view if a business man subscribes to patriotic funds he should not be taxed at the same time on the amount of his contribution.

Canada Must Plan and Work For Future

PEACE Period to Follow the War May Find Us Unprepared for the Commercial Struggle Then to be Waged—Sir George Foster Says in that Regard that "There is not a Great Country so Sound Asleep as Canada."

"**B**Y the time this war is over, whether it be in 1917 or 1918 or 1919—and no man living can tell in which year it will be—500,000 adult men will have been abstracted from the fields, the forests, the mines, the farms of this country; taken away from previous beneficent productive work and drafted into the great phalanx which day and night, month after month, year after year, are trying to destroy as much of the accumulated wealth of the world as they can, and to destroy as many units of humanity as they possibly can. Do you think that 500,000 adult men can be taken out of the productive industries of Canada and leave no after effects? Put that down on your note-book. But put another thing alongside of it—war at the front has got to be sustained by war service at the base, and for every soldier that fights in the trenches and at the front it is calculated that the whole time of one or two persons must be given to provide the equipments, the supplies, the services which are necessary to make the front line effective in carrying on the war."

In these words, Sir George Foster, minister of trade and commerce, commenced an analysis of probable trade conditions after the war, in an address last week to the Empire Club, Toronto, the following special report of which has been prepared for *The Monetary Times* :—

"Then put as a second point on your note-book the fact that at least 500,000 men and women, and probably nearer 750,000, are abstracted and will be abstracted from the beneficent productive work of Canada in making supplies, equipments, doing subsidiary services of a thousand different kinds, all to aid the processes of destruction and demolition which are being carried on by the advanced 500,000 men. Do you think it is possible to abstract, in addition to the first, this other force of 500,000 or 750,000 men, and yet there shall be no after consequences, no effects? But you have not the whole account yet. Put down on your note-book the tremendous daily expenditures for war; the colossal debts that are being accumulated; the increased taxation which is necessary in order to keep up this burden; and you will tot up a sum of money so vast that you will scarcely be able to adequately understand exactly what it means. But it is a burden which is rolled in as one of the consequences of the war, which is laid upon your shoulders, and which will bear heavily upon your shoulders for your lives and for the lives of your sons; if it does not go farther than that.

"Put down on your note-book as well another item—the trail of war, the consequences of war outside of those financial and unit abstractions that I have spoken of, in the men who will never come back, in the men who will come back, but different from what they were when they went over; in the men who will come back, who will be our proud burden—and we will not think of them as burdens; lovingly we will care for them, government, municipality, association, home, the individual; but none the less they will be a drag and an abstraction, a drag upon the prosperity of the future, an abstraction from the work of the world, and the value of what might have been their contribution if they had never gone to the war.

"Then you can let your imagination go just a little further as to what it means for this Dominion of Canada to have had these, the virile men, the strong men, the men of fibre physically, the men of fibre mentally, the men of big souls and of large visions and of strong feelings, and sensitiveness to the obligations of duty and right, to those ideals which were ours, pass out from us in these days, turning their backs upon the west and facing the east till they came to the base line and the trench and met destiny face to face. There are factors which are being abstracted from the fertile soil of this country which it will take generations to replace, the loss of which we cannot but deplore, and the loss of which it will take long to make up.

"Do you think that all these things can take place and that something is not doing, working out of our sight partly, in our sight as well—working, working in this country of ours, in every branch of its life and its enterprise? Is there not something in all that which makes it necessary for us, if we will face our duties, to spare a little from our busy work, to let our thoughts have some play when activities are not so strong, and to face the conditions and the situations as they appear to us—face them with thought, face them afterwards with plans as to meeting the conditions when they come? Is it best for us or not, to wait till these conditions are upon us? Or is it best for us to anticipate them as much as we can, and prepare for them as best we may?

"Suppose that to-morrow the bells of peace ring and war is declared off. There are some things that we know will take place. One thing that will take place is this: with that very red-hot moment the doors of your munition factories will shut, the wheels of your munition industries

will cease to go round, the busy cogs will no longer work, you will no longer have governments coming to you and stuffing both pockets full of orders and saying to you, 'Get busy and fill these.' You will not then have that source for employment. In all that aggregation of capital and enterprise and industry and machinery and equipment, there will be a sudden pause. The chains with their links will clank and move more slowly, and the war machine—wonderful, tremendous, pervasive as it is—will stop dead in so far as nine-tenths of those activities are concerned.

Losing Peace Time Business.

"There will be another thing," he continued. "While you have been furnishing your factory for munitions of war, getting your help, drilling them to the work, filling the orders which crowd in upon you, for which payment is prompt and quick and certain—while all that is going on, you, or others like you, have been gradually growing out of your old-time peace custom. You have not been able to attend to your old customers. They have gone elsewhere; whither the old peace custom in the two or three years will have scattered and gone, and largely will have been lost. Then, when the war orders are no more, you have got to go out and hustle after orders. You will not find people coming in, stuffing your pockets full of orders, and telling you to hustle; it will be you that will have to do the hustling then—hustle for the old customers that you have not known for two or three years, for the old custom that you have not enjoyed for a year or two years or more. All that I want to do is to bring before you as vividly as I possibly can that that is a change that is absolutely certain. Many things we do not know, and others we cannot reasonably guess, but these things I have been speaking about are absolutely certain.

"What is best to do? To wait till that time comes, and then in the confusion and in the maze of worrying, disappointed, dislocated activities which will busy us at that time, to sit down and in that guise and under those circumstances try and work out what we shall do for the future?

Canada is Sound Asleep.

"Let me in all sincerity, in all kindness, but in all truthfulness say that there is not a great country that I know of that is so sound asleep as Canada is to-day in that very particular. I want you to take that in, because I believe it is absolutely true. There is no doctrine, spiritual or otherwise, that I would agree to with a greater conviction of my being right than to this doctrine which I have just annunciated. I believe it is absolutely truthful. Now for proof. Go over to England. Some of you have been there, and I appeal to you that have been there. While the heart of England, out to its rim is burdened and busy with preparations for war and the making of munitions, there is a wealth of activity—mental, scientific, businesslike—which is devoting hour after hour, day after day, night and day, week after week, month after month, looking into those very problems which I have been trying to limn for you to-day, and seeing and delving and examining and planning and working with capital, with business enterprise and business ability, to get into operation the things which must be engaged in when peace comes, and not to be found napping.

"The world has learned this lesson from the war—those engaged in the war most particularly—that old business crusts, like old social crusts, like old class crusts,

have been pretty well shot to pieces during these two and a half years of war. They will never be mended. Not only the class distinctions will have been rent in twain from top to bottom, to be succeeded by better, but the crusts of business custom and wont hallowed by centuries have been rent from centre to circumference and will never be mended and be as it was of old. The war has taught the Empire that mobilization, standardization, organization and co-operation—that those four things are winning this war. Application of those principles is what is winning the war, and the lesson will be absolutely learned; it must be learned after the war if not before the war is over, that these same things must be applied in the world of business. So, in Great Britain they are doing that, and so they are doing it in the United States. Read their scientific journals, read their trade journals, read the results and reports of their great conventions. The United States is alive from the borders of the south to the borders of Canada, looking to the future, making preparations—scientific, financial, including the enterprise and the application of business ability, making preparations for what shall succeed the war. France is doing the same on a scientific and uniform basis; so is Russia; so is Italy, in lesser degree but still doing it; all the countries are doing it; so is Japan. What is Canada doing? She may be thinking a great deal. She may be doing something, but to my eye there is not much that can be scanned upon the surface as yet. How long shall we go on in that way?

Combination Will Win.

"When the war is over and peace comes and the world of business sets itself to work, competition will be on a basis different from ever before. Tom and John and Harry with small capitals and little businesses will have no chance in the world to go into Russia and do big business. It must be done on a different plane. Combination must come in; co-operation must come in; mobilization of forces must come in. Suspicion, small business, and petty jealousies must be swept out and men must be willing to give of the best that is in them to their neighbor in the same trade and in other trades, in order that you may get at the best national results. Is there any doubt in the world about this? I do not think there is. What are we doing? What are we going to do? For Canada is a country of brain and nerve and business ability, of resource and adaptability. It is going to secure its place in the world in the future as it has in the past. It is going to play its part, but we have got to do something that we have not yet done if we are to give ourselves a chance to play the part.

Trade Fight With Bare Fists.

"Do you know the pathetic thing about the war in its earlier period like that great Eastern Russian Bear? Those Russians, anti-German to the core, whatever German influence may have penetrated the courts and high circles of Russian society and high circles of finance and of business, the Russian heart was not swayed or touched or entered by the Hun, and it is that that made the Russian soldier a unit from Vladivostock to the Carpathians, a unit in this war behind their Czar to defend their country and to fend off the Hun. There you see that people of ideals, of spirituality, simple, plain people, with the purpose in their heart to do their work, you see them fighting with their bare fists against German equipments—iron, steel, blood, flame, poison, everything concentrated upon them. Was it not pathetic that they went into that fight with their bare fists, so to speak,

and fought and died by hundreds of thousands without giving way?

"Do you want to be in that way in a business point of view? You have got pluck; you have got a heart; you have got a brain; but if you don't have the munitions of war you go out into this great peace competition after the war is over, and you will find yourselves up against

disadvantages—better munitions, better equipped, better nationalized and better mobilized businesses than you yourselves have—and it will take you years, and maybe a generation, to overcome the initial handicap. Why not commence to overcome it now? Why not get down to thinking and planning and action in order to put yourselves right in Canada with reference to this future?"

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Minneapolis, St. Paul and Sault Ste. Marie Railway Company.—Messrs. W. A. Read and Company have placed privately with investors a new issue of \$1,500,000 Minneapolis, St. Paul and Sault Ste. Marie 4½ per cent. equipment bonds.

Dominion Steel Foundries.—The directors of the Dominion Steel Foundries have declared the regular dividend of 2 per cent. for the quarter and increased the customary bonus from 3 to 8 per cent., making a distribution for the three months' period of 10 per cent.

Canadian Locomotive Company.—The Russian government, it is understood, has distributed orders for 100 locomotives. Of these engines 40 will be built by American Locomotive Company, 40 by Baldwin Locomotive Works and 20 by Canadian Locomotive Company.

Toronto Furniture Company.—A contract for 400,000 of ammunition boxes has been closed. The company has turned out and delivered 200,000 of similar boxes and undertakes to make delivery of the 400,000 now contracted for between now and next summer. The contract is to be carried out in a plant which the company has erected adjoining its furniture factories.

Canadian Pacific Railway Company.—At the meeting of the directors of the Canadian Pacific Railway Company, a dividend of 2½ per cent. on the common stock for the quarter ended 30th September last, being at the rate of 7 per cent. per annum from revenue, and 3 per cent. per annum from special income account, was declared payable January 2nd next to shareholders of December 1st.

Toronto Paper Company.—The directors have declared a 3 per cent. dividend for the second half of the current year, compared with a disbursement of 2 per cent. for the first half, and none at all for the preceding year. In 1913 the dividend was increased from 5 to 8 per cent., but in another six months it was reduced to 6 per cent., and in the second quarter of 1914 it was passed.

Canadian Pacific Railway Company.—Few people know that there are probably 10,000 Canadian Pacific cars on United States lines, either because they are in use or because it is impossible to unload them. Car rentals, says the Boston News Bureau, are 45 cents a car per day, which means that roads in the United States are paying over to Canadian Pacific \$4,500 a day, or nearly \$1,500,000 a year.

Toronto Railway Company.—Messrs. W. A. Read and Company, New York, are offering an issue of \$1,250,000 6 per cent. gold notes of the Toronto Railway Company. The sum of \$500,000 is due December 1st, 1917, and \$750,000 due December 1, 1918. The notes offered are part of an issue of \$2,000,000 authorized to refund a like amount due December 1st, 1916, and represent expenditures for extensions and imports. The notes due 1917 are offered to yield 5 per cent., the others 5½ per cent.

Windsor Hotel Company.—The directors have declared a dividend of 4 per cent. for the year ending October 31st last, payable on December 1st, the first dividend paid by the

company since this time two years ago. In 1914 the company paid a total of 4 per cent. in two half-yearly distributions of 2½ per cent. and 1½ per cent., against 5 per cent. in 1913, and 10 per cent. previously. Earnings in 1915 were only about 1 per cent. on the capital stock and dividends were omitted altogether.

Lake Superior Corporation.—Messrs. A. H. Chitty, of Sault Ste. Marie, and Thomas Gibson, of Toronto, are about to retire from the board of the Lake Superior Corporation in order to afford place for representatives of the Philadelphia interests that are now prominently identified with the company. It has been decided that a new chairman shall be chosen in place of Mr. W. K. Wigham, now serving with the British army. The directors have arranged that periodical reports should be issued.

North American Paper Company.—Mr. J. E. A. Dubuc, president of the North American Paper Company, in a statement recently, said that Canada will eventually produce enough wood pulp to supply the needs of the entire world. Owing to the increasing demands for paper and the many uses to which it is being put, Mr. Dubuc does not look for any recession in the prices of paper. The North American Company controls 1,360,000 acres of pulp wood lands, and plans have been made for an enlarged output.

Hudson Bay Company.—The October sales of the Hudson Bay Company have taken place. The prices obtained, compared with those obtained in April last and the number of skins, were as follows: Beaver, 10,295, declined 20 per cent.; musquash, 127,088, advanced 60 per cent.; fisher, 1,750, advanced 17½ per cent.; fox, red, 2,841, declined 12 per cent.; fox, cross, 1,209, unchanged; fox, silver, 238, unchanged; fox, white, 2,161, advanced 15 per cent.; ermine, 2,561, advanced 15 per cent.; marten, 5,667, declined 10 per cent.; mink, 4,367, advanced 30 per cent.; lynx, 5,900, declined 20 per cent.; wolf, 957, declined 45 per cent.;olverine, 237, advanced 10 per cent.; skunk, 955, declined 15 per cent.; bears, 1,100, declined 10 per cent.

Rambler-Cariboo Mining Company.—The company has sold 1,000 tons of concentrates stored at the property to the United States Zinc Company for \$23 a ton. The product will average 34 per cent. zinc and 28 ozs. silver. Reports from the smelter have also been received stating that \$13,000 are due in settlements for lead-silver ore. A production of 1,000 tons of zinc concentrates monthly is stated possible, in addition to the regular lead-silver output, and it is probable that the entire zinc output will be taken by the United States Zinc Company, with the exception of a small amount for experimental purposes at the Anaconda Copper Company's new electrolytic reduction works at Great Falls, Mont. Shipments of the 1,000 tons of the concentrates sold are to be made to its plant at Blende, Colo.

International Paper Company.—The company recently advised the trade that it would establish a minimum of 3¼ cents a pound delivered for all 1917 contracts. It is likely some contracts renewed after January 1 will be well above 3¼ cents. On a normal price of 2¼ cents a pound the International Paper Company can earn its depreciation charge, its approximately \$1,000,000 interest and sinking fund re-

quirements, and the full 6 per cent. on the \$22,406,700 preferred, due to advances in specialties, capacity production and renewal of a few expiring newsprint contracts at advanced figures, it is doing better than this. The \$20 a ton advance applied to prospective 1917 output, will, it is stated, mean \$11,000,000 additional income. This balance as measured against the common is estimated as equivalent to \$63 a share.

GOVERNMENT BOND ISSUES FAVORED

Market Conditions in Canada and United States—Next British Loan

Government securities are in favor in the United States and Canadian markets at present. Prior to the listing on the New York Stock Exchange of Great Britain's new three and five-year 5½ per cent. notes, there has been considerable trading in the securities on the curb. The five-year notes opened at 98¾, and sold up to 98¾, the closing quotation, while the three-year notes opened at 99¾ and sold up to 99¾. The offering price to the public was 99¾ for the three-year notes and 98¾ for the five-year maturities. In connection with the payment for the \$300,000,000 British loan on Saturday last, the syndicate managers reported the major portion of the subscription had been paid.

During the past few weeks the new Dominion war loan has sold at a substantial premium over the price of issue. The quotation last week was 99¾. The demand since the closing of the subscription lists has been firm. The three months' treasury bills, sold by the Canadian government to the banks in August, matured on November 1st, and were paid.

GREAT WEST PERMANENT LOAN COMPANY

Interesting developments are understood to be in progress in regard to the control of the Great West Permanent Loan Company, Winnipeg. A shareholders' committee has been appointed and is actively engaged in obtaining proxies for the company's annual meeting early next year. The present management is also obtaining proxies.

Four of the company's directors, all prominent Winnipeg business men, are said to be supporting the position of the shareholders' committee.

CANADA'S BANK CLEARINGS

The following are the returns of Canada's bank clearing houses for the weeks ended November 9th, 1916, and November 11th, 1915, with changes:—

	Week ended Nov. 9, '16.	Week ended Nov. 11, '15.	Changes.

LIFE INSURANCE OFFICERS MEET

Mr. Alexander Bissett Was Re-elected President of the Association This Morning

The annual meeting of the Canadian Life Insurance Officers' Association was held this morning in the board room of the North American Life Assurance Company, Toronto, Mr. Alexander Bissett, of the London and Lancashire Life,

International Press photo.

MR. ALEXANDER BISSETT, MONTREAL,
Manager, London and Lancashire Life, re-elected president of Life Officers' Association of Canada, this morning.

president of the association for the past year, occupying the chair.

In addition to the reception of the annual report and the election of officers, a number of important matters were considered by the association. Among these were such questions as the effect of the Privy Council's decision in connection

MR. D. E. KILGOUR,
Actuary of the North American Life, re-elected as honorary secretary of the Life Officers' Association.

with the Dominion and provincial legislation, and the question of having uniform provincial life insurance legislation.

The agenda evoked interesting discussions on various subjects of interest to the business, while special committees were appointed in connection with matters which it is anticipated will concern the association during the coming year.

Mr. Alexander Bissett was re-elected president for the ensuing year. Mr. D. E. Kilgour, actuary of the North American Life, Toronto, continues as secretary of the association, an office he has held for several years.

EXPORT TRADE

One month after war commenced, our merchandise exports for the previous 12 months had a value of \$468,000,000. At the end of September last, the year's export trade had increased to \$1,053,000,000. When war commenced our total trade for the previous year was \$1,061,000,000. At the end of the 12 months ended September last, it was \$2,014,000,000. The importance of permanent and steady export trade is becoming recognized here only slowly. The growth in this trade by 103 per cent. during the war period is due chiefly to war orders in Canada, the value of which has exceeded \$1,000,000,000 since the commencement of the struggle. The large crop last year also contributed to the expansion of trade.

How our exports were made up for the 12 months ended September, 1914, and 1916, is shown in the following table:—

Canadian produce.	1914.	1916.
The mine	\$ 57,174,939	\$ 77,436,746
The fisheries	19,964,899	23,274,772
The forest	42,191,112	53,952,950
Animal produce	62,034,576	111,331,332
Agricultural products	179,110,844	396,455,537
Manufactures	63,355,893	361,381,419
Miscellaneous	224,830	8,107,248
Total Canadian produce.....	\$424,057,093	\$1,031,940,004
Foreign produce	44,152,917	20,985,647
Total exports (merchandise) ..	\$517,982,240	\$1,052,925,651

The increase of 473 per cent. in the export of manufactures is a direct result of war orders. The production of our factories during 1916 will probably be at least \$2,000,000,000 as compared with \$1,110,000,000 in 1910. While factories are working at full capacity now, the demand is abnormal and will to a large extent cease shortly after peace comes. The domestic market will absorb a substantial part of our factory products after the

war, but it is the marketing of the surplus which requires the serious consideration of manufacturers, and now. The success or failure in placing this surplus in foreign markets will maintain or depress Canadian export trade. The maintenance of export trade during peace times is one of the most important questions of the day. Competing in the home market, and filling foreign war orders, are entirely different things to competing abroad in normal times.

FINANCING THE ALLIES

The Allies will win the war however long it takes. They have confidence in themselves and their national positions. They will be able to finance successfully. These are the signs which may be read to-day in United States money markets. When war commenced president Wilson expressed his disapproval of loans to belligerent countries being made by United States bankers. To date, \$1,592,000,000 of such loans have been made. The theory of neutrality, as applied to American commerce and finance, is not consistent with the furtherance of American prosperity.

When the first foreign loans were made in the neighboring market there was a decided hesitancy on the part of bankers and investors. The Anglo-French loan of \$500,000,000 last year had to have its advance agents, its publicity men, and its stage managers to see that nothing went wrong with the new production. Since then the United States has learned to recognize that by making loans to the Allies it is financing its best customers. While the early loans had to be given to investors in the paternal "it-hurts-me-more-than-it-hurts-you" style, the latest loan of \$300,000,000 has been absorbed with avidity. Mr. H. P. Davison, of J. P. Morgan and Company which, with other large financial houses is financing the loan, has pointed out that every dollar of the money advanced remains in the United States to benefit still further United States trade and to establish conditions which will be at least sufficiently permanent to endure long after the war is over. One of the most significant of his statements is:—

"I am perfectly clear that if we regard Great Britain and France as desirable customers and wish to continue to sell them our products, we must treat them as a producer treats a desirable customer, in which event I am confident we will continue to supply them largely, not only during the war, but for the reconstruction period which will follow."

This expresses the wisdom and advantage of using surplus United States capital to finance the nations at present at war. The well recognized securities behind the loan are merely collateral. The character of the borrowers is collateral. If character were not there the loans would be condemned.

A sound view of the position is taken by the Wall Street Journal, which says: "We must remember that when the war is over our international business relations will continue. It is then that the United States investor will reap the fruits of his foreign loans. The wonderful wealth and credit of Great Britain, combined with integrity and justice, is founded upon just such loans as these. The calling of Great Britain's obligations abroad has enabled the financing of the most tremendous obligations any country ever assumed."

As Mr. Davison says, "How would the United States feel if the conditions were reversed?"

BILLIONS

The first year of the Great War cost \$17,500,000,000. The second year cost \$28,000,000,000. If the war goes on until August next, it will have cost \$75,950,000,000. Canada's war debt may yet reach \$1,000,000,000 with annual interest charges of \$50,000,000. The Allies have negotiated war loans of \$33,000,000,000. The enemies' war loans total \$16,000,000,000. The British Empire's war loans aggregate \$13,962,000,000. France has raised \$12,500,000,000 of war loans; Russia, \$6,925,000,000; Germany, \$11,988,000,000, and Austria \$3,690,000,000. The United States has loaned belligerents \$1,500,000,000. Great Britain has loaned its allies and dominions \$4,000,000,000. Two and a half years ago, the national debt of the belligerents was \$27,000,000,000. Next August, if the war goes on, it will be \$86,500,000,000. No one, three years ago, would have believed that these records could have been made without exhausting Europe's financial resources and bringing general bankruptcy. The war is in its third year and these figures may yet be doubled. National bankruptcy with most of the warring nations is distant. With others, it is nearer. But nations can go on fighting even if bankrupt. These facts and figures make prophecy as to war and its finance a risky experiment.

GERMANY AND CANADIAN PACIFIC RAILWAY

Mr. W. F. Maclean, M.P., addressing the Toronto Canadian Club this week, said that the control of the Canadian Pacific Railway was at one time in Germany. This, we believe, is not correct. German capital prior to the war had acquired shares of the Canadian Pacific Railway. From figures supplied some time ago to *The Monetary Times* by Lord Shaughnessy, president of the railway, it was learned that the percentage of common stockholders of that enterprise, in Germany and France, was 15 per cent. in January, 1911; 15 per cent. in June, 1913, and 10.96 per cent. in August, 1916. The holdings of the two countries respectively was stated only for the latest date and they were: Germany, 5.33 per cent.; France, 5.63 per cent. No figures have ever been issued showing a larger percentage of shares held in Germany. *The Monetary Times* has little doubt that control of the Canadian Pacific Railway has never been in German hands.

BRITISH TREASURY AND WINNIPEG STOCK

The British treasury announces that it will no longer purchase city of Winnipeg 4 per cent. consolidated registered stock, 1940-60, under the terms of the offer published in the press on August 15th last.

FAVORS SERIAL BONDS

Issues of serial payment bonds have been made in some Canadian cities. The advantages of this form of municipal security have been pointed out at various times by experts in the columns of *The Monetary Times*. A United States banker has written to Mayor Mitchell, of New York, in the following terms:—

"So large a saving to taxpayers could be effected by increasing the use of the city bonds in serial form that I believe the mayor could well appoint a committee to inves-

RESIGNATION

When Sir Sam Hughes spoke, it was usually in a loud voice, with egotism, and without tact. He has not reflected the spirit of the Canadian people. He has annoyed them with vain and foolish utterances. The virtues of his energy have been discounted by many of his actions and most of his words. The country for the most part is glad his resignation has come, even although considerably late. His elimination from the cabinet shows either that Sir Robert Borden has acquired more backbone or that someone has forced a little of that commodity into the premier's office. Several other obstacles to the present government's future success at the polls remain to be removed.

THE BLACKLIST

At the Paris economic conference, where Canada was represented by its trade minister, Sir George Foster, one of the unanimous decisions reached was that for the period of the war at least, citizens of the allied countries should not trade with the enemy. That point was emphasized by Sir George Foster in speaking of the Conference to the Toronto Canadian Club last week.

The countries allied with Canada in the present war and in the decisions of the Paris conference must surely be astonished at the way in which this Dominion has forgotten its subscription to the promise not to trade with the enemy during the war at least. On July 18th, 1916, the British government established what is known as a blacklist of firms in the United States with which citizens of the United Kingdom are forbidden to trade. A similar blacklist was established by Australia shortly afterwards. The Canadian government, after four months for consideration, has not yet seen fit to follow the example of the Imperial and Australian governments. The blacklist of United States firms does not yet apply in Canada.

In other words, while it is illegal for citizens of the United Kingdom and of Australia to trade with these enemy firms, classed as such by the British government after careful investigation, it is legal for Canadians to trade with such enemy firms. Business has been done by Canadians with some of these firms.

What weighty considerations are preventing the authorities at Ottawa from taking the proper action?

tigate the proposition, and especially to consider whether a considerable part of New York's present bonded indebtedness could be refunded in serials. I am well aware of the practical difficulties in the way, but I have little doubt that the saving to taxpayers would more than pay for the trouble and cost incurred. Few, if any, will question the superior advantages of serial bonds, both to the municipality which issues them and to the investor who purchases them.

"The most certain, simple, and cheap way to amortize a debt is to pay it off in annual instalments. The uncertainties of calculation, which have so unfortunately affected our sinking funds in the past, are at once eliminated. There is no large fund left in the hands of public officials to be cared for and invested and reinvested for fifty years. . . . The fact that the same administration which incurs a debt must at once begin, within one year, to make provision for its retirement, necessarily and strongly tends towards responsibility and prudence in the contraction of debt.

"Finally, the serial method produces an immense saving in the amounts which the state must eventually pay to retire its debt."

FEATURES OF QUEBEC INSURANCE LAW

Clear Exposition of Intricate Subject by J. Armitage Ewing, K.C.

Features of Quebec insurance law, more particularly in regard to life insurance, were discussed by Mr. J. Armitage Ewing, K.C., of the Montreal Bar in an instructive address to the Toronto Insurance Institute last night. After tracing the origin of Quebec province laws, Mr. Ewing proceeded to deal with the present laws as they pertain to insurance.

A certain portion of the civil code, he said, deals with insurance. Mr. Ewing continued:—

It lays down the general principles, such as the contract, the payment of the premium, warranties, necessity of an insurable interest, etc. Certain of these articles are derived from English authorities, certain of them from French, and many of them from both French and English or United States authorities. The principles laid down do not differ materially from the laws prevailing in the English provinces before the various insurance statutes were passed. I do not propose in this paper to dwell further upon this phase of the subject.

Quebec Insurance Act.

Quebec, following the lead of most of the other provinces, has in recent years enacted an insurance act. By far the greater part relates to the formation, organization, registering and licensing of companies, and the provisions governing mutual and ordinary fire companies and benefit associations. The articles affecting life companies specially are few in number and as they deal principally with details, departmental regulations are of very little interest to a gathering such as this. Time will not permit the consideration of them. I will make one exception, and say that an insurance agent cannot act as such in the province unless he resides therein. But he may, if his province permits residents of Quebec to act as agents there on the same terms as its own people.

Quebec has a wives and children's act, as Ontario and the other provinces have articles of their acts concerning preferred beneficiaries. They are not so called in Quebec, but for the sake of convenience I will make use of the term. Quebec preferred beneficiaries, however, are not as numerous as those, say, of Ontario. These are in the case of a man, his wife, his children, and his wife's children; in the case of a woman, her children. The beneficiaries may be appointed either by the policy itself or by appropriation by a subsequent document or by will. A wife may insure her life for her children's benefit, or appropriate a policy to them without the consent of her husband, this constituting a departure from the common law governing consorts. A policy in favor of a preferred beneficiary cannot be changed without his consent, except in favor of another preferred beneficiary. It may be assigned or surrendered with the consent of all the beneficiaries if they are of age. The proceeds of the policy cannot be seized either by the creditors of the assured or those of the beneficiary.

When Beneficiaries Die First.

When preferred beneficiaries die before the assured, various circumstances must be considered in determining who is entitled to the money. When such beneficiary is a child his descendants take his share whether an apportionment has been made or not. When several children are beneficiaries and no apportionment is made, if any of such children predecease the assured, without issue, accretion takes place in favor of the surviving children. When the assurance is in favor of a wife and a child or children, also without apportionment, if the wife dies before the assured accretion takes place in favor of the child or children, and if all the children predecease the assured accretion takes place in favor of the wife. When the sole beneficiary in whose favor the assurance exists, whether wife or child, or all the beneficiaries, predeceases or predeceases, the policy reverts to the assured, save in the case of a child leaving issue as before stated. The benefit of any share in an apportionment reverts to the assured, save in the case of a child to whom the policy was apportioned dying with issue. It is to be noted in all these cases that if the wife is the sole beneficiary, or an apportionment exists in her favor, it does not matter whether she leaves issue or not, for the policy or her share as the case may be reverts to her husband.

Trustees may be appointed by the assured to receive the policy moneys in trust for the beneficiaries like in the other provinces. If no trustees are appointed, payment is made to the beneficiary or beneficiaries named. The shares of minors, if there is no trustee, are paid to the executors of the will of the assured, and if there is none, to their tutors (or guardians).

Each Takes Respective Share.

If there are several preferred beneficiaries, and the assured has apportioned the moneys, each takes his respective share. If there is no apportionment, and children only are the beneficiaries the proceeds are equally divided amongst them. If there is no apportionment and the beneficiaries are the wife and one or more or all of the children, one-half the policy money goes to the wife, and one-half to the children beneficiaries, who subdivide equally.

If the assured finds himself unable to pay the premiums on a policy in favor of preferred beneficiaries, he may borrow sufficient to keep it in force, or he may surrender it for a paid-up policy in favor of the same persons, in either case without their consent.

If any of the premiums have been paid when the assured was insolvent, in fraud of his creditors, the latter may recover out of the insurance money an amount equal to the premiums so paid.

As to Married Women.

Perhaps the most perplexing feature of the Quebec law to a resident of an English province is that relating to married women.

A spinster or a widow as far as concerns her contractual capacity stands in the eye of the law in the same position as a man. A married woman is altogether different. During the marriage she is under the authority of her husband. Much depends on whether the consorts are in community of property or are separate as to property.

Parties contemplating marriage are free to arrange beforehand as to the government of their property during their marriage. They may stipulate almost as they choose provided they do not transgress good morals or public order. These stipulations must be set forth in a notarial document signed by the parties, assisted by their guardians or parents if they are not of age, before the marriage. They cannot be altered after marriage, nor can either consort then confer any benefit upon the other. It is usual now in these stipulations—marriage contracts—to provide that the parties shall be separate as to property, though it was not uncommon in the contracts passed some years ago, particularly among the French, to stipulate that they should be common as to property, but with certain modifications. When separate as to property all that either consort possesses at the time of the marriage or becomes possessed of during it, belongs absolutely to him or her as the case may be, as though marriage had not been entered into. The wife retains the right of administering her property. The parties may stipulate anything less than separation of property that they may choose.

(To be Concluded.)

SASKATOON'S TAX COLLECTIONS

Saskatoon has collected during the first ten months of this year 90 per cent. of the year's tax levy in taxes and arrears.

The total tax levy for the current year is \$821,000, as compared with \$986,418 for last year. The tax collections for the first ten months of 1916 amounted to \$740,083. Last year the amount collected in a similar period was \$660,493.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended November 10th:—

Dominion Reduction Company, 65,000; La Rose Mines, 87,314; O'Brien Mine, 66,000; Nipissing Mining Company, 554,950; Mining Corporation of Canada, 188,394; total, 961,658 pounds, or 480.8 tons.

The total shipments since January 1st, 1916, now amount to 28,028,957 pounds, or 14,014.4 tons.

PERSONAL NOTES

Messrs. Smith, Mackenzie and Hall, the well-known Toronto insurance firm, have purchased the business, goodwill, and agencies of Messrs. Richmond and McKee, Limited.

Mr. H. C. Cox, president of the Canada Life Assurance Company, Toronto, will address the Life Presidents' Association at their annual conference in New York next month.

Mr. Philip Vibert, manager of the Union Bank of Canada, in Vancouver, has been promoted to the position of inspector of western branches of the bank, with headquarters at Winnipeg.

Mr. D. B. Hanna, owing to the pressure of business, has resigned from the directorate of the London and Canadian Loan and Agency Company, and Mr. W. C. Noxon has been elected to fill the vacancy on the board.

Mr. William Lyall, president of Peter Lyall and Sons Construction Company, and Mr. Godfrey Bird, banker, have been elected directors of the Toronto Furniture Company. The other directors are: Messrs. D. K. Ridout, W. T. Bradshaw and A. E. Clark, all of Toronto.

Mr. George H. Hunt, secretary of the Life Underwriters' Association of Canada, and superintendent of agencies, Imperial Life Assurance Company, Toronto, has just returned from a trip across the continent and the general impression among the life insurance men who were at the Life Underwriters' convention last summer at Hamilton seems to be that the journey they made to get there was amply repaid in the benefits that they derived.

Mr. C. W. Strathy, manager of the North American Life Insurance Company's loan department at Winnipeg, has had 32 years' experience in the mortgage investment field. The first ten years he spent with the Canada Permanent Mortgage Company in Toronto, and then went to their Winnipeg office. After ten years in this position he was made manager of the province of Alberta for them with office at Edmonton. Five years later, in 1906, he opened the loan department in Winnipeg for the North American Life Insurance Company, and recently completed his tenth year as manager.

Dr. C. N. Bell has resigned the secretaryship of the Winnipeg grain exchange, which position he has held since 1887. Dr. Bell has also been secretary of the government grain boards controlling the selection of standards and grain surveys. He was secretary during the organization and first year's management of the Winnipeg Industrial Association. He was secretary of the royal commission investigating the whole question of the warehousing, transportation and handling of grain, which resulted in the present Manitoba grain laws, and also secretary of the royal commission on transportation in 1904.

Mr. W. E. Reid, formerly of the Goodwater branch of the Standard Bank, has been appointed to Riceton, Sask., as manager. Other changes reported by the Standard Bank are as follows: Estuary, Sask., formerly a sub-branch to Prussia, has been made an independent branch. Mr. C. R. Beer is appointed acting manager. Mr. R. T. M. Temple, formerly of Riceton, Sask., has been appointed manager at New Dayton, Alta., where a new branch of the bank is being opened. Mr. A. M. Baldwin, formerly of Toronto branch, has been appointed to Lajord, Sask., to succeed Mr. C. St. John, who has been given charge of Travers, Alta., where the bank is establishing an office.

Mr. Norman Harris, who has gained public recognition as a financial writer, is at the head of an investment organization under the firm name of Newman Harris and Company, Royal Bank Building. Having for some years past endeavored to guide public money into safe channels, and away from unsound promotions, Mr. Harris is now inaugurating his own investment business. The organization will carry the policy of service and sound finance into all its public offerings of bonds, stocks, and other securities. It is believed that there is a successful field for the offering of securities

in which the elements of over-capitalization, extravagance, heavy bonus gifts to promoters and unfavorable loading generally against the interest of the public will be conspicuous by their absence.

Mr. Rutherford Williamson, a well-known chartered accountant of Toronto, has returned from an extended trip through western Canada and western United States. Mr. Williamson reports that United States bankers and manufacturers have now a high regard for Canada, and are prepared to finance our requirements to any necessary extent. The feeling in the western states is that a large amount of emigration of United States farmers into Canada will follow the war. The labor situation in the United States is a matter of acute concern, particularly along the Pacific Coast, where the Industrial Workers of the World has been active lately, and the conditions in respect to capital and labor that will ensue when the present prosperity diminishes, will favor Canada, says Mr. Williamson.

Mr. H. A. Harvey, superintendent of eastern branches of the Bank of British North America, as stated in last week's issue of *The Monetary Times*, will retire at the end of this month. Mr. Harvey's connection with the Bank of British North America has extended over a period of 43 years. He began his banking career with the National Bank of Scotland, Limited, and joined the Bank of British North America in 1873 at Toronto. After subsequent experience in Montreal, Quebec, St. John and Ottawa, he was transferred to the London, England, office, as accountant. In 1889 he was appointed manager at Kingston, and the following year at St. John, N.B. In 1900 Mr. Harvey, after some experience in the New York office of the bank, was made manager of the bank's office in London, England. In 1901 he returned to Canada and was appointed manager of the Ottawa branch. In 1912 the enlarging interests of the bank made necessary the new position of superintendent of eastern branches, and Mr. Harvey was appointed with headquarters in Montreal. Mr. O. R. Rowley, chief inspector, has been appointed to succeed Mr. Harvey. Mr. Rowley, who is a Nova Scotian, was for three years in the service of the Merchants Bank of Canada, but in June, 1889, joined the Bank of British North America, Montreal. He has served in various capacities in branches in eastern Canada, as well as in the New York agency, and in 1902 was made inspector of branch returns. In December, 1912, he was appointed chief inspector of the bank, which position he now vacates for the important one of superintendent of eastern branches.

Mr. Edson L. Pease, the new president of the Canadian Bankers' Association, is one of the best-known bankers of Canada and for many years has been in the forefront of the profession. Under his direction, and assisted by a capable management, the Royal Bank, of which he is managing director, has made rapid strides. The Royal is now one of the 42 biggest banks of the world, and in that number only three Canadian banks have taken a place. Mr. Pease has served as a vice-president of the Canadian Bankers' Association, and is also a director of the Montreal Trust Company and the North British and Mercantile Insurance Company. He has always been a public-spirited citizen and in this regard also is a familiar figure in Montreal.

He was born at Coteau Landing, Que., on September 2, 1856, the son of Orton Pease, and came to Montreal in 1874. His early banking experience was acquired in the Canadian Bank of Commerce, where he remained until March, 1882, when he was moved to the head office in Toronto. In January, 1883, he resigned, to accept the position of accountant of the Halifax branch of the Merchants' Bank of Halifax. The bank, realizing the necessity of improving its connection with the west, decided to establish an office in Montreal, and in August, 1887, Mr. Pease opened the first branch in this city, with the position of manager. In January, 1898, he was appointed joint general manager with D. H. Duncan. On January 3, 1900, Mr. Pease became general manager in succession to Mr. Duncan. Owing to the importance which the Montreal office had acquired under his management, it was decided also to establish in this city the chief executive offices, though the head office remained for a time in Halifax, and at the same time the name was changed from the Merchants' Bank of Halifax to the Royal Bank of Canada. Later, the head office was also established in Montreal. Mr. Pease became a director of the Royal Bank in 1907, vice-president in 1908, and on January 13 last, was appointed managing director and chief executive officer.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

St. Thomas, Ont.—An issue of 5 per cent. bonds is being sold locally by city treasurer Perry.

Whitby, Ont.—The ratepayers are to vote on by-law to guarantee bonds of a tractor industry to the extent of \$100,000.

St. Romuald d'Etchemin, Que.—Tenders close on November 21st for an issue of \$21,000 6 per cent. bonds. T. Lemieux, secretary-treasurer.

British Columbia.—The following certificates have been issued by the municipal department: Chilliwack city local improvement sewer bonds, \$4,663, 20-years 6 per cent., payable yearly; Coquitlam local improvement waterworks, \$8,175, 10-years 6 per cent.

Welland County, Ont.—A deputation waited upon Hon. Finlay G. Macdormid, provincial minister of public works, to ask that the issuing of debentures to the amount of \$100,000 be sanctioned. The money is to be used by Welland county to pay the banks money advanced to build roads during the past year.

North Bay, Ont.—Two industrial by-laws are to be submitted to the ratepayers on December 11th. The North Bay Toy Company are asking the town for a free site and building, the cost not to exceed \$15,000, and the Dominion Rubber Cloak Company, of Toronto, are asking for a bonus of \$5,000 and a loan of \$15,000.

Alberta.—The school district debentures on which tenders closed November 1st were awarded as follows: \$1,600 debentures of St. Paul S.D. No. 2228, 104.40, at 7 per cent., to the Alberta School Supply Company, Edmonton; \$7,500 rural school district debentures, 103.444, at 7 per cent., to Messrs. Kerr, Fleming and Company, Toronto.

Victoria, B.C.—In an attempt to solve the problem of delinquent taxes and over-assessments, Alderman Todd has submitted a report which recommends that the city cancel certain arrears, and also that a sale of small bonds of denominations of \$10 and upwards be made locally to finance the payments of the instalments of interest and sinking fund necessary to take care of expropriations, street widening, etc., of the years 1917-21, inclusive.

Brantford, Ont.—An issue of \$58,000 5 per cent. bonds, lately authorized for hospital purposes, has been hypothecated by city treasurer A. K. Bunnell, and an issue of treasury certificates, \$10,000, payable in one year; \$12,000, payable in two years; \$30,000, payable in three years, bearing interest at the rate of 5½ per cent., was made. As these certificates mature the city will take over the \$58,000 of long-date securities for sinking fund purposes.

St. Jacques de L'Achigan, Que.—The Municipal Debenture Corporation, Limited, Quebec, are making an offering for \$124,000 5½ per cent. annuity bonds of this parish, at par and interest. The assessed value of homologated property is \$1,603,153; total bonded debt \$124,000; value of church property \$180,000. The bonds constitute the first privileged lien on all the property of the parish homologated for the purpose, and are redeemable by way of a special tax which has priority on all municipal and school taxes.

Acton, Ont.—For the \$25,000 6 per cent. 20-year bonds the following bids were received, the first-named firm receiving the award:—

Messrs. G. A. Stimson and Company	103.06
Royal Securities Corporation	103.04
Messrs. C. H. Burgess and Company	102.75
Canada Bond Corporation	102.69
Messrs. W. A. Mackenzie and Company	102.11
Messrs. Mulholland, Bird and Graham	102.07
Messrs. A. E. Ames and Company	101.70
Imperial Bank	101.58
Messrs. W. L. McKinnon and Company	101.56
Messrs. Macneill and Young	101.55
Messrs. Wood, Gundy and Company	101.28
Messrs. R. C. Matthews and Company	99.00

The bonds were issued to furnish a loan to the Reliance Shoe Company, now located in Toronto, but which is to move to Acton.

Saskatchewan.—The following is a list of bond applications granted by the local government board:—

School Districts.—Tangleflags, \$1,800, 10-years. Secretary-treasurer, W. H. Cowell, Tangleflags; Airedale, \$1,200, 10-years. H. Birtle, Senlac; Sibel Plains, \$400, 10-years, K. A. Righetti, Odessa. All not exceeding 8 per cent.

Rural Telephone Companies.—Melaval, \$4,500, 15-years, interest 7¼ per cent. annuity. B. J. Lloyd, Melaval; White-wood St. Hubert, \$6,000, 15-years, interest 6 per cent. annuity. F. Jordens, Whitewood; Lake Johnston, \$3,500, 15-years, not ex. 8 per cent. annuity. W. Monegan, Expanse; Brookside, \$1,000, 15-years, not ex. 8 per cent. annuity. W. L. Murray, Brookside; North Forget, \$1,000, 15-years, not ex. 8 per cent. annuity. E. H. Morden, Gap View; Eagle Lake, \$4,000, 15-years, not ex. 8 per cent. annuity. J. Lowry, Netherhill; Antelope, \$2,800, 10-years, not ex. 8 per cent. annuity. Jas. Chalmers, Aylesbury.

Saskatchewan.—The following is a list of bonds reported sold by the local government board:—

School Districts.—Strathcarroll, \$1,800. Kerr, Fleming and Company, Regina; Clover Bar, \$1,500. Brent, Noxon and Company, Toronto; Plessis, \$1,500. Western School Supply Company, Regina; Westdale, \$1,600. Goldman and Company, Regina; Croft, \$1,800. Goldman and Company, Regina; Denehurst, \$200. Kerr, Fleming and Company, Regina; Look Out, \$2,000. J. A. Thompson, Regina; Sequin, \$350. Grand Lodge, A.F. and A.M., Regina; Robertson, \$1,200. Kerr, Fleming and Company, Regina; Wenaus, \$1,600. Goldman and Company, Regina; Traux, \$2,500. H. O'Hara and Company, Toronto; Weston, \$1,700. Western School Supply Company, Toronto; Mackay Creek, \$1,600. Kerr, Fleming and Company, Regina.

Rural Telephone Companies.—South West Regina, \$1,350. Kerr, Fleming and Company, Regina; Logberg, \$700. H. O'Hara and Company, Toronto; Meota, \$11,000. Nay and James, Regina; Kerrobert Southern, \$8,400. H. O'Hara and Company, Toronto; Golden Acre, \$10,500. Wood, Gundy and Company, Saskatoon; Eastern Star, \$4,700. Nay and James, Regina; Ponass Lake, \$10,600. Nay and James, Regina; Stoney Coulee, \$3,000. H. O'Hara and Company, Toronto; Vawn, \$8,000. Bond and Debenture Corporation, Winnipeg; Star City, \$14,600. H. O'Hara and Company, Toronto; Oak Hill, \$4,700. Nay and James, Regina; North Webb, \$5,000. Nay and James, Regina; Tribune, \$10,600. W. L. McKinnon and Company, Regina; North Benson, \$3,000. Bond and Debenture Corporation, Winnipeg; Village of Dysart, \$1,000. W. L. McKinnon and Company, Regina.

MONTREAL'S BOND SALE.

For an issue of \$3,800,000 5 per cent. 40-year bonds of the city of Montreal tenders closed on Monday. The Bank of Montreal as fiscal agents received the following bids, the joint offer of the first three firms being accepted:—

(National City Company	New York)	
(Kountze Bros.	New York)	97.787
(Wood, Gundy & Company.....	Toronto)	
(W. A. Read & Company	New York)	
(C. Meredith & Co., Ltd.	Montreal)	97.21
(Dominion Securities Corporation.....	Toronto)	
(Brown Bros. & Company.....	New York)	
(Harris, Forbes & Co., Inc.	Montreal)	97.123
R. M. Grant & Company	Boston	96.53
G. A. Stimson & Company	Toronto	96.46

This bond issue is part of the loan of \$5,800,000 authorized by the provincial legislature in 1915, and will, according to Mayor Martin, be sufficient to carry out the permanent work expenditures for 1916.

In May last, for the city of Montreal \$2,000,000 20-year 5 per cent. bonds, the tender of Messrs. A. E. Ames and Company, Toronto, and R. M. Grant and Company, Boston, was accepted, their joint bid being 98.867.

The city of Montreal sold in April, 1915, \$6,100,000 3-year 5 per cent. gold bonds to a syndicate composed of Messrs. Wood, Gundy and Company, Toronto; C. H. Meredith and Company, Montreal; and N. W. Harris and Company, Montreal and Boston. Their price was 98.83 and interest.

The price received for the city's issue, made in December, 1914, was 98.671 and accrued interest. This issue was one of \$6,000,000 3-year 5 per cent. gold bonds. They were sold to Messrs. A. B. Leach and Company, E. H. Rollins and Sons and Kountze Brothers, all of New York.

FIRE PREVENTION IN CANADA

Individuals, Municipalities, and the Dominion are Required to Help Stop Annual Waste

At the annual meeting of Canada's commission of conservation, Mr. J. Grove Smith, who is preparing a comprehensive survey of Canada's fire losses and their prevention for the commission, stated that there are three great factors entering into the occurrence of all fires and the extent of loss resulting therefrom. These may be defined as physical hazard, moral hazard and temperamental hazard. Physical hazard is a term applied to latent characteristics inherent in combustible property and its use, such as poor construction, occupational hazards, heating, lighting, power and other causes easily discerned. Moral hazard comprises intentional fires, and these may arise from motives of revenge, from insanity, or, from the desire to secure unlawful gain by the destruction of insured property. Temperamental hazard is really a psychological study; it is the habit of the people, the state of mind which condones carelessness, is indifferent to its effects, and frequently denies its very existence. To this cause the immense number of fires in Canada can undoubtedly be ascribed.

Fire Marshal and Building Code.

Some of Mr. Smith's recommendations were:—

(1) The commission of conservation should recommend to the provinces the adoption of a standard minimum building code. It should formulate a code that would be elastic enough to be applicable to every city and town in the country. The several provincial governments might then be influenced to endorse this code and to enforce its application, thus ensuring uniform municipal building regulations throughout the Dominion.

(2) In the second place, a fire marshal act should be passed and a fire marshal appointed in each of the provinces in Canada. At present, there is such an act in force in Manitoba, Saskatchewan, British Columbia and Ontario. The regulations in each are enforced by special departments, except in British Columbia, where the administration of the act is under the superintendent of insurance. Quebec has an act for the prevention of fires, and under its provisions, the commissioner and other officials are subject to the authority of the department of public works and labor. The Quebec measure, however, does not appear to have been actively enforced since its enactment in 1912.

Co-ordinate Prevention Activities.

(3) A third suggestion is that graded standards of municipal fire protection be established for Canada. At present we have no standard other than that of the Canadian Fire Underwriters' Association. Every town should be classified according to its population and certain measures of

protection and equipment should be provided in that town. Every fire chief should bring his department up to this standard.

(4) A fourth suggestion is that a central department be established for the purpose of co-ordinating the various activities in regard to fire prevention and protection. As its functions would be strictly advisory, this department might well be under the direction of the town planning branch of the commission of conservation, with which the work of fire protection has so much in common.

Amend Insurance Act.

(5) That the commission of conservation use its influence to secure the uniform amendment of the insurance acts now in force in Canada, as follows:

1. Any policy or contract of insurance to be invalid when issued without the written signed application of the assured or his or their duly appointed agent.

2. The liability under any policy to be limited to 80 per cent. of any loss occurring on the property covered, not exceeding the sum insured; and in case of other insurance, each policy to bear only such percentage of the 80 per cent. of loss as its face value bears to the whole amount insured.

3. Further insurance without due notice to companies already insuring to make void all previous insurance.

4. A duplicate of each proof of loss to be sent to the fire marshal of the province in which the loss occurs, and all insurance payments to be made subject to the signed authorization of the fire marshal.

5. No adjustment of losses under insurance policies to be made except by adjusters licensed by the fire marshal department of the province in which the loss occurs.

Educate the Public.

It will, no doubt, be contended, adds Mr. Smith, that these measures are revolutionary and, if made compulsory, will necessitate a readjustment of existing business methods. The immediate step, therefore, appears to be a public agitation and discussion of the subject, that ultimately fire insurance may be placed on an absolutely sound social basis and so contribute directly to the elimination of the fire waste. It is unthinkable that a business affecting the whole economic fabric should be longer degraded from its preservative functions to provide a means by which the ignorant, the careless and the criminal may flourish at the expense of other men. The conception is slowly taking shape that fire insurance has an inherent duty beyond that of mobilizing today's earnings against tomorrow's misfortune, a duty of efficiently protecting the community against impoverishment by individual negligence and crime. Proper recognition of that responsibility may be the deciding factor as to its continuance under private control, when the public is fully awake to the true significance of our loss by fire.

DOMINION TRUST'S TANGLES

Two important judgments of the court of appeal in connection with the Dominion Trust Company have been handed down at Vancouver, in one of which the judges allow the appeal of the insurance companies against the \$200,000 judgment which the liquidator of the Dominion Trust holds, and in the other case allow the appeal of the Dominion Trust directors against Mr. Justice Murphy's findings of misfeasance.

Both judgments are of an involved character, that in regard to the misfeasance suit being characterized by the learned chief justice as "an interim judgment in an interim appeal," and is not regarded by the legal fraternity as being a final decision on the question of the directors' liability for misfeasance.

Mr. Justice Macdonald reserved decision on the action brought by Mrs. L. B. Arnold, widow of the late Mr. W. R. Arnold, against the Dominion Trust Company for a declaration that she is entitled to the first \$75,000 of insurance money realized from her husband's estate. The three children were also added as plaintiffs. Altogether, insurance policies were left to a total of \$425,000, of which so far, \$207,000 has been collected by the liquidator of the Dominion Trust Company. The statement of claim pointed out that the liquidator had refused to recognize any right of the plaintiff to any of the insurance funds. The plaintiff claims that the first \$75,000 does not form part of the estate which is being held under the right of retainer.

WATERED STOCK AND GOODWILL

Par Value in Excess of Assets Value—Watering Process, by Inflation Acquisition, by Loss of Property

"Watered Stock and Goodwill" was the topic discussed by Mr. D. S. Kerr, C.A., before the Dominion Association of Chartered Accountants at Regina recently. Mr. Kerr said:—

According to most of the laws of incorporation, it is illegal to issue stock at a discount. That is, all stock issued is supposed to be paid for dollar for dollar, in cash or other valuable asset.

From a practical standpoint there is no difference whatever between the issuing of capital stock at a discount for cash payment and the issuing of capital stock of a total par value in excess of a fair value of the assets acquired in respect of such issue. While the literal interpretation of the law against the issuing of stock at a discount may be complied with by entering into contracts, yet there is no doubt but that the spirit and intent of the law in this regard is too frequently not complied with, as contracts often provide that the assets acquired be paid for by an issue of paid-up capital stock, the total par value of which is in excess of the real or fair value of the assets acquired.

Watered Stock. What is It?

A discussion of unfair, unreasonable, or watered capital stock of a corporation is the first consideration.

Capital stock may or may not be watered at the date of its issue. Even if not watered at date of issue, it may become watered stock at a later date. If watered at date of issue, it may later be dewatered.

The question then arises, What is "watered stock"?

The watered stock in any corporation may be described as the amount of the par value of capital stock issued in excess of a fair and reasonable value of the assets owned.

Suppose capital stock of the par value of \$100,000 be issued as fully paid to stockholders paying in cash only \$50,000, there would then be a clear issuing of stock at a discount of 50 per cent. In paying cash the stockholder would require to pay the total amount of the par value in cash, or more if stock were issued at a premium. So that in paying cash for shares of stock in a concern the transaction does not permit of the watering of capital stock at date of issue.

But suppose that a concern intended to purchase a piece of land and it was decided to pay therefor \$100,000 of capital stock of the concern. The land is really worth \$50,000. A contract is entered into for the purchase of this land, the consideration being \$100,000 par value of fully-paid capital stock of the concern. Here is a clear instance of acquiring an asset of less value than the total par value of the consideration given for it. The result is that there is injected into the capitalization of this concern \$50,000 of "watered stock."

Distributed Over Various Assets.

Similarly, if buildings, or any other asset, be purchased and paid for in stock of the concern, the total par value of which consideration is in excess of the real value of the asset acquired, there is to the extent of such excess a "watering" of the capitalization and a corresponding inflation of the face value of the assets.

Take the case of a corporation acquiring the assets, business and goodwill of another. In buying any concern the goodwill must, of course, be included in the purchase if it is intended that the new corporation continue the business and connection of the other. Suppose that the consideration payable to the selling concern is to be paid by an issue of stock of the buying corporation. A fair and reasonable value of the goodwill of the selling concern is \$500,000. The contract stipulates that this goodwill shall be paid for by an issue of capital stock of the purchasing corporation of a total par value of \$750,000. Here, again, is a case of the capital stock of the concern being "watered" to the tune of \$250,000, there being this excess of par value given over a fair value of the goodwill acquired.

From these illustrations it will be observed that any watered stock included in the total capitalization of a concern may be distributed over various assets, such as land, buildings, goodwill, etc., on the debit or asset side of the transaction.

Usually, however, watered stock is offset by an inflated amount at which the goodwill, or other tangible asset, is carried.

The following question may be asked: If a corporation, through some accident or other cause, lost a considerable part of its plant, with the result that the total capitalization is not now represented by assets of an equivalent amount, even when no watered stock was originally issued by such a corporation, is the capitalization of this concern now watered?

Assume the concern issued all of its capital stock for cash and used such cash for the payment of its plant, etc. Here there is no watered stock. After such an accident, as just indicated, the plant is worth, say, one-half of the original capitalization. The balance sheet of this company would show a deficit if the loss be written off and assuming no surplus to offset the loss. If not written off, then the plant is carried at a value in excess of actual value. The capitalization is not now represented by bona fide assets of equivalent value.

Irrespective of the cause giving rise to the situation, it can be laid down as a rule that capitalization not represented by an equivalent value in bona fide assets must be considered as watered to the extent of the difference. It makes no difference whether the loss as just illustrated be written off or not, whether a deficit be shown on the balance sheet or not, as the total capitalization has not assets of equivalent value, there is an amount of water in the stock of the concern.

NATIONAL FINANCES

The revenues of the Dominion for the fiscal year ending March 31st amounted to \$172,147,838, and exceeded those of 1915 by \$39,074,356, or 29.3 per cent. This was in excess of the revenue of any previous year, and may be attributed in part to the moderate special taxation imposed after the outbreak of the war. For the first five months of the present fiscal year, April to August, the revenue amounts to approximately \$84,000,000, an increase of 40 per cent. as compared with the corresponding period of 1915. If this improvement continues it will result in a very decided increase in the excess of revenues over expenditures. The latter are being incurred at almost the same rate as in the previous year, and on the basis of present revenues and existing taxation the surplus for the current year will probably be fully \$70,000,000. This striking change in the position of the consolidated fund is made clearer by the following comparison with the figures of previous years, states the commercial letter of Canadian Bank of Commerce.

*Fiscal year.	Receipts.	Expenditure.	Surplus.
1907-1908	\$ 96,054,505	\$ 76,641,451	\$19,413,054
1908-1909	85,093,404	84,064,232	1,029,171
1909-1910	101,503,710	79,411,747	22,091,964
1910-1911	117,780,409	87,774,198	30,006,211
1911-1912	136,108,217	98,161,440	37,946,776
1912-1913	168,689,903	112,059,537	56,630,366
1913-1914	163,174,394	127,384,473	35,789,921
1914-1915	133,073,481	135,523,206	†2,449,724
1915-1916	172,147,838	130,350,726	41,797,112

*The fiscal year ends March 31st. †Deficit.

For the five months, April to August, capital expenditures by the Dominion government declined to \$8,015,701, as against \$13,330,670 in the corresponding period of 1915, or no less than 40 per cent. Railway subsidies and other charges for the same period are proportionately less, and furnish evidence of what is being done to conserve the resources of the country for the service of the Empire. War expenditures in the five months referred to amounted to \$76,310,719. The aggregate of these expenditures from the commencement of the war, exclusive of payments made by the British authorities on Canada's behalf, has amounted to \$303,258,950, almost the whole of which has been added to the public debt, but, as a result of the buoyant revenues, and the contraction of the usual capital and ordinary expenditures, a considerable sum will be available this year for application on war account.

In order to accommodate the troops in camp, the Bank of Montreal is opening a branch at the military camp in the exhibition grounds, Toronto.

We Will Look After Your Financial Affairs

Often men and women find themselves in circumstances where they would like to transfer the active oversight of their financial affairs to a competent and trustworthy person. This Corporation is authorized and qualified to act in such capacity. Interviews solicited.

"TOWN WHICH LIES UNDER A CURSE"

Sir George Foster Cites Prince Rupert as Example of Speculative Mania

"The moment the war is over," said Sir George Foster, minister of trade and commerce, in an address to the Empire Club, Toronto, last week, "up will jump your parasites and your unnecessary middlemen and your armies of speculators, and they will want to do the old thing over in the same old way. I travelled from east to west, getting out on the Pacific at Prince Rupert. Have you heard of that town? There is a town which lies under a curse, an absolute curse, and it will lie under it and feel the curse and the burden for years and years and years. How was it brought about? Railway corporations, governments, business men, financiers (so-called) and speculators, when Prince Rupert was brought to light and it became known that it would be the debouching-place for the Grand Trunk Pacific Railway, all of them set themselves to work to burden for generations to come the site of Prince Rupert, the site of the debouching-place and port of that great railway.

Lot on a Rock, \$18,000.

"What did I see there? One story will make it all plain. They took me along one of their streets. They showed a corner lot that in the boom days sold for \$18,000—at lot 50 feet by 35 feet. That corner lot was a perpendicular rock, which stands there to this day. The man paid his \$18,000 and got his lot. When he wanted to build his place of business on it he found that he had to take that rock down to street level. He went to a wideawake contractor and asked for his estimate, and the estimate was, '\$11,000 will let you down to the street level.' He has not been let down to the street level yet.

"Now just work that out. A piece of land which, perhaps, naturally and reasonably, was worth a thousand dollars at the utmost, is burdened with \$18,000 and \$11,000; total, \$29,000. That is what you have got to pull out of your purse before you build your drug shop, if you are a drug man, and then \$3,000 or \$4,000 to build a shop. Then to conduct a small drug business in Prince Rupert you have to make enough every year to pay for your investment of \$39,000 for the site and your initial expense for your building and stock. What time in this century will you arrive at the period when you will be able to do that? Just so long as that lot and almost every other lot in Prince Rupert is burdened and cursed by a weight of fictitious value, it will drive every business man, until the initial loss is made, away from Prince Rupert. Who live there now? The men who have speculated and who are hanging on by the skin of their teeth and their toe nails to see if the good Lord in some way or another will send a windfall to enable them to get out of their bad business.

False Idea of Money-Making.

"Now, that is an instance of what has been going on in this country. What we have to do is to get away from the false idea that you can make money by swapping jack-knives at a quarter of a dollar advance for each swap. Why, 90 miles from Victoria, in the dense forest, there is staked out to-day many and many a succession of town lots, land which should have been cultivated by the agriculturist, propped up by speculation until it comes to take a fictitious value that no man can settle on it and cultivate it; he would not have a ghost of a chance for his life. Those two instances show what I mean.

"The only way we will ever make money in Canada is to get down to the basic principle that wealth is made by production and development, and by no other. As I travelled over this great country of ours with my companions in the Dominions Royal Commission—Old Countrymen, Australians, New Zealanders, South Africans—it was one of the constant amazements from first to last in the minds of those men as to the interminable resources, the grand scale on which Canada was projected in every way, and almost unimaginable resources that she has. That is our dower; that is our wealth in perspective; and the only way we can make good as a country is to go to the work of production; go to it with knowledge; go to it with high purpose; go to it with scientific training; go to it with method and with organization and with mobilization; go to it with purpose and work out on that line, and on that line we shall make of

Canada a country which will be second to none other in this wide world.

"It may be big to say that Canada has within it possibilities greater than even the United States, but I am quite convinced that she has as great possibilities. It may be a great deal to say that Canada will some time outstrip the wealth of old nations; but time is long, and the world has its courses to run through, and in the future, those who live to see it will see Canada one of the most developed and mightiest and richest and most prosperous countries in the world; but we will only get to it through the portal of development and of production."

PROOF OF DEATH IS NECESSARY

Companies Like to Pay Soldiers' Insurance Promptly But Are Compelled to Take Ordinary Precautions

The article, "Proof of Death is Necessary," appearing in the last issue of *The Monetary Times*, is timely at this juncture when there is an increasing number of death claims arising out of the present war and among which there are likely to be some cases where positive proof of death is not available, writes Mr. C. Ruby, secretary of the Mutual Life Assurance Company of Canada. The whole nature of the circumstances naturally arouses sympathy for a claimant and the life companies may be depended upon to act as leniently as possible in regard to the nature of the proof to be furnished. Were they not prompted to do this through feelings of common decency and uprightness they would still have the spur of self-interest; for a life insurance company is dependant upon the goodwill of the public for its continued prosperity, and it were a shortsighted policy indeed for a company to pursue a course which would leave it open to just criticism in dealing with death claims.

It is well that the public should know that the official notification of the death of a soldier is not conclusive proof of his having made the supreme sacrifice, as in a number of cases soldiers have been officially reported dead but subsequently the reports were found to have been incorrect. In addition to the usual official notifications of death the companies must needs require a claimant to supply confirmatory evidence. Failing the latter, it is but reasonable that the final disposition of the claim should be deferred.

Have Paid Millions Promptly.

The universal practice of life insurance companies is to pay all claims as soon as they receive satisfactory evidence of the death of the insured and the party or parties claiming the policy prove title thereto. The different companies transacting business in Canada have paid hundreds of millions of money for death claims, usually very promptly, states Mr. L. Goldman, president of the North American Life Assurance Company.

In the case of soldiers, the practice among the best-managed companies is to accept the certificate of the department of militia and defence at Ottawa with any confirmatory evidence from the front such as letters from comrades or friends serving in the ranks with the deceased or from the hospital where he died if easily obtainable.

The companies are simply the trustees for the funds held by them and therefore it is the duty of the directors and officers not to make payment of claims unless proper evidence be furnished to identify the deceased, although there are some people so unreasonable that they expect payment of a policy on notifying the company that they have heard the insured is dead. The North American Life's experience, and no doubt that of many other companies, since the war started, is that we occasionally receive notice of the death of one of our brave men at the front and later on receive advice that he is alive.

As there may be cases of policyholders who have gone to the front and at present are missing or will be missing after the war the question will arise as to their whereabouts. They may at present be dead or prisoners unidentified in some foreign country. A certain lapse of time will be necessary after the war to make full investigation regarding such cases to see if these policyholders are dead and if possible to gain all information respecting their death or their whereabouts, and after the lapse of a reasonable time and a reas-

That First Thousand Dollars

If, as some financial expert has said, the first thousand dollars is the hardest to get, the sum should be safeguarded with all precautions when it has been earned.

Our Guaranteed Trust Investment plan offers complete protection with reasonable interest return for sums of five hundred dollars and upwards.

We are glad to explain by booklet or by personal interview the details of this form of investment.

National Trust Company

Capital Paid-up, \$1,500,000.

Reserve, \$1,500,000.

18-22 KING STREET EAST, TORONTO.

onable effort to locate or gain this information if nothing is then forthcoming the companies may wisely consider such cases as death claims and pay in annual instalments or otherwise the amount of the face value of the policy.

Government Stand Behind Companies.

Inquiry from some of the companies in Toronto would establish the fact that in almost every case it is possible to get fairly promptly some evidence from the front that is reasonably conclusive. If this proves ultimately to be impossible, the London Life Insurance Company is inclined to act on the official notice, provided nothing has been heard from the insured during a period of say three months subsequent to the date of death, states Mr. E. E. Reid, of that company.

A suggestion has been made that the government stand behind the companies in settlement of claims on soldiers' lives. This would enable prompt settlement and if the government are satisfied as to the accuracy of their reports, it should not leave any heavy burden for the government to shoulder. Every company in the country would welcome this arrangement which would enable them to clear off outstanding claims more promptly.

The statement in the article that companies vie with one another in the prompt settlement of claims, is so true that claims officials in some of the larger companies frankly admit that the interests of the general body of policyholders suffer considerably on this account alone. So far as I am aware, no company now thinks of adhering to its full rights in the matter of settlement of claims, being rather impatient of any obstacle to the settlement upon the day proof reaches the office.

Reputation as Prompt Payers.

Mr. Arthur B. Wood, actuary of the Sun Life Assurance Company, remarks that the question of proof of death is causing the life insurance companies a considerable amount of concern at the present time owing to the number of claims arising out of the war and the difficulty of obtaining positive proof of death in some cases. There is a tendency on the part of some claimants to take the position that the company is unreasonable if it refuses to accept as final proof of death the official notice from military headquarters at Ottawa. It is well known that mistakes are made and that such evidence cannot safely be accepted as positive proof. Additional evidence in the form of letters from comrades or others, describing the circumstances under which the assured met his death are therefore usually called for. This naturally causes some delay but the public should realize that this is a necessary precaution to take. Every life insurance company desires to maintain its reputation for the prompt settlement of claims and no company can therefore afford to place unnecessary obstacles in the way of attaining this end.

REFUSED HICHER RATES ON IMPORTS

An application by the Grand Trunk, Grand Trunk Pacific and Canadian Pacific Railways for approval of new and increased schedules of rates on import freights bound west from Montreal, Portland, Maine, and St. John, N.B., was made to the board of railway commissioners and refused. This application was opposed by Canadian importers. Sir Henry Drayton, chief commissioner, in his judgment, concurred in by the other commissioners, states:—

"The condition of the railways, while certainly not all that might be desired, is, nevertheless, much better than it was eighteen months ago, and, in view of the assistance already given, no hardship will be worked against the railways in determining that no action should be taken in this case until the effect of the eastern rates judgment can be clearly demonstrated. Theoretical demonstration really amounts to nothing. The actual traffic returns alone can show what, under the new conditions as developed, the situation will be. I am of opinion that the board should at the present time, therefore, take no action in this application."

The current issue of the Excelsior Record gives the policy writers of the Excelsior Life Insurance Company, Toronto, many useful hints in regard to getting new business.

BANKING AND FINANCE

The circulation of Canadian chartered banks, which has remained for some months almost stationary at \$123,000,000, expanded during September to \$135,285,031, which is equivalent to \$16.90 per capita of the population of the Dominion. The exceptional amount of this expansion is evident from the following figures, compiled by the Canadian Bank of Commerce:—

Year.	Population.	Notes in circulation.	Amount per capita.
Average for 1868	3,371,594	\$ 8,307,079	\$ 2.5
" " 1880	4,215,389	20,186,176	4.8
" " 1890	4,792,605	32,059,178	6.8
" " 1900	5,322,348	45,577,387	8.5
" " 1910	6,917,000	79,781,631	11.5
September, 1916	8,000,000	135,285,031	16.9

In addition to the notes of the chartered banks, the public held at the end of September \$39,885,630 in Dominion government notes, of which there had been issued at that date \$174,302,958, the remaining \$134,417,328 being in the hands of the banks. The public, therefore, held on the date mentioned \$175,170,661 in currency, or \$22 per capita. In the United States, according to a report of the treasury department, the currency at the end of October, exclusive of that held by the treasury as government assets and that held by federal reserve banks against note issues, was equal to \$40.02 per capita. This amount, however, includes what is held by the banks.

ALBERTA'S RAILROAD BOND GUARANTEES

Some interesting figures regarding the guarantee of railroad bonds by Alberta province have been prepared by Messrs. W. L. McKinnon and Company, bond dealers, Toronto, who have furnished a copy to *The Monetary Times*. They show that the total direct liability debt is \$26,733,178, and the total guarantee securities authorized \$58,752,500, amounting to a total commitment of (as at December 31st, 1915), \$85,485,678. The city of Toronto, with an estimated population less than the population of Alberta, had a total permanent debt (as at December 31st, 1915), of \$86,146,524.

Against the total commitment of the province of Alberta are several offsetting factors which enhance the security behind their debentures. Some of these are as follows:—

1. There are \$12,000,000 of remunerative direct liability bonds, on which the province does not require to pay interest. The interest is met out of earnings. 2. The Dominion subsidy amounts to \$405,375 per annum, which equals 5 per cent. on \$8,107,500. 3. The province of Alberta owns 7,236,925 acres of lands unsold, which, at the average price paid on previous sales (\$11.69), is worth \$84,588,000.

4. The government has authorized guarantees for 3,471 miles of railroad at an average of \$16,922 per mile. Yet they have only executed guarantees for 2,536 miles. As they are not liable for the guarantees till these are executed, their commitments as at present are considerably less than the \$58,700,000 mentioned above. Furthermore, the net earnings of the railroads interested must be applied to paying interest and redemption of principal on these guaranteed securities.

5. If the building of each mile of railroad increased the value of land (for 13½ miles on each side) to the amount of only \$1 per acre, the people of the province of Alberta will be reimbursed for the total amount of the guarantees by the province on account of railroads. This shows, say Messrs. McKinnon and Company, the wisdom of the province guaranteeing the debentures in the first place. 6. There are at least 100,000,000 acres of land available for cultivation in the province. The province itself owns over 7,000,000 acres, valued at \$11.69 per acre. 7. The value of last year's crop was \$111,000,000, raised by about 500,000 people, all told, within the province.

8. One-seventh of the world's supply of coal is estimated to be within the province of Alberta. 9. While the province has power to levy direct taxes against all the taxable property in the province, there has never been a need for levying any general taxes by the Alberta government yet. Last year's debt charges amounted to only \$768,093.

BRITISH COLUMBIA'S COMPENSATION ACT

Plan Adopted is Based Largely on Ontario's Legislation —Twelve Groups to be Assessed

On January 1, 1917, the Workmen's Compensation Act, passed at the last session of the British Columbia legislature, goes into force. The act was framed on the report submitted by the board of inquiry appointed by the British Columbia government in September, 1915, to make investigation of workmen's compensation legislation operating in the United States and Canada. The board consisted of three members—namely, Messrs. D. Robertson, H. V. Pineo and J. H. McVety. The first sessions were held in this province, and after surveying the situation here the commissioners proceeded to the United States and eastern Canada. In the course of their investigations visits were paid to 25 states of the union in addition to Ontario and other provinces. In all cases the board's procedure was to invite testimony from employers, employees and other vitally interested parties. The commissioners found a considerable difference in the several acts investigated. For instance, in some states, the employer has the option of placing his risk with an insurance company approved by the government, whereas in other states the accident fund is operated by the government under a commission. As a result of the board's inquiries a report was furnished the government, recommending, in a large measure, the principal features contained in the present act, according to a statement of the British Columbia government.

General Accident Fund.

This report was unanimous, the main proposal being that all employers be compelled to pay into an accident fund to be administered by the workmen's compensation board appointed by the lieutenant-governor in council. The board will consist of three members, but no appointments have so far been made on account of the political situation.

In the meantime, all employers have been required to furnish complete details of their payrolls so that full information will be on hand for the commissioners when they assume their duties. On account of the importance of this legislation it is probable that one of the recently appointed government's first acts will be the creation of this board. The usual practice is to appoint representatives of the employers and employees with an independent party as the other commissioner.

The British Columbia workmen's compensation act is, in the main, similar to the legislation in force in Ontario. The board will have exclusive jurisdiction in all matters pertaining to compensation payments. The action and decision of the board cannot be restrained by injunction or proceeding in any court.

The accident fund will be created and maintained from assessments levied on all the industries specified in the act. These industries are grouped into 12 classes but a rearrangement may be made if deemed advisable. The commissioners will make the first assessments largely on the experience of states and provinces where similar acts are in force.

Minister Handles Money.

The minister of finance will act as custodian of all moneys and securities belonging to the fund and his approval must be obtained before any moneys are paid out by the commissioners. Monthly estimates of the amount required for compensation disbursements must be submitted to the auditor-general. All funds in excess of current requirements are to be invested in securities under the Trustee Act. By so doing a revenue fund will be created to meet the compensation payments and all investments are to be made in the joint name of the compensation board and the minister of finance. If there are any funds in the custody of the minister of finance over and above current requirements and not invested, such sums will draw interest at 3 per cent. per annum. All the board's accounts will be audited by the auditor-general or by an auditor appointed by the government.

To Investors

THOSE WHO, FROM TIME TO TIME, HAVE FUNDS REQUIRING
INVESTMENT, MAY PURCHASE AT PAR

DOMINION OF CANADA DEBENTURE STOCK

IN SUMS OF \$500 OR ANY MULTIPLE THEREOF.

Principal repayable 1st October, 1919.

Interest payable half-yearly, 1st April and 1st October by cheque (free of exchange at any chartered Bank in Canada) at the rate of five per cent per annum from the date of purchase.

Holders of this stock will have the privilege of surrendering at par and accrued interest, as the equivalent of cash, in payment of any allotment made under any future war loan issue in Canada other than an issue of Treasury Bills or other like short date security.

Proceeds of this stock are for war purposes only.

A commission of one-quarter of one per cent will be allowed to recognized bond and stock brokers on allotments made in respect of applications for this stock which bear their stamp.

For application forms apply to the Deputy Minister of Finance, Ottawa.

DEPARTMENT OF FINANCE, OTTAWA,
OCTOBER 7th, 1916.

MARKETING QUEBEC'S MINERALS

War Conditions Made United States Large Buyer of These

The greater portion of Quebec's asbestos chrome ore, lead, zinc and copper was shipped during 1915 to the United States.

This was owing to war conditions necessitating the following orders in council:—

(a)—It is forbidden to export mica, micanite, apatite, and phosphate of lime to any country other than to the United Kingdom, British possessions and protectorates, France, Russia (except Baltic ports), Japan, the United States and Italy, when such articles are to be consumed in such country or shipped to consignees in the United Kingdom through the United States or are exported via the United States under a license or permit from Canada.

(b)—It is forbidden to export the other articles mentioned below to any country other than the United Kingdom or British possessions and protectorates, namely: asbestos, graphite, molybdenite, chrome ore, lead ore, manganese ore, zinc ore.

(c)—It is forbidden to export copper ore, iron ore, iron pyrites to any foreign port in Europe and in the Mediterranean and Black Sea, other than France, Russia (except Baltic ports), Belgium, Spain, Portugal and Italy.

Operators producing such substances may, however, in certain cases, obtain a special export permit from the Customs Department at Ottawa.

Value of Production.

The report of Mr. A. O. Dufresne, assistant superintendent of mines, shows that Quebec's mineral production during 1915 was \$11,465,873.

	Quantities.	1915.	1914.
Asbestos, tons	113,115	\$3,544,362	\$2,895,935
Asbestic, tons	25,000	21,819	4,904
Chromite, tons	14,397	245,297	1,210
Copper and sulphur ore, tons	142,797	1,021,777	801,129
Feldspar, tons	32	640	2,156
Gold, ounces	1,158	23,082	21,064
Graphite, pounds	135,200	2,461	18,886
Kaolin, tons	1,300	13,000	9,000
Magnesite, tons	16,285	137,353	2,240
Mica, pounds	735,602	55,897	67,278
Mineral water, gallons	358,275	33,084	23,569
Mineral paint (ochre), tons	6,264	42,285	36,600
Phonolith and glass sand, tons	4,000	8,000	2,114
Phosphate, tons	200	2,400	5,057
Silver, ounces	72,809	36,182	31,809
Zinc and lead ores, tons	634	36,000	10,017
Structural Materials:—			
Brick, thousand	91,932	655,017	1,094,531
Cement, barrels	2,484,362	2,805,374	3,325,055
Granite		269,350	582,235
Lime, bushels	1,209,695	228,670	391,622
Limestone and marble		1,830,141	1,745,855
Sand		210,809	446,532
Sandstone		35,754	
Slate, square	397	2,039	5,105
Tile, drain and sewer pipe, pottery		195,080	208,355
		\$11,465,873	\$11,732,783

Asbestos Rock by Million Tons.

In regard to two of Quebec's important minerals the following information is of interest:—

Eight companies operated asbestos mines during the year 1915, namely: The Asbestos and Asbestic Company; Asbestos Corporation of Canada, Limited, worked the King, the Beaver, and the British Canadian mines; B. & A. Asbestos Company; Bell Asbestos Mines; Black Lake Asbestos and Chrome Company, Limited, (two mines); Jacobs Asbestos Mining Company; Johnson's Company; the Martin-Bennett Asbestos Mines, Limited.

There was a slight increase in the total quantity of asbestos-rock mined: 2,134,073 tons as against 2,127,395 in 1914.

The asbestos milled from such rock was valued at a total amount of \$3,544,362, being an increase of 22 per cent. over the sales in 1914. The year 1915 did not, however, show an excess in the quantity of rock mined and in the value of asbestos, over 1913, which holds the record for the production of that substance.

Mining the deposits of chromite of the province of Quebec, especially in Coleraine township, was carried on with an activity hitherto unknown. A total quantity of 14,397 tons was taken out during the year 1915; the largest shipment of chromite previously made was in the year 1906, and amounted to 9,035 tons.

Before the War.

Before the war the United States which obtained this ore chiefly from Rhodesia, New Caledonia, Turkey and Greece, were unable, after the mobilization of the principal vessels of the mercantile navies of the various belligerent countries, to import in such large quantities from these sources. Moreover, the metallurgical works were overloaded with orders, and were working without cessation; and it may be presumed that the quantity of that substance consumed in the United States in 1915 greatly exceeds the 80,736 tons of the year 1914. These figures show an increase of nearly 24 per cent. over the previous year. Now, in 1914, the United States imported 99 per cent. of the ore they needed. It is therefore easy to form an idea of the state of the market in the spring of 1915.

The demand, added to the difficulty of procuring this material required in metallurgical works, induced the brokers dealing in ores, to purchase in the province of Quebec. This province is the only one in Canada which possesses deposits of that substance, apart from the Tulameen district of British Columbia where the existence of chrome iron has been reported. In the United States, it is found in California, Wyoming, Maryland, Pennsylvania and North Carolina. Some of the old workings were reopened in June.

Most of the chrome iron from the various deposits in Coleraine township was shipped to the State of Pennsylvania where it is used in making refractory lining for blast furnaces and the hearths of metallurgical furnaces. Chromite is also used for making ferro-chrome—a mill for that purpose is in operation at Niagara Falls, United States; also in the manufacture of chemical compounds of certain dye-colors. Of late years, an alloy has been made of it with nickel and vanadium to harden the heads of shells and the plates for ironclad ships. Such alloys are also used in making some parts of automobiles and other metal pieces requiring certain special properties.

United States Capital Invested.

Although, at the beginning of the year 1916, the representatives of American mills were more exacting in their purchases regarding the quality of the ore, the market remained steady and prices were getting better and better.

With a view to securing a constant supply of ore, and to evade the hazards of the maritime transport problem, the Mutual Chemical Company of America, through its subsidiary branch in this country, the Mutual Chemical Company of Canada, is building two concentration mills in Coleraine township. The old works, between Coleraine and Black Lake Stations, will be used for the first one; its daily output will be 30 tons of concentrates. The second is being built at Little Lake St. Francis and will have a smaller output, from 100 to 125 tons per week.

CANADIAN NORTHERN SECURITIES MATURING

The following Canadian Northern securities mature in New York next year on the dates noted:—

Date.	Issue.	Amount.
Jan. 1st—One-year notes, 5 per cent.		\$ 2,500,000
July 10th—One-year notes, 6 per cent.		3,000,000
Sept. 1st—Two-year coll. trust notes, 5 per cent.		11,500,000
Sept. 1st—Term notes, 5 per cent.		1,750,000

The Grand Trunk has also \$4,000,000 two-year 5 per cent notes maturing in that market on November 1st, 1917.

The Bank of Montreal has concluded arrangements to open a branch at Renfrew, Ont.

ENEMY SAMPLES AT ONTARIO'S LONDON

Exhibition of German and Austrian Goods—Toronto Made Good Attendance Record

The city of London, Ont., the centre of a very busy industrial area of that province, is one of the five cities in Canada to have the enemy samples exhibition. This collection of enemy goods was made by the British government's board of trade and loaned to Canada at the request of Sir George Foster, minister of trade and commerce, Ottawa. At Montreal, the attendance was 1,714 and at Toronto, 2,620, all business men and manufacturers with the exception of 535 students at Toronto. Of the 12 English, Scotch and Canadian cities visited by the exhibition to date, Toronto came third in attendance and Montreal fifth. Manchester was first with 3,491, Birmingham second with 3,341, Glasgow fourth with 2,014 and Sheffield sixth with 1,205.

The students visiting the exhibition at Toronto did not by any means do so merely out of curiosity. Some of these young gentlemen were very interested in a practical manner in the exhibits and came several times. Some of them came to take particulars of articles which were more or less related to their fathers' business. In any case, the exhibition served a very useful purpose in teaching the students something about German business methods and the extent to which they had introduced their products in every part of the globe. Considering the population of Toronto, the absence of large numbers of export merchants (compared with many cities in the United Kingdom), and the considerable distances which many hundreds of visitors had to travel, the result may be considered remarkable.

New Overseas Markets.

Both at Montreal and Toronto prominent manufacturers visiting the exhibition, frequently expressed astonishment that it should have been possible to market certain wares in quite remote places. Men with keen minds perceived articles which, though not directly concerned with their particular business, can by manipulation and adjustment be applied to goods which they are already manufacturing, and there is no doubt that an exhibition of this nature provides a profitable field for this kind of original investigation. Even though, as must necessarily often happen, a manufacturer cannot find just the particular article which interests him, he is none the less, if properly conducted round, interested in acquiring a sense of new overseas markets.

The exhibition has already elicited the fact that there are manufactured in Canada a considerable number of articles the supply of which one might have thought came from outside Canada. Among these are such articles as machine-made lace, fabric gloves, lead pencils, picture post-cards, various electrical supplies, wire nails, certain types of petrol engines, etc. A considerable amount of information of this description has been recorded and transmitted to Ottawa for incorporation in the official files of the trade and commerce department.

Lent to Firms.

Apart from small cuttings or clippings which have been taken from samples, as well as drawings, designs and measurements thereof, the following is a list of articles which have been actually lent to firms for experimental or investigation purposes—viz., linoleum polish, rubber tennis shoes, imitation leather, paper twine, lanterns and lamps, blankets, electrical sockets and supplies, braid, buttons (gelatin and gallalith), dome fasteners, paper envelopes, bell ringing transformer, garden rakes, butchers' cleaver, enamel ware, aluminum ware, carpeting, lace, serges, fezzes, underwear, glass household churns, embroideries and insertions, picture mouldings, fabric gloves. While the exhibition was in Toronto there were 275 written enquiries for the Canadian department of trade and commerce weekly bulletin, and 49 written enquiries for publications on export possibilities issued by the same department. These two items reflect one of the practical results of the exhibition.

Some firms, after inspecting the exhibits, have said that they would not be disinclined to take up new lines of manufacture, such as the exhibits suggested, providing they could get the requisite machinery. Other visitors thought that the present enhanced prices of material in England afforded an opportunity to Canadians to take up the manufacture of and develop at least the home market for certain

articles. One instance of this was the supply from England of billiard cloth which has practically ceased recently.

Great interest has been manifested in the German samples of buttons and studs made from casein or dried milk. A visitor to the exhibits stated that casein was being made on a somewhat extensive scale in Townsend Township, in the county of Norfolk, by a manufacturer who at one time made cheese but had taken to developing the casein industry owing to its being more remunerative. It was further learned, on investigation, that a large dairy was cognizant of this industry, and stated that the casein was being used for coating certain kinds of paper. When well-known button makers from Kitchener, Ont., visited the exhibition, they were given information on this subject, and it is not unlikely that practical results will ensue.

The exhibition will be opened at London, Ont., on Monday next, and after a stay in that progressive centre, it will probably go to Halifax and St. John, and then back to England. Mr. Herbert Kershaw, of the British government's board of trade, is in charge of the exhibits, assisted by several members of the staff of the Canadian department of trade and commerce.

LIVE STOCK

A notable incident during the past month has been the action taken by the live stock commissioner of Saskatchewan and by the Dominion authorities to procure the co-operation of the banks in stopping the exportation of young stock to the United States and in interesting farmers in the purchase of breeding stock, suggests the Canadian Bank of Commerce in its monthly letter. So great was the movement of live stock into the Union Stock Yards at Winnipeg that it became necessary for the railways to refuse to accept shipments for a limited period. The high cost of grain and of other foodstuffs is causing farmers to hesitate to carry cattle through the winter for fattening next spring.

CANADA PLACES RAIL ORDERS IN STATES

A Montreal despatch to "Financial America" says: The imports of steel rails from the United States into Canada, despite the fact that the Dominion government has removed all duty, except the war tax, have so far been small. It was thought that if the government would remove the duty on steel rails, the serious shortage which prevailed would be overcome. The steel mills in Canada are all so heavily engaged in making munitions that it is next to impossible for them to take on any rail orders. The railroads want steel badly throughout Canada to replace worn rails and make it safe to move the large amount of freight and grain which is coming eastward and to lay in the more recently settled portions of the Dominion in order to obtain the grain cargoes raised there. But this has been almost to no avail, and it seems that very small amounts of steel rails will be delivered unless the government takes a hand and assigns one mill to turn out the requirements until after the end of the war.

The orders now placed in the United States from Canada are very large, but they are for the most part totally unfilled.

At the beginning of the war the Canadian Pacific Railway had on hand a considerable amount of second-hand steel rails, but these were turned over to the government for shipment to France to be used for war purposes, and now that railway is even in a worse condition than the other systems who have a few used rails, which are being laid in new districts.

Mr. Mark Workman, president of the Dominion Steel Corporation, considers that the prices of steel rails will maintain a higher price after the war because of the shortage of ore in the United States just now. "Rails have sold too cheaply in the past," he says, "and this development will probably correct this condition. There is no doubt but we will have a healthy business after the war."

The darkening of Halifax and St. John by reason of the German submarine menace reminds Canadians of the peril, all too little understood at the time, in which Victoria and Vancouver stood from raiding German ships at the commencement of the war. Our western cities were saved partly owing to the activity of the Japanese fleet, but chiefly by the might of the British fleet. The first call for Canadian recruits to serve in the British navy on Canadian rates of pay is for 2,000 men.

Protection Doubly Sure

You protect your family from possible want, by Life Insurance.

But do you realize that if you do not make **A WILL** your estate may be disposed of by law very differently from the way you would wish? You can be assured that your heirs will receive full protection if you will permit the Sterling Trusts Corporation to advise you on this important matter.

COMMERCIAL PRINCIPLES

After describing the money and credit mechanism of commerce and its operation, the author proceeds in the second part of a book just issued to consider the gains of trade, whether the trade is with a single country or between countries, following with a discussion regarding the shares of two or more countries in the gains resulting from their trade with each other. Such a topic naturally opens avenues for a study of tariffs, government interference, transportation and allied subjects. Such phases of the subject are treated in an interesting and instructive way. The three parts of the book are given the following headings: Exchange Mechanism of Commerce; Economic Advantages of Commerce; Transportation Costs of Commerce. The business man, the economist and the student will be benefited by the perusal of this valuable volume.

Principles of Commerce. By Professor H. Gunnison Brown. Price, \$1.75. Macmillan Company of Canada, St. Martin's House, Toronto.

ADVOCATES PUBLIC OWNERSHIP OF CARRIERS

Public ownership of all "public carriers," the railways, telegraph and telephone systems, was strongly advocated by Mr. W. F. Maclean, M.P., in speaking before the Toronto Canadian Club this week. The South York member dealt chiefly with the nationalization of the railway systems of the Dominion, declaring that only through public ownership could the country reach its highest development. Public carriers could never give the maximum of service while those who operated them were working for private profit.

Under public ownership all these public services would be under one improved administration, duplication could be avoided and co-ordination effected. Public ownership of railways would open the way to the development of water traffic. With the railways exercising the wide control they do at present the development of canals and lake and river navigation had been palsied.

"A private-owned monopoly becomes, in nearly every case," he said, "a public enemy. The private railways fight our post-office in parcel-post and cheap express service just as the private-owned banking institutions of Canada fight the postal money order and the rate of interest on deposits paid by the postal savings banks. Why should a nation create unfair dictation within its own border?"

"This great war has brought into the forefront the idea of public service before anything else. A state must own its railways for purposes of national defence if for that alone. Had it not been for our state-owned railway the Intercolonial, we could not have sent a man to the front, except in summer, from Montreal and Quebec. Canada, to-day, has no absolute control of her three private-owned railways. The control may be in the States. The control of the Canadian Pacific Railway was at one time in Germany. We must own them ourselves. Bonds issued to build state railways may be held out of the country; stock that controls them should never be allowed to go out of the country. Lord Shaughnessy is bound to think more of his shareholders' interests, no matter where they live, than of the Canadians who are served by that road. Germany controls our nickel mines, and she could buy up our railways to-morrow by way of agents in the United States.

"Boston telegraph and telephone interests control the cable, telegraph and telephones that serve Canada. The empire must own the cables. Our great Canadian Pacific has its closest allies in Wall Street, not in Canada. A state that owns its railways can assist therewith in promoting foreign trade; in giving the best freight charges on her exports, and on her raw products from other countries needed for her manufacturers. Germany uses this to the great advance of her wealth and interest. National railways have made Germany able to defy the world."

The directors of the Bank of Hamilton have granted a special war bonus to the staff of the bank in recognition of extra services necessitated by the large number of employees who have enlisted for overseas service and the increased cost of living. The bonus is based on the salary received, and is awarded at the rate of 5 per cent to the unmarried men and 7½ per cent. to the married men.

LEGAL NOTICES

THE MANOR ESTATES, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 17th day of October, 1906, incorporating Robert Abercrombie Pringle, Thomas Anderson Burgess and Louis Cote, barristers-at-law; Robert Hatfield Pringle, customs broker, and Mary Ida Keays, stenographer, all of the city of Ottawa, in the Province of Ontario, for the following purposes, viz.:—(a) To acquire by purchase, lease, exchange, concession or otherwise, city lots, farm lands, mining or fruit lands, town sites, grazing and timber lands, and any description of real estate and real property or any interests or rights therein, legal or equitable or otherwise, howsoever; to take, build upon, hold, own, maintain, work, develop, sell, lease, exchange, improve and otherwise deal in and dispose of such lots, lands, sites, real estate and real property or any interest therein; to deal with any portion of the lands and property so acquired, subdividing the same into building lots, and generally laying the same out into lots, streets and building sites for residential purposes or otherwise; (b) To construct streets upon the land of the company, necessary sewerage and drainage system, to build upon same for residential purposes or otherwise, and to supply buildings so erected with electric light, heat, gas, water or other requisites therefor; (c) To act as agents for the sale and purchase of real estate and all interests therein and to procure real estate investments for any person; to act as selling agents for the owners of any real estate, subdivision, building sites, town sites or lands of any kind or any interest therein, and to take over and acquire from any person or corporation any agency, inclusive or otherwise, for the sale of any such lands, sites or interest therein, and to accept an assignment of and perform any contracts made by any person with any other person or corporation for the sale of any such lands, sites or interest therein as agents or otherwise and generally to act as real estate, house and rental agents, and as incidental thereto to carry on the business of fire insurance agents; (d) To apply for, purchase or otherwise acquire, any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property rights or information so acquired; (e) To take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (f) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise, and comply with any such arrangements, rights, privileges and concessions; (g) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Manor Estates, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 19th day of October, 1906.

THOMAS MULVEY,
Under-Secretary of State.

17-2

VAN DER LINDE RUBBER COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 26th day of October, 1906, incorporating Sophia Tutty, bookkeeper, Ella Lester Kelly, Susie Ross and Myrtle Etiole Thurgarland, stenographers, William Archibald McFarlane and Vincent Thomas Aloysius Foley, students-at-law, and Lester Millman Keachie, barrister-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on the business of manufacturers of and dealers in rubber and moulded goods and goods and products in which rubber of any kind whatsoever or any analogous substance may be used and to manufacture and deal in plastic goods, materials and products of all kinds whatsoever, and to cultivate rubber plants, guayule and all other plants capable of being used for the manufacture of rubber or similar products and plastic goods, and to carry on the business of rubber plantations in all of its branches, and to carry on and work the business of manufacturers, winners and buyers of every kind of rubber plants and vegetable, mineral or other product of the soil; to prepare, manufacture and render marketable any such product, and to sell, dispose of and deal in any such product, either in its prepared, manufactured or raw state, either by wholesale or retail, and to carry on the business of chemists and electricians, and manufacturers of and dealers in all kinds of chemicals and electrical goods; (b) To buy, sell, manufacture, refine, manipulate, import, export and deal in all substances, apparatus and goods capable of being used in any such business as aforesaid or required by customers of or persons having dealings with the company, either by wholesale or retail; (c) To own, construct, operate, manage and deal with ships, barges, vessels and other marine craft, and so far as may be expedient to carry on the business of general merchants and buy, lease or otherwise acquire and to clear, plant and work rubber estates and plantations or any interest therein, as may be deemed advisable in the interests of the company; (d) For the purpose of supplying the needs of the company's business, to purchase, lease or acquire any interests in lands, water powers and water privileges and to develop therefrom any power, electrical or other energy needed for said business on or outside the lands of the company and to use and transmit the same and to sell, lease or dispose of said lands or interests therein and to sell or dispose of surplus power or energy not required for the needs of the

company and to enter into working arrangements with other companies, persons, firms or corporations for the use or transmission of such surplus and to establish, operate and maintain any electric, gas or other lighting, heating or power plant and to sell or dispose of such surplus electric, gas or other light, heat and power and all the residual products of such plant; provided, however, that any sale, distribution or transmission of electric energy for light, heat and power beyond the lands of the company shall be subject to all provincial and municipal laws and regulations in that behalf; (e) To acquire by purchase, lease, concession, exchange or otherwise, land, buildings and hereditaments of any tenure or description and any estate or interest therein, and any right over or connected with land, and to turn the same to account as may seem expedient, and to construct, reconstruct, erect, alter, operate, maintain and manage all buildings, erections, factories, shops, storehouses, depots, machine shops, engine houses and other constructions and erections for its business and to hold, improve, decorate, furnish such buildings and erections as may be deemed proper, and to acquire as aforesaid all other property, movable and immovable, necessary and useful for carrying on any of the purposes of the company, and with power to sell, lease, exchange or otherwise dispose of any such property, lands or interests therein or rights thereover as the company may deem proper; (f) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (g) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (h) To apply for, purchase or otherwise acquire and use, any inventions, patents, brevets d'invention, trade marks, trade names, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention or discovery which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop, improve or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (i) To enter into partnership or any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (j) To take, or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company, notwithstanding the provisions of section 44 of the said Act; (k) To enter into any arrangement with any government or authorities, supreme, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such government or authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (l) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees, or ex-employees of the company (or its predecessors in business) or the dependents or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (m) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (n) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business and in particular any land, buildings, easements, machinery, plant, stock in trade, as may be required and to construct, maintain and alter any buildings or works necessary or convenient for the purposes of the company; (o) To construct, improve, maintain, develop, work, manage, carry out or control any roads, ways, tramways, branches or sidings, bridges, reservoirs, watercourses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (p) To invest and deal with the moneys of the company not immediately required in such manner as may from time to time be determined, and to lend money to such persons and on such terms as may seem expedient, and in particular to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (q) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company; (r) With the approval of the shareholders, to remunerate any person or company by the issue of fully paid-up stock or otherwise, for services rendered or to be rendered in placing or assisting to place or guaranteeing the placing of any of the shares in the company's capital, or any debentures, bonds or other securities of the company, or in or about the formation or promotion of the company or the conduct of its business; (t) To issue paid-up shares, bonds, debentures or other securities of the company in payment or part payment for any property or rights which the company may desire to acquire or, with the approval of the shareholders, for any services rendered or to be rendered or for any work done or to be done for the company or in or towards the payment or satisfaction of debts or liabilities owing by the company; (u) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (v) To sell, improve, manage,

LEGAL NOTICES

develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (w) To do all such other things as are incidental or conducive to the attainment of the above objects; (x) None of the powers given by any paragraph aforesaid are to be restricted or limited by reference to or inference from any other paragraph. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "van der Linde Rubber Company, Limited," with a capital stock of three hundred and fifty thousand dollars, divided into 3,500 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 20th day of October, 1916.

THOMAS MULVEY,
Under-Secretary of State.

18-2

DOMINION PORCELAIN CORPORATION, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 26th day of October, 1916, incorporating Gideon Grant, Mervil MacDonald, Bruce Williams and Edwin Smily, barristers-at-law, and Edward Wesley Rhodes, student-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell and deal in porcelain, porcelain and clay products, and to assemble parts thereof and to acquire, own and carry on the business of wholesale and retail dealers in all kinds of porcelain and clay products, and to act as agents for dealers or manufacturers of any such goods, wares and merchandise, and to establish agencies and branch stores; to carry on all or any businesses, both wholesale and retail, as shopkeepers, general merchants, manufacturers, shippers, general agents and warehousemen, and to buy, sell, make, manufacture, import, export, warehouse, store and deal in products of every description, goods, wares, merchandise and manufactured articles; (b) To take, acquire, lease, hold, sell and dispose of real estate and personal property of every nature and kind as security for or in satisfaction wholly or in part of debts, liabilities or obligations incurred or to be incurred in respect of or in connection with the business aforesaid, or any of the purposes of the company; (c) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (d) To acquire or undertake the whole or any part of the business, property, good-will and liabilities of any person, firm or company carrying on any portion of the business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company, and to pay for the same in cash, bonds or paid-up shares or partly in cash and partly in bonds or paid-up shares of the company as may be agreed upon; (e) To apply for, purchase or otherwise acquire, any patents, copyrights, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (f) To enter into any arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (g) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business and in particular any machinery, plant, stock in trade; (h) To construct, improve, maintain, work, manage, carry out or control any roads, ways, branches or sidings, bridges, reservoirs, watercourses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working management, carrying out or control thereof; (i) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (j) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (k) To lease, purchase, construct, own, maintain and alter any buildings or work necessary or convenient for the purposes of the company and to take options on lands and buildings belonging to others and to exercise such options or not as may be deemed expedient; (l) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with, all or any part of the real and personal property, rights and franchise of the company and to give options thereon on any part thereof; (m) To invest and deal with the moneys of the company not immediately required in such manner as the directors may from time to time determine; (n) To employ brokers, commission agent and underwriters upon any issues of shares, bonds, debentures or other securities of the company and to provide for the remuneration of such person or any other persons rendering services of any kind to the company; (o) To remunerate any person, firm or company for services rendered or to be rendered in placing or assisting to place or guaranteeing the placing of any of the company's capital or any debentures or other securities of the company or in or about the formation, promotion, organization or incorporation of the company or the conduct of its business; (p) To pay all the costs, charges or expenses preliminary or incidental to or incurred in connection with the promotion, organization, formation, establishment, registration and incorporation of the company; (q) The business or purposes of the company is from time to time to do any one or more of the acts and things herein set forth, either alone or in conjunction with others

or as principals, factors, contractors or agents, and to do all and everything necessary, suitable and convenient or proper for the accomplishment of any of the purposes or the attainment of any one or more of the objects herein enumerated or incidental to the powers herein named, or which shall at any time appear to be conducive or expedient for the protection or benefit of the company. And it is hereby declared that in the interpretation of this clause the meaning of any of the objects of the company shall not be restricted by reference to any other object or by the juxtaposition of two or more objects, and that in the event of any ambiguity this clause shall be construed in such manner as to widen and not restrict the powers of the company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Dominion Porcelain Corporation, Limited," with a capital stock of one hundred and fifty thousand dollars, divided into 1,500 shares of one hundred dollars each, and the chief place of business of the said company to be at the Town of Preston, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 31st day of October, 1916.

THOMAS MULVEY,
Under-Secretary of State.

19-2

COMMERCIAL CHEMICALS, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 23rd day of October, 1916, incorporating Earl Adlai Seburn, accountant; Percy Robinson, student; Ethel May Lennox and Margaret Jane Martin, stenographers, and Marcus Smith, student-at-law, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell and deal in goods, wares and merchandise; and in particular and without in any way restricting the generality of the foregoing to manufacture, buy, sell and deal in chemicals; (b) To carry on any other business (whether manufacturing or otherwise) which may be deemed necessary for the company's business; (c) To sell or dispose of the undertaking of this company or any part thereof for such consideration as this company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of this company; (d) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account, or otherwise deal with all or any part of the property rights of the company; (e) To do all or any of the above things, as principals, agents, or otherwise, and either alone or in conjunction with others; (f) To do all such other things as are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Commercial Chemicals, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 24th day of October, 1916.

THOMAS MULVEY,
Under-Secretary of State.

18-2

RAILROAD EARNINGS

The following are the weekly earnings of Canada's transcontinental lines during November:—

		Canadian Pacific Railway.		
		1916.	1915.	Increase.
November 7		\$3,036,000	\$3,015,000	+ \$ 21,000
		Grand Trunk Railway.		
November 7		\$1,244,959	\$ 986,765	+ \$258,194
		Canadian Northern Railway.		
November 7		\$ 885,000	\$ 806,500	+ \$ 78,500

The Western Canada Fire Underwriters' Association held the annual meeting at Chicago last week. One important matter considered was the revision of the constitution and by-laws, on which a committee, headed by Mr. W. L. Steele, western manager of the Niagara Fire, had been at work. A draft of the revised by-laws was submitted and a committee was appointed to consider further some details.

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of February, 1917, for the right to cut pulpwood and pine timber on a certain area situated on the Black Sturgeon River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure, for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honourable the Treasurer of the Province of Ontario, for ten thousand dollars (\$10,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$10,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,
Minister of Lands, Forests and Mines.
Toronto, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

BANK OF MONTREAL

Notice is hereby given that a Dividend of Two-and-one-Half per Cent., upon the paid-up Capital Stock of this Institution, has been declared for the current quarter, also a Bonus of One per Cent., both payable on and after Friday, the First Day of December next, to Shareholders of record of 31st October, 1916.

By order of the Board,
FREDERICK WILLIAMS-TAYLOR,
General Manager.

Montreal, 20th October, 1916.

THE ROYAL BANK OF CANADA.

DIVIDEND No. 117.

Notice is hereby given that a Dividend of Three per cent. (being at the rate of Twelve per cent. per annum) upon the Paid-up Capital Stock of this Bank, has been declared for the current quarter, and will be payable at the Bank and its Branches on and after Friday, the first day of December next, to Shareholders of record 15th November.

By order of the Board.
C. E. NEILL,
General Manager.
Montreal, P.Q., October 17th, 1916.

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of December next for the right to cut pulpwood and pine timber on a certain area situated on the Pic River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet, board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honourable the Treasurer of the Province of Ontario, for twenty-five thousand dollars (\$25,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$25,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,
Minister of Lands, Forests and Mines.
Toronto, August 28th, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

THE CANADIAN BANK OF COMMERCE.

DIVIDEND No. 119.

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this Bank has been declared for the three months ending 30th November next, together with a bonus of one per cent., and that the same will be payable at the Bank and its Branches on and after Friday, 1st December, 1916. The Transfer Books of the Bank will be closed from the 16th to the 30th of November next, both days inclusive.

By Order of the Board,
JOHN AIRD,
General Manager.
Toronto, 27th October, 1916.

TORONTO PAPER MFG. COMPANY, LIMITED

DIVIDEND NOTICE

Notice is hereby given that a dividend of three per cent. has been declared on the paid-up capital stock of this Company for the half-year ending December 31st, 1916, and will be payable on and after January 2nd, 1917, to shareholders of record at the close of business on December 15th, 1916. Transfer books will be closed from December 15th, 1916, to January 1st, 1917, both days inclusive.

By order of the board.
A. W. BRIGGS, Secretary.
Toronto, November 10, 1916.

DIVIDENDS AND NOTICES

UNION BANK OF CANADA.

DIVIDEND No. 119.

Notice is hereby given that a Dividend at the rate of eight per cent. per annum, upon the Paid-up Capital Stock of the UNION BANK OF CANADA, has been declared for the current quarter, together with a bonus of 1 per cent., and that the same will be payable at its Banking House, in the City of Winnipeg, and also at its branches on and after Friday, the 1st day of December, 1916, to Shareholders of record, at the close of business, on the 15th day of November, 1916.

The transfer books will be closed from the 16th to the 30th of November, 1916, both days inclusive.

By Order of the Board,

G. H. BALFOUR,

General Manager.

Winnipeg, October 19th, 1916.

CANADIAN PACIFIC RAILWAY COMPANY

DIVIDEND NOTICE

At a meeting of the Board of Directors held to-day a dividend of two and one-half per cent. on the Common Stock for the quarter ended 30th September last, being at the rate of seven per cent. per annum from revenue and three per cent. per annum from Special Income Account, was declared payable on 2nd January next, to Shareholders of record at 3 p.m. on 1st December next.

By order of the Board,

W. R. BAKER,

Secretary.

Montreal, 13th November, 1916.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over \$5,000.00, and he has built up a future income of over \$3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

SUCCESSFUL BANKER, with wide experience as Manager and also four years as Manufacturer and in Wholesale, seeks investment in a sound financial or other Company where his services would be required. Is capable of taking over correspondence, advising on investments or acting as secretary-treasurer. Small capital at present, but can increase to a good round amount later. Box 11, *The Monetary Times*, Toronto.

SCOTCHMAN of good education and ability, with 6 years' residence in Canada and many years Secretarial and Commercial experience in London and Africa in positions of trust, seeks similar position in one of the Cities, East or West. Limited amount of Capital introduced if necessary. Correspondence invited. Retlaw, Box 254, Calgary.

DOMESTIC WAR LOANS

We are pleased to quote most favorable rates either for buying or selling the old or the new war loan.

BANK OF NOVA SCOTIA BUILDING
TORONTO, ONT.

DEBENTURES FOR SALE

TENDERS FOR DEBENTURES

Tenders will be received up to 2 o'clock p.m. on Friday, 24th November, 1916, for \$42,000.00 debentures of the County of Bruce. Debentures are issued for Patriotic purposes, payable in ten annual instalments. Interest 5½%. Principal and interest payable 20th December each year at Bank of Commerce, Walkerton. Coupons attached. Equalized assessment of County \$28,192,131.00. Debenture debt \$202,039.39, including this issue. Delivery to be accepted and payment to be made at Walkerton on delivery of debentures on December 20th, 1916.

Tenders will be opened at County Treasurer's office, Walkerton, on Friday, November 24th, 1916, at 2 p.m. Tenders to be marked "Tender for debenture," and addressed to
NORMAN ROBERTSON,
County Treasurer, Walkerton.

TOWN OF PEMBROKE DEBENTURES FOR SALE

\$68,500.00 5% Bonds issued for Public School purposes payable in thirty annual instalments of \$4,456.00 each on October fourth.

Offers for the purchase of the above debentures will be received up to Monday evening, 26th November, 1916, addressed to W. R. Beatty, Chairman of Finance Committee, delivery here.

A. J. FORTIER,

Town Clerk.

CANADA AND THE LYONS FAIR

Mr. R. J. Younge, joint general manager of the Export Association of Canada, has addressed a letter to members of the association, drawing their attention to the fact that arrangements are already being made for the Lyons fair, which is to be held on March 1st to 15th next year. "The main object of this fair," Mr. Younge writes, "is to replace the Leipsic fair. It was held for the first time in March of this year, and, although organized on short notice, was most successful, exhibits being displayed from 1,342 firms, and actual orders booked amounting to 52,000,000 francs. Fourteen members of this association exhibited this year, and a number of them have already received orders and inquiries." The association will endeavor to place and superintend exhibits for its members next year as it did this year. Intending exhibitors should have their samples, catalogues, photographs, etc., ready to be shipped by January 1st. It is hoped that a good number of representative Canadian firms "will take advantage of this opportunity, as there is a demand for many kinds of goods in France, and the French people are favorably disposed to the purchase of Canadian products." Considerable success attended the Canadian exhibits this year in spite of the fact that they were very hurriedly put together. Inquiries still continue to arrive at the London office of the association. There is, therefore, reason to expect a greater measure of inquiries and orders from next year's exhibition, since there is ample time to prepare for it.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Owen Sound, Ont.—Owen Sound Fruit Company's evaporator plant. Loss, \$700.

South Woodslee, Ont.—November 5—Mr. L. George's store; partially insured.

Sydney, N.S.—November 2—Crowells, Limited's, store, 598 Victoria Road; Messrs. A. McLean and Company's store. Loss, \$50,000. Siderski block. Loss, \$4,000. Insurance on the above premises were as follows: A. Siderski building, \$20,000; J. E. Burchell, Falconer building, \$20,000; Green Lantern, \$5,200; Macdonald Bros., merchandise, \$20,000; M. Spinner, \$5,000; T. P. McCartney, bowling alley, \$2,500; Don McKinnon, job printing plant, \$3,000; Crowells, Limited, pier, building and stock \$20,000; A. McLean and Company, pier, building and stock, \$7,000. There was no insurance on the stock or effects of the Vail Tea Room.

Tillsonburg, Ont.—November 2—Miss M. McIntyre's residence, Rolph and Baldwin Streets. Loss, \$800. Cause, children and matches. Mr. G. A. Round's crops, implements, etc., five miles east of Tillsonburg. Loss, \$3,000.

Truro, N.S.—November 3—Kent building. Loss, \$30,000; insurance, \$20,000. Occupants: Messrs. F. C. Layton, dry goods; A. G. Blomquist, tailor; Allan McLellan, tailor; the Rogers Novelty Company, Prof. Williards' music store, Drs. Allan and Randall, dentists. The total loss will exceed \$40,000. The total insurance is \$20,000. The origin of the fire is unknown.

Windham Centre, Ont.—November 6—Mr. W. Grey's residence, one mile north of Windham Centre. Loss, \$4,000.

Windsor, Ont.—November 2—Messrs. W. Smith, W. White and A. Bloomfield's residences, Highland Avenue. Loss, \$5,000. Cause, defective chimney.

Wingham, Ont.—November 2—Mr. S. King's barn, 4th concession, Turnbury. Loss, \$3,000. Cause, lightning.

DEVELOPMENT OF CANADA'S STEEL INDUSTRY

"General Canadian industrial development has built up an increasing market for iron and steel. It has called for the building of railways which has always resulted in an increase in the Canadian iron and steel industry. It has resulted in the discovery of ores of considerable importance and it has found the labor supply and the capital necessary for large industrial undertakings. These minor phases of Canadian development are themselves interrelated. The whole process of Canadian economic organization goes far to explain the recent development of the iron and steel industry. Meanwhile the fact that the industry is so intimately connected with every phase of Canadian economic life suggests the condition of success, and demands that a wise commercial policy in respect to iron and steel shall not retard any phase of that Canadian future which seems so promising."

In these words Dr. W. J. A. Donald concludes his instructive book on "The Canadian Iron and Steel Industry." It is a comprehensive study of the economic history and problems of a leading Canadian industry and makes a substantial contribution to the comparatively few studies of its kind.

The volume is divided into four parts: I. The Economic Background; II. Natural Resources; III. Iron and Steel Industry, 1879-1897; IV. Iron and Steel Industry, 1897-1914. There are several appendices and a bibliography. In view of the outstanding interest in the Canadian iron and steel industry at present, there should be a good demand for the volume.

"The Canadian Iron and Steel Industry." By W. J. A. Donald, Ph.D., McMaster University, Toronto. Price, \$2. Published by McClelland, Goodchild and Stewart, Limited, Toronto.

Seven hundred issues of stocks and bonds including Canadian government, provincial, municipal and railway securities were deposited as collateral for the \$300,000,000 British government loan in New York.

NEW INCORPORATIONS

Forty-eight Charters Granted Including Reorganizations, Etc.—Total Capitalization, \$16,845,000

Canada's new companies incorporated this week number 48. The head offices of these companies are located in seven provinces. The total capitalization amounts to \$16,845,000.

The largest companies are:—

Brompton Pulp and Paper Company, Limited.... \$9,000,000
Dodge Manufacturing Company, Limited 1,500,000
Hamilton Steel Wheel Company, Limited 2,000,000
The Sunshine Mining Company, Limited 1,500,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	15	\$ 4,691,000
Quebec	12	9,969,000
British Columbia	8	195,000
Alberta	7	210,000
Manitoba	4	1,625,000
Nova Scotia	1	40,000
Prince Edward Island	1	115,000
	48	\$16,845,000

The following is a list of charters granted during this week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Montreal, Que.—James McDonnell Company, Limited, \$49,000. W. A. Lyons, T. F. Lyons, E. O. Dion; J. W. Scales, Limited, \$500,000. F. G. Bush, G. R. Drennan G. Yeoman; Brompton Pulp and Paper Company, Limited, \$8,000,000. P. Charbonneau, A. M. Murray, R. E. Allan; Samara Pulp Company, Limited, \$25,000. A. R. Holden, P. A. Badeaux, A. Charters; La Cie Internationales des Beaux-Arts, Limitée, \$25,000. J. B. Taylor, J. A. Engel, M. Bernfeld; Laporte-Irwin, Limited, \$25,000. L. Macfarlane, J. G. Cartwright, W. B. Scott; Dominion Boiler and Foundry Company, Limited, \$200,000. C. W. Webb, F. E. Lauer, J. H. Charbonneau; Canada Realty, Limited, \$10,000. L. Fitch, E. W. Morrison, I. Friedman; Lymburner Brass Works, Incorporated, \$50,000. F. X. Biron, F. Callaghan, A. Tracey; Reliance Investments, Limited, \$20,000. J. P. Rice, M. A. Owens, H. H. Field; Franham Realty Company, Limited, \$45,000. A. R. W. Plisoll, R. Brodeur, A. Chouinard; Atlas Securities, Limited, \$20,000. A. H. Tanner, B. Melancon, J. P. Lamarche.

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

A Good Living Wage
A Profitable Future
A Provision For Old Age

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policy-holders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

*NOTE.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending Sept., 1916, were: imports 1916, \$50,608,343; 1915, \$107,185,428, and exports 1916, \$275,552,035; 1915, \$94,628,533. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

PRIVATE V. GOVERNMENT OWNERSHIP

Democracies Fail Efficiently to Manage Government-Owned Businesses, Says Editor

"The mileage of railways owned and managed by private companies is still more than twice as great as that owned and operated by governments. In 1913, the latest year for which we have complete statistics, there were in the world 690,133 miles of railway. Of this, 464,421 miles, or 67 per cent., belonged to private companies, and only 225,712 miles, or 33 per cent., belonged to governments," said Mr. S. O. Dunn, Chicago editor of the Railway Age Gazette.

"There are," he continued, "over 305,000 miles of railway in North America, and of this more than 290,000 miles, or over 95 per cent., is privately owned and operated. In all the world outside of North America there are 385,000 miles, and of this, 211,147 miles, or 55 per cent., is owned by governments, while 174,000 miles, or 45 per cent., is owned by private companies. It will be seen, therefore, that the mileage in North America which is privately owned and operated exceeds the total mileage owned by governments in all the world, while even outside of North America almost one-half the mileage is owned and operated by private companies.

Not on Business Principles.

"Whether a business is owned and managed by a corporation or owned and managed by the public, the owners, in order that it may be run successfully, must choose and retain managers solely because of their special fitness for their duties. Few democracies have ever shown an effective disposition to have business concerns owned by themselves organized, officered and managed in that way; and until they do show such a disposition it is folly to expect them to manage railways and other great industrial enterprises efficiently and beneficently.

"Political considerations tend to cause lines to be built and improvements to be made where they are not most needed to promote the economic welfare of the country. They cause men to be taken into, retained and advanced in the service largely regardless of their merits. They cause a greater number of men to be employed than are actually needed. They sometimes cause contracts to be let and purchases to be made which would not be countenanced if business principles alone prevailed.

"The conclusion necessarily suggested is that, under democratic conditions at least, state railways are less likely to be efficiently and economically developed and operated than private railways.

"One thing, however, which may be conclusively demonstrated is that, while private railways invariably are required to pay taxes to the public, the usual rule as to state railways is that taxes have to be collected from the public to make up deficits which they incur.

Rates and Uneconomical Management.

"One of the extreme examples of this kind is afforded by the Canadian Intercolonial Railway. During the years from 1867 to 1914 the Intercolonial failed by \$9,600,000 to earn even its fair operating expenses. In 1914 the property was carried on the books at a cost of \$103,431,000. An estimate on the basis that it ought to earn operating expenses and 4 per cent. on actual investment showed that up to 1914, including the actual investment in the road and the total losses it had incurred, the road had cost the people of Canada over \$348,000,000. Assuming that it is actually worth to-day the cost at which it is carried on the books, its total cost to the taxpayers of Canada has been \$245,000,000 more than its present value. These losses have been partly due to the lowness of its rates and partly to its uneconomical management."

"The point at issue in counselling for permanent peace amongst nations is, first of all, that each nation must agree to abolish the metallic standard for its circulating medium of exchange (money), and substitute in its place the nation's productive resources upon which to issue its medium of exchange, and this to be issued, handled and controlled exclusively by the respective nations at cost of operation only. International exchange must be liquidated by commodities only. A nation's I.O.U. to another nation must hold good till the commodities are produced, or the I.O.U. liquidated through the international clearing house of the nations," states Mr. O. J. Wigen, Wynndel, B.C., in a lengthy letter to the press on "The Nations' Rebirth after the War."

The Canadian Iron and Steel Industry

By W. J. A. DONALD, Ph.D.
(McMaster University)

THE Canadian iron and steel industries have been built up largely by means of tariffs and the granting of bounties. Hence in the treatment of his main theme, the author has ample opportunity to analyze the working of these methods and their effect on Canadian politics and commercial expansion. The result is an important contribution to the general economic history of Canada.

World Banking and the Great War

HOW the Struggle Has Affected Canada's Bank Figures—Survey of the Effects of European Hostilities Upon World's Greatest Financial Institutions—Note Circulation and Gold Holdings—Measures Adopted to Meet Changes.

WHAT has been the influence of the European war upon the assets and liabilities of Canada's banks? The figures from the statements of the twenty-two chartered banks compare as follow:—

	Aug. 31, 1916.	June 30, 1914.	Inc. or dec.
	\$	\$	\$
LIABILITIES.			
Capital	113,019,000	114,812,000	— 1,793,000
Reserve	113,023,000	113,369,000	— 346,000
Total	226,042,000	228,181,000	— 2,139,000
Notes	122,656,000	99,138,000	+ 23,518,000
Bills payable	3,553,000	20,096,000	— 16,543,000
Acceptances	9,786,000	11,505,000	— 1,719,000
Deposits—			
Dominion and provincial govern- ments	36,019,000	44,454,000	— 8,435,000
Private in Canada	1,250,092,000	1,026,525,000	+ 223,567,000
" elsewhere	140,789,000	103,062,000	+ 37,727,000
Due to banks abroad	14,211,000	8,934,000	+ 5,277,000
" " in United Kingdom	4,749,000	15,623,000	— 10,874,000
Total deposits	1,445,860,000	1,198,598,000	+ 247,262,000
Miscellaneous	3,884,000	1,152,000	+ 2,732,000
Profit balance	29,116,000	16,638,000	+ 12,478,000
Total	1,840,896,000	1,575,308,000	+ 265,588,000
ASSETS.			
	\$	\$	\$
Cash in hand, etc.—			
Gold and other coin	65,062,000	46,100,000	+ 19,852,000
Dominion notes	137,914,000	92,114,000	+ 45,799,000
Other cash resources	194,858,000	133,455,000	+ 61,403,000
Total cash	397,834,000	271,678,000	+ 126,156,000
Money at call, etc.	257,731,000	204,521,000	+ 53,210,000
Total in hand and at call	655,565,000	476,199,000	+ 179,366,000
Investments	253,657,000	102,444,000	+ 151,213,000
Loans and advances	862,172,000	931,104,000	— 68,932,000
Acceptances	9,786,000	11,505,000	— 1,719,000
Miscellaneous	2,472,000	3,735,000	— 1,263,000
Bank premises	56,345,000	50,421,000	+ 5,924,000
Total	1,840,896,000	1,575,308,000	+ 265,588,000

The changes in these figures have a significance which extends beyond the Dominion into the sphere of world banking and of which The Statist, of London, has made an interesting survey. Discussing the effects of the European war, in part that journal says:—

As soon as the war broke out, all the belligerent countries, with the exception of the United Kingdom, suspended specie payments, from which it is very plain that the principles on which the currency and banking systems of those several countries were based did not stand the strain of a great rupture of international relations; and that, consequently, as soon as peace returns there will need to be a complete revision and reform

of the systems themselves. The suspension of specie payments is more remarkable in the case of Germany than in that of any other country, for, in the first place, it will be in the recollection of our readers that, during the crisis caused by the Agadir incident, the German bankers sent a deputation to the German government pointing out that at the moment the empire was not prepared for hostilities, and that grave consequences would ensue if war were insisted upon. It will further be recollected that, in consequence of this representation, the German government abated its demands upon France and patched up the controversy. Immediately afterwards, the president of the Reichsbank announced that he would make a very large addition to the gold holdings of his institution; and, as a matter of fact, he did proceed to add over 20 millions sterling to those holdings. Moreover, it will not be forgotten that the German Imperial Bank was a conversion, after the war of 1870, of the old Bank of Prussia, and that it was constructed with a view to bear the strain of a formidable conflict. Germany having won three successive wars within the short space of six years, and having, besides, exacted territorial aggrandizement as well as a large indemnity from France, set herself almost immediately to prepare for another series of attacks upon her neighbors which should make her the dominant power by sea and land. The Reichsbank, therefore, was purposely framed, firstly, to promote as quickly and as successfully as possible the economic pre-eminence of the empire; and, secondly, to bear the strain of further conflicts, however serious they might be. In other words, it was generally assumed that Germany had elaborated a plan which, in her opinion, would enable her successfully to bear the brunt of the coming struggle with the principal great powers. Yet, as soon as she made up her mind to enter upon this great conflict, she suspended specie payments. From which it seems to be the inevitable inference that she hoped to strike down France and compel her to accept any terms Germany proposed within a very few months, if not weeks, and that she also anticipated that Russia would be able to offer to her no serious or prolonged resistance. The inevitable conclusion seems to be that she expected in the course of a single year to have won such successes over France and Russia that practically she would be the mistress of Europe, and secure for herself the road to India. In that hope, she added largely to her gold holdings, as already said. Apparently, also, she induced the Austro-Hungarian Bank to hand over a

large part, at least, of its gold holdings; and she used all her influence with her subjects to strengthen the position of the Reichsbank. As a matter of fact, the gold holdings of the Reichsbank, according to the official publications issued weekly, now even after two years and two months of hostilities, amount to as much as £124,647,000.

While everybody was prepared to find that Germany would make a strong effort to maintain specie payments during the course of hostilities, nobody anticipated that Austria-Hungary could do so. It is only a very few years, as our readers may remember, since Austria-Hungary resumed specie payments. And the resumption has been to a great extent more nominal than real. The management of the Austro-Hungarian Bank has unquestionably been very able. It is also beyond dispute that the empire has economically made much progress during the past quarter of a century. Owing to these circumstances she has been able, therefore, to resume specie payments and to maintain them even while she was engaged in a course of international conduct which brought her frequently into collision with Russia, and from time to time threatened serious disturbance of the peace. Nevertheless, it was notorious to all competent observers that a great war would compel the suspension of specie payments; and, therefore, it is not surprising to find that as soon as hostilities began specie payments were suspended. Nor need anybody be surprised that the Austro-Hungarian Bank stopped the publication of official reports; and that, as a matter of fact, it is not known to-day whether that

institution which enjoyed the complete confidence of the whole people. Therefore, they were aware that the notes of the Bank of France would immediately take the place of the ordinary currency, and that the only serious difficulty that would follow would be the inability to pay for all imports from abroad as and when required. They counted the cost, decided that it was wisest to do at once what in all probability would have to be done sooner or later; and the course of the struggle shows that they were wise. The Bank of France has contributed over 330 millions sterling to the actual cost of the war. It has, moreover, supplied the country with a circulation with which the people are completely satisfied; and it has shown a calmness, a judgment, and an ability in doing all this which excite the admiration of all competent judges. It was a matter of course that Belgium and Serbia should follow the example of France. Furthermore, what France, so rich and so economically advanced, did without delay both Russia and Italy decided it would be wise for them also to imitate. The note circulation of the Reichsbank, the Bank of England, the Imperial Bank of Russia, the Bank of France, and the Bank of Italy immediately before the outbreak of hostilities and at the latest date are shown in the following table, figures which will at once make clear to the reader the effect the war has had in increasing the note circulation of those institutions, and how completely the measures adopted have sufficed to meet the circumstances; and, secondly, the gold holdings just before the outbreak of hostilities and at present:

institution holds any gold at all, and, if any, how much. The empire has practically abdicated its position as a great power, and become little better than an annexe of Germany. Respecting Turkey and Bulgaria, it is hardly necessary to waste space. They are mere puppets in the hands of Germany and they dance to the German tune.

Turning, in the next place, to the Entente Powers. It is proof of the calm confidence with which France entered upon the struggle which was to determine whether she was to cease to be a great power, or was to resume the leading position which she has filled so long to the benefit of the world, that she suspended specie payments immediately. Her public and her bankers were thoroughly aware of the consequences that would ensue. But they also recognized that their allies were not in a position to send to their assistance at once such armed forces as would prevent a serious invasion of their territory. Therefore, they calmly calculated that France would be to a certain extent overrun; and, as they were not even sure that they could protect Paris against a siege, they thought—and we think every competent person will agree with us in adding that they thought rightly—that their most judicious course was to suspend specie payments without a moment's delay. They were happy in this, that in the Bank of France they possessed an

reader the effect upon these great institutions of hostilities which have already lasted over two years:—

COMPENSATION INSURANCE COST UNKNOWN

That is So in State Assessment Schemes—Companies Sell Insurance at Stated Price

The Alberta government may follow the example of Ontario, Manitoba and British Columbia in regard to a workmen's compensation act. The insurance companies, naturally, will do their best to induce the government to adopt the same plan as under the Manitoba act. In British Columbia, the matter is still under discussion, and it appears likely that the insurance companies will be allowed to do business, as they should do. If British Columbia follows Manitoba, Alberta may follow the lead. In view of the experience of the state of Washington and the state of New York—the former showing a deficit up to the last fiscal year of \$500,000, and the latter passing its dividend—the provincial governments throughout Canada have food for reflection in the matter of adopting state workmen's compensation schemes and shutting out the insurance companies. There is no legitimate reason for taking away the business from the insurance companies. Their rates for Manitoba will be, on the whole, lower than those charged in the province of Ontario and the Manitoba act is similar in all respects to the Ontario one, with the exception that provision is made for medical and hospital attendances up to \$100 in any one case. In Ontario, no provision is made for these attendances.

Insurance Companies' Position.

In an interview with *The Monetary Times* this week, Mr. C. W. I. Woodland, general manager for Canada of the Employers' Liability Assurance Corporation, Limited, of London, England, said:—

"The insurance companies have frankly stated their position in respect to writing the business. They ask for a commission to see that the act is properly administered. They invite the commissioner to pass on their rates. The Manitoba Manufacturers' Association passed on the rates as being entirely satisfactory. The insurance companies invite the government or commissioner to limit the commissions paid to agents. They offer to put up any necessary deposits for the protection of the injured workmen and for the faithful performance of the insurance companies' contracts. They invite the government to dictate the form of policy they shall write, and they invite the infliction of penalties should any company fail to fulfil entirely its contract in covering under the act.

"The insurance companies properly contend that settlements made by them will be more prompt and satisfactory than through a state fund. The companies are keen for business and dependent upon service to build up and hold business. They maintain that business can be done more cheaply by them. Their overhead charges will be less than those of the workmen's compensation board. Their agents are never paid for settling claims and are only too anxious to give their services gratis in order to keep in touch with policyholders, thus fostering good business relations, leading to other lines of insurance, such as fire, accident, sickness, guarantee, etc.

Knows the Cost.

"In addition to the working man being paid every dollar to which he is entitled and being free from litigation, the employer is in a position to buy his insurance in the cheapest market. He pays a rate that is fixed for the full year's term of his policy. The loss ratio may run up 500 per cent. for one particular employer and still his rate is not affected. He knows what he is buying and how much he is paying for his insurance. Under the state scheme (the assessment system) the employer never knows what his insurance is going to cost and liabilities for deferred payments fall back on the group in which an employer may be classed, should one-half of the group at any time go out of business. There is no hold on the employer that goes into liquidation or winds up his business for any deferred liabilities, even though possibly 50 per cent. of such liabilities may have resulted on account of accidents happening in connection with his own business."

The Bank of Nova Scotia has opened a branch at Burges, Nfld., under the management of Mr. F. Davis.

FRATERNAL ORGANIZATIONS TO REPORT

All fraternal organizations reporting to the Ontario government are required to make official actuarial certified statements as to their positions to the government on January 1st next. Upon these statements the government's action is to be based. Such societies as were shown to be actuarially insolvent would have three years in which to improve their financial position. Such as were then in a weak position would have to be dealt with on definite lines.

SELLING SILVER FOX PELTS

If each individual fox breeder and company ship independently, the fur sales board of the Silver Black Fox Breeders' Association of Prince Edward Island believe the sum total received for pelts will be far below the total if the collection were marketed through a central organization. The association offers the following plan: They will start at once to ascertain from ranchers the number of pelts they plan to market. They will take from all who wish the fur sales board to market their pelts pledges that they will hand in their pelts to the fur sales board as soon as the collection is complete, and will have pelts graded, matched, and an estimate of value placed on each pelt. They will then have offers submitted by parties wishing to purchase for cash large lots of skins, and accept or reject these offers. They plan then to apportion to several large dealers of the highest standing the collection of skins, reserving the right to take from these lots, if unsold, pelts to fill any large orders they may sell. The fur sales board already have offers from several large houses, who have stated that they can handle from 100 to 200 skins each.

COLLATERAL FOR BRITISH LOANS

Messrs. J. P. Morgan and Company have issued the list of United States securities that have been deposited as collateral for the \$300,000,000 three and five-year 5½ per cent. secured loan of the United Kingdom of Great Britain and Ireland. The list comprises about 700 issues of stocks and bonds of railroad and industrial companies, including obligations of the Canadian Pacific Railway.

The value of the securities is in excess of \$100,000,000, and forms only a part of the collateral deposited as security for the loan, the remainder consisting of bonds of the Dominion of Canada, the colony of Newfoundland, Canadian provinces and municipalities, the Commonwealth of Australia, Union of South Africa, New Zealand, Argentina, Chile, Cuba, Japan, Egypt and India, and approximately \$25,000,000 value in bonds of dividend-paying British railway companies.

Divided roughly, the list consists of 54 railroad stock issues, 74 issues of shares of industrial companies, about 550 railroad and industrial bonds, and four classes of obligations of the Canadian Pacific Railway.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Bobcaygeon, Ont.—November 20—Mrs. McQuade's millinery store, small insurance; Miss Cross's dressmaking rooms; Mr. Warren's flour and feed store.

Brockville, Ont.—November 16—Stables in fair grounds. Loss, \$1,000. Insurance, \$500.

Chatham, Ont.—November 5—Dominion Pulp Company's sulphur shed and three box cars.

Dereham Twp., Ont.—November 13—Mr. B. Nancekivell's farm. Loss, \$4,000. Fire originated in dust and bran.

Fredericton, N.B.—November 13—W. K. Howard's automobile. Loss, \$4,000. Insurance, \$800.

Galt, Ont.—November 21—Basement of Woolworth Company's store.

Moncton, N.B.—November 14—Canadian Pacific Railway round house, Albert Street. Loss slight.

New Aberdeen, N.S.—November 14—Public school. Loss, \$12,000. Completely destroyed; manse of Warden Church. Loss, \$1,000; and three cottages of Dominion Coal Company.

Port Arthur, Ont.—November 10—Broughton Block interior and stores.

Ridgetown, Ont.—November 11—Mr. A. McBrayne's barn and sheds. Loss, \$2,200. Insurance, \$1,350.

St. Stephen, N.B.—November 12—Miss A. Thompson's tenement house. Loss, \$2,000.

Tillsonburg, Ont.—November 14—Mr. B. Bird's farm. Loss, \$5,000. Insurance, \$2,000.

Timmins, Ont.—November 20—Mr. C. See's drug store. Loss slight. Insured; rear of Mr. M. Ecclestone's hardware store.

Toronto, Ont.—November 12—Mrs. C. Crowe's bathing-houses. Loss, \$1,000. Cause, supposed incendiary.

November 15—Adams Brothers' Harness Manufacturing Company's factory. Loss, \$100,000; fully covered by insurance.

November 16—Mr. C. A. Risk's residence, 640 Hanlan's Point. Loss, \$8,000.

November 20—Mr. A. Barnes' residence, 299 Gardeners' Lane. Loss, \$900; coal chutes, West Toronto. Loss, structure, \$700, contents, \$500; Imperial Varnish Company, 8 Morris Street. Loss, building, \$500, contents, \$3,000.

November 22—Nos. 3, 5, 7, 9 and 11 Caer Howell Street. Loss, \$1,000. Cause, overheated furnace; fifteen boats, two boathouses and several cars of baled hay. Loss, \$30,000.

Vancouver, B.C.—November 15—"Waimarino," of the Dominion Steamship Company of New Zealand. Loss, \$20,000. Cause, spontaneous combustion in a shipment of copra.

Wallachin, B.C.—November 4—Mr. Snell's barn. Loss, \$600.

White Sulphur, B.C.—November 11—Riverside Lumber Company's mill. Loss, \$60,000.

Winnipeg, Man.—November 18—Borbridges Harness Company's warehouse. Loss, building, \$10,000; contents, \$75,000. Insurance, building, \$20,000; contents, \$40,000.

CANADIAN DEBENTURES PAYABLE IN BRITAIN AND CANADA

In the article on mortgage corporation debentures appearing on page 26 of *The Monetary Times* of October 27th, the total debentures payable in Canada in 1913 was given as \$64,490,240, and payable in Great Britain and elsewhere as \$95,534,720. These figures were taken from the official blue book, in which book it has now been discovered there was an important error. The figures should read for that year: Debentures payable in Canada, \$25,159,650; debentures payable in Great Britain and elsewhere, \$96,059,466. The government officer in charge of the compilation of these figures states that an item of \$39,330,589 appears in the summary of the official report under the wrong heading, thus causing the error.

REORGANIZATION OF MEXICAN GROUP

Mr. R. C. Brown Elected President—Mr. E. R. Peacock Appointed Director to Represent Bondholders

Mr. R. C. Brown, one of the vice-presidents of the Mexico Tramways Company, the Mexican Light and Power Company, and the Mexican Electric Light Company, at board meetings this week, was elected president of these companies in the place of the late Dr. Pearson. Mr. E. R. Peacock, the chairman of the London committee, was appointed a director as representing the bondholders, and Mr. G. T. Clarkson, who is the receiver of the Mexican Light and Power Company, Limited, also joined the boards. Mr. R. H. Merry appointed secretary in place of Mr. U. de B. Daly, resigned.

It will be recalled that meetings of the bondholders of the companies were held in London on October 4th and 5th last, when resolutions were passed whereby provision was made that the control of these companies' affairs should be vested in the bondholders through the committee appointed in London, and that until otherwise determined the management should be permitted to remain in the hands of the directors.

Power to Raise Funds.

At these meetings, Sir Alexander Roger presided and said that power was given under the resolutions to raise a limited sum of money if it should become necessary. This was merely asking for powers which, in similar circumstances, would be given by the courts to a receiver. The necessity for raising money, fortunately, had not yet arisen, but it was obviously desirable to have the powers in existence. The policy laid down was purely a temporary expedient to bridge over the present time of difficult conditions in Mexico. If and when it became necessary to legislate for any reorganization of an individual company or of the group of companies the bondholders would be called together for the purpose of considering the proposals. Meanwhile, a single committee, equipped with the necessary powers, should be in existence to deal with day-to-day difficulties.

Of the total amount of bonds—namely, £12,330,371, £9,268,555 have been lodged in support of the committee and more than sufficient support has been given in each of the companies concerned. The balance of undeposited bonds is largely held on the Continent and is without facilities for depositing them. Sir Alexander stated also that since July affairs in Mexico had not improved, and it seemed unlikely that any permanent stability would be reached, unless some form of intervention and financial control comes about. During August and September the companies had many difficulties to contend with, and demands for increased pay in the power company had been difficult of settlement.

Unrest in Mexico.

In May, 1915, the directors of the Mexico Tramways Company issued a circular to the bondholders and shareholders explaining the difficulties caused by the conditions of unrest in Mexico. They stated that the working of the tramways had been arbitrarily taken over by the military authorities, with consequent complete cessation of revenue to the company and deterioration of installation and rolling stock; that the receipts of the light and power companies had seriously diminished, owing largely to non-payment by the authorities of bills for street lighting and power; that the business of the company operating in the Pachuca district had greatly decreased on the shutting down of many of the mines, and that so large an amount of paper money had been issued by each new authority, that the value of the Mexican dollar had fallen from 25d. to 5d., making remittances almost impossible. It was then emphasized that the difficulties of this group of companies arose from the political situation in Mexico, and until this became more settled, it would not be possible to resume the business of these companies on a profitable basis. Several of the coupons due for payment by these companies under these conditions, naturally have not been met.

Mr. E. R. Peacock, one of the new directors representing the bondholders, was in Canada a few weeks ago in connection with the reorganization of the Mexican group, but recently returned to England.

HARMING CREDIT

Much has been heard about the moratorium in Alberta for volunteers and reservists. In dealing with a recent case under the act, Mr. Justice Walsh described it as "a flagrantly dishonest attempt to crawl in under the provisions" of what he described as "a much abused act." The judgment is reported in detail on another page. The Western legislatures are beginning to realize the serious effect which vicious legislation is having upon the credit of the Western provinces.

SINKING FUNDS AND MORTGAGES

Since the Saskatchewan legislature required that the approval of the provincial local government board be obtained to the investment of sinking funds, investments have been made only in debentures and Dominion war loan bonds. Several applications were received by that board for investment in mortgages where the property to be taken as security was situated within the area of the municipality applying. In such cases the approval of the board was refused, partly on account of the fact that the board does not look with favor on the investment by municipalities in mortgage securities within the limits of the municipality itself. It is satisfactory to note that the local government board of Saskatchewan has taken this strong and proper stand. They have found that, just as in other provinces, when such investments are allowed, and the time has arrived when mortgage companies would institute foreclosure proceedings to protect the security, local pressure is brought upon councils in favor of the mortgagee and proceedings are frequently withheld to the detriment of the investment; when the property is beyond the area of the municipality their experience is this difficulty does not arise.

Even when the property is outside a municipal area, civic authorities should exercise the greatest caution in regard to the investment of sinking funds.

NICKEL

In the discussion this week respecting the destination of Canadian nickel, the statement was made that the International Nickel Company's export agents in London are an enemy firm. One important fact has been overlooked. Some weeks ago, the firm in question applied to the British government for reinstatement on the ground that the German interest is now eliminated. One may safely assume, therefore, that the Imperial government is apprised of the facts of which so much fuss has been made here during the past few days.

Again, if the British authorities are dissatisfied with the precautions taken here, they will naturally suggest any changes they deem desirable. The Dominion and Ontario governments would in that event continue to co-operate in this matter, as they have in others for the successful conduct of the war.

"SOUND ASLEEP"

Plans should be made here now for the period to follow the war. Governments and individuals should not wait until that time comes. Then, as Sir George Foster said at the Toronto Empire Club, "in the confusion and in the maze of worrying, disappointed, dislocated activities which will busy us at that time are we to sit down and in that guise and under those circumstances try and work out what we shall do for the future?"

Sir George has expressed the position, in regard to trade preparations, in the following words: "Let me in all sincerity, in all kindness, but in all truthfulness say that there is not a great country that I know of that is so sound asleep as Canada is to-day in that very particular. I want you to take that in, because I believe it is absolutely true."

That statement is not palatable to a young country, boasting of its initiative, energy, and foresight. But it is a true statement. The prosperity of war may have blinded industrial captains to the necessity of commercial preparation now. If so, it is shortsightedness which will later pay a heavy penalty. An export association, well organized and backed by the Canadian Manufacturers' Association, was formed two years ago. Its appeals for membership have brought about a hundred of the many thousands of our manufacturers. The national business conference, planned months ago by the department of trade, has not materialized, partly because of the apathy of business men.

Sir George Foster has a clear vision of what a difficult period will be met after the war. He has pictured probable conditions for the benefit of trade and commerce. His address must be followed by action and that is the duty of both governments and business men. Some, but not much, has been done.

If the department of trade has the foresight and business men are too occupied to gain it, that department should take the initiative. Of all government departments, trade and commerce should not at this time stint well-planned expenditures. A dollar saved in trade preparation to-day may mean the loss of thousands of dollars of trade later. Let our trade department, which has already done important work, go further. Let it set the machinery in motion so that Canada will have well-matured plans to put into action when peace comes. "Canada is sound asleep," says Sir George Foster. Who will apply the practical prod?

AFTER THE WAR

If the war goes on until August next it will have cost \$75,000,000,000. These figures assume that after hostilities have ceased, full expenditure will continue for a further period. This is a possible factor in the early days of peace, to which little attention has been given. When the truce is called, armies will probably be kept in the field pending the negotiation and ratification of the definite peace treaty and for clearing up after the hostilities.

While this condition may prove helpful in the adjustment from war to peace it must not be exaggerated as a favorable factor. When war stops, the placing of new

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

No part of the moneys at the credit of the sinking funds may be invested in any securities, whether by the municipal council itself or by sinking fund trustees, without the previous approval of the Saskatchewan board.

It is the practice of the board to have all such applications submitted to it in detail. Where an investment is to be made in debentures the board insists upon obtaining full information concerning such debentures and the price at which the same are to be purchased, in order that the yield to the sinking fund may be ascertained. Care is also taken in selecting securities which have maturity dates suitable to each particular sinking fund. If payments are to be made out of the fund within a comparatively short period, then short-term securities are required; if no such demand will be made upon the fund for a considerable length of time then longer term securities may be purchased; the object being that purchases of securities for the sinking fund should be made with a view to permanent rather than temporary investments, in order that money and not merely securities may be at the disposal of municipal officials when such is required; otherwise those in charge of sinking funds may be forced upon the market at inopportune times with securities upon the sale of which loss may be sustained.

In Saskatchewan the sinking fund may be invested in any stock debentures or securities of the government of Canada; any debentures or securities the payment of which is guaranteed by the government of Canada or of any province of Canada; the debentures of any municipality; school debentures or in debentures issued under the Rural Telephone Act; in local improvement or other debentures of the municipality concerned; or in first mortgage of freehold real estate to an amount not exceeding one-third of the sworn cash valuation of an independent appraiser.

The board has suggested to those administering the various sinking funds that the investments should not be restricted to one class of the above securities only, but should be in various classes, not centred in one locality, but spread over a considerable area. The board does not look with favor on the investment by municipalities in mortgages within the limits of the municipality itself.

In referring to the levy and collection of money for the sinking fund, a direct appeal is made to chartered accountants who have undertaken the task of auditing the accounts of municipalities to take a firmer stand in future than has been taken in the past. In some cases there is a tendency to make little or no reference to the manner in which money, levied and collected for this fund, has been applied. In most municipal acts provision is made that any moneys levied and collected for the purpose of a sinking fund shall not be diverted towards paying current or other expenses, and that members of council who vote for such diversion shall be disqualified from holding office and be personally liable for the amount so diverted. Many municipal acts contemplate that such moneys received by the tax collector are paid over to the treasurer who makes the appropriate entries in separate ac-

orders for munitions is likely to stop also, or at least to be greatly minimized. A certain amount of orders then in hand will be completed, but peace will probably give a severe jolt to business and prosperity based as it is on the fact that there is war. Preparation in every department of our national organization for the period to follow the war is the urgent need of the moment.

In a recent interview in London, Lord Shaughnessy said that the subject of trade after the war "is one in which Canada is deeply interested." The Canadian Pacific Railway, with its usual enterprise, long ago instituted investigation and formulated plans for the period to follow the war. Canada, the nation, has as yet allowed the matter to remain at the stage of being "deeply interested," but apparently too proud to think-ahead.

counts to show the financial aspect of the municipal debt. These moneys are earmarked and reach the treasurer as trust funds to be kept separate for the purposes for which they are collected. An eminent judge has expressed the idea of a trust being attached to such moneys as follows: "It is an incident of the money borrowed (part of the contract of lending); it is due to the creditor that so much shall be set aside yearly towards his eventual payment. Its being done adds to his security; its perversion impairs it. Its nature is to create a trust fund, and the municipality is a debtor to the fund year by year as moneys become payable to that fund."

Thorold, Ont.—Tenders for \$36,000 6 per cent. 30-year bonds close on November 30th. D. J. C. Munro, treasurer.

Stratford, Ont.—A by-law to issue \$30,000 bonds for patriotic purposes has been passed by the council.

St. Jean de la Croix, Montreal, Que.—\$180,000 6 per cent. 30-year bonds, to Mr. Rene T. Leclerc, Montreal.

York Township, Ont.—The township council has adopted the proposed waterworks plan, involving a cost of over \$500,000.

Kitchener, Ont.—An issue of \$12,000 5½ per cent. 20-instalment bonds was awarded to Messrs. R. C. Matthews and Company, Toronto.

Ottawa, Ont.—Two by-laws to issue \$125,000 bonds for swimming baths and garbage collection plant are to be voted upon by the taxpayers.

Victoria, B.C.—Any of the city's bonds purchased by the municipality in London, England, are not being resold in New York, but are cancelled outright.

Halifax, N.S.—Tenders close on December 4th for \$130,000 5 per cent. bonds. J. J. Hopewell, city treasurer. (Official advertisement appears on another page.)

Toronto, Ont.—At a meeting of the board of control it was decided to recommend the purchase of the Interurban Electric Company, the city to pay \$25,000 and the provincial hydro-electric system to pay \$50,000.

Pembroke, Ont.—The closing date for bids has been extended to November 27. The issue is \$68,500 5 per cent. 30-instalment bonds. A. J. Fortier, town clerk. (Official advertisement appears on another page.)

Montreal, Que.—The civic requirements for the year amount to \$13,975,438, as compared with \$14,231,492 for 1916, a decrease of \$256,000. A reduction of \$474,000 in salaries is made for the coming year, the figures being \$4,033,000. Interest charges have been increased by \$258,000 and amount to \$5,043,587. Available revenue is \$12,596,798, leaving a deficit of \$1,378,648.

Amherst, N.S.—The town called for tenders up to November 14 for \$24,000 30-year 5 per cent. bonds. They received the following bids:—

Sterling Securities Company, Limited	94.45
Eastern Securities Company, Limited	94
J. C. Mackintosh and Company	92.80
W. F. Mahon and Company	92.56

The town refused to accept any of the tenders, but *The Monetary Times* understands that the bonds have now been

WINNIPEG CITY'S BOND CONVERSION

British Treasury Has Purchased £580,000 of the Securities in London

Mr. H. C. Thompson, city treasurer, and Mayor Waugh, of Winnipeg, have reported to the city council in regard to the city's bond conversion. In response to a request of *The Monetary Times*, city treasurer Thompson has forwarded the following summary of the position:—

"On the completion of arrangements with J. P. Morgan & Company, Right Hon. R. McKenna, chancellor of the exchequer, issued a notice stating that the British treasury were desirous, in connection with the arrangements for regulating the American exchange, to purchase all of the city of Winnipeg 4 per cent. consolidated registered stock, 1940-60, which was at present in the United Kingdom. A copy of his letter was sent by the registrars of the stock (the Bank of Montreal) to all stock holders whose names appeared on the register. As a result the British treasury department have been able to purchase on our behalf £580,000 of this stock. Of this amount the British treasury delivered to our agents, the Bank of Montreal, £564,798 which will be cancelled.

Ten-Year 5 Per Cent. Bonds in New York.

"We have issued in New York sufficient 5 per cent. 10-year bonds to provide funds for buying the stock in London. In so far as it refers to this amount the deal has been completed, leaving £15,202 yet to be delivered. The transaction resulted as follows:—

We have purchased and will cancel city of Winnipeg 1940-60 4 per cent. stock to the amount of £580,000 \$2,822,628.00
We have issued 10-year 5 per cent. debentures, the proceeds of which are to pay for the stock held in London, to the amount of 2,347,340.00

Making a reduction in our debt of... \$ 475,288.00

Our yearly interest on the cancelled stock is.... \$ 112,905.12
Our yearly interest on the new debenture is.... 117,367.00

Making an increased interest charge per year for 10 years of \$ 4,461.88

Share of Increased Selling Price.

"In addition to the above saving we will receive a cheque for approximately \$13,008, being our share of the increased selling price, of the debentures.

"No apprehension need be felt regarding the payment at maturity of the 10-year debentures, as there will be in the hands of the sinking fund trustees at that date, at the credit of the original by-law, available for the payment of the new debentures, considerably more than what the new debentures amount to.

"It will now be in order to apportion this profit so that the ratepayers of to-day will benefit instead of allowing the saving to stand until the new debentures are paid off."

RIORDON COMPANY BUYS PLANT

The Riordon Pulp & Paper Company, Limited, this week completed the purchase of a majority of the capital stock of the Ticonderoga Pulp & Paper Company, Ticonderoga, N.Y.

SENECA SUPERIOR DIVIDEND

The Seneca Superior Silver Mines, Limited, so far this year has paid 120 per cent. on capital stock or \$574,661.60 in cash. The company is holding a meeting on Monday, when possibly a small dividend will be declared.

HELPS FOR CALCULATORS

Exchange, interest and finance, stocks and bonds, etc., showing fractions with their decimal equivalents by advances of 1/64, and interest on the unit from 1/4 to 7 per cent., both for dollars and for sterling at current rates and par of exchange, are dealt with in a practical series of cards issued by a well-known Canadian foreign exchange expert; also quick ways of calculating interest and reductions of shillings and pence into decimals of £1, and vice versa, arbitrage in stocks and shares between London and New York, etc.

The cards are bound so that they can be spread out in a sheet or folded up in book form, and are useful to brokers, bond dealers, stock brokers, and exporters and importers generally.

Ready Reckoner Cards, by F. L. Appleby, manager foreign exchange department, Union Bank of Canada, Toronto. Price, 50 cents.

PERSONAL NOTES

Hon. J. S. Duff, Ontario's well-known minister of agriculture, died last week at Alliston, Ont.

Mr. E. J. Kneitl has been made district manager for the North American Life at Kitchener, Ont.

Sir Henry Pellatt, Toronto, and Mr. B. F. Ackerman, Peterboro', have joined the board of the Security Life Insurance Company.

Mr. W. B. Collins, Muskogee, Arkansas, has been appointed by the Imperial Life Assurance Company as its branch manager at Brantford, Ont.

Mr. F. G. Daniels, general manager of the Dominion Textile Company, has been elected a director of that company, in succession to the late Mr. G. A. Grier.

Mr. W. D. McCallum, manager of the Manitoba agency of the Sun Life Insurance Company of Canada, is leaving Canada to assume the position of manager over the China and Manchuria territory of that company.

Mr. William Wallace, formerly managing director of the Crown Life Assurance Company, has been appointed by the Confederation Life Association inspector of agencies for Eastern Canada with headquarters at Montreal.

Mr. F. W. Teele, formerly vice-president and general manager of the Porto Rico Railway Company, has been elected vice-president of the Southern Canada Power Company, and Mr. J. B. Woodyatt was appointed manager.

Mr. F. G. Ramsden, formerly of the Bank of Toronto, is the manager of the new Montreal security house, the Instalment Investment Company, Limited, which are handling an issue of the Toronto Furniture Company's bonds.

Mr. Y. Numano, the new Japanese consul-general at Ottawa, said at Vancouver that the Japanese were not overlooking the Canadian market, but hoped to increase their business with this country. Japan wants in return Canadian lumber and other raw material. He succeeds Mr. C. Yada as Japanese consul-general in this country, Mr. Yada proceeding to an appointment in New York.

Mr. Arthur Drummond, president of the Canada Sugar Refining Company, who died in May last, left property valued at \$1,370,053, of which \$549,437 is the deceased's interest in the estate of his father, the late Sir George Drummond. The estate includes \$34,000 in Quebec real estate; \$55,063, bonds; \$30,658, cash; \$663,538, stocks. Among the latter are 16,407 shares of mining companies listed as of no value.

Mr. H. E. Wilson, general manager of the Northern Assurance Company, Limited, is to retire at the beginning of the new year. Mr. Wilson joined the Northern Assurance Company when quite a lad, and after considerable experience was, in 1878, appointed to the position of assistant secretary, and in 1894 succeeded to the general managership. Mr. Wilson carries with him into his retirement the best wishes of insurance men in general. His successors are Messrs. H. T. Gayford and J. Robertson, secretary of the London board and manager in Aberdeen, respectively. These gentlemen are to become joint general managers of the company. They are prominent insurance men and have the best qualifications for the position.

TIGHTER REIN ON COUNTRY'S FINANCES

Col. Cockshutt, when speaking before the Ontario Union of Municipalities, suggested that a tighter rein be put on the finances of the country, and declared that there were too many motor cars running around. "Canada is making money, and it should go to the common cause. It is costing England and her allies \$25,000,000 every day and we must be prepared to give more. My view is that the man who will not fight shall not have a say in the final settlement. We who have done the fighting and not our friends across the line shall have the say at the finish, and the day is near at hand when all the overseas empires shall have a voice in the common empire for the common good."

WHEAT PURCHASE LOAN

The Corn Exchange Bank of New York announced on Wednesday that it had made a loan of \$25,000,000 to the Wheat Export Company of Canada, guaranteed by the British government. The proceeds are to be used by the export company for the purchase of Canadian grain and the facilitating of its exportation.

Payment of the loan is to be made in the form of notes bearing 5 per cent. interest. The notes are for no specified period, but will be renewed as conditions may necessitate. Most of the wheat purchased under this arrangement will come from Canada, but some of it may be supplied by the United States.

To have a central agency in New York in charge of the purchase of wheat for the British government, there has been incorporated the Wheat Export Company, the president of which is to be G. F. Earle, manager of the New York office of Sanday & Company, whose headquarters are in London and Liverpool. This company has had charge of the wheat purchases for some time past, but with the prospect of handling the wheat exports on a much larger scale, the new corporation is being formed.

An earlier reference to this matter appears on page 28.

STEEL COMPANY PAYS DIVIDEND ON COMMON

"A distribution of 4 per cent. has been authorized by the directors on the ordinary shares of the Steel Company of Canada to be paid out of earnings of the year 1916 on January 1st, 1917, to shareholders of record at the close of business December 16th, 1916. In view of the earnings of the company," says an official statement, "it was felt that some distribution of profits to the ordinary shareholders might be made, but the board in so doing has not decided upon the establishing of a regular dividend policy, and desire to record that the question of future distributions must depend upon the future earnings and prospects of the company, and must be left for the conditions of another year to determine. A conservative policy has been followed in view of the exceptional conditions prevailing in the iron and steel trade, as well as having in mind the very heavy capital expenditures which the company has undertaken. At their meeting the directors authorized additional plant appropriations and considered the question of extensions which will be incumbent upon the company to undertake in order to place it in a position to realize to the fullest the benefit from the expenditures and extensions already made, and also having regard to the necessity of putting the operation to the company on the basis of the lowest possible cost of production to meet the competition which is inevitable when adjustment of trade conditions takes place. The directors consider it essential that the future position of the company should be regarded as paramount, and with a view to the conditions which may arise after the war are to be commended in following a policy which will place the company on the soundest possible footing.

"It is also felt that the bonded debt of the company, which has been considered by some as heavy compared with other companies, should be reduced, as has been the policy of the large steel interests of the United States under existing circumstances. The shareholders will no doubt agree with the directors that a conservative policy is the wisest course to follow, and by building up the company on a firm foundation place it in a position of greater security for the realization of future expectations."

Mr. H. M. Cherry, formerly a chartered accountant practising in Winnipeg and Brandon, has been promoted to the rank of major, and is now attached to the office of the general auditor of the Canadian Expeditionary Forces in London, Eng. Major Cherry went overseas with the first contingent as a lieutenant in the 90th Winnipeg Rifles. A brother of Major H. M. Cherry recently went overseas as major, second in command of the 138th Battalion, of Edmonton, commanded by Col. Belcher. Major H. T. Cherry has had financial connections for some years in Western Canada and is well-known from Winnipeg to the Pacific Coast.

BANK OF MONTREAL'S STRONG POSITION

Proportion of Liquid Assets to Liabilities is 75 Per Cent.
—Excellent Annual Statement

The total liquid assets, including securities of the Bank of Montreal at the end of October last were almost \$247,000,000. The proportion of these assets to public liabilities is 75.2 per cent., an unusually high ratio. That compares with 55.1 per cent. in the previous year and 49.9 per cent. in 1913. The bank's total assets exceed \$365,000,000, the largest reported in any of its annual statements. Cash holdings, including deposits of \$7,500,000 in the central gold reserve, total \$50,000,000, equal to 16 per cent. of public liabilities. What may be termed first-line reserves, including call loans abroad, cash and balances due by banks aggregate \$194,000,000, or 59 per cent. of public liabilities. These figures give some idea of the exceptionally strong position in which the bank now stands.

Having been in business for nearly a century, the Bank of Montreal has taken a leading part in the financing of Canadian development since the early days of the country's history. As the Dominion has grown, so has this outstanding financial institution. Its domestic business has rapidly increased and its international relations have been considerably extended.

Sir Vincent Meredith, president, and Sir Frederick Williams-Taylor, general manager, with their co-directors, staff, shareholders and clients, have every reason to be satisfied with the gratifying strength and operations of the bank, which is now numbered among the 25 largest financial institutions of the world.

The following is a statement of the result of the business of the Bank of Montreal for the year ended October 31st, 1916:—

Balance of Profit and Loss Account, 30th October, 1915	\$ 1,293,952.95
Profits for the year ended 31st October, 1916, after deducting charges of management, and making full provision for all bad and doubtful debts	2,200,471.04

FEATURES OF QUEBEC INSURANCE LAW

Clear Exposition of Intricate Subject by J. Armitage Ewing, K.C.

(Continued.)

In the absence of a marriage contract the parties are presumed to have decided to abide by the common law of the province, which provides that they shall be in community of, or common as to, property. By this a sort of partnership is established. If a couple marry outside of Quebec without a marriage contract, and afterwards live in the province, they continue to be governed by the law of the husband's domicile at the time the marriage was celebrated. For instance parties domiciled in Ontario, when married, afterwards residing in Quebec, are treated as being separate as to property, because Ontario has not the régime of community of property. If, however, they intended at the time of their marriage to take up their abode in Quebec, and after the marriage put that intention into effect, Quebec is considered as their matrimonial domicile and they are subject to its laws, and so if they have no marriage contract, they are treated as being in community.

Movable or Personal Property.

When community obtains, all movable or personal property which either party possesses at the time of the marriage falls into this community or partnership and also all property of any kind, real or personal, which either consort acquires during the marriage, with the one exception of real property given or bequeathed by an ancestor—that becomes the private property of the descendant of the donor or testator. Parties, however, giving or bequeathing property to either of the consorts may specially stipulate that it shall not fall into the community but will belong to the consort in question as his or her own property. Real property which either party owned at the time of the marriage is excluded from the community and continues to belong to the consort, who possesses it as his or her private property.

The husband is the head or managing partner of the community. He may deal with its property in the most absolute manner without the concurrence of the wife, he being free to even give the property away provided that he act in good faith and without fraud.

On the dissolution of the community, which usually takes place by the death of one of the consorts, like on the dissolution of any partnership, the community property is divided, one-half going to each of the consorts or his or her representatives as the case may be.

If Policy is not Assigned.

If a man common as to property insures his life in favor of himself or his legal representatives, and the policy be not assigned during his lifetime, the proceeds fall into the community, and on his death one-half only goes to his heirs, the other half going to his wife, not as one of his heirs, but in her own right as the surviving partner. The same in the case of a married woman common as to property, so the discharge of the surviving consort should always be secured by the assurance company, unless evidence that they were separate as to property is furnished. A wife cannot legally insure her life other than in favor of her children without the authorization of her husband or of a judge. Even if the consorts are separate as to property the woman requires authorization to make a contract of insurance except in favor of her children. Any contract made by her without such authorization is an absolute nullity unless it be connected with the administration of her property and as an accessory thereof.

There is one exception to the rule that during the marriage the consorts cannot confer any benefit upon each other, and that exception is the law which allows a husband to insure his life in favor of his wife. This is by statute. Being an exception to the common law it must be strictly interpreted and does not permit a woman to insure her life in favor of her husband. Such a contract is a nullity and cannot be enforced in the courts.

The question of lending to a married woman on the security of her policy, or any other property, is a complex one and should not be entered into without great care on the part of the lender.

If she is common as to property with her husband and the latter becomes a party to the contract of loan and signs the same, the creditor is safe, because it is deemed to be made to the community on the security of property of the community, and being made with the husband, the head of the community, is perfectly legal. Remember, all that belongs to the wife as all that belongs to the husband, including life policies, fall into the community. Of course, I am speaking of policies payable to the assured or her estate.

If the wife is separate as to property a very different state of affairs exists, and one that has caused confusion and loss to many a creditor? Article 1301 of the Civil Code read as follows up to a few years ago:—

"A wife cannot bind herself either with or for her husband, otherwise than as being common as to property; any such obligation contracted by her in any other quality is void and of no effect."

For Husband's Use.

Where a man loaned to a woman on the security of her property, say her life policy, and when he sued for repayment, was met with the plea that she borrowed the money for her husband and gave it to him, he found himself confronted with this article, for the Privy Council held in the case of the Trust and Loan Company and Kerouack, that where a woman borrows money and immediately hands it over to her husband, it is very difficult to escape the conclusion that she, in the language of the code, bound herself for her husband, and as prohibitive laws import nullity the Privy Council refused to condemn the woman to repay the amount she borrowed. This decision created such a stir that the legislature amended this article, but the amendment was very clumsily and unwisely drawn, and it did not do as much as it should have done to clarify the situation. The amendment added these words to the article:—

"Saving the rights of creditors who contract in good faith."

What are the rights of creditors? If the woman bind herself for her husband she enters into an illegal contract, which in the eyes of the law is null, hence what right has a creditor? Then again, where are the creditors? If the agreement is null there is no contract, hence no creditor, so that taken literally and followed to its logical conclusion the amendment is meaningless. But it is not to be presumed that the legislature added these words without some intent, and by the rules of interpretation, the intention of the law maker is always sought for and given effect to. So the best legal opinion interprets this amendment as though it had enacted that where a party lends in good faith the contract is valid even though the wife borrowed for her husband, and the creditor can force her to pay.

Adopt Reasonable Precautions.

But what is good faith? I do not think it means that every time a loan is made to a married woman it can be recovered so long as the lender was not informed that the husband was to benefit. He must, I think, keep his eyes open and adopt all reasonable precautions, so I submit that one, lending to a married woman, separate as to property, whether on the security of a life policy, or on a mortgage of real estate, should have the applicant state precisely in writing at the start, the purposes of the loan and what she intends to do with the money and then if it appears that it is to be used for herself personally, and for what she has a right legally to spend money on, and this seems reasonable with due regard to her station in life, the contract may be safely entered into, provided that she and her husband both make a solemn declaration that the money is to be used for the stated purpose and on no account to benefit him. Some lawyers in Quebec will not go as far as this and insist upon the lender seeing to the application of the money himself, that is, having a statement made by the wife of the uses of the money and then himself paying out the loan for these uses.

(To be Concluded.)

The prevailing opinion regarding the statement of Mr. H. P. Davison, of Messrs. J. P. Morgan, regarding Great Britain as a desirable customer, printed in a recent issue of *The Monetary Times*, is that it was somewhat in the nature of a prophecy that Britain's next loan in the United States will be unsecured by collateral, and will be issued simply as a government obligation.

ALBERTA'S SHARE OF CANADA'S CROPS

United States Investors and Work of Producers—A Farmer's Story of Success

Alberta is the bright spot on the crop map of Canada this year, one of the few bright spots on the continent. This is the view of Mr. Kingman Nott Robins, treasurer of the Associated Mortgage Investors, Limited, Rochester, N.Y., after his tour of the province, and the remarks of this well-known farm mortgage authority are well worthy of attention. With the grain yield, both in the United States and Canada, little more than half that of 1915, Alberta is safely harvesting a crop of more than normal size, only inferior as a whole to the crop of 1915, and equalling that in many localities. A preliminary estimate of Alberta's crops, reckons the production as follows: Wheat, 40,000,000 bushels, average per acre, 25 bushels; oats, 60,000,000 bushels, average per acre, 60 bushels. Considering present prices for grain and livestock, Alberta seems in a fair way to surpass last year's total agricultural production in point of value, and that will certainly make her agricultural population as prosperous as any on the continent, in proportion to their opportunities.

Prosperity is Showing.

This prosperity is showing itself in improved collections, liberal sales of luxuries, and semi-luxuries, such as automobiles, and a slackened demand for loans, both from banks and mortgage lenders. The total investment by lending institutions in farm mortgage loans in Alberta at the end of 1913 was about \$24,000,000, and it is doubtful if borrowings have greatly increased. In the case of the Associated Mortgage Investors Incorporated, the chief problem is to get enough loans of the class we recommend to our clients. Of maturing loans, a large proportion are being paid off. The liquidation thus indicated, however, is likely to be followed by increased activity among the farmers in buying lands, equipping themselves with livestock and improving their buildings. This will increase the demand for loanable funds, creating a supply of the most desirable farm loans to farmers making a strictly business use of their borrowed capital.

Contrary to expectation, there has been adequate labor supply for the 1916 harvest, owing partly, no doubt, to the partial failure elsewhere.

Crops and Livestock.

Some idea of Alberta's crop and livestock production last year can be gained from the following figures:—

The total agricultural production exceeded \$100,000,000, or \$2,000 for every family of five of the rural population.

The average grain yields per acre for the entire province, including the results of good, bad and indifferent farming, were: Wheat, 36.16 bushels; oats, 57.33 bushels; barley, 34.83 bushels.

This record, as regards wheat, at least, has never been surpassed on any area at all equal in size, in the history of America. Search of the records of grain yields of the United States since 1869 reveals nothing approximating this phenomenal production, which was the result of a combination of fertile soil with practically perfect weather conditions.

Many large yields were reported by reliable authorities, wheat exceeding 70 bushels per acre and oats 130 bushels per acre; 40 bushels and more of wheat per acre were the rule, not the exception, in the large area south of Calgary. On one farm the wheat yield was 41 bushels per acre, on fall plowed land, which is not considered as a rule productive of good results; and was undertaken in the fall of 1914 because of the high grain prices. In a district newly settled by homesteaders, the yield reported over affidavit by 15 farmers taken at random, showed the average for the group to be 46 bushels of wheat per acre. Four of these are borrowers from the Associated Mortgage Investors, in amounts ranging from \$3 to \$5 per acre on the land that produced this crop.

Shipping Million Bushels.

As many as a dozen small towns in Alberta, of less than a 1,000 population, shipped over 1,000,000 bushels of grain apiece in the season of 1915. Alberta's wheat production has increased from 2,000,000 bushels in 1905 to 51,000,000 bushels in 1915, and the oat production from 9,500,000 bushels in 1905 to 107,000,000 bushels in 1915.

The extraordinary grain production of 1915 has, fortunately, been accompanied by a continuing increase in mixed

farming products—livestock, dairy products, poultry and eggs. Prices for all these products have been and continue to be good, and in many instances high. Hogs in particular have risen in price to a point where it is profitable to feed them grain even at present prices, the market for hogs at the present writing being 11¼ cents lb. live weight in Calgary—higher than the Chicago market. A Calgary packing plant has just secured a single order requiring 350,000 hogs before spring.

There is a steady and most encouraging increase in the milking of good dairy stock, the butter production of Alberta increasing from 5,400,000 lbs. in 1914 to 7,400,000 in 1915. An Alberta dairy won first prize for creamery butter at the National Exhibition at Toronto.

With the present high prices for wool and mutton, Alberta, a natural sheep country, is enlarging its sheep production as indicated by the fact that the business of the Alberta Sheep Breeders' Association increased sixfold last year.

MUST LEARN FRENCH, RUSSIAN AND ITALIAN

That the French language should be made compulsory in every common school in the Empire, because it is the most common medium in the exchange of thought all over the world, was a statement of Lord Shaughnessy, president of the Canadian Pacific Railway Company, in an interview with a Central News representative in London, Eng. Russian and Italian, too, should be studied, he added.

"The people of Canada," he continued, "will exhaust their resources to the last ounce in order to assure the kind of victory for which the Allies are determined to fight to a bitter finish.

"The development of munition factories has been extraordinarily rapid in Canada within the last year. Thanks to the formation of the Imperial Munitions Board, to-day we are turning out a variety of war manufactures which heretofore the Allies were obliged to obtain elsewhere.

"The subject of trade after the war is one in which Canada is deeply interested. At the moment, of course, we are preoccupied with the successful prosecution of the war, but at the same time it is possible to frame in our minds a general outline of our trade policy when hostilities are concluded. We must not be content to develop scientific research alone. Amongst other things in connection with the trade after the war question greater attention should be paid to universal instruction in foreign languages. In the past we have been content to give our boys and girls just an adequate education in their own tongue. If the lessons of this war are to be taken to heart, and if we are to extend our trade, then we must make our youngsters familiar with the languages of other nations."

MANY INQUIRIES FOR FACTORY SITES

Toronto Harbor Commission Gets Them—Allies' After-War Tariff is Factor

The Toronto Harbor Commissioners have had numerous inquiries in connection with sites in their industrial district from local and United States firms contemplating either a change of their location in Toronto at present, or the establishment of a new industry in Canada. The outstanding feature in connection with the inquiries of these United States concerns seems to be that they are all awaiting the much-discussed preferential tariff of the Allies.

Fully 90 per cent. of the correspondents desire no publicity regarding their inquiries. So far as the United States manufacturer is concerned, he probably does not desire his competitors in the United States to be advised that he has any intention of establishing in Canada.

When any sites are leased, the Toronto Harbor Commission make it public through the press on account of the commissioners being a public body handling lands in trust for the city.

At a recent meeting of the commissioners, a lease to Messrs. Baines and Peckover, steel merchants, was authorized for 1.30 acres in this industrial district. It is their intention to start immediately building operations and erect a steel warehouse to involve, at present, an expenditure of \$20,000 for buildings. When fully developed, the total expenditure will be about \$225,000.

Personnel of Commission.

The Toronto Harbor Commissioners are a municipal commission of the city of Toronto, incorporated by a special act of the Dominion of Canada, holding title through patents from the Crown and conveyances of the city of Toronto to practically the entire harbor and waterfront of the city.

The commission is composed of five members: two appointed by the Canadian government and three by the city of Toronto, and was formed for the purpose of administering the harbor and developing the waterfront property formerly owned by the city. The plan for this development has been approved by the Canadian government and the city of Toronto.

The personnel of the commission is as follows: Messrs. Lionel H. Clarke, chairman; Thos. L. Church, R. S. Gourlay, John Laxton and R. Home Smith. The officers are: Messrs. E. L. Cousins, chief engineer and manager; Alex. C. Lewis, secretary; and Colin W. Postlethwaite, harbor master.

Big Works in Hand.

The plans in regard to the waterfront and harbor lands of Toronto acquired by the harbor commissioners, include a comprehensive system of docks, harbor works, and an industrial tract of one thousand acres, with sites for manufacturing establishments and other revenue producing facilities, together with a deepening of channels, construction of sea-walls, breakwater and ship channel 8,000 feet long. The property now held by the commissioners includes a waterfront approximately 12 miles in length, comprising over 1,850 acres of land and water lots, of which 1,100 acres are water lots and 750 acres land lots.

The Dominion government has undertaken the construction of certain portions of the improvements planned by the harbor commissioners the estimated cost of which is approximately \$7,000,000; of this sum contracts have already been let to the amount of \$5,371,000. The city of Toronto has also undertaken improvements relating to the harbor to cost \$4,885,000, which will be provided for by the city out of its general funds.

Sale of Bonds.

A block of \$1,500,000 guaranteed 4½ per cent. 40-year gold bonds of the Toronto Harbor Commissioners was recently sold at an excellent price. They are now being offered by Wood, Gundy and Company, bond house, Toronto.

A sinking fund sufficient to retire 50 per cent. of the issue at maturity is set aside annually, commencing September 1st, 1918, under which bonds are to be purchased annually in the open market up to 105 and interest. The issue is redeemable in whole or part by lot on any interest date at 105 and interest. These bonds, while issued by the Toronto Harbor Commissioners, are guaranteed unconditionally by endorsement, both as to principal and interest,

by the city of Toronto. They have all the security of bonds issued by the city, in addition to the pledge of the property of the harbor commissioners, and the revenues therefrom. The assets of the harbor commissioners at the beginning of this year were \$12,756,441 (comprising a waterfront of 12 miles), the total bonded debt at that date being \$3,500,000.

POOR YEAR FOR PANAMA CANAL

Landslides and Diversion of Traffic by War, Were Unfavorable Factors

The number of ocean-going vessels using the Panama Canal waterway during the fiscal year ended June 30th, 1916, was 787, and their aggregate net tonnage was 2,479,761 tons, the corresponding figures for the previous fiscal year being 1,088 vessels of 3,843,035 tons. As the canal was closed by a landslide from middle of September, 1915, to April 15th, 1916, the period covered is in reality only five months. The total quantity of cargo carried through the canal in 1915-16 was 3,140,046 tons, as compared with 4,969,792 tons in 1914-15. Taking into consideration the fact that the canal was open to traffic for ten and a-half months in the year 1914-15, as against five months in 1915-16, the monthly average for ships, tonnage, cargo carried and tolls was higher in the latter year.

The vessels passing through the canal in the fiscal year 1916 were employed on the following principal trade routes: (1) United States to the west coast of South and Central America; (2) United States to the Far East, including Australasia; (3) United States coast-wise; (4) Europe to the Pacific Coast of Central and South America; (5) Europe to the West Coast of North America; (6) Atlantic terminal of the Panama Canal to the Pacific Coast of Central and South America, over which route is carried cargo for and from the United States and Europe.

United States Trade Smaller.

A noticeable feature is the large falling-off in the United States coastwise trade in recent months. During July-September, 1915, there were 79 ships, with a net tonnage of 311,468 tons, carrying 389,844 tons of cargo, but from the time of the reopening of the canal to June 30th, 1916, the coastwise traffic consisted only of 11 ships, with a net tonnage of 37,706 tons, which carried 51,888 tons of cargo. This falling-off was caused by the fact that with the closing of the canal the vessels of the interrupted coastwise services were diverted to a great extent to the foreign trade, in which trade they have been kept since the reopening to commerce of the waterway by the continued great demand for tonnage and the prevailing high freights brought about by the war.

Of the 787 vessels using the canal during 1915-16, 358 were British and 238 United States, the next most important nationality being Norwegian with 45.

As regards the cargo carried, the principal commodities passing through the canal during the year were as follows: Nitrates, 894,139 tons; refined petroleum, 271,041 tons; coal, 243,216 tons; sugar, 128,544 tons; lumber, 89,685 tons; manufactured goods of iron and steel, 87,375 tons; crude oil, 69,812 tons; railway material, 57,829 tons; and iron ore, 52,250 tons.

Coaling Plants Nearing Completion.

The acting British consul at Colon reports that construction work on the permanent coaling plants at the terminals of the Panama Canal has advanced to such a point that their completion will require only a few more months. The various coaling companies which have applied for storage space have been notified of this fact and requested to state their precise requirements for space, in order that the Panama Canal administration may proceed with the assignments of space and the granting of revocable licences.

Some companies have made a provisional application for space, with the understanding that before the completion of the plants they should indicate more precisely their needs, while others had applied for space for a specific number of tons. The latter companies are given opportunity to increase or decrease the space applied for, and all are requested to advise whether they wish the space in one plant, at either Cristobal or Balboa, or divided between the two.

DEBENTURES issued for term of five years with interest at $4\frac{1}{4}\%$ per annum, payable half-yearly. The Debentures of this Society are a legal investment for Trust Funds. Correspondence invited.

Head Office, King Street, HAMILTON, Ont.

GEO. RUTHERFORD, President

D. M. CAMERON, Treasurer

AN AUTHORIZED TRUSTEE INVESTMENT

The Debentures issued by this Corporation are a security in which Executors and Trustees are authorized to invest Trust Funds.

They are issued in sums of one hundred dollars and upwards, as may be desired by the investor, and for terms of one or more years.

Interest is computed from the date on which the money is received, and is payable half-yearly.

They have long been a favorite investment of Benevolent and Fraternal Institutions, and of British and Canadian Fire and Life Assurance Companies, largely for deposit with the Canadian Government, being held by such institutions to the amount of more than ONE AND ONE-HALF MILLION DOLLARS.

A miniature specimen debenture, with Interest Coupons attached, copy of Annual Report, and all particulars will be forwarded on application.

The Need of Accuracy

Besides ability to make sound decisions about the general lines on which administration is to be conducted, an Executor must keep accurate and systematic records of all transactions connected with the Estates in his care. Many individuals who meet the first of these tests, fail at the second. This Company's accounts are rigidly audited year by year and leave no room for inaccuracies.

FLAGRANTLY DISHONEST ATTEMPT TO CRAWL

Mr. Justice Walsh Says Alberta Relief Act is "Much Abused"

"This is about as flagrantly a dishonest attempt to crawl in under the provisions of the much-abused volunteers and reservists relief act, as can well be imagined." That is how Mr. Justice Walsh expressed himself in a recent judgment which the Western Law Reporter of November 11th reports as follows:—

The applicant Hulbert made a ground lease of certain premises to the tenant Mayer on July 15th, 1915, under which \$375 became due for rent on July 1, 1916. He also agreed to pay the taxes on the property, his share of which for the year 1915 is \$1,100.53. He has paid neither rent nor taxes. In October, 1915, he was instrumental in the incorporation of the Jasper Clothing Company, Limited, and he is the largest shareholder in that company of which he appears to be the manager. Immediately after its incorporation he transferred to it all of the stock in trade of the business carried on by him in the store on the demised premises and that company has ever since been and now is carrying on its business in that store. In October, 1916, the landlord took in distress a quantity of goods in this store.

Now a Volunteer.

Upon his application under the act respecting extra-judicial and other seizures for leave to sell the goods so taken in distress he was met with the objection that the tenant is now a volunteer in the military forces of his Majesty. This appears to be a fact. He is now a full-fledged soldier and is known as No. 01676 A. Company, No. 1 platoon of the 101st Battalion and he drills regularly twice a week. So it is undoubted that he is as immune for the present from his liabilities contracted before the 19th of April last, as if he was in the trenches in France, even though, as the fact is, his battalion is a militia corps and not an overseas unit.

The Master at Edmonton, to whom the application was made, refused it and the landlord renews it before me as I think he had a right to do. The point principally argued before me was whether or not this obligation of the tenant was created or arose before the passing of the Volunteers and Reservists Relief Act, for it is only to a debt, liability, or obligation incurred before that date that the act applies. The Master held that this liability was created before the passing of the act and I think that he was right. The liability was created by the lease which was made before the passing of the act and so the liability was incurred before then too. It does not matter, it seems to me, that payment of the liability so incurred was not to be made until a date subsequent to the passing of the act. It is the date of the incurring of the liability and not of its maturity that governs. I cannot yield to Mr. Gibson's argument that the tenant's liability arose only because of his possession of the premises which was carried up to a date beyond that upon which the statute was enacted. His liability does not depend upon his possession at all. He would be just as liable for the rent if he had never taken possession unless, of course, his failure to do so was due to the wrongful conduct of the landlord. If that is all there is in the case the landlord's application must fail. But I do not think that it is.

To Pay His Honest Debts.

Upon the tenant's own showing the goods distrained upon are not his at all, but are those of the Jasper Clothing Company, Limited. The landlord claims the right to distrain upon them because the company's title to them is derived by purchase from the tenant, and it is not entitled to the benefit of the restriction imposed by law upon the landlord's right to distrain for rent on the goods of any person except the tenant. Sec 4, Ch. 34, Consolidated Ordinances. To refuse the landlord's application therefore will not give the tenant any relief at all. He can go forth regularly to his bi-weekly drill unoppressed by the fear that while he is away his goods may be sold to pay his honest debts. It is his company that will in that event be relieved, for then its goods will not be sold. But it is neither a volunteer, nor a reservist, nor the wife, nor a dependent member of his family, nor can it become any one of these and so it cannot claim the benefit of this legislation which is intended for the relief of these classes. Whilst he and his wife and any dependent member of his family are within the act, his clothing company is not,

and so I cannot extend to it the benevolent provisions of this statute. I do not think a distress upon his company's goods can be considered the taking of a proceeding against him, and so this application cannot be defeated under the act.

No notice of this application has been given to the company as such. Sec. 4 of ch. 4 of the statutes of 1907 provides that the order may be made "ex parte" or on notice. The principal shareholder of the company in the person of the tenant was before me by his solicitor on the hearing of it, and if there was any reason on the merits why the order should not go, I doubtless would have heard of it. No argument on that score was addressed to me, and I see therefore no good reason why the company should have further notice of it. The order may go as asked.

CASE AGAINST INTERNATIONAL CONTROL

United States Attitude Towards Control of Norman Dam —Canada's Rights Questioned

An article, dealing with the important question of the national or international control of the Norman Dam, on the Winnipeg River, appeared in a recent issue of *The Canadian Engineer*. The following are extracts:—

"Many of the problems which enter into the Lake of the Woods investigation are approaching decision by the International Joint Commission. Some of these essentially admit of adjustment upon a monetary basis. With such phases of the investigation the citizens of neither country are very seriously concerned, because any reasonable adjustment of compensation decided upon by the commission will doubtless be acceptable to both countries. There are, however, other phases of the investigation which involve questions of principle or public policy of the individual countries and which necessarily will have to be decided upon national, rather than international grounds. For example, a problem in which the Canadian public is most vitally concerned now that its import is being generally understood, is the question of national or international control of the Norman Dam—a structure on the Winnipeg River, wholly in Canada, and some 60 miles to the north of the international border.

Safeguard National Assets.

"It has always been fully expected that the commissioners for each country would safeguard the national assets of the other country. But if there should be any effort to compromise the national status of the Norman Dam in Canada, the Canadian members of the commission are not expected to sacrifice Canadian rights.

"In our opinion, dams such as at International Falls, extending from the main shore of Canada to the main shore of the United States, could be under international control, but in no sense is the Norman Dam an international structure.

"If the commission were to designate the highest and lowest levels to be permitted, the Dominion government (either directly or co-operatively with the Ontario government) undoubtedly will be prepared to give assurance that the specified levels will be maintained and that the dam will be operated according to such findings of the commission as may be acceptable to both governments.

Honor and Rights.

"In any discussion of the policy attaching to purely national structures, a word may be said upon the subject of national honor. When either the United States or Canada pledges its word that certain matters will be attended to in order to conform to the findings of the International Joint Commission, surely that should be sufficient. In a matter like the control of the Norman Dam, the people of Canada will regard their national status and honor of much more value than are the millions of dollars of shipping, power, lumber, farming and other interests involved. They will cheerfully contribute their share of any reasonable monetary settlement in which the members of the commission may acquiesce; but the people of Canada will fully expect that any recommendations approved by the Canadian commissioners will ensure no compromise of Canada's national honor or of this country's actual rights in the ownership of its own structures."

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Laurentide Pulp and Power Company.—A certificate covering ten shares of Laurentide Power, No. 926, in the name of William A. Ralston, has been lost.

Cranby Consolidated Mining, Smelter and Power Company, Limited.—The company's copper production in October amounted to 4,346,099 pounds as compared with 3,440,035 pounds in September, 3,218,847 pounds in August, and 4,727,929 pounds in May, the high record.

Of the total, 3,081,431 pounds were produced at Anyox, while at Grand Forks 1,264,668 pounds were turned out.

Windsor Hotel Company.—The gross receipts of this company show an increase of 23 per cent., and net profits, which, in 1915, were \$11,747, were this year \$77,648. Expenses of operation were larger by 18 per cent. The company reported an increase of 26,487 in the number of guests. The balance sheet shows assets of \$2,728,482. The sum of \$80,409 was written off against furniture and renewal account. Particulars of the company's dividend announcement were given in the last issue.

Civic Investment and Industrial Company.—With the first dividend cheques sent to shareholders of the company, the management has sent a request to the large number of shareholders who cannot attend the meetings of the company to give it a permanent proxy, investing Sir Herbert S. Holt, J. S. Norris and C. R. Hosmer, or their successors in office, with power of attorney to vote for them. The general custom has been to seek proxies some time in advance of each meeting. The above course will render this step unnecessary.

Tooke Brothers.—The directors have declared the usual quarterly dividend of $1\frac{3}{4}$ per cent. on the preferred stock, payable on December 16th, as well as one more of the deferred quarters, making $3\frac{1}{2}$ per cent. paid on the deferred dividends during the last six months, leaving 7 per cent. yet to be paid. It is understood orders will keep their three plants busy until the end of the fiscal year, June 1st next. Sufficient material was purchased at a low figure to keep the plant running for considerably over a year. Sales for the first five months are about 40 per cent. in excess of 1915.

Shawinigan Water and Power Company.—Mr. J. E. Aldred, president of the company, said at Montreal that the demands on the power resources of Shawinigan were so pressing that the chief problem in 1917 would be to take care of the requirements of their customers. Arrangements have been made whereby Shawinigan will take additional power from Laurentide earlier than was at first intended.

The Shawinigan company has been taking 25,000 horsepower from the Laurentide company, and in the natural course of the agreement would take an additional 15,000 horsepower on July 1st, but this is now to be anticipated by more than half a year.

Sterling Gum Company.—The Sterling Gum Company was incorporated in 1914 to manufacture and sell chewing gum, and acquired the manufacturing business, plants, etc., of the Autosales Gum and Chocolate Company. Plants are located at Toronto, Ont., and Long Island City. For six months orders received by the Sterling Gum Company had not been sufficient to keep these plants running at full time.

The American Chicle Company, which was incorporated in 1889, and which, consolidating the leading chewing gum manufacturers of the United States, has bought the Sterling Gum Company, and taken over all its property and actual assets. This company has plants scattered throughout the United States and Canada.

Howard Smith Paper Company.—At a meeting of the shareholders of the company the proposals for the enlargement of the company through the purchase of an additional mill were sanctioned, together with the authorization of a new issue of \$500,000 common stock to provide for the extensions.

The new plans provide for the purchase of the properties and contracts of the Edward Crabtree Sons, Limited, mill at Crabtree Mills, P.Q., for which the payment is to be made partly in cash and partly in common stock.

Shareholders are asked to subscribe for the common stock at 80. The amount outstanding at present is \$525,000, while the preferred amounts to \$475,000.

International Nickel Company.—Secretary and assistant treasurer G. S. Jordan, of the International Nickel Company, was shown a telegram saying that his letters to the Iron and Metal Supply Company, of Montreal, and to G. G. Lindsay, of Toronto, had been made public along with the charge that their London agents had been proved to be agents of the German nickel trust, says a New York despatch, adding that a statement was requested from Mr. Jordan or any other official of the International Nickel Company upon the charges made.

Mr. Jordan read the telegram carefully, consulted with the other officials of the company, and then he made this oral reply: "We have no information to give out, and no comment to make on the statements."

Porto Rico Railways Company, Limited.—The comparative statement of earnings for October was as follows:—

For October.	1915.	1916.	Increase.	Per cent.
Gross	\$ 62,072	\$ 63,320	+ \$ 1,257	+ 2
Net	33,557	28,922	— 4,634	— 13
For ten months.				
Gross	622,260	691,234	+ 68,974	+ 11
Net	306,963	340,086	+ 33,123	+ 10

Both the earnings and operating expenses for the month were adversely affected by serious labor disturbances in the island, resulting from considerable outside pressure in a strike of employees of the trolley division, which has since been satisfactorily settled.

Dominion Bridge Company.—This company has acquired \$569,500 of the outstanding bonds of the National Bridge Company of Canada, Limited. The total par value of the bonds issued by that company was \$585,000; there is, therefore, a balance still to be got in of \$15,500.

The outstanding bonds would undoubtedly have been turned in to the Dominion Bridge Company were it not for the unsettled conditions in Europe. They are probably held by estates, the management of which is complicated by the numerous casualties caused by the war. The time limit of the Dominion Bridge Company's offer for the bonds has expired, but it is more than likely, *The Monetary Times* understands, that the same rate will be paid if the remaining bonds are turned in within a reasonable period.

Dominion Park Company.—Gross earnings of the company for the year ended October amounted to \$150,982, and, after making expenditures for repairs and replacements, insurance, general expense, operating and bond interest, totalling \$121,500, the surplus was \$22,307, which compares with \$4,151 a year ago.

Mr. H. A. Dorsey, president, reported that at the close of the season, there was in cash and in call loans about \$67,000, and the directors decided to subscribe to \$50,000 of the new Canadian war loan. This was done, and will be carried against the maturity of the bonds, to that extent offsetting interest charges.

The balance sheet shows total assets \$736,292, of which \$51,000 is set down as investments and \$42,369 cash on hand.

The officers and directors of the company were re-elected as follow: Messrs. H. A. Dorsey, president; W. G. Ross, vice-president; D. McDonald, C. A. Duclos and Paul Gaillbert.

Trust and Loan Company of Canada.—The net profits of the company for the half-year ended September 30th amount to £66,200, being an increase of £7,400 over the preceding six months, and an increase of £5,828 over the corresponding period of 1915.

The statutory reserve fund amounts to £423,757, being a net decrease of £29,775, compared with six months ago. This decrease is accounted for by the fact that the company have always adopted the practice of revaluing from time to time their statutory reserve fund investments at the market value, and the present is the first occasion since the outbreak of war that stock exchange quotations in Great Britain have been available for this purpose. The special reserve has been increased from £130,000 to £135,000.

A dividend at the rate of 10 per cent. (less income tax) has been declared and will be paid on December 2nd, the rate being the same as that of the two previous half-yearly declarations. The transfer books will be closed from November 18th to December 2nd, inclusive.

Brompton Pulp and Paper Company, Limited.—This company has been formed to take over the assets of the Brompton Pulp and Paper Company. The company has \$1,700,000 bonds outstanding, \$2,000,000 preferred shares and \$7,000,000 common shares. Three hundred thousand bonds are held in the treasury. It is a large producer of ground wood pulp, kraft pulp and paper, newsprint, box board, and lumber. The available wood supply of the company is given in a recently issued memorandum of the company to be sufficient for years operations at the present capacity: 30,000 tons ground pulp, 16,500 tons newsprint, 12,000 tons kraft pulp, 9,000 tons kraft and fibre paper, 10,500 tons box board, 15,000,000 ft. b.m. merchantable timber, shingles 5,000,000, railroad ties 30,000, miscellaneous 1,000,000 ft. b.m.

The company's directorate is as follows: President, F. N. McCrea, M.P., Sherbrooke; Messrs. E. W. Tobin, M.P., Sherbrooke; W. N. Munroe, Auburn, Me.; J. N. Green-shields, K.C., Montreal; H. W. Beauclerk, Montreal; and Mr. J. A. Bothwell, who is general manager of the company.

Emerson Motors Company, Incorporated.—The actual book value of this company's stock, being offered the public at \$7 a share, is 66 cents at most, according to the New York Tribune, which also stated that the same stock that is being sold to the public was sold by the company to Mr. N. F. Wilson at \$1.75 a share. This stock offering was largely advertised in Canada, but not in *The Monetary Times*.

The company's plant consists of plant purchased at Kingston, N.Y., at an actual investment of about \$30,000, and a leased floor of a building in Long Island City, neither of which is equipped for turning out cars.

The above authority also asserts that the management's estimates of \$60 profit per car are based on output of 30,000 cars yearly, whereas only about 10,000 cars can be made in 1916, and that costs are based on estimated costs of parts, prices of many of which have probably gone up appreciably since estimates were made.

The company does not plan to build cars, but merely to assemble them from parts purchased. The public so far has invested between \$1,250,000 and \$1,500,000 in the company's securities.

Consolidated Mining and Smelting Company.—In connection with the issue of \$2,100,000 new capital stock, on the basis of one \$25 share at par for every four shares now held, which will make the total issue a little over \$10,000,000, of the authorized capital of \$15,000,000. President W. D. Matthews gives the following information:—

Early this year at the request of the imperial munitions board the company undertook additional contracts of considerable magnitude for high grade zinc to be supplied to the allied governments. While a portion of the cost of the plant requisite for manufacturing this zinc was advanced by the governments, the company was required to substantially supplement the amount. The copper refinery has been increased in capacity. Plants for the production of both sulphuric and hydro-fluo-silicic acid have been installed so as to make the refining operations independent of an uncertain and expensive supply. Because of the further zinc contracts undertaken and the extensions in the plant, various changes and enlargements have been necessary to bring the smelter up to the increased demands upon it. Mining operations are being extended and will be further extended. Producing at one place and on a fairly large scale, no less than five refined metals (i.e., gold, silver, lead, zinc and copper), the company's capital, even with the increase resolved upon, is moderate. In fact, it is small as compared with the capital

of many United States companies engaged in much more restricted operations.

Dominion Power and Transmission Company.—An offering of this company's stock is being made at \$65 per share to yield 6.20 per cent. by Messrs. J. M. Robinson and Sons and Messrs. F. B. McCurdy and Company of Montreal and the maritime provinces. These companies have been trading in the common stock of the Dominion Power and Transmission Company for some time, and they recently secured about 1,000 shares, which they have since sold in small blocks. Messrs. Robinson and Sons give *The Monetary Times* to understand that it is probable that a listing of this stock will be made on the Montreal exchange later on. The capitalization of the Power and Transmission Company is as follows: \$25,000,000 5 per cent. bonds, of which \$5,260,000 have been issued. The underlying bonds (less redeemed) issued amounts to \$3,665,000, or a total bond issue of \$8,925,000. Of the \$10,000,000 7 per cent. cumulative preferred stock authorized, \$3,681,000 have been issued, and of the \$15,000,000 common stock \$7,714,500 have been issued. Companies controlled are: Hamilton Radial Railway Electric Company, Brantford and Hamilton Railway Company, Hamilton Street Railway Company, Hamilton and Dundas Railway Company, Hamilton, Grimsby and Beamsville Electric Railway Company, Dundas Electric Company, Limited, Lincoln Electric Company, Limited, Western Counties Electric Company, Limited, Welland Electric Company, Limited, Hamilton Terminal Company, Limited.

Canadian Connecticut Cotton Mills, Limited.—The amount of preferred stock issued by this company since June 1st is \$101,900 in par value. So *The Monetary Times* is informed by Mr. Tracy S. Lewis, treasurer of the company. This stock carries a dividend of 7 per cent., and none of it has been sold for less than par and accrued dividend in actual cash, sales having been made in both Canada and the United States. No common stock was issued as a bonus, but the concern underwriting the stock delivered from its holdings 75 per cent. in common stock to the company's stockholders who subscribed for the preferred.

The preferred stock is on a regular dividend basis of 3½ per cent. half-yearly. No dividend has ever been paid on the common stock, for which there is a nominal market value of about \$20.

This company has a Canadian factory at Sherbrooke, Que., while its headquarters and United States factory are at Beacon Falls, Conn. Its products are fine Sea Island, Egyptian and Peeler cotton fabrics. The company's officers are: Harry L. Burrage, president; R. J. Caldwell, vice-president; Tracy S. Lewis, treasurer and chairman; Obadiah Butler, secretary and manager.

It is understood that extensions to the company's plant at Sherbrooke are making satisfactory progress. With the completion of extensions, the capacity of the plant will be doubled by February, 1917, and trebled by June, 1917, it is anticipated.

Nova Scotia Steel and Coal Company.—The following statement for six months ended June 30 was supplied to the New York stock exchange in connection with listing Scotia on that exchange:—

Total profits	\$2,790,709
Surplus after charges	2,413,679
Dividends	66,250

Surplus	\$2,347,429
Pension surplus	1,512,065

Profit and loss surplus	\$3,859,494
-------------------------------	-------------

The consolidated balance sheet as of June 30, 1916, follows:—

Assets total \$28,940,502—Properties, plant and equipment, \$21,241,154; deferred assets, \$75,350; inventories, \$4,255,476; accounts receivable, \$2,400,880; bills received, \$91,971; cash, \$396,854; deferred charges, \$478,816; and the liabilities include preferred stock, \$1,000,000; ordinary stock, \$7,500,000; funded debt, \$10,795,806; purchase money obligations, \$50,000; bills payable, \$1,347,000; accounts, etc., payable, \$544,526; interest and dividends, \$335,184; reserves, \$2,758,400; surplus, \$3,859,495.

The stock exchange listing was Nova Scotia Steel and Coal Company, Limited, temporary certificates for \$7,500,000 ordinary stock.

QUEBEC'S BORROWINGS

Hon. Walter Mitchell, provincial treasurer, gave the information in the provincial legislature that since 1908 loans effected were as follows: Permanent loans, good roads, \$1,959,586. On January 1st, 1913, \$3,991,722; on July 1st, 1914, for the same purpose, \$600,000; for the St. Maurice River dam, and under the term of special short-term loans, as follows: \$6,000,000 on April 1st, 1915, and \$4,000,000 on June 1st, 1916. Temporary loans effected were \$1,460,000 on November 1st, 1913, renewed on May 1st, 1914, and paid August 1st, 1914, and a loan of \$4,000,000 on December 1st, 1914, and paid May 3, 1915.

MARINE INSURANCE RATES

In reporting the evidence of Mr. J. B. Morissette before the Dominions Royal Commission at Quebec, he was said to have stated that the marine insurance between Quebec and Liverpool was 10 per cent. lower than that between Montreal and Liverpool, and that the insurance from New York to Great Britain was 12 per cent., while from Quebec it was 22½ per cent. These figures should have been 12½ c % and 22½ c %. Mr. Morissette explained that the navigation risk was greater from Quebec. The commissioners asked if there was any comparative statement of the loss between New York and Quebec, to which Mr. Morissette could not reply, but stated that the rates were made by the head offices. However, he did not know whether they kept track of the losses by the various routes.

RAILROAD EARNINGS

The following are the weekly earnings of Canada's transcontinental lines during November:—

Canadian Pacific Railway.			
	1916.	1915.	Increase.
November 7	\$3,036,000	\$3,015,000	+ \$ 21,000
November 14	3,051,000	3,035,000	+ 16,000
Grand Trunk Railway.			
November 7	\$1,244,959	\$ 986,765	+ \$258,194
November 14	1,283,901	971,715	+ 312,186
Canadian Northern Railway.			
November 7	\$ 885,000	\$ 806,500	+ \$ 78,500
November 14	825,100	820,800	+ 4,300

OCTOBER COBALT ORE SHIPMENTS

The following are the shipments for month ended October 31st:—

	Tons.
Aladdin Cobalt Mine	20.5
Beaver Consolidated Mines	40.7
Coniagas Mines	74.2
Dominion Reduction Company	257.5
Kerr Lake Mining Company	30.2
La Rose Mines	126.9
McKinley-Darragh-Savage Mines	167.5
Mining Corporation of Canada	36.9
Nipissing Mining Company	649.1
O'Brien Mines	64.9
Right-of-Way Mine	42
Trethewey Silver Mine	42
	1,542.8
From Temagami—Pyrites Ore—	
Dominion Rand Company	79.2
From New Liskeard—	
Casey Cobalt Mine	27
Reeves Dobie Mine	11.5
Miller Lake O'Brien	56.600
From Porquis Junction—Nickel Ore—	
Alexo Mining Company	237

The Algoma Steel Corporation has \$2,432,500 3-year notes maturing in New York on March 1st, 1917.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended November 17th:—

Nipissing Mining Company, 62,545; Dominion Reduction Company, 88,000; Temiskiming Mining Company, 84,403; Penn-Canadian Mining Company, 108,206; McKinley-Darragh-Savage Mines, 85,868. Total, 429,122 pounds, or 214.5 tons.

The total shipments since January 1st, 1916, now amount to 28,458,079 pounds, or 14,228.9 tons.

ESTATE, \$545,203; LIFE INSURANCE, \$1,229

Application has been made for the probate of the will of Samuel May, a pioneer maker of billiard tables in Canada, who died in Toronto last month. The estate, inventoried at \$545,203 is made up of \$67,400 in real property, and personal property valued at \$477,803. Of the latter, the stock-in-trade of the business of Samuel May and Company is valued at \$51,166; 1,689 shares Dodge Manufacturing Company, \$354,700; book debts and promissory notes, \$34,289; Canadian war loan, \$25,000; life insurance, \$1,229; cash, \$11,019, and \$400 in household goods and personal effects.

Of the Toronto real estate, 102 and 104 Adelaide Street are valued at \$34,850; 95 Pelham Avenue, \$26,700; 161 Pelham Avenue, \$2,850, and a half interest in 34 Maynard Avenue, \$3,000.

MANITOBA'S RURAL CREDIT PLAN

The Manitoba government has worked out a plan of rural credits that will become effective as soon as the legislature convenes. It is intended to supply \$50,000,000 in sums of from \$500 to \$10,000 at 5 per cent. on mortgages of from one to forty years. The sum contemplated for the early stages of the scheme is placed at \$10,000, says a Winnipeg despatch.

The administration of the problem will be conducted by a bi-partisan board. The government will name two members, the opposition two and the Union of Municipalities two. The government will name the commissioner, and the directors, in the beginning, will be expected to give their services for a nominal sum.

The Manitoba government has arranged to borrow \$1,000,000 on provincial debentures in New York for financing the scheme, and at the inception will provide \$100,000 in stock. When the board has loaned \$1,000,000 on mortgages, it will begin the sale of 5 per cent. bonds in sums of \$100 and multiples of \$100. These will be offered for sale chiefly in the province, and later to the brokers and bankers in Toronto, Montreal and New York.

NEW INCORPORATIONS

Thirty-nine Companies Get Charters—Interest in Mineral Resources

Canada's new companies incorporated this week number 39. The head offices of these companies are located in five provinces. The total capitalization amounts to \$6,674,500.

The largest companies are:—

North America Antimony Smelting Company, Limited		\$2,000,000
Quebec Mining Corporation		2,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	11	\$3,386,500
Quebec	16	711,000
British Columbia	1	40,000
Manitoba	7	455,000
New Brunswick	4	2,082,000
	39	\$6,674,500

The following is a list of charters granted during this week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Stettler, Alta.—Skinner and Dalgeish, Limited, \$20,000.
Chicago, Ill., U.S.A.—The Methods Company, Limited, \$25,000.

Edmonton, Alta.—The Edmonton Fur Exchange, Limited, \$50,000.

Prince Rupert, B.C.—F. H. Mobley and Company, Limited, \$40,000.

Chatham, N.B.—Northern Motor and Garage Company, Limited, \$49,000.

Victoria, B.C.—British Columbia and Labrador Fisheries, Limited, \$25,000.

Vancouver, B.C.—Gold Seal, Limited, \$40,000. G. B. Norman, J. Goddard, A. Tulk.

Lindsay, Ont.—Lindsay Builders, Limited, \$40,000. J. Carew, P. J. White, T. H. Stinson.

Pembroke, Ont.—James O'Kelly, Limited, \$49,000. J. O'Kelly, J. P. Coulson, J. Bresnahan.

Perth, Ont.—Perth Shoe Company, Limited, \$200,000. J. A. Stewart, W. E. Danner, F. W. Hall.

Bathurst, N.B.—J. P. Whelan and Company, Limited, \$9,000. J. P. Whelan, C. Eddy, Eva Whelan.

Amherst, N.S.—United Pole Company, Limited, \$40,000. F. L. Milner, H. A. Purdy, Margaret A. Currie.

St. James, Man.—St. James Washing Company, Limited, \$5,000. B. L. Grant, F. W. Lange, J. C. Shelley.

North Temiskaming, Ont.—Quebec Mining Corporation, \$2,000,000. L. Caron, E. Proulx, M. Shaughnessy.

Fort William, Ont.—Grain Products Company, Limited, \$25,000. H. S. Scarth, V. A. Leslie, S. A. Rogers.

Germanicus, Ont.—The Dore Bay Telephone Company, Limited, \$2,500. B. Schutt, W. A. Sack, H. Krohn.

Ottawa, Ont.—Eclipse Plating and Sales Company, Limited, \$50,000. J. Dornig, F. D. Hogg, P. M. Grimes.

Gobden, Ont.—The Wolfstown Telephone Company, Limited, \$1,000. J. A. A. Spence, W. Blackwell, T. G. Peever.

St. Catharines, Ont.—The Packard Fuse Company, Limited, \$200,000. R. B. Hamilton, G. C. Rough, A. W. Varey.

Quebec, Que.—Quebec Concrete and Contracting Company, Limited, \$49,000. J. Fitch, D. Fitch, F. W. Phillips.

St. John, N.B.—The Colwell Fuel Company, Limited, \$24,900. C. W. Colwell, S. L. Colwell, Mildred V. Colwell.

New Hamburg, Ont.—The Dominion Thrasher Company, Limited, \$40,000. W. R. Miller, A. Bailey, W. H. Curtis.

Fort William, Ont.—Fort William Temple Building Company, Limited, \$40,000. J. Cooper, D. Cameron, T. J. Stenhouse.

Prince Edward Island.—The Bankers Silver Black Fox Company, Limited, \$115,000. F. E. Muzzy, J. Anderson, J. L. Townsend.

Lake George, N.B.—North America Antimony Smelting Company, Limited, \$2,000,000. G. M. Daley, N. M. Conrad, Una B. Johnson.

Vancouver, B.C.—Estate Holders, Limited, \$25,000. Chambers Packing Company, Limited, \$25,000; Burrard Sawmills, Limited, \$25,000.

New Westminster, B.C.—New Westminster Foundry Company, Limited, \$10,000; Coast Central Mill Company, Limited, \$20,000; Stewart Laundry Company, Limited, \$25,000.

Calgary, Alta.—The Mathews Music House, Limited, \$25,000; Eldon Mining Company, Limited, \$45,000; the Alberta Produce Company, Limited, \$25,000; Walker and King, Limited, \$20,000.

Hamilton, Ont.—The Regal Shirt Company, \$125,000. J. R. Marshall, G. A. Young, Agnes Baker; Hamilton Steel Wheel Company, Limited, \$2,000,000. J. R. Marshall, G. A. Young, Myrtle A. Baker.

Kingston, Ont.—Kingston Hosiery, Limited, \$500,000. A. B. Cunningham, Charlotte I. Mack, Emma M. Argue; McKelvey and Birch, Limited, \$50,000. J. McKelvey, D. Smith, C. A. Macpherson.

Winnipeg, Man.—Electrograph Company of Canada, Limited, \$100,000. W. M. Houston, Elsie G. Houston, W. R. Mulock; Emery's Coal and Wood Yards, Limited, \$5,000. H. F. Emery, W. Sheridan, C. Thomas; McManus and Howard, Limited, \$20,000. H. L. Howard, W. Simpkin, W. McManus; The Sunshine Mining Company, Limited, \$1,500,000. A. E. McDonald, H. A. McDonald, J. R. Woodley.

Toronto, Ont.—Bermuda Bunkering Company, Limited, \$30,000. W. W. Perry, C. H. G. Leggott, K. MacKenzie; Dodge Manufacturing Company, Limited, \$1,500,000. W. G. Thurston, W. C. Caulton, C. F. Wheaton; Revolving Wardrobe Company, Limited, \$50,000. R. J. W. Barker, J. S. Denison, L. A. Richard; Federal Properties, Limited, \$40,000. R. H. M. Temple, F. C. Allen, W. Bowler; Ely, Limited, \$40,000. E. F. Ely, Ethel R. Ely, Edna L. Aiken.

Toronto, Ont.—Musical Instruments, Limited, \$540,000. A. T. Pike, J. A. Moore, A. Wilkinson; Beaver Board Timber Company, Limited, \$50,000. J. W. Bicknell, J. B. O'Brien, A. T. Maher; Toronto Hockey and Amusement Company, Limited, \$50,000. Emma P. King, H. G. Keen, Eva Levitt; Regal Films, Limited, \$375,000. D. McArthur, J. Aitchison, A. T. Struthers; Specialty Shop Wearing Apparel, Limited, \$40,000. G. Grant, A. Silk, A. Dods; Reid Products Company, Limited, \$40,000. R. H. Reeves, L. A. Reeves, A. C. F. West.

Winnipeg, Man.—The Arena Club, Limited, \$5,000. S. Cuthbert, W. Hart, T. J. Casey; the Mansbridge Gray Electric Heater Company, Limited, \$50,000. R. T. Ferguson, R. E. Davis, C. E. Reynolds; the Middle West Grain Company, Limited, \$50,000. F. A. Bean, J. M. Bruzek, W. L. Harvey; Universal Supply Company, Limited, \$5,000. D. Crawford, E. R. Chapman, S. H. Green; Western Engineering Company, Limited, \$40,000. J. F. Davidson, S. W. McMurray, C. F. Publow; Finnie and Murray, Limited, \$300,000. G. C. Murray, W. L. McLaws, F. A. Johns.

Montreal, Que.—The Page Farms, Limited, \$49,000. L. P. Leblanc, E. Holland, J. Pettit; Berlind Phonograph Company, Limited, \$20,000. L. Millman, J. Kibrick, A. Millman; R. H. Howard and Company, Limited, \$10,000. R. H. Howard, W. J. Equi, L. Garneau; the Montreal Live Stock Exchange Incorporated, \$20,000. C. G. Derome, J. Ducharme, J. Bruneau; G n reux Motor Company, Limited, \$49,000. J. A. Trempe, E. Doray, A. Dumoulin; Produits Theriault, Limit e, \$16,000. J. P. Theriault, D. Banville, J. C. Audet; St. Lawrence Progressive Real Estate Company, Limited, \$10,000. A. R. W. Plimsoll, H. Langevin, A. Chouinard; Rapid Printing Company, Limited, \$20,000. W. B. Hope, H. F. Hope, A. H. Hudon; the Crystal Skirt Company, Limited, \$45,000. B. Wilanski, J. H. Wilanski, H. MacKay; Canadian Silk and Dye Works, Limited, \$250,000. W. H. Langelier, A. E. Clement, L. J. Bisson; the Anglo-Canadian Factors, Limited, \$10,000. L. Daoust, A. Daoust, Elsie Bramson; British Chemical Company, Limited, \$50,000. G. R. Drennan, A. G. Yeoman, H. W. Jackson; the Prudential Credit and Financial Bureau, Limited, \$20,000. J. Y. Fortier, G. Duhamel, H. Weinfield; Premier Waterproof Clothing Company, Limited, \$50,000. S. Cohen, B. B. Goldman, I. Ballon; Trudeau Carriage, Limited, \$49,000. T. Trudeau, M. Renaud, J. L. Poirier.

The Wellington Milling Company, P.E.I., \$10,000, M. Delaney, E. F. Gaudet, J. C. Arsenault, has applied to parliament for letters patent.

TOTAL TRADE WAS \$1,668,880,000

Analysis of Figures of Canada's Commerce During Second Year of War

Canada's total trade, exclusive of coin and bullion, during the second year of war, was \$1,668,880,000, as compared with \$920,532,000 for the preceding 12 months; the balance of trade in Canada's favor grew to \$359,860,000, as compared with \$89,088,000 for the year ending with August, 1915; the aggregate favorable trade balance for the two years is \$448,948,000, and the export of manufactured articles for the two years aggregated \$453,867,000, or more than four times the total value of manufactured exports for the two years preceding the war.

During the 12 months ending with August last the imports of dutiable goods totalled \$365,979,000, and the duty collected amounted to \$125,572,000.

Included in the imports are foodstuffs valued at \$73,754,000, including \$17,000,000 worth of provisions, \$10,000,000 worth of breadstuffs, \$16,000,000 worth of fruit and \$29,000,000 worth of sugar, molasses, etc. The imports of provisions during the 12 months were more than three times the imports of the preceding year.

Sending Foodstuffs Overseas.

Canadian exports of provisions, principally to Great Britain, increased to \$76,425,000, as compared with \$52,650,000 for the preceding 12 months. The exports of cheese increased from \$21,961,000 to \$29,733,000; meats from \$18,456,000 to \$32,233,000; butter from \$631,000 to \$2,168,000; animals from \$14,649,000 to \$16,668,000. The exports of breadstuffs, wheat, flour, etc., increased from \$116,774,000 to \$360,720,000.

The total value of precious stones imported during the year was \$1,298,000. Other luxuries include silks and manufactures of silks, \$11,143,000; spirits, wines, etc., \$3,961,000; tobaccos, \$6,233,000; watches, \$1,482,000. The total value of these articles imported during the second year of the war

was \$24,117,000, and during the first year \$18,050,000, making a total of \$42,117,000 for the two years.

In regard to the relative growth of trade with Great Britain and with the United States the figures show an increase of \$36,461,000 in imports from Britain, and of \$208,090,000 in imports from the United States. Exports to Great Britain increased by \$395,483,000, and exports to the United States by \$61,126,000.

From the mother country Canada bought last year goods worth \$111,584,000, and sold \$646,504,000. From the United States Canada imported goods worth \$492,483,000, and exports to the United States totalled \$247,984,000. Canada's favorable trade balance on trade with Great Britain for the year was \$534,920,000. On Canada's trade with the United States the adverse balance was \$244,499,000.

MISUSE OF CHEQUES IN CANADA

The misuse of bank cheques in Canada drew criticisms from the counsel in the action brought by the Columbia Graphophone Company against the Union Bank at Toronto.

Mr. A. C. McMaster, Toronto, cited instances in which it had been held that the bank was held liable for the amount of forged or raised cheques honored by it, and that negligence of the customers to keep a proper check on its banking account did not relieve the bank of any liability. Admitting that Ott, of the Columbia company, did forge or raise the cheques in question, the lack of care on the part of his managers could not be designated negligence, and to support this argument he quoted a British decision.

Mr. P. B. Wilson, of Winnipeg, remarked on the loose way in which blank cheques can be had anywhere in Canada. In clubs, hotels, and, indeed, in any place of note it was easy to get a cheque. "How different it is in Britain," he said, "and it is common knowledge that old countrymen laugh at our system here, and say it is an invitation to crime." He held that decisions in British courts could not be held to apply to this case owing to the better way in which the banks were protected.

WHAT BRITISH WAR LOANS YIELD

Analysis of the Six Principal Securities Offered to the Public

Whatever criticisms may be urged against the manner in which the war has so far been financed, it must be conceded that the British government has now so arranged the form and method of issue of its various appeals for the savings of the community as to suit the means of every British citizen from the highest to the humblest.

The following table, compiled by the London Financial Times, shows the six war securities with which the public is mainly concerned together with the available yields:—

Security.	Redeemable.	Price.	Yield %.
			£ s. d.
Treasury bills	in one year	94½	5 16 0
War expenditure certificates	in two years	89	5 18 9
6% exchequer bonds ...	1920	100	6 0 0
5% war savings certificates	in five years	15/6 per £1	*5 0 0
3½% war loan	1925-28	85	5 4 6
4½% war loan	1925-45	95½	4 18 6

*Compound interest free of income-tax.

Many of these securities have been purchased in Canada. Treasury bills not being issued for denominations of less than £1,000 are not the investment for the small investor. Time was when the treasury bill offered by tender was the monopoly of Lombard Street, but the high yields lately offered and the introduction of the system of a continuous sale of bills at fixed prices over the counter of the Bank of England have greatly widened the circle of buyers. Banks and discount houses are still large holders, but included in the present total of over £1,000,000,000 are substantial amounts standing at the credit of the joint stock companies, merchants and private individuals all over the country. Taking for example a treasury bill having a currency of 12 months the buyer would pay at the rate of 94½ now and receive at the rate of 100 per cent. at the end of 12 months.

War Expenditure Certificates.

War expenditure certificates are two-year treasury bills under another name. The only difference that concerns the public is that these certificates may be obtained in denominations of as low as £100. The investor pays £89 now and receives £100 at the end of two years. Allowing for the fact that the interest is not paid annually or semi-annually, but in one sum at the end of the two years, the yield on the certificates may be calculated at £5 18s. 9d.

Both treasury bills and war expenditure certificates are obtainable either direct from the Bank of England or through the agency of any banker or broker. The two-year securities have never caught the public fancy, the total outstanding being only £25,000,000, which is small compared with the issued amounts of "Treasury" and exchequer bonds. In the last week or two the certificates have been rather put into the shade by the introduction of 6 per cent. exchequer bonds having a life of just over three years. From the purely income point of view these bonds give the highest yield of any British government security. They are issued in denominations of as low as £5, being obtainable at any post office in the country, and have naturally, by virtue of the extra 1 per cent. return, brought sales of 5 per cent. exchequer bonds almost to a standstill. Interest is payable half-yearly on 16th February and 16th August, and the bonds are repayable at par on 16th February, 1920.

Payment of Income Tax.

The interest on registered bonds or those left on deposit at post offices is not subject to the deduction of income-tax at source, but holders are liable to the payment of income-tax at the appropriate rate and must include in their declaration of income the sums received as interest on their exchequer bonds. The discount payable at redemption upon treasury bills and war expenditure certificates is also subject to income-tax; the tax is not deducted at source, but the recipient of the discount must declare it to the income-tax authorities and be assessed upon it along with his other income.

When we come to five-year war savings certificates we reach the one British security that is immune from income-tax. That is to say, that not only will no tax be deducted at the end of the five years, but there is no obligation upon any holder, whatever his income may be, to return the income obtained from these certificates. It is for this reason that the government has limited the maximum which any individual may buy to 500 certificates, the cost of which is £387 10s. The war savings certificates were a happy idea of the treasury for promoting thrift among the working classes. The great feature about them is their simplicity. The working man is told that for every 15s. 6d. he puts by now he will get back a sovereign in five years' time; there are no vexatious formalities to go through, no income-tax worries, and the certificates are obtainable at any post-office. The interest works out at 5 per cent. compound, with an additional bonus attaching to immunity from taxation provision that varies according to the extent of the holder's liability to pay income tax.

Longer-Dated War Loans.

Of the two longer dated war loans the bulk of the old 3½ per cent. loan has now been converted, only 62¼ millions remaining in existence. The interest yield upon this loan at 85 is only £4 2s., but as repayment is fixed for 1928 at latest the total yield, including the gain on redemption, is about 5½ per cent. Those who require a larger immediate return, plus "prospects," will give the preference to the 4½ per cent. war loan. At 95 cum a full half-year's dividend on December 1st, it offers in interest £4 16s. per cent., and allowing for redemption at the latest date (1945) the total yield is £4 18s. 6d. But the real attraction about this loan lies in the option that the holder, possesses of treating each £100 of stock as the equivalent of cash by way of subscription for the next long-dated war loan. Thus, if the next war loan were a 5 per cent. issue at par, the purchaser of the existing 4½ per cents would be getting in at 5 discount (or say 7 discount, reckoning the accrued interest earned in the price of the stock). Should the next loan be a 4 per cent. issue at 80 the purchaser of the existing 4½ per cents for on outlay of 95¼ gross (say 93 net) would secure the right to £125 of such new loan. And even in the unlikely contingency of the government being able to raise another 4½ per cent. loan at par, the buyer of the existing 4½ per cents at 95 cum dividend would still derive the advantage of a capital increase of some 7 points, because obviously another 4½ per cent. issue at par must ipso facto imply that the existing loan stood at, to something over, its face value.

CANADA'S FRENCH TRADE

"Because Canadian products are practically unknown in France and because French goods are insufficiently known in Canada" are the reasons advanced by Honorable C. P. Beaubien, Montreal, for the present comparatively small volume of trade between the two countries. Mr. Beaubien has submitted to Sir George Foster an interesting suggestion for trade extension, which, in brief, is as follows: "That two sample trains, which simultaneously would be organized and widely circulated, one with Canadian products in France and the other with French goods in Canada. To facilitate the carrying out of this project, the four big railway companies of France, the Paris-Lyon-Mediterranee, the Paris-Orleans and Les Chemins de fer de l'Etat et du Midi, are to grant, on their respective lines, free circulation to the Canadian sample train in France, provided similar gratuity of transportation would be accorded the French sample train in Canada."

Each of these companies has assented to the request. La Compagnie Generale Transatlantique has also agreed to carry gratuitously both, coming and going, the sample goods of France and Canada.

Both the Canadian Pacific and the Grand Trunk Railways have acceded to the suggestion, and no doubt their example will be followed by the Canadian Northern Railway.

The Agents' News, of the Imperial Life Insurance Company, is a live insurance man's journal, and the current number furnishes much news from the firing-line.

High Grade Investments

The following High Grade Canadian Government and Municipal Bonds are a few selections from our list of investment offerings, to yield from 4.95% to 6%.

WATERED STOCK AND GOODWILL

What is Goodwill?—How It Should Be Valued and Placed Among Assets

For purposes of definition, the goodwill of a business is considered "the connection between the business and its customers and the probability of being able to continue and to develop such connection advantageously." Goodwill is a desirable and valuable asset, suggested Mr. D. Kerr, C.A., Montreal, in a recent address, a portion of which appeared in the previous issue of *The Monetary Times*.

In purchasing the business and goodwill of a concern, in addition to the other assets, it is the usual practice, upon a fair basis, to pay an amount equal to three to seven times the average annual net profits to the stock holders, based upon the past history of the concern and future possibilities. This refers to the average commercial concern.

The value at which the goodwill of a concern should be carried upon the balance sheet should be not more than the amount, if any, paid therefor.

If \$500,000 be paid for the goodwill acquired, then an asset, "Goodwill, \$500,000," should appear.

The concern may, if it so desire, write off this goodwill value, but it should not increase it. Of course, if other concerns be purchased and a price be paid for their business and connection, in addition to the other assets acquired, then the goodwill account would be correspondingly increased.

The actual value of the goodwill of any concern well organized and operated upon a profitable basis would likely increase year after year. The goodwill account should not, however, be increased.

Price Paid for Goodwill.

Many concerns start their own business, having purchased no goodwill of any other. If profitable businesses be built up, then very valuable goodwills will accrue to the concerns. But their values will not be shown on the books.

When the goodwill of a concern is purchased at a specific figure, the consideration being paid in cash or securities of the purchasing company, such goodwill cost should, as stated, be clearly set forth as is done in connection with the price paid for any other asset, whether paid for in cash or securities.

Frequently, however, a concern is purchased for a round sum, say \$1,000,000, this total amount representing the purchase price of all of the assets including the goodwill, the contract not specifying the proportion applicable to each asset.

No corporation, under these circumstances, would show in a published statement, an item such as "plant, buildings, machinery, goodwill, inventories, book debts, cash, etc., \$1,000,000." Such an item in a published balance sheet is unknown.

Valuation of Assets.

The book debts are always examined and valued as are also the inventories and other current assets. These then are set up separately. Sometimes concerns do not value the fixed or capital assets, but, in addition to showing separate items for the value of the inventories, book debts, cash, etc., show a total figure only for all of the "plant, buildings, machinery and goodwill," i.e., the balance of the assets.

There is no sound reason why valuations should be made of the current assets and no valuations made of the fixed or capital assets.

Many concerns, however, do value all of their assets except goodwill, thereby arriving at a fair and reasonable value for the buildings, machinery inventories, book debts, etc., separately.

Water and Book Values.

The method adopted under these last mentioned circumstances in order to arrive at the book value of the goodwill of the concern, is to deduct from the total par value of the consideration paid, the total value of these assets upon which fair and reasonable values have been placed. For illustration purposes, let us assume that \$1,000,000 capital stock has been given for the assets and business of an operating company. The valuation of the various assets, excluding goodwill, is \$600,000. Then the asset of goodwill is carried at the difference between these two figures, that is \$400,000.

Thus it will be observed that the more watered stock included in the capitalization, the greater is the book value placed upon the goodwill.

The mere issuing of watered stock does not increase the actual value of the goodwill.

(To be Continued.)

LOAN FOR WHEAT PURCHASE

A proposed credit of \$30,000,000 for the British government, which was understood would be undertaken by the chartered banks of Canada for the purchase of Western Canadian grain, is now said to have been arranged with the Corn Exchange Bank of New York.

It was originally suggested that the credit would be in the form of a three-cornered transaction, the banks to undertake the financing of grain purchases for the British government made through the government's grain-purchasing agents. The loan was apparently to be divided among the banks on a pro rata basis, similar to the plan followed in other credit arrangements.

It is likely that a loan may be made by Canadian banks later for financing further grain purchases.

AN HISTORIC PROCLAMATION

The following is the text of the proclamation issued from Ottawa on November 11th in regard to the appointment of the Duke of Devonshire, who arrived here on Saturday, as governor-general of Canada:—

DEVONSHIRE.

PROCLAMATION.

CANADA.

By His Excellency the Right Honorable Victor Christian William, Duke of Devonshire, Marquess of Hartington, Earl of Devonshire, Earl of Burlington Baron Cavendish of Hardwicke, Baron Cavendish of Keighley; Knight of the Most Noble Order of the Garter; One of His Majesty's Privy Council; Knight Grand Cross of the Most Distinguished Order of St. Michael and St. George; Knight Grand Cross of the Royal Victorian Order, Governor-General and Commander-in-Chief of the Dominion of Canada.

To all to whom these presents shall come.—GREETING:

A PROCLAMATION.

WHEREAS His Majesty the KING, by Commission under His Royal Manual Sign and Signet bearing date at the Court of St. James's the eighth day of August, 1916, has been graciously pleased to appoint me to be, during His Royal pleasure, His Majesty's Governor-General and Commander-in-Chief in and over His Dominion of Canada, and has further in and by the said Commission, authorized, empowered and commanded me to exercise and perform all and singular the powers and directions contained in certain Letters Patent under the Great Seal of the United Kingdom of Great Britain and Ireland, bearing date at Westminster the fifteenth day of June, in the year of Our Lord, one thousand nine hundred and five, constituting the said office of Governor-General, or in any other Letters Patent adding to, amending, or substituted for the same according to such Orders and Instructions as the Governor-General for the time being hath already received, or as have been given to me with the said Commission or as I shall hereafter receive from His Majesty.

NOW, THEREFORE, KNOW YE, that I have thought fit to issue this Proclamation in order to make known His Majesty's said appointment, and I do also hereby require and command that all and singular His Majesty's Officers and Ministers in the said Dominion of Canada, do continue in the execution of their several and respective offices, places and employments, and that His Majesty's loving subjects and all others whom it may concern do take notice hereof and govern themselves accordingly.

GIVEN under my Hand and Seal at Arms at Halifax, this 11th day of NOVEMBER, in the year of Our Lord one thousand nine hundred and sixteen, and in the seventh year of His Majesty's Reign.

You are Alive To-day

But should you be suddenly taken away to-night would your wife, family, and dependents receive the protection that you have always intended they should have?

This protection can only be assured by a properly drawn up will and the appointment of executors who will administer its provisions in an efficient manner.

Let us prepare your will and attend to its administration.

The officers of this company will guard the interests of your estate and your heirs, and will be glad to correspond with you regarding wills, or any other trust business.

AUTOMOBILE INSURANCE IN ONTARIO

Ontario Motor League Wants Standard Policy Conditions

On behalf of the Ontario Motor League, Mr. W. G. Wright, Toronto, appeared before Judge Masten, who is conducting the Ontario fire insurance inquiry. Mr. Wright said. A policy insuring against fire only is almost impossible to obtain from the insurance companies to-day, except in the form of a fire, transit and theft policy with the transit clauses eliminated. This fact is one of the most serious which the league have to complain about, because when a person insures against fire in Ontario the policy is subject to the Ontario statutory conditions and the league is of the opinion that the fire part of the policy issued by the companies insuring automobiles in Ontario are subject to the Ontario statutory conditions, notwithstanding all that may have been placed on the policies by the companies. The object of issuing the automobile policy in this form appears to us to be an endeavor to get away from the statutory conditions in the adjustment of fire losses.

What the motor league believes should be legislated upon is that it should be granted a policy on automobiles covering fire insurance, subject to the Ontario statutory conditions and to no other conditions whatever, in so far as the adjustment for claim under the fire loss portion of the contract may be concerned. Then it should be provided that companies which are entitled to insure against explosion, against loss while in transport and against theft, might insure against these for an extra premium, with a special clause attached to their policy covering these features of liability. It is desirable that the fire policy be left as a fire policy contract, so that as many companies as possible shall write on the fire insurance end of it, because at the rate the automobile business is developing, it will require many companies to carry the risk, and if special automobile policies are devised, such that only a few companies are legally qualified to write them, it will result in a shortage of insurance cover. Besides, the conditions of the automobile policy as issued are practically those of the New York standard fire policy, which are not nearly so favorable as are the Ontario statutory conditions.

Arbitration for Appraisal.

The automobile policy as at present written provides for appraisal instead of the arbitration provided for in the Ontario statutory conditions. The fire insurance companies endeavored to have appraisal made law in 1912 but the statute revision committee and parliament refused to agree with the views of the fire insurance companies. Appraisal is not a game which the two parties are playing on an equal basis. The companies have expert appraisers and adjusters. The assured has none, and the assured has not a chance in a thousand of coming out even on appraisal, particularly on a thing like automobiles.

What we consider an unfair condition of the automobile policy is that which reads: "That the company will be liable for theft, robbery or pilferage by any person or persons, other than those in the employment, service or household of the insured." A theft of a car is frequently the act of chauffeurs or of other servants, and surely the insured should be able to obtain insurance which will cover his loss in the event that one of his servants proves recreant to his trust. In fire insurance it is the intention of the fire policy to cover the insured against losses caused by the negligence or malintent of his employees. It is not too much to ask that the automobile policy be as broad.

Protection against Liability.

The liability policy as usually issued by the companies on automobiles contains some peculiar clauses, and some unjust ones. The policies usually insure against loss by reason of the liability imposed by law upon the insured for damages on account of injury to or destruction of property of every description belonging to others than the insured, resulting solely and directly from an accident due to the ownership, maintenance and use of the automobiles insured. If a collision causes the destruction of the car of another party by burning there is no doubt that the owner of the car causing the damage would be liable for the loss by fire, owing to the liability imposed by law on him, yet this policy would not cover him against this loss, although he has insured intending to be covered against liability imposed by

law, nor can he buy a policy which will cover him in regard to this liability. Then the policy stipulates that the limit of the companies' liability shall be the actual cost of repairing the damaged property, but when one car runs into another the liability of the owner of the car which caused the damage is not limited to the loss caused by the breakage, nor is he cleared when he pays the cost of repairs, because the loss of use of the other car might run into four or five times the amount of the cost of repairing, and against that the person who carries liability insurance policies should be covered.

There is also a clause in the policies providing that within 30 days after sworn proofs of loss have been filed the company may elect to make repairs within a reasonable time. This means that the assured must file his proofs, then wait 30 days before the company elects to take action, and then he must be out of the use of his car during the period, a reasonable time, the company may take to make these repairs. With the fire insurance policy the time is limited to 15 days. What it really means is that from two to three months may be exhausted before the assured may reasonably go at it to make his own repairs or deal with the proposition. This is not fair in the case of an automobile, because the loss of use of an automobile for three months means a large proportion of its value being lost in depreciation and loss of use.

Not a Fair Proposition.

The limiting of the liability of the company in the case of policies covering liability to the public and also personal accident to the time that the car is being driven by properly authorized persons is not a fair proposition to the insured, because the risk of damage is greatest while the car is in the hands of a thief or joy rider, and the owner needs just such protection under his liability policy, and expects he is getting it.

While the model policy of the Royal Automobile Club in England is, as a whole, impracticable in Canada, owing to the entirely different conditions under which Canadians are operating, yet some valuable suggestions can be obtained from it in the preparation of standard policy conditions for automobile insurance in Ontario.

With about 50,000 owners of automobiles of one kind and another in Ontario, it is the opinion of the Ontario Motor League that the subject of automobile insurance is of sufficient importance to justify the appointment of a special commission to investigate into automobile conditions and to prepare standard policy conditions for the three great branches of automobile insurance.

MINES OF NORTHERN ONTARIO

An excellent description of the mines of Northern Ontario is contained in a brochure, "Silver and Gold," issued from Cobalt. It contains 100 views and many interesting facts and figures. The Cobalt camp has produced \$122,754.525 of silver and the Porcupine camp \$18,852,277 of gold. These figures are proof of the productive power of Northern Ontario's mineral areas. The active properties are described in the volume.

"Silver and Gold"; \$1.60, post-paid. Published by the Cobalt Daily Nugget, Limited, Cobalt, Ont.

TRADE COMMISSION SUBMITS REPORT

The Canadian trade commission, headed by Mr. J. W. Woods, of Toronto, which last summer visited Great Britain, France, Italy and Belgium, studying ways and means of developing Canadian trade, last week submitted a report to the minister of trade and commerce, as forecasted in *The Monetary Times*. There are a number of recommendations. The report will be made public shortly.

Pamphlet No. 6 of "Letters from the Front," a partial record of the part played by officers of the Canadian Bank of Commerce in the European war, has been issued. Recent additions to the casualty lists show that the officers of this bank are in the front ranks in the Somme offensive.

LEGAL NOTICES

VAN DER LINDE RUBBER COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 26th day of October, 1916, incorporating Sophia Tutty, bookkeeper, Ella Lester Kelly, Susie Ross and Myrtle Etouille Thurgarland, stenographers, William Archibald McFarlane and Vincent Thomas Aloysius Foley, students-at-law, and Lester Millman Keachie, barrister-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on the business of manufacturers of and dealers in rubber and moulded goods and goods and products in which rubber of any kind whatsoever or any analogous substance may be used and to manufacture and deal in plastic goods, materials and products of all kinds whatsoever, and to cultivate rubber plants, guayule and all other plants capable of being used for the manufacture of rubber or similar products and plastic goods, and to carry on the business of rubber plantations in all of its branches, and to carry on and work the business of manufacturers, winners and buyers of every kind of rubber plants and vegetable, mineral or other product of the soil; to prepare, manufacture and render marketable any such product, and to sell, dispose of and deal in any such product, either in its prepared, manufactured or raw state, either by wholesale or retail, and to carry on the business of chemists and electricians, and manufacturers of and dealers in all kinds of chemicals and electrical goods; (b) To buy, sell, manufacture, refine, manipulate, import, export and deal in all substances, apparatus and goods capable of being used in any such business as aforesaid or required by customers of or persons having dealings with the company, either by wholesale or retail; (c) To own, construct, operate, manage and deal with ships, barges, vessels and other marine craft, and so far as may be expedient to carry on the business of general merchants and buy, lease or otherwise acquire and to clear, plant and work rubber estates and plantations or any interest therein, as may be deemed advisable in the interests of the company; (d) For the purpose of supplying the needs of the company's business, to purchase, lease or acquire any interests in lands, water powers and water privileges and to develop therefrom any power, electrical or other energy needed for said business on or outside the lands of the company and to use and transmit the same and to sell, lease or dispose of said lands or interests therein and to sell or dispose of surplus power or energy not required for the needs of the company and to enter into working arrangements with other companies, persons, firms or corporations for the use or transmission of such surplus and to establish, operate and maintain any electric, gas or other lighting, heating or power plant and to sell or dispose of such surplus electric, gas or other light, heat and power and all the residual products of such plant; provided, however, that any sale, distribution or transmission of electric energy for light, heat and power beyond the lands of the company shall be subject to all provincial and municipal laws and regulations in that behalf; (e) To acquire by purchase, lease, concession, exchange or otherwise, land, buildings and hereditaments of any tenure or description and any estate or interest therein, and any right over or connected with land, and to turn the same to account as may seem expedient, and to construct, reconstruct, erect, alter, operate, maintain and manage all buildings, erections, factories, ships, storehouses, depots, machine shops, engine houses and other constructions and erections for its business and to hold, improve, decorate, furnish such buildings and erections as may be deemed proper, and to acquire as aforesaid all other property, movable and immovable, necessary and useful for carrying on any of the purposes of the company, and with power to sell, lease, exchange or otherwise dispose of any such property, lands or interests therein or rights thereover as the company may deem proper; (f) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (g) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (h) To apply for, purchase or otherwise acquire and use, any inventions, patents, brevets d'invention, trade marks, trade names, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention or discovery which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop, improve or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (i) To enter into partnership with any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (j) To take, or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company, notwithstanding the provisions of section 44 of the said Act; (k) To enter into any arrangement with any government or authorities, supreme, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such government or authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (l) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors in business) or the dependents or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (m) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose, which

may seem directly or indirectly calculated to benefit the company; (n) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business and in particular any land, buildings, easements, machinery, plant, stock in trade, as may be required and to construct, maintain and alter any buildings or works necessary or convenient for the purposes of the company; (o) To construct, improve, maintain, develop, work, manage, carry out or control any roads, ways, tramways, branches or sidings, bridges, reservoirs, watercourses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control thereof; (p) To invest and deal with the moneys of the company not immediately required in such manner as may from time to time be determined, and to lend money to such persons and on such terms as may seem expedient, and in particular to customers and others having dealings with the company, and to guarantee the performance of contracts by any such persons; (q) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company; (r) With the approval of the shareholders, to remunerate any person or company by the issue of fully paid-up stock or otherwise, for services rendered or to be rendered in placing or assisting to place or guaranteeing the placing of any of the shares in the company's capital, or any debentures, bonds or other securities of the company, or in or about the formation or promotion of the company or the conduct of its business; (s) To issue paid-up shares, bonds, debentures or other securities of the company in payment or part payment for any property or rights which the company may desire to acquire or, with the approval of the shareholders, for any services rendered or to be rendered or for any work done or to be done for the company or in or towards the payment or satisfaction of debts or liabilities owing by the company; (u) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (v) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (w) To do all such other things as are incidental or conducive to the attainment of the above objects; (x) None of the powers given by any paragraph aforesaid are to be restricted or limited by reference to or inference from any other paragraph. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "van der Linde Rubber Company, Limited," with a capital stock of three hundred and fifty thousand dollars, divided into 3,500 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 26th day of October, 1916.

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of February, 1917, for the right to cut pulpwood and pine timber on a certain area situated on the Black Sturgeon River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure, for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honourable the Treasurer of the Province of Ontario, for ten thousand dollars (\$10,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$10,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,
Minister of Lands, Forests and Mines.
Toronto, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

BANK OF MONTREAL

Notice is hereby given that a Dividend of Two-and-one-Half per Cent., upon the paid-up Capital Stock of this Institution, has been declared for the current quarter, also a Bonus of One per Cent., both payable on and after Friday, the First Day of December next, to Shareholders of record of 31st October, 1916.

By order of the Board,
FREDERICK WILLIAMS-TAYLOR,
General Manager.

Montreal, 20th October, 1916.

THE ROYAL BANK OF CANADA.

DIVIDEND No. 117.

Notice is hereby given that a Dividend of Three per cent. (being at the rate of Twelve per cent. per annum) upon the Paid-up Capital Stock of this Bank, has been declared for the current quarter, and will be payable at the Bank and its Branches on and after Friday, the first day of December next, to Shareholders of record 15th November.

By order of the Board.
C. E. NEILL,
General Manager.

Montreal, P.Q., October 17th, 1916.

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of December next for the right to cut pulpwood and pine timber on a certain area situated on the Pic River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet, board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honourable the Treasurer of the Province of Ontario, for twenty-five thousand dollars (\$25,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$25,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

Toronto, August 28th, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

THE CANADIAN BANK OF COMMERCE.

DIVIDEND No. 119.

Notice is hereby given that a quarterly dividend of 2½ per cent. upon the capital stock of this Bank has been declared for the three months ending 30th November next, together with a bonus of one per cent., and that the same will be payable at the Bank and its Branches on and after Friday, 1st December, 1916. The Transfer Books of the Bank will be closed from the 16th to the 30th of November next, both days inclusive.

By Order of the Board,
JOHN AIRD,
General Manager.

Toronto, 27th October, 1916.

TORONTO PAPER MFG. COMPANY, LIMITED

DIVIDEND NOTICE

Notice is hereby given that a dividend of three per cent. has been declared on the paid-up capital stock of this Company for the half-year ending December 31st, 1916, and will be payable on and after January 2nd, 1917, to shareholders of record at the close of business on December 15th, 1916. Transfer books will be closed from December 15th, 1916, to January 1st, 1917, both days inclusive.

By order of the board.
A. W. BRIGGS, Secretary.

Toronto, November 10, 1916.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE STORY OF A YOUNG FINANCIAL MAN'S SUCCESS.—A financial man, thirty-three years of age, came to our office four years ago to take up a new line of business—a line against which he had been prejudiced, but which he knew carried great rewards for the successful. His average commissions this year will be over \$5,000.00, and he has built up a future income of over \$3,000.00 a year on business already written. We are enlarging our organization to prepare for an enormous expansion of business during the next few years. We have positions for two good men with successful records. This offer will be open during the next week. Only applicants of unquestioned integrity and with the highest references will be considered. W. A. Peace, Manager Toronto Branch, Imperial Life Assurance Company, 20 Victoria Street, Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

TORONTO'S NEW DEPARTMENT STORE

A large departmental store is to be erected in Toronto on the block enclosed by Yonge, College, Hayter and Ter-aulay Streets. Mr. H. H. Williams, of the H. H. Williams real estate company, is acting on behalf of the promoters. In the negotiations with the city Mr. Williams stated that the actual investment in the property when completed would be about \$20,000,000. A fixed assessment of ten cents per cubic foot was desired, but after a report from Mr. Bradshaw, Toronto's finance commissioner, the request for a fixed assessment was withdrawn. The proposed store will be an eight-story building, estimated to cost \$5,500,000. When the ultimate plans are carried out, a fifteen-story building will be constructed, costing nearly \$9,000,000. The promoters have agreed to hand over to the city three strips of an average depth of 20 feet on Yonge, College and Hayter Streets in return for the closing of Buchanan Street. The current impression is that the store, which will employ 15,000 people, will be built for the T. Eaton Company, Limited.

IMPROVED CONDITIONS IN SASKATOON

Interviewed by *The Monetary Times* with reference to conditions in Saskatoon and the surrounding district, Mr. W. R. Kemp, of the Hill Agencies, Limited, Saskatoon, said: There has been a great improvement during the past year. Even at the present time the demand for houses to rent is brisk, and there is probably not a vacant suite in an apartment block in the city. Considerable property in the way of houses have changed hands, and a number of vacant lots on streets with sewers and water have been sold to those living on the outskirts of the city who are moving their houses closer in. Rents are gradually increasing. Another indication of financial improvement is that we have recently had money left with us by private parties for investment. We have in the city close to two hundred loans on the monthly repayment basis, and 90 per cent. of these are in good standing; in fact, collections are good. Wholesalers and merchants report steady and rapid improvement.

Owing to the bad weather the thrashing in the surrounding district has been somewhat delayed, but at the present time there is about 70 per cent. of the thrashing done, and if the present good weather keeps up, three weeks will finish the work.

Insurance business in all branches is good and the premiums are not hard to collect.

DEBENTURES FOR SALE

TENDERS FOR DEBENTURES

Tenders will be received up to 2 o'clock p.m. on Friday, 24th November, 1916, for \$42,000.00 debentures of the County of Bruce. Debentures are issued for Patriotic purposes, payable in ten annual instalments. Interest 5%. Principal and interest payable 20th December each year at Bank of Commerce, Walkerton. Coupons attached. Equalized assessment of County \$28,192,131.00. Debenture debt \$202,039.39, including this issue. Delivery to be accepted and payment to be made at Walkerton on delivery of debentures on December 20th, 1916.

Tenders will be opened at County Treasurer's office, Walkerton, on Friday, November 24th, 1916, at 2 p.m. Tenders to be marked "Tender for debenture," and addressed to NORMAN ROBERTSON, County Treasurer, Walkerton.

TOWN OF PEMBROKE DEBENTURES FOR SALE

\$68,500.00 5% Bonds issued for Public School purposes payable in thirty annual instalments of \$4,456.00 each on October fourth.

Offers for the purchase of the above debentures will be received up to Monday evening, 27th November, 1916, addressed to W. R. Beatty, Chairman of Finance Committee, delivery here.

A. J. FORTIER,
Town Clerk.

TENDERS FOR LOAN

So Marked will be received at this office up to 12 noon on the 4th day of December next, from parties disposed to purchase Debentures or Stock of the City of Halifax in whole or in part, as below described, sufficient to produce at the price offered the sum of \$130,000.00, to be used by the City for the following purpose:—

To redeem Consolidated Fund Debentures,	
1880, due January 1st, 1917	\$183,000.00
Under Chap. 51 Acts 1905, Chap. 84 Acts 1909	
Less provided by General Sinking Fund	53,000.00
	<u>\$130,000.00</u>

For which coupon debentures of One Thousand Dollars each or inscribed Stock Certificates of multiples of One Hundred Dollars will be given, payable in lawful money of Canada, or in gold of the present standard weight and fineness, on the first day of January, 1951.

Interest will be at the rate of 5 per cent. per annum, payable half-yearly, in lawful money of Canada, or in gold, at the Royal Bank of Canada's Branches in Montreal, Toronto or New York, and at the Office of the City Treasurer.

Parties loaning the money will be required to pay the accrued interest to the time of paying over the amount loaned. The loan to be paid in Halifax Funds, and the securities to be delivered in Halifax at the Office of the City Treasurer.

A General Sinking Fund is provided by law (Sec. 11, Chap. 51, Acts 1902) for the redemption of the Funded Debt of the City.

The City does not bind itself to accept the highest or any tender, and reserves the right to accept from any tenderer such portion of the whole as it deems necessary.

By order.

JAMES J. HOPEWELL,
City Treasurer.

Halifax, N.S., November 9th, 1916.

The Canada Paper Company has \$200,000 5 per cent. first mortgage bonds maturing in New York on May 1st, 1917.

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

A Good Living Wage

A Profitable Future

A Provision For Old Age

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policy-holders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

*Note.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending Sept., 1916, were: imports 1916, \$50,608,343; 1915, \$107,185,428, and exports 1916, \$275,552,035; 1915, \$94,628,533. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

"BULAK" Egyptian Cigarettes

"Bulak" Cigarettes are the supreme achievement of one of the greatest blenders of tobacco in Cairo, Egypt.

Their exquisite aroma is fully in keeping with their elegant appearance.

10 FOR 15^{C.}

FARMERS' CO-OPERATION vs. COMBINES

Mr. H. W. Wood, president of the United Farmers of Alberta, in a speech at Calgary, discussing the combinations which control food prices, said:—

"In the flour line, in the grocery line, and, in fact, in nearly every line which the farmer buys there are combinations which have determined to oppose the forward movement of co-operative methods by refusing to sell their goods to any farmers' co-operative company or association. This refusal is in a way a blow at the very foundation of co-operation, but I repeat that we will break such combines; with our force all mobilized throughout the length and breadth of the land, we will have sufficient power to ride down such opposition. These same combinations which now refuse to sell to co-operative companies will then seek our trade, for we will not have to buy from them."

ONTARIO'S MINERAL PRODUCTION

The Ontario Bureau of Mines' summary of mineral production for the first nine months of 1916 is as follows:—

Product—	Quantity.		Value \$.	
	1915.	1916.	1915.	1916.
Cobalt (ore), tons	92	98	12,472	10,591
do., oxide, pounds	135,337	378,732	107,363	231,947
do., metallic, pounds	76,979	172,055	66,562	146,467
Cobalt and nickel oxides (un-separated), pounds	2,501	57,026	500	22,890
Copper ore, tons		1,715	...	21,685
do., in matte, tons	14,057	16,989	2,024,658	6,285,930
Gold, ounces	281,712	363,955	5,826,941	7,513,734
Iron ore, tons	302,586	271,034	601,044	673,170
Molybdenite (concentrates), pounds		15,845		15,845
Nickel oxide, pounds	142,483	54,152	16,085	6,381
do., metallic, pounds	11,905	17,435	4,762	7,618
do., in matte, tons	24,054	31,046	5,360,536	15,523,000
Pig iron, tons	354,151	501,410	4,510,906	6,686,965
Silver, ounces	17,178,629	16,203,091	8,030,469	9,750,040

Bank Statement Shows Better Business

DEPOSITS Are Nearing \$1,500,000,000—Loans in Force Aggregate \$1,100,000,000—Commercial Activity and Crop Movement Reflected in Figures—Comparison of Two Years' Figures.

	October, 1915.	September, 1916.	October, 1916.	Year's inc. or dec.	Month's inc or dec.
Deposits on demand	\$392,042,193	\$454,148,049	\$489,230,234	+29.8	+ 7.7
Deposits after notice	701,336,850	816,374,171	814,297,404	+16.1	— 0.25
Current loans in Canada	780,785,754	752,545,756	774,928,222	— 0.74	+ 2.0
Current loans elsewhere	49,612,985	69,949,215	79,459,621	+60.4	+13.5
Loans to municipalities	45,682,230	38,708,745	37,613,530	—17.5	— 2.8
Call loans in Canada	74,574,270	88,145,851	90,412,023	+21.3	+ 2.6
Call loans elsewhere	120,681,624	173,877,586	189,346,216	+57.5	+ 9.2
Circulation	122,782,233	135,285,031	145,031,667	+18.8	+ 7.4

THE principal accounts in the October statement of the chartered banks made to the Canadian government are given above. Gains since the September return are as follows: Deposits on demand, 7.7 per cent.; current loans in Canada, 2.9 per cent.; current loans elsewhere, 13.5 per cent.; call loans in Canada, 2.6 per cent.; call loans elsewhere, 9.2 per cent.; circulation, 7.4 per cent. Decreases are shown in deposits after notice and loans to municipalities.

These figures indicate that better business conditions are prevailing in Canada. This with the crop movement's requirements brought more money into circulation and heavier borrowing from the banks.

Comparing *The Monetary Times'* records with October, 1915, the following changes since October, 1914, are noted:—

	Year's inc. or dec., Oct., 1915, compared with 1914.	Year's inc. or dec., Oct., 1916, compared with 1915.
Deposits on demand	+12.6	+29.8
Deposits after notice	+ 6.3	+16.1
Current loans in Canada	— 4.4	— 0.74
Current loans elsewhere	+18.09	+60.4
Loans to municipalities	— 3.5	—17.5
Call loans in Canada	+ 6.1	+21.3
Call loans elsewhere	+48.1	+57.5
Circulation	— 0.8	+18.8

In savings deposits the first decrease for the year is shown amounting to just over \$2,000,000. This is gratifying in view of the first payment of 30 per cent. on the second Canadian domestic war loan, on which a deposit of 10 per cent. had been made in September. The first payment fell due on October 15, on which date many investors paid in full for their bonds. Demand deposits were larger by \$35,000,000 and deposits abroad by \$16,000,000.

Taking domestic deposits, the figures for the past thirteen months are as follow:—

	On demand.	After notice.
1915—October	\$392,042,193	\$701,330,850
November	406,735,171	714,219,286
December	423,690,384	720,990,267
1916—January	387,002,926	714,264,486
February	389,825,667	728,242,609
March	389,165,388	738,169,212
April	402,060,955	748,359,957
May	412,301,481	765,064,041
June	428,117,340	767,598,130
July	431,958,188	789,363,919
August	443,317,275	806,774,687
September	454,148,049	816,374,171
October	489,230,234	814,297,404

The deposits record for the past five years for the month of October is given in the following table compiled by *The Monetary Times*:—

October.	On demand.	After notice.	Total.
1912	\$383,814,572	\$640,097,928	\$1,023,912,500
1913	389,856,507	621,511,207	1,011,367,714
1914	348,732,830	659,806,682	1,008,539,512
1915	392,042,193	701,336,850	1,093,379,043
1916	489,230,234	814,297,404	1,303,527,638

These figures indicate a growth of over \$100,000,000 in commercial deposits and over \$170,000,000 savings in the five years period.

Deposits of \$1,303,527,638 in Canada and \$166,200,928 elsewhere give Canadian banking institutions charge of nearly \$1,500,000,000 of deposits. Total loans of the banks in October were:—

Call loans in Canada	\$ 90,412,023
Call loans elsewhere	189,346,216
Current loans in Canada	774,928,222
Current loans elsewhere	79,459,621
Loans to government	12,728,655
Loans to provinces	1,476,240
Loans to municipalities	37,613,530

\$1,185,964,507

NOVEMBER MUNICIPAL BOND SALES

United States Market Took Big Issues—Demand for Securities

The municipal bond sales in Canada for November, as compiled by *The Monetary Times*, amounted to \$1,246,480, compared with \$1,361,665 for October and \$1,645,892 for the corresponding period of last year.

Comparing the record of November, 1915, with that of the month just ended, the bond sales are as follow:—

	1916.	1915.
Canada	\$1,246,480	\$1,645,892
United States	7,894,000	4,000,000
	<u>\$9,140,480</u>	<u>\$5,645,892</u>

The municipal bond sales in Canada during the first eleven months of the past five years, according to *The Monetary Times'* bond record, were as follow:—

	1912.	1913.	1914.	1915.	1916.
Jan. ..	\$2,133,531	\$1,337,500	\$1,953,137	\$1,784,947	\$1,909,441
Feb. ..	2,596,378	1,038,806	5,995,336	3,047,011	1,419,909
Mar. ..	1,926,716	335,492	5,123,176	2,572,357	2,027,741
April ..	927,160	3,693,857	2,847,953	8,603,094	1,979,852
May ..	1,928,748	880,630	6,400,755	3,464,281	2,649,000
June ..	1,690,344	2,435,726	4,617,857	2,395,744	3,170,583
July ..	1,967,476	1,591,924	2,180,758	1,618,422	1,485,225
Aug. ..	1,649,547	526,300	395,395	1,087,415	852,447
Sept. ..	1,998,605	1,663,260	535,050	2,768,484	960,435
Oct. ..	1,060,597	3,452,282	2,874,872	1,245,874	1,361,665
Nov. ..	1,396,664	2,481,062	622,049	1,645,892	1,246,480

Canadian municipal bonds sold in the United States during the first eleven months of 1916, compared with sales of 1914 and 1915, were as follow:—

	1914.	1915.	1916.
January		\$ 340,000	\$3,183,215
February	\$ 50,000	6,471,000	899,500
March	18,000	6,543,947	595,000
April	25,000	7,100,825	2,158,000
May	1,750,000	600,000	7,219,000
June	2,100,000		3,393,743
July	1,130,000	890,000	3,540,000
August	35,000	750,000	97,300
September	90,000	6,748,342	100,000
October		1,589,000	100,000
November	170,200	4,000,000	7,894,000

The following are the particulars of sales in Canada by provinces:—

Quebec	\$ 614,500

Colonel W. O. H. Dodds, C.M.G., has been appointed manager of the Mutual Life Insurance Company, of New York, at Montreal, in succession to the late Mr. Fayette Brown. Colonel Dodds, who was an artillery officer, went overseas with the first Canadian contingent, and was recently promoted to the command of an infantry brigade at Bransford Camp. Colonel Dodds has been connected with the Mutual Life since 1892, and is known as a very efficient insurance man. Until Colonel Dodd's return from the front, the territory under the jurisdiction of the Montreal office, which includes eight provinces, will be in charge of the staff.

FEDERAL RESERVE BOARD'S "WARNING"

American bankers were warned by the United States Federal Reserve Board this week to avoid locking up their funds by purchasing treasury bills of foreign governments involving long-term obligations. While specifically disclaiming "any intention of reflection upon the financial stability of any nation," the board advised all investors to proceed with caution and formally announced to member banks of the Federal Reserve System that with the liquid funds which should be available to American merchants, manufacturers and farmers in danger of being absorbed for other purposes, it "does not regard it in the interest of the country at this time that they invest in foreign treasury bills of this character." The statement is printed on another page of this issue.

The Federal Board's manifesto seems to be the result of several influences which have used the board, perhaps by the help of one or more of its members, as a medium for their fine arts. As possible factors there are the pacific characteristics of President Wilson, the sour grapes of William Jennings Bryan, and the Kaiser, the envy of bankers in the shadow but not in the sunshine of war finance, the intrigues of pro-German bankers, the desire to have the full pound of interest flesh, and the conspiracies of cultured diplomats. Some or all of these fires might make the federal reserve pot boil.

Such bids for peace are futile. They reflect a breaking Germany; they reflect a lack of appreciation of the Allies' viewpoint, and for that matter of the viewpoint of the majority of real citizens of the United States.

One of the biggest bankers in that country replies to the Federal Reserve Board's "warning" in these words: "The financiers of Europe could not prevent the war. The financiers of America have no foolish idea that they can stop it."

The war is being fought because the Allies know there is in this world something of greater value than the almighty dollar. Such a thought is occasionally long in penetrating the thick skin of silver and gold.

BUSINESS AND THE STATE

The Dominion government has decided to place two public-owned steamers on a service between British Columbia and the Canadian Atlantic ports. During his recent visit to British Columbia, Hon. Dr. Reid, minister of customs, was strongly urged to have some arrangement effected whereby all-water communication between the eastern ports on the Atlantic and British Columbia ports on the Pacific might be had through the Panama Canal. It was found impossible owing to existing conditions to charter vessels for this service, but in view of the earnest wish of the British Columbia people to obtain a direct service from Canadian Atlantic maritime ports to British Columbia ports with British bottoms, an order-in-council was passed for construction, by the department of railways and canals, of two vessels in British Columbia, which vessels, when completed, will be placed on this service.

This should be an interesting experiment. While it will please particularly the people of British Columbia, it may prove to have a national, or international significance as a further illustration of the tendency of the times. Great Britain's shipping during the war has been largely under State control. This was deemed necessary to help win the war. When peace comes, how far will the State deem it desirable to operate shipping in order to knit closely the economic map of the British Empire, the Allies and their trading relations with the rest of the world?

Australia this year purchased a small fleet to carry its wheat bought by Great Britain. Australia sends part of its wool clip by slow sailing vessels so that the whole clip will not arrive in the British market at the same time. Thus the wool is stored, is on its way to market, while the slow boat acts as a desirable economic balancing factor.

We may find that to give a practical touch to the sentimental talk of allied and British Empire trade relations and to meet neutral and enemy competition, the State may have to become a more active partner with the nation's business interests.

THE BLACKLIST

On July 18th, 1916, the British government established what is known as a blacklist of firms in the United States with which citizens of the United Kingdom are forbidden to trade. A similar blacklist was established by Australia shortly afterwards. The Canadian government, after more than four months for consideration, has not yet followed the example of the Imperial and Australian governments. The blacklist of United States firms does not yet apply in Canada.

In other words, while it is illegal for citizens of the United Kingdom and of Australia to trade with these enemy firms, classed as such by the British government after careful investigation, it is legal for Canadians to trade with such enemy firms. Business has been done by Canadians with some of these firms.

Writing *The Monetary Times* in response to an inquiry, the following letter was received: "With regard to the sanctioning for Canada of a blacklist of enemy firms, I may inform you that the Government has not yet determined to put such a list into force."

This letter is from Ottawa,—from the department of justice.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Development, Extensions, Dividends, and Future Plans

The first dividend declared on the common stock of Steel Company of Canada, last week, one of 4 per cent., was a surprise to the market, which presumably expected only 3 per cent.

The company's directors apparently drafted with considerable care the wording of the statement announcing the dividend. "In view of the earnings of the company," said the official statement, "it was felt that some distribution of profits to the ordinary shareholders might be made, but the board in so doing has not decided upon the establishing of a regular dividend policy, and desire to record that the question of future distributions must depend upon the future earnings and prospects of the company, and must be left for the conditions of another year to determine. A conservative policy has been followed in view of the exceptional conditions prevailing in the iron and steel trade, as well as having in mind the very heavy capital expenditures which the company has undertaken."

Thinks it is 8 per Cent. Basis.

Despite this fact, there appears to be a disposition in several quarters to regard the present payment as a declaration of an 8 per cent. dividend policy. This view is expressed, for example, in the columns of one of our contemporaries as follows:—

"We have gone very closely into this matter, and we are convinced that this week's declaration actually means that the stock now is on an 8 per cent. annual basis, and we are also convinced that the next payment will be for a period of three months (quarterly, in fact) and will be 2 per cent. or at the rate of 8 per cent. per annum."

Vice-President Says "Distribution."

In briefly discussing with *The Monetary Times*, last week's dividend declaration, Mr. Cyrus Birge, vice-president of the company, said: "It was not a dividend; it was a distribution." The attitude of the company's vice-president reflected the general tone of the company's official announcement last week and *The Monetary Times* is inclined to think that to assume this 4 per cent. payment on common as the placing of the stock upon an 8 per cent. basis, is not correct.

The Steel Company of Canada is well managed and is enjoying an excellent volume of business, but that it will follow a properly conservative policy is made clear throughout the official statement issued last week.

Future Position Paramount.

This is again quoted:—

"At their meeting the directors authorized additional plant appropriations and considered the question of extensions which will be incumbent upon the company to undertake in order to place it in a position to realize to the fullest the benefit from the expenditures and extensions already made, and also having regard to the necessity of putting the operation of the company on the basis of the lowest possible cost of production to meet the competition which is inevitable when adjustment of trade conditions takes place. The directors consider it essential that the future position of the company should be regarded as paramount, and with a view to the conditions which may arise after the war are to be commended in following a policy which will place the company on the soundest possible footing.

"It is also felt that the bonded debt of the company, which has been considered by some as heavy compared with other companies, should be reduced, as has been the policy of the large steel interests of the United States under existing circumstances. The shareholders will no doubt agree with the directors that a conservative policy is the wisest course to follow, and by building up the company on a firm foundation place it in a position of greater security for the realization of future expectations."

The stock market apparently obtained 1 per cent. more than it expected this time, and is allowed plenty of scope for guessing as to when and how much the next distribution will be.

Dominion Steel Corporation.—The redemption of the company's \$3,400,000 6 per cent. 5-year notes will probably be effective to-day.

Canada Steamships Lines, Limited.—Negotiations have been completed for the chartering of 15 steamships at higher rates for ocean service for the year 1917.

Seneca Superior Silver Mines.—This company, as forecasted in *The Monetary Times*, declared a dividend of 5 per cent. to shareholders on record at close of business on December 5.

Walter Bentley, Limited.—The company is offering 100 preferred common shares, par value \$100, for sale. This Niagara Falls company intends opening a United States factory and further extending their business.

Canadian General Electric Company.—The directors of the Canadian General Electric have declared a dividend of 2½ per cent. for the quarter, which will make 8 per cent. for the year. The regular dividend since 1907 has been 7 per cent. In 1912 and 1913 an extra bonus of 1 per cent. per annum was paid.

Dominion Steel Corporation.—A director stated after the recent meeting, that the chief business was the announcement of the sale of the entire steel output of the corporation for the year 1917. This means more than the selling of the 1916 output, since the capacity of practically all the mills has been increased.

Goodyear Tire and Rubber Company of Canada, Limited.—The company's report for the year ended September 30, as compared with the previous return, is as follows:—

	1916.	1915.
Gross earnings	\$3,440,682	\$2,370,914
Net earnings	419,522	323,981
Surplus	354,128	235,136

Guelph Junction Railway.—At the quarterly meeting of the Guelph Junction Railway Board, the dividend from the road for the last three months was paid. The city of Guelph received \$11,260, being at the rate of 6½ per cent. of Guelph's investment in the company. The condition of industrial life is reflected in the earnings of this road, which taps most of the manufacturing plants. The present is expected to be the best year in the history of the road.

Canadian Pacific Railway Company.—A Spokane despatch states that Mr. D. C. Corbin, president and builder of the Spokane International Railway, announced that negotiations with Lord Shaughnessy, of the Canadian Pacific, had resulted in that company and the Minneapolis, St. Paul and Sault Ste. Marie jointly purchasing the road from Mr. Corbin and his associates. The road runs from Spokane to Eastport, Idaho, on the international boundary, there connecting with the Canadian Pacific Railway.

Canadian Car and Foundry Company.—The most important contract the Canadian Car and Foundry Company have yet arranged in Canada is said to be practically completed with the imperial munitions board. This contract, it is stated, is for forgings to be supplied to various munitions plants that will be carrying out shell contracts, and it is understood that the total value of the present contract is approximately \$14,000,000. This will be carried out by the Canadian Steel Foundry, the subsidiary of the Canadian Car and Foundry Company, in its forgings department and will require almost the entire capacity of the present plants for the whole of 1917.

Montreal Transportation Company.—Control of the shares of this company has been purchased by Mr. L. L. Henderson and associates. At a meeting of the directors Mr. Henderson was elected president and managing director, with Mr. A. A. Wright, of Toronto, vice-president and treasurer. The other directors are Messrs. Farquhar Robertson, Abner Kingman, A. G. Thomson, A. Ogilvie and H. A. Calvin.

This company is the oldest Canadian steamboat company operating on the Great Lakes and St. Lawrence River. The company has extended its operations to the Atlantic coast and West Indian ports and was the first lake company to place vessels in this service. At present the company has a large steamer building at Collingwood.

Riordan Pulp and Paper Company.—As stated in the previous issue of *The Monetary Times* the Riordan Company purchased a majority of the capital stock of the Ticonderoga Pulp and Paper Company, Ticonderoga, N.Y.

The Ticonderoga Pulp and Paper Company manufactures over 100 tons of soda pulp, and fine book and specialty papers per day. They are one of the large consumers of Riordan sulphite fibre. The Ticonderoga Company is long established in the paper trade and has a well-equipped plant. This connection insures to the Riordan Company a permanent outlet, to the ultimate consumer—the printer, for a considerable portion of its product.

Fixed assets of the Ticonderoga Company are about \$1,700,000 and the surplus of current assets over current liabilities is over \$650,000.

The directors of the Ticonderoga Pulp and Paper Company are Messrs. Charles Riordan, Carl Riordan, F. B. Whittet, Lawrence Macfarlane and T. J. Stevenson, of Montreal, George E. Challes, Toronto, T. E. Warren, Ticonderoga, N.Y., C. S. Merrill, Albany, N.Y., and Allen Curtis, New York City. The officers of the company elected are as follows: Messrs. Charles Riordan, president; Carl Riordan, vice-president; F. B. Whittet, secretary and treasurer; and T. E. Warren, manager.

SASKATCHEWAN CO-OPERATIVE ELEVATOR CO.

Further progress was achieved by the Saskatchewan Co-operative Elevator Company, Limited, last year. Its annual report shows that the company handled over 43,000,000 bushels of grain, at a lower cost, added 28 elevators to its system, and made a profit of \$757,000.

This well-known western company's balance sheet shows assets amounting to \$4,419,219, including elevators valued at \$1,861,072, after allowance for depreciation, stocks of grain worth \$1,724,020 and advances on bills of lading \$530,476.

The liabilities include a provincial government loan and interest of \$1,639,267, outstanding cash grain tickets, etc., \$982,268, reserves \$322,973, and business profits war tax \$199,479. The official report, which shows a strong financial position, is given in full on another page. It reveals the work of Canada's western producers and the excellent organizations they possess for placing the wheat in the world's markets.

ENEMY SAMPLES AT ST. JOHN AND HALIFAX

The instructive exhibition of Austrian and German samples, loaned by the British government to the Canadian department of trade and commerce, Ottawa, at the suggestion of Sir George Foster, has closed at London, Ontario, after a very successful week. It is now on the way to the maritime provinces.

At London, the active centre of western Ontario's industrial district, the exhibition proved very successful. The attendance there was 520, which, in view of the population, is a gratifying figure. Considerable technical interest was displayed in the samples, many visitors making inquiries with a view to taking up new lines of manufactures suitable for their present machinery. A number of the samples were loaned to manufacturers for practical tests.

The success of the exhibition at London is largely due to the combined activities of the representatives of the Canadian department of trade, Ottawa, of Mr. Herbert Kershaw, of the commercial intelligence department of the British government (in charge of the exhibits) and of the board of trade, and Mr. Gordon Phillip, the capable and energetic industrial commissioner of Ontario's London.

The exhibition will be opened at St. John from December 11th to December 16th and at Halifax from January 1st or 2nd to January 6th. It will then return to England.

The earnings of the Sherwin-Williams Company of Canada for the past year, before providing for depreciation and interest on bonds, amounted to \$846,944, and have been dealt with as follows: Reserve for depreciation and renewals of plant, \$76,710; interest on bonds, \$136,470; dividends on preferred stocks, \$210,583; donations to patriotic fund, allowances to employees on active service, and provision for British war tax on profits of the Berger companies, \$49,867; balance to surplus account, \$373,373. The surplus account and reserves, as will be seen from the balance sheet, now amount to \$1,949,844.

NOVEMBER FIRE LOSSES

Month's Record of Waste was Somewhat Lower Than Usual—Twelve Fatalities

The Monetary Times' estimate of Canada's fire loss during November amounted to \$923,335, as compared with October loss of \$1,078,815 and \$1,087,980 for the corresponding period of last year. The following is the estimate for the November losses:—

Fires exceeding \$10,000	\$708,000
Small fires	94,900
Estimates for unreported fires	120,335

\$923,235

The Monetary Times' record for the past four years shows the following monthly losses:—

	1913.	1914.	1915.	1916.
January	\$3,913,385	\$2,796,312	\$1,249,886	\$1,649,217
February	2,037,386	2,920,749	1,019,556	3,275,600
March	1,710,756	2,660,666	1,631,696	1,406,501
April	1,470,622	1,916,235	1,463,747	1,460,437
May	2,123,868	1,935,516	881,855	1,850,205
June	3,069,446	1,267,416	1,157,156	494,557
July	2,579,698	2,033,139	773,269	1,159,285
August	3,034,775	2,921,379	403,693	803,100
September	1,468,324	1,356,281	1,116,109	981,703
October	1,383,572	1,326,505	1,290,325	1,077,815
November	2,200,486	1,524,932	1,087,980	923,235

The fires reported in November at which the losses amounted to \$10,000 and over were—

Sydney, N.S., Nov. 2	Business blocks ...	\$ 50,000
Truro, N.S., Nov. 3	Business block	30,000
White Sulphur, B.C., Nov. 11 ..	Lumber mill	60,000
New Aberdeen, N.S., Nov. 14 ..	School	12,000
Toronto, Ont., Nov. 15	Factory	100,000
Vancouver, B.C., Nov. 15	Steamship	20,000
Bolton, Ont., Nov. 6	Hotel	10,000
Winnipeg, Man., Nov. 18	Warehouse	85,000
Bathurst, N.B., Nov. 19	Church	10,000
Toronto, Ont., Nov. 22	Boathouses, etc. ...	20,000
Montreal, Que., Nov. 23	Block	15,000
Prince Albert, Sask., Nov. 23 ..	Block	190,000
Limoulu, Que., Nov. 24	Church	120,000
Ottawa, Ont., Nov. 24	Block	40,000

The structures damaged and destroyed included 14 residences, 12 barns and stables, 9 stores, 6 blocks, 4 factories, 3 box cars, 2 warehouses, 2 churches, 2 schools, 2 evaporators, 2 boathouses, 2 garages, 2 steamers, 1 hotel, 1 light plant, 1 automobile, 1 roundhouse, 1 lumber mill, 1 light-house.

Among the causes were spontaneous combustion 4, incendiary 3, lightning 2, defective chimney 2, firecrackers 2, overheated stovepipes 2, children and matches 2, overheated furnace 1.

The following table, compiled by *The Monetary Times*, shows deaths caused by fire during the first nine months of 1916 compared with previous returns:—

	1909.	1910.	1911.	1912.	1913.	1914.	1915.	1916.
January	16	27	27	27	14	26	3	10
February	8	15	12	11	21	18	11	20
March	16	20	18	24	22	27	23	23
April	18	37	20	15	11	22	14	6
May	21	15	28	18	33	8	5	14
June	16	52	13	6	18	12	2	6
July	4	15	110	9	9	8	13	268
August	17	11	22	16	29	3	14	30
September	10	10	13	6	27	9	27	6
October	26	16	17	21	15	9	7	39
November	34	10	20	22	24	14	12	12

The fires at which fatalities occurred were:—

St. George, N.B., Oct. 28	Burning building	1
Montreal, Que., Oct. 30	Burning building	1
Toronto, Ont., Nov. 2	Playing with matches	1
Hamilton, Ont., Nov. 3	Burning building	1
Montreal, Que., Nov. 10	Smoking in bed	2
Brantford, Ont., Nov. 16	Clothing set alight	1
Winnipeg, Man., Nov. 18	Burning building	1
Gilbert Plains, Man., Nov. 25 ..	Burning building	2
North Bay	Burning building	4

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Brantford, Ont.—Taxpayers may vote on a by-law to establish a municipal gas plant.

London, Ont.—An issue of bonds for the London and Port Stanley Railway is to be made, the bonds to be 5 per cent. 5-year.

Port Arthur, Ont.—A by-law for the development of 30,000 horse-power by the provincial hydro-electric commission is to be voted upon by the city's taxpayers.

London, Ont.—The proposed issue of \$75,000 bonds for extension to the London and Port Stanley Railway are to be 5 per cent. 5-year securities. An issue of \$25,000 for sanitarium is to be ratified by the taxpayers in January.

Saskatoon, Sask.—The city may invest \$175,000 of sinking fund moneys in British bonds. The following investments have been made with the sinking fund moneys: Dominion war loan, value, \$240,000, amount paid, \$236,048.49, yield, 5.30 per cent.; city of Saskatoon 5 per cent. debentures, value, \$173,751.75, amount paid, \$169,314.16, yield, 6½ per cent.; city of Saskatoon 4½ per cent. debentures, \$5,353.33, amount paid, \$4,322.82, yield, 6½ per cent.; city of Saskatoon stock, value, \$63,265.99, amount paid, \$54,426.25, yield, 6½ per cent.; total amount invested, \$228,063.33.

Toronto, Ont.—Mr. T. Bradshaw, finance commissioner, has recommended that the city apply to the legislature for authority to increase its borrowing powers. The finance commissioner reports that there are capital expenditures of about twenty millions under consideration that cannot be carried out unless the law is changed. Under the existing statute the city can incur a debt equal to only 12½ per cent. of the first one hundred million dollars of the assessment and 8 per cent. of all over that. The commissioner wants to get power from the city to borrow to the amount of 12½ per cent. on the total assessment.

Edmonton, Alta.—The city's revenue for the nine months ended September was \$343,829, a decrease of \$116,469, as compared with the first nine months of 1915. As against \$669,073.06 at September 30th, 1915, the controllable expenditures, under central administration, for the nine months of the current year are \$534,132, a decrease of \$134,940, reductions having been effected in almost every department. Controller Mouat in his return shows that the actual expenditures are \$47,495, within the appropriations authorized by council for the first nine months of 1916. Allowing for all contingencies there is prospect that controllable expenditures for the 12 months will be quarter of a million dollars less than those of 1915.

Alberta.—Tenders close on November 29th for 7 per cent. school districts bonds, amounting to \$7,100.

Four separate tenders are to be made as follow: (1) Kern S.D., No. 3380, \$1,200, 6-years, 7 per cent., Waterloo S.D., No. 598, \$600, 6-years, 7 per cent., Poplar Ridge S.D., No. 772, \$300, 6-years, 7 per cent., maturing January 15, 1923; (2) Fox Coulee S.D., No. 2317, village district, \$1,000, 10-years, 7 per cent., maturing January 15, 1927; (3) Cold Lake S.D., No. 3307, \$1,400, 10-years, 7 per cent., Chip Lake S.D., No. 3345, \$1,200, 10-years, 7 per cent., maturing January 15, 1927; (4) Lyncot S.D., No. 3370, \$1,400, 20-years, 7 per cent., maturing January 15, 1937. M. C. Elliott, manager of the bond branch, department of education, Edmonton.

Saskatchewan.—The following is a list of bond applications granted by the local government board:—

School Districts.—Devonshire, \$1,200, 10-years, not ex. 8 per cent. instalment. Secretary-treasurer, Geo. Martin, Pelly; Mildred, \$1,400, 10-years, not ex. 8 per cent. annuity. Jas. Hartley, Staynor Hall; Hazel Dell, \$1,200, 10-years, not ex. 8 per cent. annuity. J. G. Adamson, Hazel Dell; Elmhurst, \$1,200, 10-years, not ex. 8 per cent. annuity. Herb. Knight, Bright Sand; Star, \$2,000, 10-years, not ex. 8 per cent. annuity. W. J. Woodman, Davidson.

Rural Telephone Companies.—Success, \$19,000, 15-years, not ex. 8 per cent. annuity. W. R. Frith, Birmingham; Forest Bank, \$6,000, 15-years, not ex. 8 per cent. annuity. E. A. O. Pike, Forest Bank; Great Bend, \$6,000, 15-years, not ex. 8 per cent. annuity. R. McNaught, Radisson; Great Deer, \$1,000, 15-years, not ex. 8 per cent. annuity. D. R.

Dyck, Borden; Assiniboia, \$7,500, 15-years, not ex. 8 per cent. annuity. J. Eustice, Assiniboia; Garnock, \$3,300, 15-years, interest at 7 per cent. annuity. A. B. Long, Kelliken; South Radisson, \$4,000, 15-years, not ex. 8 per cent. annuity. R. McNaught, Radisson; Village of Blaine Lake, \$500, 5-years, not ex. 8 per cent. instalment. J. J. Coffin, Blaine Lake.

School Districts.—Dickson, \$1,600, 10-years, not ex. 8 per cent. annuity. Secretary-treasurer, E. H. Worrall, Perdue; Barra, \$1,200, 10-years, not ex. 8 per cent. annuity. V. Flook, Esterhazy; White Mud, \$1,600, 10-years, not ex. 8 per cent. annuity. G. Anderson, Robsart.

Rural Telephone Companies.—Hubbard, \$2,000, 15-years, not ex. 8 per cent. annuity. R. H. Longmore, Hubbard; Lajord, \$800, 15-years, not ex. 8 per cent. annuity. E. W. Smith, Lajord; South Churchbridge, \$2,700, 10-years, not ex. 8 per cent. annuity. A. T. Penwarden, Churchbridge; Blucher, \$2,200, 15-years, not ex. 8 per cent. annuity. W. J. G. Hall, Blucher.

Saskatchewan.—The following is a list of bonds reported sold by the local government board:—

School Districts.—Eston, \$2,000, Peronne, \$1,800, Sich, \$400, to Messrs. Kerr, Fleming and Company, Toronto; Hat Creek, \$700, Messrs. H. O'Hara and Company, Toronto; and Lipton, Messrs. W. L. McKinnon and Company, Toronto.

Rural Telephone Companies.—Lacpeltier, \$10,000, Melaval, \$12,000, Goldman and Company, Toronto; Kandahar, \$2,000, Iola, \$1,200, Messrs. Wood, Gundy and Company, Toronto; Keedive, \$5,600, North, \$4,000, Village of Meadlyn, \$1,500, Messrs. W. L. McKinnon and Company, Toronto; Rush Lake, \$10,500, Geo. Foley and Sons, Saskatoon; Superb, \$13,000, H. C. O'Hara and Company, Toronto; Balgonie, \$5,400, Kerr, Fleming and Company, Toronto; Sovereign, \$12,000, J. R. Thompson, Winnipeg.

School Districts.—Wabash, \$1,600, Town of Biggar sinking funds; Meusatz, \$1,000. J. A. Thompson, Winnipeg; Moose Plains, \$1,200. J. Duff, Regina; Gnadenau, \$900. H. O'Hara and Company, Toronto; Wauchope, \$2,000. H. O'Hara and Company, Toronto; Okla, \$1,400. H. O'Hara and Company, Toronto; Eyre, \$1,700. Western School Supply Company, Regina; Leamington, \$800. Tomenson, Forward and Company, Toronto; Speers, \$2,000. Nay and James, Regina; Sunnyside, \$1,500. Goldman and Company, Toronto.

Despite the Federal Reserve Board's Opinion—Canadian Banker's View—New York Opinion

The announcement of the Federal Reserve Board, Washington, in the nature of a warning to member banks against employing their reserves in foreign short-term securities has created a considerable stir in Canada, some papers even having commented that it was a blow directed against the welfare of the Allies.

In a statement yesterday to *The Monetary Times*, Mr. F. L. Appleby, manager of the foreign exchange department of the Union Bank of Canada, Toronto, said:—

"There is no doubt that, coming as it did, at a time when Messrs. J. P. Morgan and Company were endeavoring to place British government treasury bills, and the New York banks had advanced the call money rates, it will result in the British government paying far more for any such accommodation than they anticipated, and certainly to that extent it is a serious blow. An indirect but important, and to the British costly, effect may be that it will result in the continuance of a 6 per cent. Bank of England rate.

High Interest Centre.

"Outside of that, we doubt if much harm will be done, as there has never yet been discovered any way of preventing money being drawn to the high interest bearing centre other than absolute lack of confidence, which at present does not exist, and those banks deeming the security good, or pro-Ally in sentiment, will in all probability continue to invest, while those pro-German in sentiment will refrain from doing so.

"It is more than likely that the real motive was political, namely, an attempt to make the present government appear in the light of a champion of cheap money for the people.

"Generally speaking, the effect will be very small when compared with the amount of discussion raised, as the banks are forced to employ their money somewhere in order to pay interest to their depositors. If there is not a sufficient supply of short-dated American securities, the banks are forced to look elsewhere."

Opinion in New York.

As in other matters involving action by the Federal Reserve Board, national bankers of the United States are naturally reluctant to express any opinion which would appear to criticize the board. "But, unofficially," says the Wall Street Journal, "there is considerable criticism expressed in regard to the board's attitude in this matter. Many bankers are saying that while there is need of caution, the board is taking an entirely too narrow view, if it does not transcend its legitimate functions. Some bankers say: 'What are we going to do if we continue to ship goods to the Allies? We must either be satisfied with their credit and ready to take their obligations for future payment or else we must stop shipping goods. If our customers are not good, then we should not sell them goods.'

"In some quarters the Reserve Board is said to be stultifying itself in respect of a former ruling. By ruling that bankers' acceptances could be renewed without impairing the liquid quality of the original transaction the banks went ahead with certain foreign acceptances which enjoyed the privileges of being rediscountable at the Federal Reserve Bank. It was pointed out when this ruling was made, that a renewal of an acceptance becomes virtually a finance bill, but inasmuch as the board ruled in favor of the renewals its present contentions that a renewal of treasury bills is unsound discloses a vacillating position."

Will Issue the Bills.

The proposed offering of a series of short-term treasury notes by J. P. Morgan and Company, for the British and French governments, it was authoritatively stated in New York on Wednesday, will be made, regardless of the warning issued by the Federal Reserve Board. The notes, ranging from thirty days to six months, will be issued in limited amounts in response, it was said, to a widespread demand from banks and investors and will not be renewable. Bankers representing the Allies declined to say to what extent, if at all, future international undertakings may be affected by the action of the Reserve Board.

OPPORTUNITY FOR YOUNG ACCOUNTANT

An opportunity is available for a young accountant to start in business for himself, an office and small salary being provided as a commencement.

WILL NOT SELL SECURITIES FOR A YEAR YET

In a statement to *The Monetary Times* this week regarding the Manitoba government's proposed rural credits bill, Hon. Edward Brown, provincial treasurer, said: "The province has no intention of issuing any securities for a year at least. The market should not get an idea that we propose to issue securities in large amounts for the purposes of this bill. When we come to the question of issuing bonds, these will be put on sale continuously within our own province. No large sums will be offered at any one time."

DOMINION LINEN COMPANY EXPANDS

Growth of business necessitates an expansion in the equipment of the Dominion Linens, Limited. To provide for this, a stock offering is being made. Messrs. Ferguson, Sanson and Graham, Toronto, are offering the balance of \$175,000 7 per cent. preferred participating cumulative shares, full particulars of which are given on page 37 of this issue. The objects of the issue are to construct new buildings; to purchase and install spinning plants, additional looms and other equipment and to furnish working capital. The additions and improvements mentioned are well under way.

The earnings for the first six months of 1916 show over 15 per cent. on the common stock, after paying 7 per cent. on the preferred. It is anticipated that the enlarging of the mills and introduction of spinning plants will further increase the rate of earnings.

The directorate of the company, which is under good management and direction, is as follows: Mr. D. M. Sanson, president, Guelph; Mr. J. W. Lyon, vice-president, Guelph; Messrs. G. D. Perry, F. Barry Hayes, G. H. Muntz, J. B. Ferguson, Toronto, and Messrs. G. B. Ryan, W. Berry, Guelph. Mr. H. A. Hignell is secretary-treasurer.

Mr. T. G. McConkey, general superintendent of the Canada Life Assurance Company, is visiting England in connection with the company's activities there.

Captain Dr. Fox, of the Orpington Hospital, who is visiting Toronto, has brought with him a number of moving picture films depicting the work of the Canadian Hospital Corps. A special exhibition of these pictures was given for the members of the government and the press at the Ontario Parliament Buildings, Toronto.

Lieutenant Benson Wright, the son of Mr. Alfred Wright, Canadian manager of the London and Lancashire Fire Insurance Company, has been killed in action. The late Lieutenant Wright, enlisted with the Mississauga Horse and was later granted a commission and went overseas with the 75th Battalion and was slightly wounded in August. Shortly after returning to the front he was killed.

Mr. David McNicoll, former senior vice-president of the Canadian Pacific Railway Company, died at Guelph on Sunday last. The late Mr. McNicoll was born in Arbroath, Scotland, in April, 1852, and entered the railway service as clerk with the North British Railway in 1866. He then went to the Midland Railway, England, in the year 1873. Coming to Canada he entered the Northern Railway of Canada at Collingwood, Ont., as billing clerk in 1874. From there he went into the general manager's office of the Grey and Bruce Railway at Toronto, where he stayed during the years 1874-81, was general freight and passenger agent of the road in 1882, leaving the next year to become general passenger agent of the Eastern and Ontario division of the Canadian Pacific Railway, from which position he rose step by step till, in 1893, he was made 2nd vice-president and general manager of the line. Since then he held the post of vice-president and was appointed a director of the company in 1906. Mr. McNicoll was a director of The Molsons Bank and of other institutions.

PROOF OF DEATH IS NECESSARY

Mistakes in Casualty Lists—Companies Are Trustees of All Policyholders' Funds

Further comment on the article "Proof of Death is Necessary," printed in the issue of *The Monetary Times* of November 10th, has been received as follows:—

Mr. R. A. Mannings, resident secretary of the Royal Insurance Company, sums up the problem indicated in Mr. Barton's article as follows:—

"In times of peace, formal proof of death is not in general a matter of much difficulty, except in respect of lives who have 'disappeared.' Modern facilities for communication between different parts of the world make a really complete disappearance difficult, in spite of its generally being complicated by a change of name and guise, and if within a reasonable time—seven years is the usual period—no trace of the existence of the missing person can be found, the courts will usually grant a presumption of death on being furnished with satisfactory evidence that full and diligent enquiry has been made. In such cases, the companies run little risk in making settlement, and claims of this sort are rare enough to be a factor of little or no importance in the affairs of the companies.

"In the case of deaths on active military service, it generally happens that the relatives of the deceased receive letters of condolence from his comrades-in-arms, who, in many instances, have seen and helped to inter the dead body. Such letters of corroboration, in conjunction with the official certificate of death issued by the military authorities, are conclusive enough as proof that a claim has arisen. When a soldier is reported as 'missing' and no further news of him can be obtained within six months of the report, the authorities usually assume that he is dead, and issue a certificate to that effect. Claims can generally be safely paid on such evidence, but in these cases the companies are justified in obtaining an indemnity from the claimant whereby the latter undertakes to reimburse them if it should subsequently transpire that the assured is alive."

Information can be Obtained.

Mr. G. B. Woods, president and general manager of the Continental Life Insurance Company, says the general practice of the Continental Life, in common with most, if not all Canadian life companies, when claims are presented with regard to risks carried on soldiers at the front, is to ask for the death certificate signed by the adjutant-general at Ottawa, as well as for confirmatory letters from friends of the deceased man at the front, to the next of kin. In some exceptional cases, where the friends have not been able to secure confirmatory letters from the front, this company has paid the claims upon official notification and authority from Ottawa. It is just and reasonable for the companies to ask for confirmatory letters from the front before paying, especially since so many mistakes have been made in the reported casualty lists, and though there may be delays in getting these letters from the trenches, they can be obtained in nearly all cases. If the officers in charge of the battalion should not be able to furnish the information, it is seldom that it cannot be obtained from a chum, a chaplain, doctor, nurse or other attache of the army.

While naturally the companies accept reasonable evidence of the death of enlisted policyholders, that will establish the claims presented, yet in this war unusual difficulties have arisen in securing this evidence, especially with any sort of regularity or promptitude. Not long since we received a claim supported only by a brief letter "Officer in charge of Record Office," Ottawa, reporting the policyholder "killed in action," but without a name to the statement. There was also a letter of condolence and sympathy with the relatives from Sir Sam Hughes, but surely this was not satisfactory evidence of death? Another case is that of a well-known lieutenant returned to this city, who was reported and mourned as dead for some weeks, when suddenly one day his relatives received a despatch from Ottawa, correcting the earlier report, and stating that he had been wounded and was in a hospital. The lieutenant is much alive, in Toronto to-day.

Every life company can doubtless multiply such cases, and others where the policyholders are reported "missing," "taken prisoner," or "wounded and in hospital," but months afterwards found to be dead, proving conclusively that com-

panies who do not look carefully into the facts and details before admitting the claims for payment are in great danger of jeopardizing the interests of their whole body of policyholders, for whom they are acting as trustees.

From the patriotic standpoint, perhaps it would be as well if, as has been suggested, the Canadian government would become responsible to the companies for claims paid promptly to needy beneficiaries, and later the soldier, supposedly dead, was reported alive and well. It is embarrassing for a beneficiary to be called on to make restitution for having collected the wrong man's insurance money by mistake; while it is right that such restitution should be made, the company who paid the claim has seldom been known to collect it. Legally speaking, the companies must and will always pay upon evidence that in a court of law would be considered satisfactory proof of death. But the public should remember always that life insurance companies are holders in trust of their policyholders' savings, and to safeguard these they must take the necessary precautions. No better proof of their patriotism could be asked for than the Canadian companies gave at the outbreak of the war, in waiving absolutely their right to an extra premium for war risks on all policies in force. The life companies would rather pay a claim than delay it, in their best interests. All they ask of the claimants is that they write to the responsible officers at the front for confirmation of the official notice, "reported dead," which experience proves is not proof of death.

No Fixed Rule.

Colonel W. C. Macdonald, managing director of the Confederation Life Association, mentions other specific cases of errors in casualty lists. An officer was reported officially as killed, and his relatives in Toronto mourned him as dead. He lived for about a month thereafter. His wound was mortal, but not instantaneously fatal as supposed. Some of the letters they received were quite astonishing, one man going so far as to say that he had assisted to bury the officer on the field. He died in Germany.

In another case in which a Canadian chaplain, whose name is well known, officiated at the burial of a dead soldier, and wrote a letter of condolence to his parents informing them of the circumstances surrounding his death and burial. Some considerable time thereafter the parents were not unnaturally surprised and pleased when they received a letter from their son, a prisoner of war in Germany.

In many cases it is not possible for the parties to produce conclusive proof. In the Confederation Life's experience there have been several cases of that kind. There is good presumptive evidence that the man has been killed, but still a possibility that he may be alive. In such cases we are generally ready, as other companies would be under similar circumstances, to admit the claim, but we ask the beneficiary to reimburse the company should it subsequently appear and be proven that the insured is still living, a request which the ordinary person would not regard under the circumstances as in any way unreasonable, although we had a case of one business man in Barrie, who was indignant when this was asked of him, and he refused. Fortunately, we were able while the matter was pending to get conclusive evidence of the death of the insured, and our request for contingent indemnification was at once withdrawn, and we paid the claim.

It is impossible to lay down any fixed rule for guidance in connection with the settlement of war claims; each case must be dealt with on its merits, and no doubt most, if not indeed all, companies are endeavoring to do in a manner which will be liberal to the claimants and just to the interests of the company.

Must Consider all Policyholders.

Mr. J. B. McKechnie, general manager of the Manufacturers' Life Insurance Company, remarks that in the case of "war claims," life insurance companies should, without doubt, require full proof that the policyholder killed at the front is the same man to whom the policy was issued, and it is but fair that the company should receive the regular certificate of death issued by the department of militia and defence at Ottawa, possibly supplemented by any letters which may have been received from his comrades at the front who know beyond question that the policyholder has been killed in action or died of wounds.

In regard to the Manufacturers' Life Company, we have, fortunately been able to secure sufficient evidence with practically all our war claims. We have paid a few "missing" cases, but with these we have been able to satisfy ourselves

that in each case the missing man had actually been killed. We, however, took further precaution in these cases by obtaining a bond from the beneficiary agreeing that if the policyholder should ever turn up alive the company would be reimbursed for the amount paid on the claim.

All cases of disappearance are disagreeable ones to handle, whether they are war claims or not. That the fullest proof should be submitted is very well evidenced by the case referred to by Mr. Barton of the lawyer who disappeared, and it was afterwards shown that he was still alive, although the claim under the policy was made 15 years before.

A point that should not be overlooked by anyone considering this matter is that, after all, the directors of life insurance companies have the interests of all policyholders to consider, and they would be considered by these policyholders to have acted in a very unbusinesslike way if the funds of the company were paid out by way of death claims without reasonable proof of the death of the insured.

ROOT AND FODDER CROPS

They Brought \$249,882,000 to the Country This Year— Fall Wheat and Fall Ploughing

The total area in Canada this year under root and fodder crops, consisting of potatoes, turnips, etc., hay and clover, alfalfa, fodder corn and sugar beets amounts to about 8,980,000 acres, according to the estimate of the census and statistics office, which is practically the same as in 1915; but the total is made up of an increase of about 100,000 acres under hay and clover, the total area of which is nearly 8 million acres, and a decrease for each of the other relatively smaller crops. In total value, at local prices, these crops amount for 1916 to \$249,882,000 as compared with \$229,508,000 for 1915. The yield of hay and clover this year is the record one of 14,799,000 tons, an average of 1.86 ton per acre, which is the highest yield on record for this crop in Canada. The average value per ton is \$11.50, as compared with over \$14 last year.

Potatoes Were Poor Crop.

Potatoes are again, upon the whole, a poor crop, this result being due to unfavorable conditions in Quebec and Ontario, where the average yield per acre is for Quebec 131 bushels, as compared with 149 bushels last year, and for Ontario 61 bushels, as compared with 92 bushels. In the Maritime provinces the potato yield is good, being 206 bushels per acre for Prince Edward Island, 201 bushels per acre for Nova Scotia and 192 bushels per acre for New Brunswick. The average price per bushel for potatoes is 81 cents for Canada, 95 cents for Prince Edward Island, 89 cents for New Brunswick, 97 cents for Quebec and \$1.28 for Ontario. Fair yields of potatoes are recorded for the prairie provinces, the averages being between 170 and 177 bushels, with prices of 92 and 93 cents per bushel in Manitoba and Saskatchewan, and 84 cents in Alberta. In British Columbia the average yield per acre is 189 bushels and the price 70 cents per bushel. The quality of the tubers is between 89 and 95 per cent. of the standard for the Maritime provinces, over 90 per cent. for Manitoba and Saskatchewan and 84 per cent. for Alberta and British Columbia. For Quebec and Ontario the quality is 76 and 77 per cent.

Fall Wheat and Fall Ploughing.

Owing to the dry condition of the soil in Ontario difficulties were experienced in the ploughing and seeding of fall wheat. By October 31 only 656,500 acres were sown, as compared with 820,600 acres in 1915, a decrease of 164,100 acres, or 20 per cent. In Alberta also there is a decrease of 36,500 acres, or 14 per cent., viz., from 260,500 acres to 224,000 acres. For all Canada the area estimated to be sown to fall wheat is 899,300 acres, as compared with 1,100,800 acres, a decrease of 201,500 acres, or 18 per cent. The condition of fall wheat on October 31 for all Canada is 76 per cent. of the standard, as compared with 88 per cent. last year and 97 per cent. in 1914. Of the total land in Canada intended for next year's crops, 51 per cent. is estimated to have been ploughed by October 31, the percentage proportions in the west being 47 for Manitoba, 28 for Saskatchewan and 21 for Alberta.

WHEN THE MEN COME HOME

How Will Canada Place Them?—Mr. J. S. Dennis on War Problems

Reviewing forty-four years of Canada's progress, especially in the prairie provinces, Mr. J. S. Dennis (assistant to Lord Shaughnessy, president of the Canadian Pacific Railway) told the Canadian Credit Men's Association at Toronto that the past development was but an indication of the future possibilities of Canada. Canada's greatest economic problem was to secure a proper distribution of her population, said Mr. Dennis, and in the stimulation of immigration an endeavor ought to be made to encourage the right class of people and correct the present unsound basis as between producers and consumers. To seek agriculturists in Great Britain had been a mistake, but when the war was over there would be the return of Canada's contingents, who would rightfully expect proper treatment. To this number would be added men from the British army and a considerable movement from Northern Europe.

What was Canada going to do with these incoming men? They could not all be absorbed in industry or in the government service, and it was a fallacious dream to suppose that all these men could be placed on the land and succeed.

Expenditure on Development.

The only way Canada could prepare herself to take care of this great influx of labor would be by developing the natural resources of the country. No development can take place without financial expenditure, and for years Canada had been securing capital in large quantities from Great Britain, France and Holland, and to-day, but for the war, we could have all we want from those sources. Now it will be a long time before large supplies will be available. We must look elsewhere. The United States was rolling in wealth, and why should not Canada secure some of it by a propaganda of education which would teach those over the imaginary boundary line what Canada really was, to create an interest in the Dominion which would lead to the granting of any amount of money for its development. Canada would then only be getting back some of her own.

Producers are Needed.

There must be development of natural resources along sane lines, rather than the building up of industries not concerned with production but with the manufacture of imported material, before there could be a solution of the problems of colonization and labor. One thing Canada must do, and that was to mill her own wheat at home and send out the finished article.

Mr. Dennis said existing conditions meant that Western grain-growers were "shipping their farms across the Atlantic," and "grain mining" was taking everything out and giving nothing back to the land. The solutions of the great problems indicated called for co-operation from the Dominion government downward to the smallest organization, and only by every individual seeking to do more than his share in the work would the difficulties be surmounted. All interests must sink their differences and Canada, as a whole, must be united. The Canadian Pacific Railway had started a campaign to secure a labor survey of Canada which would help to deal with the deluge of immigration when it came.

States After Western Market.

An impression prevailed in Western Canada that Eastern manufacturers were so busily engaged in war order work that they were neglecting their Western market. The United States had made a note of the situation and were taking advantage of it.

The Insurance Company of the State of Pennsylvania has been authorized to transact tornado insurance in addition to its present business of fire insurance.

The Equity Co-operative Exchange, representing 70,000 organized farmers of the north-west, will participate in a conference under the auspices of the National Council of Farmers' Co-operative Association at Chicago next week. The Canadian grain-growers will send a delegation and a speaker. The Farmers' Grain Dealers Associations of Illinois, Kansas, Indiana, Minnesota, North Dakota, South Dakota, Ohio, Nebraska and Iowa are arranging to send delegates.

A "TRUST" PROVIDES PERMANENCE OF PRINCIPAL AND PERPETUITY OR INCOME

In making your Will, consider the advisability of setting aside funds "in trust," the income from which shall go to certain beneficiaries. Instead of disposing of property outright, the creating of a trust to be administered by an efficient and reliable Trust Company is an assurance of the permanence of both principal and income throughout the period for which the trust is made.

We solicit interviews or correspondence.

FEATURES OF QUEBEC INSURANCE LAW

Clear Exposition of Intricate Subject by J. Armitage Ewing, K.C.

(Concluded.)

In concluding the address on Quebec's insurance law, portions of which have been printed in previous issues of *The Monetary Times*, Mr. J. Armitage Ewing, K.C., said:—

In the case of companies governed by the Dominion Insurance Act lending to their own married women policyholders who are separate as to property on the security of their policies, about the only risk they run is the loss of interest should the women have borrowed for their husbands, assuming that the loan agreement follows the form provided in article 95 (g), of the insurance act. While the transaction is called a loan, it is strictly speaking not a loan at all, because one of the essentials of the contract of loan is missing, that is the obligation to repay. The party borrows a certain sum on which she binds herself to pay interest at a certain rate, but enters into no obligation to return the money, though she has the right at any time to do so. The matter is more in the nature of a part payment in advance (though not even that, inasmuch as the assured has the right to repay at will) in consideration of which she undertakes the payment of interest. As the prohibition is only against a woman binding herself for her husband the contract if tainted with nullity would only be void to the extent of her obligation and that is to pay interest. As she has the right to receive her own property, including money owing to her, the fact that she handed the money advanced by the company over to her husband would not give her the right to demand, on the policy falling due, that the company pay her the full proceeds thereof as though the so-called contract of loan had not been entered into.

Surrender by Married Women.

A married woman is free to surrender her policy made payable to herself, but as this is an act beyond administration, authorization is required.

If the policy is payable to a named beneficiary or named beneficiaries, payment is made accordingly; if payable to the assured's estate, the money is handed to his personal representatives. If he leaves a will his executors, if he appoints any, or his residuary legatees, or the one to whom the policy is specially bequeathed, if no executor is named, can give a discharge. If he leaves no will, much trouble is often caused to the insurance company. There is no provision in the law of Quebec for the appointment of an administrator to an intestate succession, so debts are payable to the legal heirs direct. If these be all of age and available, and not too many, little difficulty is experienced. But if, as is frequently the case, the heirs are numerous, and scattered, and some of them minors, the company is put to much trouble before the last claimant is settled with.

Changing the Beneficiary.

I will briefly touch upon another feature of Quebec law which is peculiar and that is the right to change the beneficiary. If the beneficiary is a preferred beneficiary, wife or child, the assured may make whatever changes he likes within the family circle. In that respect Quebec does not differ from the other provinces, but if the beneficiary is outside this circle—father, brother, or stranger—it depends on whether or not the beneficiary has accepted the contract made in his favor. There is nothing in the law of insurance regulating this point, so as insurance is a contract we fall back on the common law of contract. Article 1029 of the Code says: "A party may stipulate for the benefit of a third person, when such is the condition of the contract which he makes for himself, or of a gift which he makes to another; and he who makes the stipulation cannot revoke it if the third person have signified his assent to it." Quebec has not the vested interest doctrine which prevails in the majority of the United States, but if a beneficiary have accepted the contract made in his favor it is irrevocable, and a new beneficiary cannot be substituted, without his consent. It is therefore always necessary to enquire whether or not the beneficiary has accepted. At first sight this seems easy. Did he sign the application with the assured? If so, he accepted

it. Did he serve a written notice on the company that he accepted? If so, he has a vested interest. But there is more to enquire into than this.

The court of appeal in the case of *Baron vs. Lemieux* has decided that acceptance by a beneficiary need not be in writing at all, but may be made tacitly. That is to say his conduct and actions may be sufficient to constitute acceptance. How is the insurance company to know whether there is any such conduct signifying acceptance? It cannot; and it is a pity that such a doctrine has been laid down. The only safeguard for the company is to take such precautions as it can and I suggest this rule: Require a solemn declaration from the assured stating that the beneficiary named in the policy did not know that he was made a beneficiary, and that he never had possession of the policy which always remained in the hands of the assured, and if the assured cannot say that the beneficiary did not know of his having been so appointed, to at least ask him for a solemn declaration stating that the beneficiary never accepted or signified his acceptance of the benefit of the stipulation, either expressly or tacitly. Another article of the Code (1145) says that payment made in good faith to the ostensible creditor is valid, although it be afterwards established that he is not the rightful creditor; so where such a solemn declaration is made I submit that a new beneficiary, assuming that he survive the assured and no further change be made, is, under the circumstances, an ostensible creditor, and payment to him will free the insurance company.

INTERNEED SOLDIER WANTS USED POSTAGE STAMPS

The Monetary Times some months ago received a postcard from John Corthals, a Belgian soldier interned in Holland with his little daughter, ten years old. She is collecting picture postcards, and the father asked readers of *The Monetary Times* to send a card now and again. Many of our readers have done this, duly receiving acknowledgment. Private Corthals now asks for used postage stamps "for to pass the longness of my captivity."

The Monetary Times previously made inquiries of the British consul at Amsterdam, who (while accepting no responsibility in the matter) stated that, according to the information given to him by the Dutch military authorities, Mr. Corthals "is a very suitable person, who belongs to an honorable family. He is employed at the post-office of the internment depot, where his employers are very well pleased with his work."

The soldier's name and address are: John Corthals, Belgian soldier, Internment Camp, Amersfoort, Holland.

Investors in Canada and the United States will find some attractive municipal bond offerings in the December list of Messrs. A. E. Ames Company, Toronto.

WATERED STOCK AND GOODWILL

Capitalization on Basis of Estimated Earnings— Bonus Stock

(Continued.)

Briefly stated, the method of arriving at the capitalization of a concern upon the basis of the future estimated earnings of the undertaking is the arriving at the capital stock of the new concern, not upon the basis of an equivalent total fair value of the assets acquired, but upon the basis of a calculation as to the amount of capital stock upon which a dividend could be paid at a certain rate, the total dividend being equal to the estimated annual net profits to be earned in future years.

Mr. D. Kerr, C.A., Montreal, in his address, gives this instance: A concern has been earning, say, \$300,000 per annum. A new corporation acquires this concern, and estimates that under the new arrangements future earnings, when the contemplated plans are matured, will be \$500,000 per annum. If the promoters of this new concern used as a basis for capitalization purposes a rate of 5 per cent., the capital stock of the new company will be fixed at \$10,000,000, because 5 per cent. on \$10,000,000 equals \$500,000, the estimated future net earnings.

Will Equal that Dividend.

Observe that the capitalization is not fixed at \$10,000,000, because there will be real assets representing this value, but merely because, upon a 5 per cent. basis, estimated future profits of \$500,000 will equal a dividend upon \$10,000,000 capital stock.

If the promoters estimated upon a basis of 10 per cent., then the capital stock would be \$5,000,000 instead of \$10,000,000, because 10 per cent. on \$5,000,000 equals \$500,000, the estimated profits.

Observe that these profits are not the profits that have actually been earned in the past, but are the profits which it is estimated will accrue in the future and based upon the past earnings, together with estimated economies to be effected, increased output, decreased cost of production, etc. It is also well to remember that usually these problematical and frequently too rosy anticipations do not materialize until some considerable period afterwards, if at all.

This method of capitalization upon the basis of estimated earnings affords a very convenient method of placing upon the goodwill of a concern as high a book value as may be desired.

Often the assets acquired, excluding goodwill, are paid for by the issue of bonds or preferred stock, or both, or the proceeds of these, and the common stock issued represents the book value of the goodwill acquired.

Different Views of Goodwill Values.

In valuing the goodwill or other intangible assets of companies, it is interesting to know that there is a greater difference in valuations than is found in the valuation of physical assets. Naturally, one must allow for differences of opinion in estimating values. When, however, the difference is 100 per cent., 200 per cent., 500 per cent. or more, there is need for more thought than ordinarily is demanded. Yet there are, rightly or wrongly, these differences in valuations of goodwill, etc.

Test of Fair Value.

As previously stated, a fair valuation of goodwill is, as a rule, three to seven times the annual net profits.

If one were told that the consideration payable for the goodwill of a concern was equal to ten, twenty, thirty or forty times the average annual earnings of the past, he would be very careful to inquire into the conditions, as such cases would certainly be most exceptional.

If the goodwill of any concern be paid for in hard cash, how often would one hear of such purchases being equal to ten, twenty, thirty or forty times the average annual earnings?

The test of fair capitalization would appear to be that the par value of any capital stock issued in exchange for assets acquired would equal the same amount if hard cash had been paid.

It is also interesting to note that when the total consideration for the assets and goodwill of a concern has been paid in hard cash, the amount paid for goodwill is usually

fair and reasonable. The inflation of the book value of the goodwill acquired takes place practically always when the consideration is paid for, wholly or partly, in stock or other securities of the purchasing company.

In order to fully comprehend the question of watered stock and capitalization, it is necessary to understand how "bonus stock" is given with the purchase of other securities. In this connection there is a great deal of misconception.

The uninitiated have an idea that corporations give to the public this so-called bonus stock.

In order to explain the bonus stock arrangements it might be well to assume a transaction.

A group of financiers obtain options, or purchase agreements, covering the assets and business of another concern. They form a new corporation, which agrees to assume the responsibilities of these financiers under the agreements and in consideration of thus assigning the agreements to the new corporation, the latter in addition issues to them as consideration, say, the whole of the common stock of the new corporation; in addition, the new corporation decides upon a certain bond issue, and the financiers agree to take this bond issue at a certain figure, say, 90 per cent.

Sell for Any Price.

The financiers are now in possession of the bonds and the common stock of the new corporation. They decide to sell these bonds to the public at 92 per cent., giving with each bond a bonus in common stock equal to 50 per cent. of the par value of the bonds. Strictly speaking, however, the public really buy bonds plus common stock for 92 per cent. of the par value of the bonds purchased by them. The stock is termed "bonus stock."

Let the position be stated in another way. The financiers have acquired certain bonds and stocks. As owners of these, they may sell them at any price they may decide, just the same as can anyone owning other securities or assets.

From this illustration it will be observed that it is not the new corporation which gives this bonus stock, because the corporation has issued this common stock to these financiers for consideration, even though the consideration may not be of value equivalent to the total par value of the stock thus issued.

(To be Continued.)

CANADIAN PACIFIC AND GERMAN HOLDINGS

A correspondent writes. (says a Canadian Associated Press cable message), to the London Morning Post on the sale of Canadian securities in enemy names: "The secretary of the Canadian Pacific has stated that shares of the company in New York and Montreal registers are beyond the sphere of our public trustees' activities, but he added that in obedience to Royal proclamation the company has stopped transfer of shares to enemy names and payment of dividends thereon. That is well so far as it goes, but is it enough? The restrictions imposed are for the duration of the war only. Property in these enemy shares ought to be stopped by some public authority.

"What is happening is the Germans are sending these Canadian Pacific Railway shares to New York by submarine and selling them there at a discount sufficient to recoup purchasers for non-payment of dividends during the war. The government ought to induce the Dominion government to declare that such sales will not be recognized at all. The neglect to take this step has been a gross oversight on the part of our government, which might long ago have come to an arrangement with the Dominion government if they were big and alert and in earnest for the attachment of enemy shares and non-recognition of transfers. Fortunately, it is not even yet too late to take action, because the bulk of enemy holdings are still unsold."

How institutional bond buyers are purchasing government bonds is exemplified in the following list of various government securities purchased by the Sun Life Assurance Company of Canada since the outbreak of the war, totalling over \$9,000,000: Dominion of Canada, \$2,573,666.66; government of Great Britain, \$2,205,766.66; Anglo-French governments, \$3,000,000; French government, \$901,179; Russian government, \$500,000; government of Newfoundland, \$50,000. This does not include the company's subscription of \$5,500,000 to the last Canadian war loan.

SHIPBUILDING ON PROFITABLE BASIS

Minister of Marine Outlines Position of the Industry in Canada

"During the present year real and substantial progress has been made in the direction of establishing the shipbuilding industry on a permanent and profitable basis," said Hon. J. D. Hazen, minister of marine and fisheries, after the launching of dredge No. 16, the largest dredge ever built in Canada for the department of marine and fisheries, at the shipbuilding works of Canadian Vickers, Limited, Maisonneuve. The dredge was built by Canadian Vickers, Limited, for the use of the department in making the north channel, Beaujou, about 35 miles below Quebec, passable for big ships, and is 292 feet in length, 48 feet in breadth, with a depth of 20 feet 6 inches, capable of dredging at a depth of 57 feet and having a capacity of 1,500 tons per hour.

Plants at Montreal, Toronto, Collingwood, Port Arthur and Vancouver were splendidly equipped for the construction of steel ships, and, in addition, Hon. Mr. Hazen reported the successful building of wooden vessels in Nova Scotia. A large number of the highest class of auxiliary schooners for use in the timber trade between British Columbia and Australia and the Orient are under construction in Vancouver.

Building Ships for Norway.

Canadian yards have secured a number of contracts for ships for Norway. Following the outbreak of the war the Dominion parliament decided to prohibit the export of ships from Canada without first obtaining approval from the government, and permission has been granted for the export of ships to be constructed as follows:—

Messrs. J. Coughlan and Son, Vancouver, B.C., three large steel freighters, with a carrying capacity of over eight thousand tons each, for a price of approximately \$1,200,000 each; the Wallace Shipyards, Vancouver, four large steel freighters; the Western Drydock Company, Port Arthur, three full canal-size steel freighters; Thor Iron Works, Toronto, two full canal-size freighters; Polson Iron Works, Toronto, two steel freighters of approximately 3,000 tons capacity, and two of 4,250 tons capacity; Canadian Vickers, Limited, Montreal, two steel freighters of about 7,000 tons capacity; the Nova Scotia Steel Company, New Glasgow, N.S., three steel freighters.

Not for Enemy's Use.

Conditions upon which permission for the export of these vessels has been given are that at no time during the continuation of the war shall the ships engage in any enemy trade, and that no demand shall be made on Great Britain for materials, machinery or labor in connection with the construction of these ships.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended November 24th:—

Temiskiming Mining Company, 78,677; La Rose Mine, 87,345; Dominion Reduction Company, 174,000; McKinley-Darragh-Savage Mines, 162,332; Nipissing Mining Company, 302,135. Total, 804,489 pounds, or 402.2 tons.

The total shipments since January 1st, 1916, now amount to 29,262,568 pounds, or 14,631.2 tons.

In booklet form, the Consumers' Gas Company has issued a lengthy honor roll of its employees who have enlisted for active service in the Empire's army.

The following companies have increased their capital stock: Lake Shore Mines, Limited, with Ontario charter, from \$1,500,000 to \$2,000,000; Success Rural Telephone Company, Limited, with Saskatchewan charter, from \$250 to \$300; Montreal (Lachine Canal) Land Syndicate, Limited, with Dominion charter, from \$400,000 to \$500,000; Howard Smith Paper Mills, Limited, with Dominion charter, from \$1,000,000 to \$3,000,000; Louison Lumber Company, Limited, with Dominion charter, from \$200,000 to \$450,000.

TORONTO AND FIXED ASSESSMENTS

Commissioner Bradshaw's Comments on Application of Large Departmental Store

In regard to the request for a fixed assessment for the proposed large departmental store in Toronto, Mr. T. Bradshaw, finance commissioner, made a report to the city, which is of interest to Canadian municipalities generally. He said in part:—

Entertaining, as I do, the greatest admiration for the enterprise and those associated with it, I greatly regret that, while favoring all of the other concessions sought, I cannot see any justification or warrant for the assessment exemption desired. There is a vital principle involved in it, so far as the city and the citizens are concerned, and I am convinced that, if granted, it would open up a situation which would lead to most serious consequences.

The present business has been established in the city for a great number of years, and has been uniformly successful. The application for a concession or bonus from the city, therefore, comes as a great surprise.

Not a New Enterprise.

No claim is made for it on the grounds that it is a new enterprise coming into the city, that the business is in the experimental stage, that its conduct has not been highly profitable, or that the remarkable financial success achieved has been due in whole or in part to any special assistance or bonus having been heretofore granted by the city.

One of the underlying principles of taxation is that there shall be as nearly as possible equality in contribution among those taxed.

Assuming that the fixed assessment sought were granted, would it not mean that every other merchant in the city would have to bear a share of the concessions granted to his most powerful and energetic competitor? Surely it cannot be seriously intended that the smaller merchants throughout the city shall be compelled to pay tribute to their wealthiest peer. The proposal appears to be both inequitable and unfair.

Not a Deciding Factor.

I cannot but believe that the question of a fixed assessment is a minor one to the applicants, compared with the other larger and more important matters entering into the whole scheme. If it were a deciding factor, it surely would have been brought up for consideration before an investment of several millions of dollars had been made, and before plans had been laid for the construction of the building, instead of at the "eleventh hour."

Mr. Bradshaw pointed out that the former application, that of a large hotel company, for a fixed assessment, was under entirely different circumstances, "as it involved a new enterprise coming to the city, a considerable investment in a business which had heretofore proved entirely risky, the building up of a business by a concern which had no established record in the city, and an enterprise which the city needed, but for which it had always been more or less difficult to interest capital."

The application for a fixed assessment was withdrawn.

HYDRO COMMISSION TO BUILD PLANT

The Ontario hydro-electric commission will proceed with actual construction on the Chippewa Canal power project in the spring, and will do the work itself. The commission made its decision after careful consideration of the reports of engineers based upon nearly two years of investigation.

According to Sir Adam Beck, the commission will have to make an investment of about \$800,000 in motors, excavating machinery, railway tracks, etc., to dig the twelve-mile canal through which water will be taken from the Chippewa Creek to Queenston—the outlet below the falls where the development plant will be built.

It is estimated that the work of excavating the twelve-mile canal will cost between \$8,000,000 and \$9,000,000, and the commission anticipates being able to complete the work at less cost than if done by contract.

Saskatchewan Co-operative Elevator Company, Limited

6th Annual General Meeting, held at Regina, Sask., Nov. 22, 1916

REPORT AND BALANCE SHEET PRESENTED TO SHAREHOLDERS

REPORT OF BOARD OF DIRECTORS.

The Report which your Board of Directors submit for your consideration in connection with the fifth year's business of the Company, for the season ended July 31, 1916, deals with the exceptionally good crop of 1915. It has now been amply demonstrated that our system of co-operative elevators can successfully cope with the conditions arising in a phenomenally good crop year, as well as with those of a poor year. The last report dealt with the latter conditions.

It is a matter of history by this time that the 1915 crop was unusual in several ways—for high yield, for high average grade and for high prices, all of which greatly benefited the farming community and the country generally. In the 1915-1916 grain season, ending with August, approximately 211,000,000 bushels of wheat, and 59,000,000 bushels of oats, barley and flax were shipped from this Province. All who had to do with the handling of this crop found their facilities taxed to the limit, the country elevators, the railways, the terminals and the Great Lakes freighters; while coupled with these difficulties was the pressing labor problem. Our average handling per elevator was 170,000 bushels, which is 68,000 bushels higher than our best previous record. The Cabri elevator heads the list, showing a handling of 520,000 bushels of grain.

The cost of handling grain through our elevators was lower than in any previous year. This is entirely attributable to the large volume handled, and the saving effected thereby is reflected in the profits for the period.

OPERATING DEPARTMENT.

During the 1915-1916 grain season the Company handled a grand total of 43,198,000 bushels of grain, of which 4,109,000 bushels were loaded over the platform and 39,089,000 bushels passed through our 230 elevators, the latter amount being three million bushels more than the combined handling through our elevators during our three first seasons. Eight of the new houses constructed in the spring and early summer of 1916 were opened for business as soon as complete, as it was apparent there was sufficient grain unmarketed in these districts to justify this procedure. The call for recruits in the service of the Empire, and consequent general scarcity of help, made it difficult to secure and retain a sufficient number of experienced operators. The Company's policy of training its own assistants to become operators continues, and the number of operators in our employ who have seen service only with this Company increases yearly.

Stocktaking at the close of the business year was a task of real magnitude. An accurate yearly valuation of stocks by means of a careful weigh-up and grading is essential. The balance sheet shows our grain stocks on July 31st, 1916, to be valued at \$1,724,020.69. When it is remembered that these "cut-offs" are all taken by the travelling superintendents, who have an average of 23 elevators to look after, and that every bushel of grain in the elevators has to be weighed up by them, some appreciation is gained of the work involved. The securing of cars prior to the weigh-up was another factor to be considered. The greatest care, however, was exercised in prosecuting this work, to ascertain in what districts there was most grain yet to be marketed, so that such points might be weighed up last, and the elevator closed for the shortest possible period.

CONSTRUCTION DEPARTMENT.

Twenty-seven new elevators were built during the 1916 building season, and one was purchased. Crews were employed for a period of six months, and the work was carried on expeditiously despite unfavorable weather, with the result that every new elevator was completed in time for the new crop season. There is considerable work to be done during the year in maintaining so large a system of elevators in a good state of repair, and much of the time of our chief engineer and the employees of the Construction Department, is devoted to this work.

ORGANIZATION AND SHARE DEPARTMENT.

The work of this Department is constantly increasing with the growth of the Company. Nearly 200 applications for organization were received, and from among these 30 new Locals were organized, making 260 in all, with 18,077 shareholders, holding an aggregate of 47,178 shares.

PUBLICITY DEPARTMENT.

During the year your Directors instituted a Publicity Department, through which shareholders are kept in touch with matters affecting the Company's interests and development. The Co-operative News is issued bi-monthly, and since last April has been sent regularly to all shareholders. A further amount of publicity has been secured through the medium of special issues of agricultural and financial journals.

COMMISSION DEPARTMENT.

The Commission Department at Winnipeg handled 39,674,000 bushels of grain, which included the Company's purchased grain, 93 per cent. of all farmers' grain stored in our elevators and 3,287 cars which were loaded over the platform. The number of platform-loaded cars consigned to the Commission Department is on the increase. These facts constitute a gratifying feature of this Report.

BALANCE SHEET AND DIVIDEND.

A copy of the balance sheet and the profit and loss account, setting forth the financial position of the Company as at July 31st, 1916, certified by the Provincial Auditor, has been sent to each shareholder. The profit for the year amounts to \$757,275.10. From this amount provision has been made for the payment of the Dominion Government Business Profits War Tax. This tax is assessable at the rate of 25 per cent. of all profits in excess of 7 per cent. on capital invested, including reserves, and is collectable on the profits of three annual financial periods. The amount provided, \$199,479.39, represents tax payable for the two periods ended July 31st, 1915, and July 31st, 1916.

A cash dividend of 8 per cent. on capital paid up on all shares allotted before April 1st, 1916, was declared by your Board of Directors out of the above profits, and has been sent to each shareholder. Your Directors will submit to this meeting their recommendations for the disposal of the balance of the surplus.

BONUS.

The very large business handled during the year entailed a heavy pressure of work upon all our employees, and this condition was accentuated at the Regina and Winnipeg offices by the unavoidable shortage of experienced help. The employees having responded cheerfully to these demands, it was decided that our appreciation should be extended to them in the form of financial consideration. Towards the close of the business year, a bonus was therefore paid to all deserving employees.

TERMINAL ELEVATOR.

Your Directors were instructed by the last Annual Meeting to carefully consider the advisability of erecting a terminal elevator at the head of the Great Lakes. They decided that the time had come for such a move, and as a result of their decision a site was secured at Port Arthur, Ontario, and the building of a terminal of 2,500,000 bushels capacity was commenced on July 3rd last. The elevator will have a storage tank capacity of 2,000,000 bushels, and the workhouse capacity will be 500,000 bushels. Additional units to provide a total storage up to 16,000,000 bushels can be added as required. The workhouse is designed to accommodate a storage capacity of 8,000,000 bushels. Mr. C. D. Howe, Chief Engineer of the Board of Grain Commissioners for Canada, is the Consulting, Designing and Supervising Engineer. The foundation work is nearly complete, the Barnett-McQueen Company, of Fort William, having been awarded this contract, as well as the contract for the elevator building, which is to be ready for service by September 1st, 1917. The estimated cost of the

whole undertaking is \$1,225,000, which is being financed from funds in the hands of the Company. It is our largest single undertaking to date, and would not have been possible but for the policy which has been followed of creating reserves for future development.

"HYBRID" TICKET.

Early in the year a protest was lodged with the Board of Grain Commissioners for Canada against the use of the subject-to-grade-and-dockage, or "hybrid" ticket. This is too lengthy a matter to be dealt with in a few sentences, but our attitude has been fully explained in the Co-operative News. We believe that the discussion of this question has revealed a root evil of the grain trade. The claim was made by the North West Grain Dealers' Association, representing the line elevator companies, that farmers' grain stored in country elevators under this ticket becomes the property of the company storing it, to be dealt with as it sees fit. To this view we are very strongly opposed, and do not believe it is in accord with the provisions of The Canada Grain Act. A ruling by the Department of Justice is being awaited with interest.

FEDERATION.

The Minutes of the Fifth Annual Meeting record that the Directors were asked to give careful consideration to the question of the federation of the farmers' business organizations of Western Canada, but to take no definite action without consulting with this Annual Meeting. Reports appeared in the Press during October stating that a plan for amalgamation had been consummated, but so far as your Company is concerned, no such action has been taken.

THE PRESENT CROP YEAR.

The crop of the present year is a more difficult one to handle than the crop of last year because of its greater variety of grades. The farmer is receiving good prices, but threshing has been delayed by bad weather and a lack of help. It is too early to anticipate what volume of business the company will handle, but rusted, hailed and dried out areas are more and more offset by the loyal support we receive, and the good yields in other localities.

It has been found necessary to provide additional space at the Head Office, and rather than add another storey to the building, which would necessitate dividing the staff, the north wall of the present building has been removed, and the building extended .25 feet, thus providing the required space upon one floor.

This Report would be incomplete if we made no reference to the change in management which has recently occurred, although it did not take place until some time after the close of the 1915-1916 business year. The value of Hon. C. A. Dunning's services as General Manager is too well known to need enlarging upon, and it was with very sincere regret that his resignation was accepted by your Board to take effect on October 31st. His enthusiasm and his efficient work during the past five years have been highly appreciated. Mr. F. W. Riddell, who has rendered the Company splendid service as Assistant General Manager, becomes General Manager, and Mr. James Robinson has been appointed to take Mr. Dunning's place on the Executive, with the title of Executive Director.

A word regarding the future. The Company is firmly established in the grain business. It has the loyal support of its shareholders, and it would appear that there is no limit to the possibilities of farmers' co-operation in the marketing of their grain. The establishment of the Commission Department in Winnipeg four years ago, and the building of the terminal elevator at the present time, are examples of the logical expansion which should always be kept in view. But continued progress depends mainly on the fulfilment of one primary condition, namely, the loyalty of the individual farmer to his own institution.

I have examined the Books and Accounts of the Saskatchewan Co-operative Elevator Company, Limited, for the financial period ended July 31st, 1916, and hereby certify that in my opinion the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the Company's affairs. The Grain Stocks shown on the Balance Sheet have been certified as correct by the General Superintendent of the Operating Department and countersigned by the General Manager. All my requirements as Auditor have been complied with.

G. L. HOPKINS, Provincial Auditor.

FEDERAL RESERVE BOARD SPEAKS

Issues a "Warning" as to Foreign Government Treasury Bills

In a statement issued on Tuesday, the federal reserve board of the United States warns bankers to avoid locking up their funds by purchasing treasury bills of foreign governments, involving long-term obligations. While specifically disclaiming "any intention of reflecting upon the financial stability of any nation," the board advises all investors to proceed with caution and formally announced to member banks of the federal reserve system that with the liquid funds which should be available to United States merchants, manufacturers and farmers, in danger of being absorbed for other purposes, it "does not regard it in the interest of the country at this time that they invest in foreign treasury bills of this character."

As to Private Investors.

"The board does not consider that it is called upon to advise private investors," continues the statement, "but as the United States is fast becoming the banker of foreign countries in all parts of the world, it takes occasion to suggest that the investor should receive full and authoritative data, particularly in the case of unsecured loans—in order that he may judge the future intelligently in the light of present conditions and in conjunction with the economic developments of the past."

"The United States has now attained a position of wealth and of international financial power, which, in the natural course of events it could not have reached for a generation. We must be careful not to impair this position or strength and independence. While it is true that a slowing down in the process of credit extension may mean some curtailment of our abnormally stimulated export trade to certain countries we need not fear that our business will fall off precipitately should we become more conservative in the matter of investing in loans, because there are still hundreds of millions of our own and foreign securities held abroad which our investors would be glad to take over, and, moreover, trade can be stimulated in other directions."

To Remain Liquid.

"In the opinion of the board it is the duty of our banks to remain liquid in order that they may be able to continue to respond to our home requirements, the nature and scope of which none can foresee, and in order that our present economic and financial strength may be maintained when, at the end of the war, we shall wish to do our full share in the work of international reconstruction and development which will then lie ahead of us, and when a clearer understanding of economic conditions as they will then exist, will enable this country more safely and intelligently to do its proper part in the financial rehabilitation of the world."

United States government officials informally interpreted the warning as the reserve board's answer to the recent proposal of J. P. Morgan and Company, British fiscal agents in the United States, to have United States bankers accept British treasury bills of an indefinite total issue, secured by gold reserves held in Ottawa. Such loans would be for 90 days, with the period of renewal for five other 90-day periods.

Imports of Gold.

Mr. H. P. Davison, of the Morgan firm, was in Washington recently, and conferred with President Wilson and some members of the reserve board. It was said later that he sought to have bank of the reserve system authorized to buy British treasury bills as if they were bills of exchange to cover commercial transactions.

Danger from further importation of large amounts of gold, the board says in its statement, will arise only in case the gold is permitted to become the basis of undesirable loan expansions and of inflation. Emphasis is laid upon the necessity for caution in putting money into investments which are short term in name but which, "either by contract or through force of circumstances, may in the aggregate have to be renewed until normal conditions return."

Too Proud to Lend.

The board's warning, which will go down in financial history as a "too proud to lend" document, does not seem to have been taken very seriously in the United States.

BANK OF COMMERCE TAKES 500 SHARES

Much attention continues to be paid to the British Italian Corporation, in which, as exclusively announced in *The Monetary Times* three weeks ago, the Canadian Bank of Commerce has acquired an interest.

The Corporation was registered on July 20th, and has an authorized capital of £1,000,000, in 50,000 shares of £20 each. The Credito Italiano was one of the principal sponsors for the concern in Italy, the London County and Westminster Bank and Lloyds Bank acting in a somewhat similar capacity in Great Britain. The main object of the Corporation is to promote the joint economic interests of Great Britain and Italy and to oust German influences from the Peninsula, and the British government has recognized the great utility of the scheme by granting a subsidy of £50,000 a year.

The list of shareholders appended, and gathered by the London Financial Times, comprises allotments from July 28th to September 23rd, and is the latest obtainable. It shows that 41,509 shares, representing £830,180, were allotted between those dates for cash. The allottees of 250 shares and upwards, the Canadian Bank of Commerce taking 500 shares with a par value of \$50,000, from July 28th to August 27th, were as under:—

Brown, Shipley and Company, Founders' Court, E.C.	1,000
Bank of Liverpool, Limited, 7 Water Street, Liverpool	1,250
Right Hon. Sir Ernest Cassel, Kt., 51 Green Street, Grosvenor Square, W.	2,500
Commercial Bank of Scotland, Limited, 14 George Street, Edinburgh	1,000
Clydesdale Bank, Limited, Glasgow	500
Credito Italiano, 22 Abchurch Lane, E.C.	2,500
Ellerman Lines, Limited, 12 Moorgate Street, E.C.	1,000
Glyn Mills Currie and Company, 67 Lombard Street, E.C.	1,250
Sir George L. Holford, G. H. Benson and N. H. Smith, 26 Old Broad Street, E.C.	500
Lloyds Bank, Limited, 72 Lombard Street, E.C.	5,000
London County and Westminster Bank, Limited, 41 Lothbury, E.C.	5,000
Metropolitan Carriage Wagon and Finance Company, Limited, 2 Central Buildings, S.W.	1,250
Merchants' Trust, Limited, 4 Crosby Square, E.C.	1,000
National Bank of Scotland, Limited, Edinburgh	500
Prudential Assurance Company, Limited, 142 Holborn Bars, E.C.	4,950
Union Bank of Manchester, Limited, 17 York Street, Manchester	250
A. Weir, 57 Holland Park, W.	1,000
Witan Investment Company, Limited, 28 Austin Friars, E.C.	1,250
Right Hon. Sir E. Cassel, Kt., 51 Green Street, W.	1,250
British Maritime Trust, Limited, 21 Billiter Street, E.C.	500
Canadian Bank of Commerce, 2 Lombard Street, E.C.	500
F. H. D. Man, 7 Mincing Lane, E.C.	250
J. Paull and W. S. Smee, 62½ Old Broad Street, E.C.	250
Martin's Bank, Limited, 68 Lombard Street, E.C.	500
R. T. Smith, 4 and 6 Copthall Avenue, E.C.	250
Excess Insurance Company, Limited, Birchin Lane, E.C.	1,250
Viscount Allendale, 144 Piccadilly, W.	500
Viscount Hythe, 28 Victoria Street, Westminster	500
Thos. Wilson Sons and Company, Limited, Hull	250
C. Hanbury, Kingstown House, Dorchester	1,000
C. E. Heath and M. Evans, 3 and 4 Royal Exchange Buildings, E.C.	350
C. E. Heath and H. E. Crawley, 3 and 4 Royal Exchange Buildings, E.C.	500

The office of the corporation is at 3 Lombard Street, E.C., and the secretary is Mr. C. A. Radice. The first directors are Mr. Arthur Hill, Mr. Robert H. Benson, Mr. J. W. Beaumont Pease, Sir Henry Babington Smith, Mr. Joseph Burn, Mr. Alberto Pirelli, Mr. Riccardo Bianchi and Mr. Ignatius G. Marizi-Fe. The last named is connected with the Credito Italiano, which, so long as it owns at least 2,500 shares—its present holding—is entitled to nominate one-third of the board.

The Glens Falls Insurance Company has been authorized to transact automobile insurance in addition to its present business of fire, hail and tornado insurance.

The Alberta Farmers' Co-Operative Elevator Company, Limited

BALANCE SHEET AS AT AUGUST 31st, 1916

ASSETS.

Fixed Assets	\$ 929,784.18

Calgary, 14th November, 1916.

We beg to report to the Shareholders that we have audited the books and accounts of The Alberta Farmers' Co-Operative Elevator Company, Limited, for the thirteen months ended 31st August, 1916, and hereby certify that in our opinion, subject to our report of 13th November, 1916, as called for by Section 26 of the Act of Incorporation, the foregoing Balance Sheet is properly drawn up so as to exhibit a true and correct view of the Company's affairs at 31st August, 1916, and as shown by the Books of the Company.

SCOTT & STUART, Chartered Accountants.

AGRICULTURAL INVESTMENTS ARE SAFE

What an Alberta Farmer Did—Revulsion Against Radical Legislation

Here is a letter received by Mr. Kingman Nott Robins, of the Alberta Mortgage Investors, Limited, Rochester, N.Y., a company which has a considerable sum invested in Alberta, from one of their borrowers:—

"I will give you here a brief summary of my experience since coming here six years ago. I was a new hand at farming, my trade being meat cutting and butchering. My capital was \$400, which was a first payment on my quarter section (160 acres). Most of my stock, harness, implements, etc., were bought at sales, all "on time," necessarily. The buildings on the place were about as good as nothing and had either to be rebuilt or replaced entirely. There were 20 acres broken, and badly farmed, bringing poor returns the first year." After mentioning a number of mischances, he says: "In spite of all these drawbacks, I have done well. I consider my farm worth \$3,500 to \$4,000. I have four horses, 12 cattle, over 400 pure-bred Buff Orpington chickens and 125 turkeys, besides implements, harness, etc. I have a well 170 feet deep with an inexhaustible supply of water. The well with pump cost me \$400. I have built a \$125 chicken house and put up nearly \$50 worth of poultry fencing; have built root cellars to hold over 3,000 bushels of potatoes and other vegetables. As to income, I raise about 10 acres of garden and roots annually which net from \$600 to \$1,000 total. I generally sell from 20 to 40 tons timothy hay which brings from \$60 to \$14 per ton. My grain is most all used on the farm except a few hundred bushels sold to the neighbors for seed. My four milk cows bring in from \$50 to \$80 each (counting calf). Last year 80 hens laid 600 dozen eggs, which averaged more than 25 cents per dozen. (I always work for winter egg production.) The surplus hens were sold in spring, dressed, at \$1 each. My turkeys average \$2.50 each in fall. By having vegetables to feed my young cattle, the two-year-old steers bring \$75 each in spring.

Long-Term Loans Needed.

"Now I think you will agree with me that 8 per cent money is cheap, to put into proper buildings for stock and poultry and a few more milk cows. But that money must be on a long-time loan or it is of little use. I have borrowed from the banks and in a few months have to sell young stock (regardless of market conditions) to pay the loan. There is no doubt but loans on Alberta farm property are safe, sane and sure, and the loan companies who deal fairly with the farmers are a wonderful help to them. The money is here, on the ground, and it only takes a little money to start on, and time and work will do the rest. I can work for Carstens Packing Company, Tacoma, Washington, for \$150 per month if I want to give up farming, which I think proves my faith in my present investment."

Effect Upon Towns.

Prosperous conditions in rural Alberta, Mr. Robins states, are having their effect on the towns, those businesses having to do directly with the farming population—wholesale and retail merchandising, coal, lumber, packing, farm implements, etc., showing increases. The rural centres are in good condition, and if the cities were not carrying a burden of excessive maintenance expense resulting from over-expansion beyond the needs of their surrounding communities, they would be in comfortable shape. Immigration of United States farmers continues, in somewhat better numbers than in 1915, and 45 per cent of the total go to Alberta, chiefly to the great Peace River country now accessible by railway, 300 miles north-west of Edmonton, and acknowledged by experts to be the rival of the finest sections of Alberta.

A totally inadequate and incorrect idea of the agricultural possibilities of western Canada is likely to be gained by the casual traveller on Canada's main arteries of passenger traffic.

To see the country at all, the observer must necessarily take the secondary lines through the well developed agricultural areas of central Saskatchewan and central Alberta, and the lines south from Calgary. Those areas familiar to the United States tourist, are certainly little better than the poorest and least attractive farming sections of western Can-

ada. Two expert farm mortgage men accompanied the writer on his field trip this summer, and both expressed more than a little surprise at the character of the country and the development of the better sections of Alberta. They had not expected to find it a region equal in improvements to many of the best agricultural sections of the United States and surpassing most of them not only in productivity but also in natural beauty, with its lakes, streams and rolling green expanse dotted with woods and shrubbery.

Not from Car Window.

However unfortunate the casual impression of western Canada from the car window, nevertheless, the remarkable productivity and living advantages of the better parts of this vast country are steadily impressing themselves on the prospective land seeker. And it seems a certainty that as the outcome of the war becomes clearer and more certain, and its effect is rightly measured, immigration will come into western Canada in increasing numbers. This movement will gradually bring into use the large untilled areas, and raise land prices to a point approximating a fair capitalization of the productive capacity of western Canadian lands. Certainly, in Alberta, if not elsewhere in western Canada, land values at the present time are lower in proportion to what the average farmer is producing on them, year in and year out, than anywhere else on the continent. This statement is not contradicted by any competent observer. And the other conditions affecting the desirability of the country from a farming standpoint are at least no hindrance to its development.

Must Take Statesmanlike View.

"It remains for those having in charge the management of Canada's affairs during the years to come to take a statesmanlike view of the situation and to give to the country such a government as will encourage enterprise, investment and that individual initiative without which no country can develop," says Mr. Robins, adding: "It is encouraging to those who wish Canada well to note a revulsion in sentiment against the radical legislation that followed the outbreak of the war. There seems to be a disposition on the part of the great groups of industry and business, farmers and city workers, to co-operate to mutual advantage, as evidenced by the recent conferences in Winnipeg and elsewhere. Canada has a wonderful opportunity to command the enterprise and capital of the world at this time when other countries are experimenting with laws of equalization, communistic in place of individual enterprise, etc.

"It is to be hoped that Canada will bide her time, letting the other countries serve as experimental laboratories, adopting for herself only the tried and proved. In the meantime, she is sure to reap the harvest that has always rewarded the development of a country of great natural resources by a free people."

The Monetary Times believes with Mr. Robins that Canada will not throw away an opportunity so obviously and surely hers, and that investment of both capital and labor in Canada's fundamental industries, particularly agriculture, will continue to be safe and remunerative.

HYDRO RADIAL AND BOND ISSUES

By-laws are to be voted upon by the various municipalities for the proposed hydro radial line from Port Credit to St. Catharines at the beginning of the year. The cost of the line from Port Credit to St. Catharines is estimated at \$11,360,363. Of this Hamilton is asked to bear \$5,860,286; the township of Saltfleet, \$1,002,296; Barton, \$284,484; East Flamboro', \$266,626; and West Flamboro', \$66,600. The rest is divided among the other townships, towns, villages and the city of St. Catharines, its share being \$623,750.

The amounts of the bonds to be issued by the respective municipalities for deposit with the Ontario Hydro Electric Commission are as follow, and total \$11,360,363:—

Townships—Toronto, \$243,087; Trafalgar, \$518,735; Nelson, \$374,812; East Flamboro', \$266,626; West Flamboro', \$66,600; Barton, \$284,484; Saltfleet, \$1,002,296; North Grimsby, \$424,077; Clinton, \$473,740; Louth, \$503,595; Grantham, \$128,280. Villages—Grimsby, \$101,817; Beamsville, \$51,460. Towns—Oakville, \$203,008; Burlington, \$144,536. Cities—Hamilton, \$5,860,286; St. Catharines, \$623,750.

Invest for Safety and Income!

Canadian Government and Municipal Bonds combine, to a larger extent than is the case with any other form of security, unquestioned safety of principal, with an attractive, dependable income return. Write us to-day for a list of these Bonds, which may be obtained to yield

NEW INCORPORATIONS

Five Mining Companies with Capital Over \$1,000,000
—Twelve Charters in British Columbia

Canada's new companies incorporated this week number 46. The head offices of these companies are located in five provinces. The total capitalization amounts to \$13,156,090. The largest companies are:—

Copper Queen Mining and Smelting Company, Limited	\$1,000,000
The Dominion Cement Products Company, Limited	1,500,000
Hazelton Rocher de Roulé Mining and Exploration Company, Limited	2,500,000
Thompson-Krist Mining Company, Limited	2,500,000
West Comstock Mining Company, Limited	3,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	17	\$7,255,190
Quebec	6	1,735,900
British Columbia	12	3,460,000
Alberta	9	435,000
Manitoba	2	270,000
	46	\$13,156,090

The following is a list of charters granted during this week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Fernie, B.C.—Aldra Theatre Company, Limited, \$10,000.

Victoria, B.C.—British Columbia Glass Works, Limited, \$10,000.

Bow Island, Alta.—The Bow Island Drug and Stationery Company, Limited, \$20,000.

Hull, Que.—Bank Hotel, Limited, \$49,000. J. N. Fortien, J. P. Coulson, J. E. Gavel.

Sudbury, Ont.—Fournier, Limited, \$40,000. A. Fournier, M. J. Powell, J. F. Templeton.

Edmonton, Alta.—Restaurants, Limited, \$25,000; Keystone Mining Company, Limited, \$200,000.

Ottawa, Ont.—International Feldspar Company, Limited, \$50,000. J. V. Poaps, N. Hollister, F. Curry.

Medicine Hat, Alta.—The Medicine Hat Farmers' Exchange, Limited, \$10,000; Golf Lands, Limited, \$5,000.

Poland, Ont.—Lavant Dalhousie Telephone Company, Limited, \$3,190. J. Park, J. C. Currie, W. F. Umpherson.

Walkerville, Ont.—Walkerville Construction Company, Limited, \$40,000. J. H. Walker, H. E. Walker, H. H. Walker.

Millbrook, Ont.—The Fallis Line Telephone Company, Limited, \$1,000. H. A. Fallis, H. W. Ball, A. J. Henderson.

Chatham, Ont.—The Central Development Company, Limited, \$250,000. W. G. Ryan, G. W. Holmes, P. W. Roth.

Ladner, Ont.—Ladner Lumber Company, Limited, \$200,000. J. J. Mackan, R. Turnbull, H. W. O. Woodroffe.

Gimli, Man.—The Gimli Flour Mills and Trading Company, Limited, \$20,000. J. Rech, B. J. Lifman, J. Greenberg.

Renfrew, Ont.—The South McNaughton Telephone Company, Limited, \$1,000. P. H. Bolger, J. M. Barr, G. F. Cardiff.

Sault Ste. Marie, Ont.—The Sault Shipping Company, Limited, \$300,000. R. E. Nicholson, A. Taylor, H. A. Cowan.

Pointe-aux-Trembles, Que.—Parlor Furniture Manufacturers, Limited, \$98,000. A. R. W. Plimsoll, R. Brodeur, A. Chouinard.

The Pas, Man.—Northern Manitoba Mining and Development Company, Limited, \$250,000. R. Kerr, G. R. Bancroft, H. S. Johnson.

Calgary, Alta.—The Canadian Foundry and Machine Company, Limited, \$100,000; R. Knight, Limited, \$20,000; Motor Sales, Limited, \$35,000; the Alberta Import Company, Limited, \$20,000.

Montreal, Que.—Montreal Patents Promoting Company, Limited, \$49,000. J. Lusignan, O. Laporte, C. Landry; the Dominion Cement Products Company, Limited, \$1,500,000. C. Bordier, J. O. Fournier, A. Binnette; Leannpark Realty, Limited, \$19,900. N. Gordon, E. Lafontaine, G. Monarque; Wah On Club, Incorporated, \$20,000. S. H. Thick, C. G. Thick, J. W. Lee.

Vancouver, B.C.—Vancouver Pickle Company, Limited, \$50,000; Iowa Shingle Company, Limited, \$10,000; Vancouver Dry Docks, Limited, \$100,000; Copper Queen Mining and Smelting Company, Limited, \$1,000,000; Union Jack Motor Company, Limited, \$10,000; Yuctaw Gold Mines, Limited, \$250,000; Hazelton Rocher de Roulé Mining and Exploration Company, Limited, \$2,000,000; Wing Hong Lin Theatre Company, Limited, \$10,000; Canadian Teachers' Agency, Limited, \$10,000.

Toronto, Ont.—The Standard Lithographic Company of Canada, Limited, \$40,000. H. Reeder, G. H. Gray, H. Sutherland; West Comstock Mining Company, Limited, \$3,000,000. W. B. Sturup, J. S. Duggan, C. A. S. McKay; Thompson-Krist Mining Company, Limited, \$2,500,000. E. M. Gallagher, I. O. Allan, B. W. Edmunds; Malloy and Bryans, Limited, \$100,000. F. M. McDowell, G. B. Flett, G. R. Sproat; the I. D. Caulk Company of Canada, Limited, \$40,000. A. Fry, R. McLean, J. D. Musselman; the D. Burtch Manufacturing Company, Limited, \$50,000. J. McMillan, D. Burtch, E. J. Swift; the Walter Buton Company, Limited, \$40,000. D. Henderson, W. H. McGuire, G. F. Rooney; Painless Horseshoe Nail, Limited, \$600,000. F. E. Pearce, U. C. Lane, W. Rudd.

Application for letters patent is being made by the Canadian Fur Company, Limited, Summerside, P.E.I., \$36,000. L. R. Allen, S. McKay, C. R. Rogers.

HELPING TO SELL LIFE INSURANCE

The following is an extract from a letter received by *The Monetary Times* from one of the western vice-presidents of the Canadian Life Underwriters' Association of Canada:—

"I take this opportunity to express my appreciation to you personally of what you are doing through the medium of your most excellent paper for the cause of life insurance, and I am sure I am only voicing the sentiments of the life insurance men in the West.

"Your weekly articles are always interesting and educational, and I trust that your subscription list may continue to increase, thus enlarging the influence of your paper.

"I am looking forward to *The Monetary Times* Annual."

MARKETING FOX PELTS

The fur industry is the oldest in the world, and we are endeavoring to place it on a sound business basis, said Mr. George B. Herzig, president of the George B. Herzig Company, of New York, the principal agents for the public auction sales of Messrs. Funsten Brothers, of St. Louis, when meeting Prince Edward Island fox breeders recently. Fluctuations in price depend more upon the producer than the consumer. If the sale of the output of the island's fox ranches can be properly controlled, it will be better for all concerned.

One of Mr. Herzig's objects in visiting Prince Edward Island was to secure, if possible, the handling of the island's output. If all the ranches on the island would co-operate, the firm, he said, would be willing to advance 75 per cent. of the market value of the skins at 6 per cent. interest, and market the foxes at the most profitable period. They would advance a sum of \$1,000,000 if necessary.

The demand in the United States at the present time is for the finer skins, and silvers sell from \$500 up. Cross foxes are worth from \$100 to \$125. The best red foxes (these are now coming from Russia) are worth from \$25 to \$35, and the New Brunswick red foxes, which may be said to resemble the Prince Edward Island stock, bring about \$12. The demand for mink, which had fallen off, is beginning to revive again, and there are good prices for fine, dark skins. There is a growing demand for muskrats, which are worth from forty to sixty cents each.

Messrs. Funsten Brothers have sold 1,500 fox pelts this year, including 400 from Prince Edward Island.

The Most Important Point

after making your will, is to arrange so that its provisions will be properly carried out, and that your estate will receive efficient and economical management.

If you appoint a friend or relative as your executor, you have only the good health, strength, and honesty of such individual to rely on.

By having a Trust Company administer your will, you overcome those risks, and give your heirs the benefit of the experience gained in the management of many estates

One of our Officers will be pleased to arrange an interview or correspond with you in regard to your will or its administration.

MORATORIUM LAWS TO BE AMENDED

Manitoba Will Take Action to Prevent Use of Law as Instrument of Fraud

In view of the criticism of moratorium laws of Manitoba, *The Monetary Times* has asked Hon. A. B. Hudson, provincial attorney-general for a statement on the matter. This he has kindly given in the following form:—

"These laws have been the subject of a great deal of discussion and it is probable that some amendments will be proposed at the next session of the legislature, but I am not in a position at the present time to state what is likely to be done.

Two Acts in Manitoba.

"There are in Manitoba two acts relating to the matter. The first is the one commonly referred to as the moratorium which was first passed by the legislature in the autumn of 1914. In the spring of 1915, this act was practically repealed and new provisions substituted the effect of which is that all proceedings under mortgages or other contracts relating to lands, are stayed until some interest, taxes or fire insurance is in arrears for one year or more. This act does not refer to mortgages or contracts entered into after August 1st, 1914. The passing of the law no doubt worked hardship to creditors in many cases, but on the other hand, was no doubt of real service to a large number of debtors. It is not possible to say when the act will be officially repealed, but it will in time, work itself out to a large extent.

Has Been Used for Fraud.

"The other act in the nature of a moratorium is known as the war relief act passed in April, 1915, for the protection of soldiers and prevents action being taken against soldiers or their wives or dependants for the enforcement of payment of debts or obligations until after the termination of the war. This act has not worked satisfactorily. Some improvements were made during the session of 1916, but there is great difficulty in altering a law of this kind where a considerable number of men have gone to the front, relying on its provisions for the protection of their families. It has been used as an instrument for the perpetration of fraud in a number of cases, and I expect that another attempt will be made at the coming session of the legislature to make some improvement.

"I do not feel at liberty to discuss the matter more fully than this at the present time."

ALGOMA STEEL'S HEAVY UNFILLED ORDERS

In the first of its periodical statements to shareholders, the Lake Superior Corporation states that for four months ending October 31st there were produced 131,600 tons of ingots and 82,500 tons of finished material. Production has not quite come up to expectations, due to labor difficulties generally. Conditions, however, are improving and the results for the last few weeks have been more satisfactory.

The output is practically sold up for the ensuing year. At October 31st the Steel Company had approximately 380,000 tons unfilled orders on hand, the tonnage preponderating being shell steel and steel rails. Prices are satisfactory, but profits on war material cannot be as high as in the United States, says the report, from the fact that heavy duties plus war taxes are payable in Canada, and in addition it must be kept in mind that the price of steel rails has increased but slightly in comparison with other steel products.

Full details are given with regard to the investment account of the corporation, which stands on the books at \$47,974,556, and the par value of the securities held is \$62,188,815. The reserve for depreciation of securities at the end of June 30th last was \$710,953, which amount deducted from the book leaves a net value of \$47,263,603. The larger items in the list given at par value are Algoma Central & Hudson Bay Railway, \$5,000,000; Algoma Steel Corporation, \$30,800,000; Ontario Lake Superior Corporation, \$20,000,000. Among the holdings also at the end of the year in question, that is, at June 30th last, were 5,240 shares of Spanish River common and 297 of the preferred, which since the close of the year have been disposed of for \$92,550.

LEGAL NOTICES

THE L. D. CAULK COMPANY OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 20th day of November, 1916, incorporating Arthur Fry, secretary; Mary Little, bookkeeper; Jacob Doan Musselman, manager; Ralph McLean, student-at-law, and John Charles McKay MacBeth, barrister-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell and deal in goods, wares and merchandise of all kinds; (b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To apply for, purchase or otherwise acquire any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (d) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (e) To enter into any arrangements with any authorities, government or supreme, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with or surrender any such arrangements, rights, privileges, concessions and franchises; (f) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors or associates in business) or the dependents or connections of such persons, and to grant annuities, pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (g) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (h) To purchase, take in lease or in exchange, hire or otherwise acquire, any real personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business or capable of being profitably dealt with in connection with any of the company's properties or rights, for the time being, and in particular any machinery, plant, stock-in-trade; (i) To construct, improve, maintain, work, manage, carry out or control any roads, ways, branches or sidings, bridges, reservoirs, watercourses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, working management or control thereof; (j) To aid in any manner any corporation any of whose shares of capital stock, bonds, debentures or other obligations are held or in any manner guaranteed by this company, and to do any act or things for the preservation and protection, improvement and enhancement of the value of any such shares of capital stock, bonds, debentures or other obligations, and to any and all acts tending to increase the value of any of the property at any time held or controlled by this company; (k) To purchase, take or acquire by original subscription or otherwise, and to hold, and with or without guarantee, to sell or otherwise dispose of shares, stock, whether common or preferred, debentures, bonds, and other obligations in and of any other company, and to pay for such shares, stocks, debentures, bonds and other obligations either in cash or partly in cash, or to issue shares of this company fully paid up or partly paid up in payment, and notwithstanding the provisions of section 44 of the said Act to use the funds of the company in the purchase of shares, stock, debentures, bonds and obligations in and of any such other company, and to vote on all shares so held through such agent or agents as the directors may appoint; (l) To remunerate any person for services rendered to the company, in such manner as the company may deem expedient, and more particularly with the approval of the shareholders by the issue and allotment of shares, bonds or other securities of the company, wholly or partly paid up, but nothing in this clause contained shall be deemed to limit the power of the directors to fix and pay the salary of any and all officers, servants, agents and employees of the company; (m) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable and transferable instruments; (n) To lend money to customers and others having dealings with the company and to take security for the loan of such money; to guarantee the performance of the contractual and other obligations of any such persons and to give any guarantee or indemnity as may seem expedient; (o) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (p) To pay out of the funds of the company all expenses of or incidental to the

formation, registration and advertising of the company, or in or about the promotion of this company or the conduct of the business; (q) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (r) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with others, and either by or through agents, sub-contractors, trustees or otherwise; (s) To do all such other things as are incidental or conducive to the attainment of any one or more of the above objects, and so that the objects specified in each paragraph of the clause shall, except when otherwise expressed in such paragraph, be in no wise limited or restricted by reference to or inference from the terms of any other paragraph or to or from the name of the company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere, by the name of "The L. D. Caulk Company of Canada, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 22nd day of November, 1916.

THOMAS MULVEY,

Under-Secretary of State.

J. C. M. MACBETH, Toronto,

Solicitor for the Company.

22-2

THE BEAVER BOARD TIMBER COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 13th day of November, 1916, incorporating James White Bicknell, John Bruce O'Brien, Morley Carman vander Voort and Aubrey Thomas Maher, students-at-law, and John Steuart Duggan, barrister-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on the business of pulp manufacturers, importers and dealers, and to manufacture, export, prepare, buy, sell and deal in pulpwood and pulp, either mechanically or chemically prepared, and other articles incident to the manufacture of pulp and articles in the making of which pulpwood or wood pulp form constituent parts; (b) To carry on the business of lumbermen, timbermen and sawmillers, and to acquire, buy, sell and deal in timber lands and timber limits and in standing timber and rights or licenses held by persons to cut or remove such timber and acquire and deal in timber and logs, and to manufacture and deal in lumber, ties, laths, shingles and other wood products and in extracts, essences and by-products thereof and in all articles of which timber or wood may form a constituent part; (c) To purchase, construct, charter and navigate vessels or construct and operate tramways on lands owned or controlled by the company so far as may be necessary for the business of the company; (d) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (e) To acquire or undertake the whole or any part of the business, property or liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (f) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (g) Subject to section 44 of the said Act, to take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (h) To enter into arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (i) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors in business) or the dependents or connections of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (j) To promote any company or companies for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (k) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business and in particular any machinery, plant, stock in trade; (l) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (m) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for

1. The object of the present issue is to provide new buildings (now practically completed) to purchase and install spinning plant and additional looms and other equipment.

2. The Balance Sheet for the year 1915 shows that after paying the 7 per cent. dividend on the Preferred Stock outstanding, there was earned over 10 per cent. on the Common Stock, and the Balance Sheet for the first six months of 1916 shows 15 per cent. on the Common after paying 7 per cent. on the Preferred.

3. The Company is in no way dependent on the war and will not be subject to after-war depression.

4. For the past two years the orders for the Company's products have at all times been from three to five months ahead of output.

5. The Company now supplies 90 per cent. of the Canadian manufactured goods of the kind it makes, of which there are about \$9,000,000 in value imported annually.

6. Customs Duty on the raw material is only the war tax of 5 per cent. to 7½ per cent., while the finished product is protected by a duty of 27½ per cent. to 42½ per cent.

7. The management of the Company is in excellent hands.

8. The legality of the issue has been passed on and approved by Messrs. Holden & Grover, Toronto.

9. Application to list the Stock on the Toronto Stock Exchange will be made as soon as regular dividends are well established on the Common Stock.

PRICE: \$100 per share, carrying a bonus of 20 per cent. of Common Stock.

Write for circular giving full particulars to:

Ferguson, Sanson & Graham

DIVIDENDS AND NOTICES

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of February, 1917, for the right to cut pulpwood and pine timber on a certain area situated on the Black Sturgeon River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure, for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honourable the Treasurer of the Province of Ontario, for ten thousand dollars (\$10,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$10,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,
Minister of Lands, Forests and Mines.
Toronto, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

DIVIDEND NOTICE

CANADIAN GENERAL ELECTRIC COMPANY, LIMITED

COMMON STOCK DIVIDEND No. 70

Notice is hereby given that a Dividend of 2½% for the three months ending the thirty-first day of December, 1916, making in all a Dividend of eight per cent. for the current year, has been declared on the Common Stock of the Company.

The above Dividend is payable on the first day of January, 1917, to Shareholders of record at the close of business on December 15th, 1916.

By order of the Board.

J. J. ASHWORTH,
Secretary.

Toronto, November 25th, 1916.

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of one and one-half per cent. (1½%) on the Common Stock of the Dominion Textile Company, Limited, has been declared for the quarter ending 31st December, 1916, payable January 2nd, 1917, to shareholders of record December 15th, 1916.

By order of the Board.

JAS. H. WEBB,
Secretary-Treasurer.

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of December next for the right to cut pulpwood and pine timber on a certain area situated on the Pic River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet, board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario—the paper mill to be erected when directed by the Minister of Lands, Forests and Mines.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honorable the Treasurer of the Province of Ontario, for twenty-five thousand dollars (\$25,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$25,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,
Minister of Lands, Forests and Mines.
Toronto, August 28th, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

THE STEEL COMPANY OF CANADA, LIMITED

DISTRIBUTION OF COMMON SHARES

Notice is hereby given that a distribution of four per cent. on the Common Shares of the Company will be made out of the earned profits for the year 1916, payable 1st of January, 1917, to shareholders of record at the close of business on the 16th of December, 1916.

By order of the Board.

H. H. CHAMP,
Secretary.
Hamilton, Ontario, November 21st, 1916.

DOMINION POWER AND TRANSMISSION COMPANY, LIMITED

Notice is hereby given that a dividend of two (2%) per cent. on the Ordinary Stock of this Company has been declared, and that the same is payable on December 15th, 1916, to holders of said stock on record November 30th, 1916.

The Transfer Books for the Ordinary Stock of the Company will be closed from November 30th, 1916, to December 15th, 1916, both days inclusive.

By order of the Board of Directors.

(Signed) WM. C. HAWKINS,
Secretary.

CONDENSED ADVERTISEMENTS

Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE SIMPLE ANNALS OF A SUCCESSFUL SALESMAN.—(How he made his opportunity.)—The most important thing a salesman has to sell is his services, for consider, when the salesman sells his services he has disposed of his most valuable asset. If he puts this sale over right, the rest follows as a matter of course. Listen to the story of a salesman who sold his services well. Mr. H. was a clerk in a financial office in a small city in Canada. His equipment was simple—a fair education and an indomitable ambition. Like many good men he felt sure there was a better place and a brighter future for him somewhere, and he was content to abide his time, only he was determined not to wait for his opportunity but to make it. Casting about, he learned that successful life insurance soliciting was a very lucrative profession. He could not afford to give up his job for the moment, so he devoted his time to study at night. In brief, Mr. H. soon mastered his subject and found he could increase his income considerably by writing insurance in his leisure moments. In a short time he felt he was justified in giving up his position as a clerk, and arranged to come to Toronto and connect himself with my agency. From the start he has made, he should earn \$5,000 a year with comparative ease. What is the moral? Had he not been stirred by ambition, had he not been willing to sacrifice a part of his evenings to better himself, he would still be earning \$75 to \$100 a month. This is a human document from life and only one of many we will be glad to show. We have a few good openings for applicants of unquestioned integrity and with the highest grade references. No others will be considered. Give full particulars of your business career in making application. W. A. Peace, Branch Manager, Imperial Life Assurance Co., 20 Victoria St., Toronto.

WINNIPEG MAN OFFERS HIS SERVICES to any Eastern firm of high standing which may desire Western representative. Now Western manager of one of the best-known concerns in Canadian financial circles. Familiar with provincial government and municipal officials, bankers and leading business men from Winnipeg to Vancouver. Member of leading clubs, etc. Address Box 19, *The Monetary Times*' Office, Toronto.

EXPERIENCED ACCOUNTANT desires change. Position as travelling auditor preferred. Satisfactory information given on interview. Box 15, *The Monetary Times*, Toronto.

A SUCCESSFUL Financial Corporation, with a large paid-up capital, desires to secure the services of an energetic, experienced, capable and reliable person, to organize and manage a Stock and Bond Department at a fixed salary, or salary and commission. If successful, future assured. State salary and give references. Correspondence confidential. Address Box 17, *The Monetary Times*, Toronto.

STRONG INSURANCE and Financial Firm located in Edmonton desire the General Agency of a tariff fire insurance company for the Province of Alberta. Can guarantee an income from Calgary and Edmonton of at least \$20,000 the first year. Address in strictest confidence, "General Agents," care of *The Monetary Times*, Toronto.

WANTED, ACTIVE PARTNER with Capital; export business. Agencies secured. Apply first to Box 21, *The Monetary Times*, Toronto.

The latest issue of the Life Underwriters News, as usual, supplies the agent with much valuable material for immediate use and for record. Editorially, it puts forward a suggestion that every agent should read three or four good life insurance journals.

DOMESTIC WAR LOANS

DEBENTURES FOR SALE

TENDERS FOR LOAN

So Marked will be received at this office up to 12 noon on the 4th day of December next, from parties disposed to purchase Debentures or Stock of the City of Halifax in whole or in part, as below described, sufficient to produce at the price offered the sum of \$135,000.00, to be used by the City for the following purpose:—

To Redeem School Debentures, 1892, due
Jan. 1st, 1917 \$135,000.00

(Under Chapter 67, Acts 1907; Sec. 3, Chap. 40, Acts 1911)

For which coupon debentures of One Thousand Dollars each or inscribed Stock Certificates of multiples of One Hundred Dollars will be given, payable in lawful money of Canada, or in gold of the present standard weight and fineness, on the first day of January, 1951.

Interest will be at the rate of 5 per cent. per annum, payable half-yearly, in lawful money of Canada, or in gold, at the Royal Bank of Canada's Branches in Montreal, Toronto or New York, and at the Office of the City Treasurer.

Parties loaning the money will be required to pay the accrued interest to the time of paying over the amount loaned. The loan to be paid in Halifax Funds, and the securities to be delivered in Halifax at the Office of the City Treasurer.

A General Sinking Fund is provided by law for the redemption of the Funded Debt of the City.

The City does not bind itself to accept the highest or any tender, and reserves the right to accept from any tenderer such portion of the whole as it deems necessary.

By order.

JAMES J. HOPEWELL,
City Treasurer.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses
and Insurance

Barrie, Ont.—November 26—Barn of House of Refuge. Loss, \$7,000; insurance, \$3,500. Cause unknown.

Bathurst, N.B.—November 19—Roman Catholic church. Loss, \$10,000.

Collingwood, Ont.—November 21—Georgian Fruit Farm's barn, five miles west of Collingwood, on Mountain Road. Partially insured.

Halifax, N.S.—George's Island lighthouse.

Hunter River, P.E.I.—Mrs. McMillan's warehouse. Partially insured.

Leamington, Ont.—November 26—Barns of W. Sampson, T. Smith and W. Simpson, garages of L. J. Wright and E. E. Adams, and the house of L. S. Knowlton were all damaged by fire in a short time.

Limolou, Que.—November 24—St. Charles' Church. Loss, \$120,000. Insurance, on church: Mutuelle des Fabriques, \$60,000; Quebec, \$13,000; Norwich Union, \$10,000; General of Scotland, \$10,000; Equitable, \$10,000; National Union, \$5,000; Generale de Paris, \$5,000; British Colonial, \$5,000; Union Assurance Society, \$3,000; total, \$121,000. On contents: National Union, \$2,000; Generale de Paris, \$2,000; British Colonial, \$1,000; Union Assurance Society, \$500; total, \$5,500.

Montreal, Que.—November 23—242 St. James Street. Loss, \$15,000. The firms occupying the building were the International Postcard Company, J. O. Saucy, Ernest Stevens, John Garland, H. Brady and Company, and Julius Olson.

Ottawa, Ont.—November 24—Stewart and Company's premises over Casino Theatre, Sussex Street. Loss, stock, \$30,000; building, \$10,000. Those affected were: Stewart and Company; Andrew Haydon and J. E. Taggart, owners of the building; Letellier and Company; Thomas Foley, real estate office, 588 Sussex Street; Abraham Cowan, fruit store, 5 Besserer Street; Plaza barber shop, 40 Rideau Street; the Elgin Social Club; W. L. Thomas, dentist; F. A. Fissiault; Dr. J. E. Taggart; Mr. J. Gorman's stable.

Point Grey, B.C.—November 21—Shaughnessy School. Loss, \$5,000; insurance, \$2,700.

Prince Albert, Sask.—November 23—Macleod, Limited, departmental store. Loss, \$190,000. Insurance, building, \$18,000, and \$93,000 on stock, divided among these companies: Hudson Bay, \$10,000; Springfield Fire and Marine, \$19,000; Fidelity Phoenix, \$13,000; British-American, \$10,000; Union of London, \$12,000; Hartford, \$5,000; Aetna, \$5,000; General of Paris, \$19,000.

Quebec, Que.—November 22—Mr. Hawkins' premises, 3 Cote d'Abraham.

Toronto, Ont.—November 28—Grace Hospital. Loss, \$2,000. Fire started in basement.

LEGAL NOTICES

THE BEAVER BOARD TIMBER COMPANY, LIMITED.

(Continued from page 36.)

shares, debentures or securities of any other company having objects altogether or in part similar to those of the company, if authorized so to do by the vote of a majority in number of the shareholders present or represented by proxy, at a general meeting duly called for considering the matter, and holding not less than two-thirds of the issued capital stock of the company; (n) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (o) To do all or any of the above things and all things authorized by the letters patent or supplementary letters patent as principals, agents, contractors or otherwise, and either alone or in conjunction with others; (p) To do all such other things as are incidental or conducive to the attainment of the above objects and of the objects set out in the letters patent and supplementary letters patent. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Beaver Board Timber Company, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 15th day of November, 1916.

THOMAS MULVEY,

Under-Secretary of State.

BAIN, BICKNELL, MACDONELL & GORDON,

Barristers and Solicitors, Lumsden Building, Toronto,

Solicitors for the company.

DIVIDENDS AND NOTICES

BARCELONA TRACTION, LIGHT AND POWER
COMPANY, LIMITED

(Incorporated under the Laws of the Dominion of Canada.)

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

**A Good Living Wage
A Profitable Future
A Provision For Old Age**

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

*Note.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending Oct., 1916, were: imports 1916, \$49,464,853; 1915, \$56,531,364, and exports 1916, \$206,126,802; 1915, \$118,782,516. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

SOLDIER DESIRES OFFICE POSITION

Wounded in France in the Empire's service, a young Toronto man, now convalescing, is desirous of obtaining a position. He is familiar with general office work. Any firm needing a useful and capable assistant can obtain further particulars from *The Monetary Times*, Church and Court Streets, Toronto.

GREAT-WEST PERMANENT LOAN'S AFFAIRS

A Winnipeg shareholders' committee of the Great-West Permanent Loan and allied companies has been formed, with Mr. Thomas Sharpe, ex-mayor, as chairman, and Mr. Harry Sanderson, school trustee, as secretary-treasurer. This committee are forming an active working committee of the shareholders, and will endeavor to elect an independent board that will be the choice of the shareholders of the different companies.

In the meantime, Captain William Robinson, Mr. E. D. Martin, Dr. Popham and Mr. E. F. Hutchings have retired from the boards of these companies, in order, it is understood, to give the shareholders an opportunity to elect whom they please to represent them at the ensuing annual meeting.

TO HELP ONTARIO'S SICK CHILDREN

Many people outside of Toronto are under the impression that because the city of Toronto, and each municipality in Ontario that send in patients, pay \$1 per head per day to the Hospital for Sick Children, Toronto, as directed by the act of the provincial legislature, that this amount defrays the cost of treatment of each patient. It is, therefore, well to explain to the people at large, and to the municipalities, that the \$1 per head per day pays only part of the cost. This dollar for the city and country patient is supplemented by 20 cents per head per day by the Ontario government, making a total of \$1.20. The cost necessary for treatment of each patient is \$2.35 per day, and after deducting the \$1.20 there was still a shortage of \$1.15. This \$1.15 per head per day, therefore, was the free treatment given by the hospital, and amounted in 1916 to about \$70,000, which sum has to be made up by the donations of the people of Toronto and other parts of Ontario.

Donations should be remitted to Mr. I. Ross Robertson, chairman of the board, or to Mr. Douglas Davidson, secretary-treasurer, College Street, Toronto.

RAILROAD EARNINGS

The following are the weekly earnings of Canada's transcontinental lines during November:—

Canadian Pacific Railway.

	1916.	1915.	Increase.
November 7	\$3,036,000	\$3,015,000	+ \$ 21,000
November 14	3,051,000	3,035,000	+ 16,000
November 21	2,984,000	2,960,000	+ 24,000

Grand Trunk Railway.

November 7	\$1,244,959	\$ 986,765	+ \$258,194
November 14	1,283,901	971,715	+ 312,186
November 21	1,202,291	935,884	+ 266,407

Canadian Northern Railway.

November 7	\$ 885,000	\$ 806,500	+ \$ 78,500
November 14	825,100	820,800	+ 4,300

The number of directors of the British Chemical Company, Limited, has been increased from five to seven.

The following companies have changed their names: The Pattison Electric Company Limited, with Alberta charter, to the Calgary Electric Company, Limited; Consolidated Steel Foundries, Limited, with Dominion charter, to Consolidated Brass Foundries, Limited.

BRITISH GOVERNMENT IS SECURING FUNDS**Forty-five Million Dollars for Purchase of Canada's Wheat
—Sells Treasury Bills in New York**

Mr. E. L. Pease, president of the Canadian Bankers' Association, has announced that a syndicate of Canadian banks had completed arrangements to extend a revolving credit for six months, to the extent of \$20,000,000, to the Royal wheat commission of Great Britain, for the purchase of wheat in Canada.

Loan in New York.

The credit will provide funds for the purchase and shipment of wheat bought here for the imperial authorities, and, probably, for its storage over the winter months, if and when necessary. This is in addition to the loan by the Corn Exchange Bank of New York of \$25,000,000 to the Wheat Export Company of Canada, guaranteed by the British government, the proceeds of which are also to be used by the export company for the purchase of Canadian grain and the facilitating of its exportation.

Treasury Bills for Sale.

Messrs. J. P. Morgan and Company, New York, have announced that the British and French government treasuries have each authorized the sale in that market of a limited amount of short-term bills running at various maturities from thirty days to six months. This is a novel form of financing by Great Britain and the Allies, as heretofore loans have been placed in the United States for fixed amounts. The treasury bills will be payable in dollars in New York. They will probably be available for purchase on or about December 1 at rates based upon money market conditions, probably running from 3¼ to 4½ per cent. It is understood, however, that the amount of bills will be comparatively small.

ALBERTA FARMERS' BUSINESS

From the interesting annual report of the Alberta Farmers' Co-operative Elevator Company, Limited, some idea of the work of marketing the Western wheat crop may be formed. During the season the company operated 87 elevators and handled 19,320,556 bushels of grain, 18,131,156 of which was handled through elevators and 1,189,400 bushels loaded over the platform and on track and consigned to the company. Of the amount handled through the elevators, 10,797,130 bushels was special binned and 7,338,026 bushels purchased by cash ticket. Of this amount, over 17,400,000 bushels was handled in the twelve months ending July 31st, an average of slightly over 200,000 bushels per elevator.

In addition to its wheat business the company handles live stock, coal, lumber, etc. Through its organization, 36,224 hogs, 7,659 sheep and 36,224 cattle were passed, also 1,002 cars of supplies, divided as follows: flour and feed, 164; twine, 133; coal, 370; posts, 204; hay, 30; lumber and building material, 42; salt, 7; fruit, 20; wood 9; wire, 23.

The company's total income amounted to \$843,426 and, after making the usual deductions, there was a profit of \$282,484, which, with \$36,229 brought forward, made \$318,714 available for distribution. This was allotted as follows: General reserve, \$175,000; renewals, \$19,482; bonus to agents, \$15,000; dividend No. 1, \$23,000; provision for alteration to Macleod elevator, \$3,000; Dominion government war tax, \$60,000.

The company's assets total \$1,509,496, fixed assets are shown as \$929,784 and current assets as \$579,712, of which stocks of grain, etc., amount to \$286,439, and funds \$195,923. The liabilities include fixed liabilities of \$657,556, paid-up capital of \$301,737, reserves of \$226,088, and accounts and bills payable \$180,399. The report shows a strong financial position.

The new branch recently opened by the Bank of Nova Scotia is at Burgeo, Nfld., not Burges, as previously stated.

The Schwanbeck Grain Company, Limited, with Saskatchewan charter, has reduced its capital stock from \$60,000 to \$6,000.

London and New York, Financial Centres

REASONS *For London's Supremacy—World's Financial Centre Will Always Remain in Europe, Says Canadian Banker—New York's Present Dominance is Temporary—London is the Only Free Gold Market.*

LONDON'S supremacy is the cumulative result of numerous forces, political as well as economic, spread over a long series of years during which time the world has learned to think in terms of British money and the bills of exchange on London have been raised almost to the dignity of an international currency, while the safety of the Bank of England and the value attached to the word "sterling" have become proverbial. Sovereigns and to a great extent Bank of England notes pass current the world over without recourse to money changers. The dollar and the dollar bill must be made equally well-known and acceptable.

This is the conclusion reached by Mr. E. L. Stewart Patterson, of the Canadian Bank of Commerce, in an instructive article in The Annals of the American Academy of Political and Social Science, Philadelphia.

Mr. Patterson points out that since the beginning of the present European war there has been a great deal of discussion in the financial papers and elsewhere as to the effect of the war on London's position as the financial centre of the world and the probability of New York succeeding in assuming and keeping the position. It is, of course, natural that the serious interruption in shipping, commerce and exchange throughout the world would minimize for the time being London's supremacy, especially when the stupendous task of financing not only Great Britain's munition requirements but those of her Allies devolves upon her. He continues: There is no question that at the end of the war, New York's position as an exchange and financial centre will be vastly enhanced but not necessarily at the expense of London. Sovereigns and dollars are the only two important mediums of exchange that have been at all reliable since the war commenced and this will no doubt put both of these exchanges immeasurably ahead of the exchange of any other country at the end of the war.

London has been for centuries the commercial clearing house of the world. This is due not only to its central situation, its immense foreign trade and its large mercantile navy, but also because, through its highly perfected banking system, it provides facilities of such magnitude and of such entire efficiency for the final settlement of exchange operations, that drawers or negotiators of bills in every quarter of the globe gave preference to sterling over any other form of exchange. It has been estimated that nearly 90 per cent. of all letters of credit

issued throughout the world were, prior to the war, drawn in English money.

London is situated on the threshold of Europe in the heart of the world's commercial activities, directly opposite the estuary of the Scheldt and nearly opposite that of the Rhine and is within a short distance of every important exchange centre in the world with the exception of New York. This alone may be considered as an insuperable obstacle to New York's ambition.

To be a world centre of finance it is essential that a city must in the first place be the unquestioned financial centre of its own country. London is indisputably recognized as the financial centre not only of Great Britain but of the British Empire. No local jealousy is evinced by Birmingham, Liverpool, Glasgow or other large cities as to London's supremacy in this regard. New York is the principal financial centre of the United States, but it is not the only financial centre. Chicago, St. Louis, San Francisco and other important centres are strong competitors with New York for domestic business and to a certain extent for foreign business. Aside from sectional jealousy, the vast area of the United States makes this competition inevitable. Will these cities abandon selfish motives and aid New York in her ambition? Will not the expansion of the country's foreign trade accentuate rather than diminish this competition? Chicago and Minneapolis will share in the development of the great Canadian West, San Francisco will become more and more important with the extension of business with the Orient and New Orleans will benefit by the opening of the Panama Canal and the expansion of trade with South America. The United States is not a country but a collection of countries or commonwealths of which New York State is only one. The tendency is to minimize New York's financial supremacy rather than to assist it. A study of the discussions on this feature preceding the passing of the present federal reserve act will bear out this statement.

It is not a question of the ability and enterprise of the American, but one of his overcoming the handicaps of temperament, environment and tradition and we might add prejudice and suspicion as the world has not yet forgotten the frequent and serious crises in American financial history.

It must not be overlooked that, when an international business is so long established and well centralized

as the money market of London, the world will continue to use it as a matter of convenience irrespective of the possibly superior facilities of New York. The financial roads to London are well defined by much travel, and business tradition will favor the old stand; it is human nature the world over to follow the cow track across a pasture no matter how oblique its direction.

One of the main foundations upon which London's position rests is the world's estimation of its credit. This credit is tried and sound, backed by great resources, and has been reared upon the trust and confidence in the honorable tradition of British business ethics and it is unlikely that the world will have cause to revise its opinion after the war is over.

The principal economic factors which tend to enhance London's position as a financial centre may be considered under the following heads: Free gold market; liquid discount market; stability of money rates; immense mercantile navy; great foreign export and import trade; tariff; excellent banking system at home and abroad; the numerous branches of foreign and colonial banks established in London; freedom from panics and financial disturbance; free navigation laws; marine insurance, etc., and reliable ship registration.

Of the four great exchange centres of the world, London, New York, Paris and Berlin, London is the only one that can always be depended upon to meet every legitimate trade demand for gold, which means that there is no delay or premium entailed in realizing gold on a bill expressed in English money. It is payable in pounds sterling which represent a definite and immutable weight of fine gold. Great Britain adopted the gold standard unequivocally in 1816, over one hundred years ago, and has not departed from it since, even to the extent of charging a fractional premium on gold or by restricting its export by legal or sentimental embargoes. Even war conditions did not deprive the Englishman of the privilege of converting Bank of England notes into gold and, if he were willing to take the risk of shipping it, he could pay a debt in Europe or America without let or hindrance.

Since the war commenced the United States has gradually changed from a debtor to a creditor nation, principally owing to the fact that vast exports of munitions, etc., have been made to belligerent countries, thus creating an abnormal trade balance in her favor. With this shifting of international balances, large amounts of gold have been received from debtor nations, a considerable volume of American securities held abroad have been absorbed by the New York market and large loans made to the belligerent nations, as well as to Canada and other countries of the American continents.

Owing to the position of the United States as a wealthy neutral nation, for removed from the scene of conflict, a wide demand has also developed for dollar ex-

change and dollar credits, not only in the United States but in foreign countries. In other words, the abnormal conditions induced by the war called upon New York to take the position of international bankers heretofore played almost exclusively by London. This rôle was assumed by New York, not so much of her own volition as by force of circumstances. Will these war time opportunities, when peace is declared, be sufficient to retain for New York the position which London with all her advantages took centuries to acquire? Before New York can do this to any great extent the United States must learn to think internationally and not provincially. It must increase its foreign trade tremendously and revise its navigation and alien labor laws and its tariff, all with a due regard to the comity of nations; sound, permanent banking and currency systems, removed from legislative tinkering must also be established, and finally, foreign banks should be encouraged to establish branches in New York and other centres without unnecessary restrictions as to the business they may undertake.

I am of the opinion that the financial centre of the world will always remain in Europe, if only for geographical and national reasons, but there is need and room for another strong financial centre in addition to London and it would always be desirable that such an alternative centre should not be located in Europe, as the present European crisis has amply demonstrated.

New York is already the financial centre of the new world; she should strengthen and broaden her claim to this position and, as a coadjutor, relieve and assist London in her great responsibility as the world centre. In the reconstruction that must follow the close of the war, Great Britain and the United States will undoubtedly play a great part and London and New York will find it more and more necessary to co-operate in the performance of their several functions. London is ready now. When the time comes will New York be equally prepared and able to do her share?

New York will doubtless benefit permanently from the advantages and experience gained during the war. Great Britain will profit also from the intimate intercourse with France, Italy and Russia, likely to result from the war which will undoubtedly tend to re-establish, if not strengthen London in her former position. Great Britain has financed her Allies generously through the war and will not only have these large amounts refunded to her in due course but will receive collateral advantages which should more than offset the business lost to New York.

The conditions, however, that will obtain after the war are too much a matter of conjecture at the present stage of the conflict to warrant an opinion of any value. No one knows how or when the war will end and the whole world, including the United States, may yet be involved.

CANADA'S ADVISERS IN RESEARCH WORK

The following have been appointed as an advisory council of the Dominion government in regard to industrial research:—

Frank D. Adams, Sc.D., LL.D., F.R.S., formerly president of the Royal Society of Canada, dean of the faculty of applied science, McGill University, Montreal; A. B. Macallum, Sc.D., LL.D., F.R.S., president of the Royal Society of Canada, secretary-treasurer of the Biological Board of Canada, professor of physiology and biochemistry in the University of Toronto; J. C. McLennan, Ph.D., F.R.S., president of the Royal Canadian Institute, professor of

physics and director of the physics laboratory in the University of Toronto; A. S. Mackenzie, Ph.D., LL.D., formerly professor of physics in and now principal of Dalhousie University, Halifax, N.S.; Walter C. Murray, M.A., LL.D., principal of the University of Saskatchewan; R. F. Ruttan, M.A., M.D., Sc.D., professor of chemistry and director of the chemical laboratories in McGill University; R. Hobson, manager of the Steel Company of Canada, Hamilton, Ont.; R. A. Ross, E.E., Sc.D., consulting electrical engineer, consulting engineer to the Hydro-Electric and to a number of electric power developments throughout Canada, Montreal, Que.; Tancrede Bienvenue, general manager of La Banque Provinciale, Montreal.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends, and Future Plans

Canadian Car and Foundry Company.—Interest is being shown in the company's action regarding the dividend on preferred shares. A statement is expected early in the new year.

Brazilian Traction, Light and Power Company.—A dividend of 1½ per cent. has been declared on the cumulative preference shares payable January 1st to shareholders of December 15th.

Abitibi Power and Paper Company.—The company has made its initial dividend declaration of 1¾ per cent. payable January 2 to shareholders of December 20. The securities of the company are likely to be listed on the Toronto and Montreal stock exchanges.

Shredded Wheat Company.—An extra dividend of 1 per cent. has been declared on the common stock of the Shredded Wheat Company. This disbursement becomes payable, together with the regular quarterly dividend of 1½ per cent., on January 1st, to shareholders of record of December 20th.

California Exploration Company.—Lord Erroll, addressing the California Exploration Company, said that a large number of Canadian shareholders had not exchanged their old Northern Ontario exploration scrip for shares in the California Exploration Company, and they were therefore without a proper title, and were not receiving the dividends paid. The company paid 10 per cent., and still held its Porcupine mining property. The Plymouth Mine is developing most satisfactorily, with every indication of continuing to be a regular dividend earner.

Dome Mines Company.—The company's monthly production this year has been as follows:—

1916. Month.	Tons milled.	Bullion produced.	Value per ton.	Total cost per ton.
January	31,600	\$175,639	\$5,558	\$2.77
February	32,040	164,027	5,119	2.71
March	34,300	173,724	5,064	2.64
April	37,300	177,624	4,762	2.40
May	39,400	190,229	4,828	2.44
June	36,700	179,245	4,883	2.66
July	38,150	179,370	4,701	2.57
August	40,010	179,530	4,487	2.55
September	38,300	179,500	4,686	2.59
October	40,200	185,000	4,601	2.69
November	37,900	177,000	4,670	2.88

Partington Pulp and Paper Company.—By the completion of a merger at Kalamazoo, Mich., between the Bryant Paper Company, of Kalamazoo, the Oxford Paper Company, of Rumford Falls, Maine, and the Partington Pulp and Paper Company, of St. John, N.B., the latter corporation, with its extensive pulp plants, passed to the control of the United States companies. The sum of \$3,500,000 is estimated as the cost of the deal. The new company will be known as the Nashwaak Pulp and Paper Company and will maintain its head offices in New York City.

The following officers were elected: President, P. J. Chisholm, St. John, N.B.; vice-president, L. M. Bickford, New York; treasurer, F. E. Tufts, St. John; secretary, H. H. Drummond, St. John.

Hollinger Consolidated Gold Mines.—Shareholders of the Acme, Millerton and Canadian Mining and Finance Company were to receive in cash an amount equal to all dividends paid to the shareholders of Hollinger Gold Mines, Limited, during 1916, until the consolidation should be completed. The liability amounted to \$720,000. The directors of the company now propose to cancel this indebtedness by an issue of 120,000 shares of the company's treasury stock at \$6.50 per share. This means in effect that the principal owners of the Hollinger are to take for a large part of their claim shares in the company at a premium at \$1.50 per share in lieu of cash. The proceeds, as the directors state in a circular, will not only take care of the indebtedness, but will leave a substantial amount to apply towards wiping out the present deficit. The new stock will be issued in the proportion of one new share for every 40 old shares.

Sherwin-Williams Company of Canada.—As noted in the last issue of *The Monetary Times*, the company's earnings for the past year were \$846,944. This result, compared with the previous return, is as follows:—

	1916.	1915.
Earnings	\$ 846,944	\$577,304
Depreciation	76,710	53,485
Balance	\$ 770,234	\$523,818
Bond interest	136,470	139,322
Net profits	\$ 633,764	\$384,495
Preferred dividend	210,583	210,000
Balance	\$ 423,180	\$174,495
Patriotic, etc.	49,807	15,337
Surplus	\$ 373,373	\$159,158
Previous surplus	980,987	821,828
Total surplus	\$1,354,361	\$980,987

The surplus is subject to taxes (if any) payable under the business profits tax.

During the past year an Australian company was incorporated under the name of Lewis Berger and Sons (of Australia), Limited, for the purpose of developing further the growing business of the company in Australasia. All of the capital stock of this company is owned by the Canadian company. A white lead corroding plant, and in conjunction with it a paint and varnish plant, is being erected in Sydney, Australia, and will be in operation, it is expected, during the spring of 1917. This lead corroding plant is the first white lead works to be erected in Australia. Total assets of the company amount to \$12,462,119.

McIntyre Porcupine Mines, Limited.—The proposed purchase of the McIntyre Jupiter and McIntyre Extension mines by McIntyre Porcupine Mines, Limited, is to be arranged on the following basis: McIntyre Extension, has given an option on its property, the price being 294,000 shares of McIntyre Porcupine, which is equivalent to one share for every 3¼ shares of McIntyre Extension in respect of 955,501 shares outstanding other than in the hands of the McIntyre Company at present. For the McIntyre Jupiter the price will be 316,298 shares of McIntyre, which is equal to one share for every three shares of the 948,893 issued by the Jupiter Company exclusive of those held by the McIntyre Porcupine Company. This proposal is to be submitted to the shareholders on December 28.

Colonel A. M. Hay states regarding the proposed combination as follows: In securing the options on the above terms the directors aimed at maintaining the total issued share capital at a low figure. The share capital of the three companies presently existing is as follows:—

	Authorized.	Issued.	Acreage.
McIntyre Porcupine Mines, Limited	\$3,000,000	\$2,999,985	145
McIntyre Extension Mines, Limited	2,500,000	2,500,000	127
McIntyre Jupiter Mines, Limited	2,000,000	1,898,893	79
	\$7,500,000	\$7,398,878	351

In the event of the company electing to exercise the options, its authorized share capital will be increased by one million dollars, of which 610,298 shares will be issued to complete the proposed purchases, leaving unissued 389,717 treasury shares, out of a total authorized capital of four million shares of the par value of \$1 each. The directors are satisfied that consolidation would not only facilitate the operation and administration of the properties, but would also materially increase their combined earning power.

The operating profits of the three companies for the months of October and November amount to over \$140,000, from a daily average of 413 tons of ore milled. After January 1st, when the new aerial tramway from the main shaft to the mill should be completed and in operation, sufficient ore will be available from the McIntyre and Extension properties to supply the mill to its recently increased capacity. When the ore bodies on the north side of Pearl Lake have been developed to greater depths, and when the Jupiter workings have been connected up with the main shaft, the production of ore will undoubtedly warrant a further commensurate increase in milling capacity.

FOR PRINCE RUPERT LOT, \$29,000

Man Who Bought It Did Better Than the Government—
Production Per Capita

Editor, *The Monetary Times*:

Sir,—In your issue of November 17th you give unusual prominence to a portion of a speech delivered by Sir George Foster under the heading, "The town which lies under a curse," referring to Prince Rupert. There is one sentence to which I particularly wish to draw your attention, viz.: "Who live there now? The men who have speculated, and who are hanging on by the skin of their teeth and their toenails to see if the good Lord, in some way or another, will send a windfall to enable them to get out of their bad business."

It is only fair to this city that you should give space for a reply to such a base accusation, entirely unworthy of a cabinet minister, whom his Sovereign has honored by knighthood.

I wish emphatically to refute such a statement, and, further, counter it by saying that the citizens of Prince Rupert are not relying on the good Lord to send them a windfall, but, on the contrary, believe that "The Lord helps those who help themselves," and are energetically developing their fisheries, minerals and other natural resources. I know of no city where there are fewer speculators, pure and simple, and who have no other occupation. Nor do I know of a city where there is a greater production of the necessities of life and commerce per capita.

Large Catch of Fish.

If you will take the trouble to look up the returns of the fish caught in adjacent waters and shipped through this port, having increased from approximately 100,000 pounds per month two years since to approximately 2,000,000 pounds per month now, I think you will find that some other people than speculators must be living in Prince Rupert.

Sir George Foster must be "a man without a vision" if the only thing he could see worth commenting on during his trip through Northern British Columbia was a rocky lot for which a man paid \$18,000. If he failed to see the enormous resources in minerals, timber, fish and agricultural lands, the magnificent harbor, with its possibilities as a naval base, the outlook for the port as a great commercial centre, as the nearest Pacific port to the Orient, the best drydock and shipbuilding plant on the Pacific, then, I say, if he failed to see all this, he is not the man who should be minister of trade and commerce. No wonder the people of this part of Canada are looking forward anxiously to the time when the "Man with the Vision," who conceived and carried into execution the building of the Grand Trunk Pacific, shall once again control the destinies of our Dominion.

Lots Bought by Government.

If Sir George Foster wished to illustrate his remarks by citing the price paid for a lot in Prince Rupert, why did he not draw his hearers' attention to the purchase made by the Dominion government, of which he is such an important member?

The lot which Sir George cites was a corner in the centre of the city, 35 by 100 feet, and the price paid was \$18,000, while the cost of excavating was estimated at \$11,000.

The Dominion government purchased four lots for a post-office site and paid \$95,000 for 100 by 100 feet. These four lots were inside lots and had no alley to the rear. The cost of excavating, according to official returns, was over \$27,000. Corner lots are usually considered to be worth at least one-third more than inside lots.

If the unlucky purchaser of the \$29,000 lot, including estimated cost of excavation, had paid at the same rate as the Dominion government, his lot would have cost him over \$50,000.

Instead of Sir George Foster uttering senile platitudes on the folly of speculation, which is obvious to the meanest intellect in Canada—after the event—why did he not raise his voice during the mania and prevent the government, of which he is a member, from being absolutely the worst offender in the very city which he uses for illustrating his text?

Yours, etc., G. R. Naden.

Prince Rupert, B.C.,
November 24th, 1916.

PUBLIC AND FIRE INSURANCE RATES

Continuing the Ontario government investigation re fire insurance rates, Justice Masten, the commissioner, remarked: "I am not thinking so much of the rate or the fixing of the rate. I am thinking of the public."

This statement was made in connection with the evidence of Mr. Mark H. Irish, M.P.P., in regard to the uniform application of rates. Mr. Irish said:—

"I think any association should be obliged to quote a rate on any proposition put up to them." The appeal could fix the rates, suggested the commissioner.

"In England," said Mr. Justice Masten, "I am told you can get a company to give a rate on any proposition. That is not the case here?"

"No."

"Have you come across cases where the company was unwilling to write policies not covered by the rules of the Canadian Fire Underwriters' Association?"

"Yes."

"It is suggested that owners of dwelling-houses are paying an inequitable rate—paying insurance that should be paid by manufacturers. The manufacturers are, therefore, paying too little," said the commissioner.

"Insurance means that the fortunate pay for the unfortunate," replied Mr. Irish.

"But what about different classes?"

"One year one may be hit hard. The next year the other may be hit hard. I have no specific suggestion to give." My statement is that the rates are not in the best interests of the assured and of the business itself. The proposition is most unfair. Throw off restrictions and let competition do its work."

"Let the public look after itself?" suggested Justice Masten.

"Yes."

"And the devil take the hindmost?"

"And the devil take the broker," was the rejoinder of Mr. Irish.

The extension of credit for premiums was opposed by Mr. Louis Gurofsky, who said that insurance should be on a cash basis. If the books of all the companies in Toronto were looked over it would be found that payments were delayed in most cases for five or six months. In some cases it would be found that the second year's insurance had been entered upon before the first year's premiums had been paid. It was a rebate, and as such tended to unfair competition.

CANADA'S BANK CLEARINGS

The following are the returns of Canada's bank clearing houses for the weeks ended November 30th, 1916, and December 2nd, 1915, with changes:—

	Week ending Nov. 30, '16.	Week ending Dec. 2, '15.	Changes.
Montreal	\$ 85,339,725	\$65,135,922	+ \$20,203,803
Toronto	56,634,145	45,933,966	+ 10,700,179

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870, The Trade Review, of Montreal; and the Toronto Journal of Commerce.

The Monetary Times does not necessarily endorse the statements and opinions of its correspondents, nor does it hold itself responsible therefor.

The Monetary Times invites information from its readers to aid in excluding from its columns fraudulent and objectionable advertisements. All information will be treated confidentially.

SUBSCRIBERS PLEASE NOTE:

When changing your mailing instructions, be sure to state fully both your old and your new address.

All mailed papers are sent direct to Friday evening trains. Any subscriber who receives his paper late will confer a favor by complaining to the circulation department.

POST-BELLUM CONDITIONS

Considerable emphasis was placed by Sir Vincent Meredith and Sir Frederick Williams-Taylor, in their addresses at the annual meeting of the Bank of Montreal, upon the need for preparation for the post-bellum period. So little has been done in Canada that Sir George Foster has said the Dominion is sound asleep in that regard. As Sir Frederick Williams-Taylor properly points out, "post-bellum conditions will surely weigh upon us more heavily or less heavily in proportion to our present indifference or our foresight, and in direct ratio to the steps we take to provide for inevitable problems and difficulties."

Judging by the lack of action to date, the national business highway will be a hard one to travel after the war, unless the federal government commences immediately to plan, to act and to seek the practical assistance of Canada's business men.

Sir Vincent Meredith stated that the three objects to which every effort must be bent are economy, production and immigration. Arising from those three points are a number of problems such as labor, the marketing of surplus production and the direction of immigration. The addresses of these two prominent bankers, printed on another page, will be read with considerable interest and benefit. They analyze clearly the present conditions, they make an attractive forecast of the situation as it may be after the war, and they point to the great necessity for foresight and action in regard to post-bellum problems. This necessity is very aptly put by Sir Frederick Williams-Taylor in the following words: "The timely and eloquent 'call to action' of our minister of trade and commerce commands attention. I am not sure that it should not be preceded by a 'call to reason,' in order that the importance of the problems of the situation be impressed upon those who are living in, let us say, the paradise of the unwise.

"Sane optimism and self-confidence are admirable national qualities and should be the order of the day.

There is a point where optimism loses its value and the danger of over-confidence begins. That is the point for nations to avoid."

RURAL CREDITS SCHEME

The Manitoba government proposes to institute a system of rural credits. An outline of the scheme is printed on another page. There are many provisions in it which will call for the attention of Western boards of trade, bankers' associations and other organized bodies. For instance, taxes which are being removed from the shoulders of the farmers will have to be paid by some other section of the community. Bankers, implement companies, storekeepers and money lenders holding collateral second mortgages will probably have something to say with regard to the plan to dispense with foreclosure procedure of any kind and empower the government through the loan commissioner to take title by the simple process of the order of the commission.

Obviously the proposed government association cannot lend money at a low rate of interest unless the association is relieved of the disabilities which have to be borne by the existing lending institutions. It is proposed, therefore, to free the government association from (1) all forms of taxes, including Dominion war tax, provincial license fee, annual revenue tax and municipal business tax; (2) office rent; (3) payment of commission to agents (this work to be done by the secretary-treasurer of the municipality without charge); (4) payment of land titles fees for registrations, certificates of title and foreclosure proceedings; and (5) all prior liens such as seed grain charges, municipal expenditures for hospital aid, destruction of noxious weeds, etc.

It is also claimed that local boards will pass on applications and that the members will give their services freely in the public interest. The intention is that 90 per cent. of the fund shall be borrowed money, 5 per cent. being capital contributed by the government and 5 per cent. being capital contributed by the borrowers. An allowance of 1 per cent. is made for expenses, out of which the government expect a considerable profit. The contingent liability of the municipalities to meet the losses made by the association is treated as negligible, and without effect upon the credit of the municipality.

One of the curious features of the scheme is the provision that repayments on principal which, according to the schedule of payments, are immediately applicable on the original indebtedness, are to be paid into a sinking fund and bear interest at 3 per cent., which fund is to be invested in government or municipal securities. It is said that there will be a net profit of 2 per cent. on this financing. Inasmuch as this money costs the government 5 per cent., one would suppose that unless the repayments were immediately reinvested in mortgages, there would be a distinct loss.

The provision that overdue payments shall bear interest at 8 per cent. is illegal and therefore could not be enforced. The suggestion that foreclosure shall be obtained by the mere issue of a certificate without any process of law would probably be discovered to be illegal also.

In view of these and other novel provisions of the bill, the provincial treasurer, Hon. Edward Brown, with the help of his cabinet colleagues and committees of the legislature, will probably have to make radical changes in the bill before it becomes law.

WHY?

A press dispatch from Ottawa says:—

"Representations have been made to the Dominion government from various sources that the British blacklist of United States firms should be enforced as regards Canadian trade. It is not generally understood that although copies of the list are on file in the Canadian trade and commerce department it *does not apply in any sense to Canada and that Canadian firms are free to trade unrestricted with whomsoever they will.* As far as can be learned there is no intention on the part of the government to make any change in this arrangement with which Canadian merchants are well satisfied. No Canadian blacklist has yet been established and such action will not be taken without careful consideration."

What an advertisement for Canada's dollar commercial patriotism!

SPECULATION AND PRODUCTION

In Toronto recently, Sir George Foster spoke of the speculative mania in Canada a few years ago and took Prince Rupert as an example. His statements printed in *The Monetary Times* of November 17th, have brought a reply from Mr. G. R. Naden, of Prince Rupert. It is printed on another page. The most important point made by our correspondent, we think, is in regard to the productive power and output of Northern British Columbia. The need for greater production was, after all, the moral of Sir George Foster's Prince Rupert story. While Mr. Naden perhaps quite naturally objects to his city being taken as the example, he is apparently in agreement with the principle involved.

After quoting the Prince Rupert incident, Sir George said: "Now, that is an instance of what has been going on in this country. What we have to do is to get away from the false idea that you can make money by swapping jackknives at a quarter of a dollar advance for each swap. Why, 90 miles from Victoria, in the dense forest, there is staked out to-day many and many a succession of town lots, land which should have been cultivated by the agriculturist, propped up by speculation until it comes to take a fictitious value that no man can settle on it and cultivate it; he would not have a ghost of a chance for his life. Those two instances show what I mean."

Few will disagree with that view as applied to the whole country. Since 1912, the value of production and the harm of hurtful speculation have been seen more in their true perspective. Only the other day this letter came to *The Monetary Times* from a leading manufacturer of British Columbia: "Our population, like that of all the western provinces, was attracted by the prospect of easy money in speculating rather than by industry, the result being a real estate boom, consequent overgrowth in our cities, large sums borrowed and invested in non-productive and unremunerative enterprises. This led banks and financial experts to regard British Columbia credits with disfavor, and the bona fide manufacturer suffered with the rest. The people of British Columbia have now settled down to legitimate enterprise on sound business principles. Credit is being restored, and to-day a casual observer would be surprised at the remarkable progress made in the last few years."

That is a desirable change, but even yet we are not sure whether, given the old conditions, similar mistakes would not be made.

WAR AND EXCHANGE

German exchange in New York is now depreciated 30 per cent. and Austrian exchange 43 per cent. Since gold payments were abandoned by Berlin in 1914, Germany's paper currency has increased \$1,377,000,000, or 286 per cent. Nobody knows the state of Austria's paper currency. In the meantime, the pound sterling holds its head high and John Bull is able to alarm prosperous neutrals with more gold than they want. Germany cannot forever bluff against hard facts which are still growing harder.

THE GROWING WEST

Wall Street thought it had elected Charles Hughes to the presidency of the United States. The West decided otherwise. The Western States have become a factor for more serious consideration by Wall Street, by the Eastern States generally. In Canada, a similar story is being written. The western provinces have been organizing, politically and otherwise. Eastern Canada's selfishness has caused friction, dissatisfaction and opposition. The mistakes of East and West have been magnified each by the other and their good points overlooked. The West may have developed unduly radical tendencies and the East ultra-conservative ways. Opposition has grown between one section and the other. Little effort, until recently, has been made to give and take, to recognize the proper value of eastern and western demands. That condition is unsatisfactory to both.

The voice of the West must be given a better ear by the East. The East must take the initiative in trying to get a state of affairs more pleasing to the West and beneficial to both. A few manufacturers, loaning men and bankers have recognized that fact. As a result, they and the farmers are already on better terms. To understand, is good for the nation's business. Imaginary grievances have been put into place and real ones removed.

The merging of the farmers' organizations of the western provinces will make a strong national factor. It will have political power for reckoning. It will advance the farmers' interests. It will fight the East if the East does not get a clearer conception of western ideas and ambitions. The prairie provinces have made many mistakes. So has the East. Some of the western legislation is harmful to national interests generally. These and other problems will be best solved by less deafness on the part of Eastern Canada, to Western Canada's voice. Otherwise, the West will cure poor hearing by considerable noise and by taking much more than is good for it or for the country as a whole.

Mr. J. Armitage Ewing, K.C., legal adviser Sun Life Assurance Company of Canada, whose paper on "Some Features of Quebec Insurance Law," given before the Toronto Insurance Institute, and printed in *The Monetary Times*, graduated from McGill University, with honors, in 1897, and was admitted to the Bar in 1898. He then formed a partnership with Hon. Henry Aylmer. In 1898 he entered into partnership with the late Mr. G. B. Cramp, which partnership continued until Mr. Cramp's death in 1915. In 1905 Mr. Ewing was appointed solicitor for the Sun Life of Canada. In 1909 he was created a King's counsel. He is also solicitor for the Liverpool and London and Globe Insurance Company, and the Globe Indemnity Company of Canada, besides other important financial corporations. The practice of the legal firm, of which he is the head, consists largely of insurance and real estate matters.

UNITED STATES FACTORIES IN CANADA

Investment of \$150,000,000 is Represented in That Way —Tariffs After the War

About 50 branch establishments of United States firms have been established in Canada since the outbreak of war. Most of these have come to Ontario, several to Quebec province and a few to western cities. With an average investment conservatively estimated at \$300,000, these 50 plants represent a new investment of \$15,000,000 in this country. Prior to the war there were about 450 such companies in Canada. With a similar average investment, the total is \$135,000,000, and with the companies which have come here since the war, the grand total investment is \$150,000,000.

Among the United States companies which have established branches since the war commenced, are makers of the following:—Railway accessories; overalls; chemicals; silverware and flatware; automobiles; horse shoes; steel goods; patent medicines; spices; soaps; perfumes; glue; beet sugar; pumps; greenhouses; railway signals; fuses; boxes; spreaders; silk gloves; stockings; tires; steel; steel products; canned goods; automobile varnishes; belting; store counters; explosives; pulp and paper; sewing machines; aloxite and other abrasives and electric furnace products; grain and elevator machinery; silk and chammoisette gloves; refined nickel; and cottonseed oil products.

Branch Plants \$150,000,000.

Of the total of United States investments of \$978,000,000 in the Dominion, \$150,000,000 is represented by branch plants. Until 1914, this was the largest item in the list of United States investments here. Since then, our securities have been sold in the neighboring republic in far greater volume than hitherto, and consequently that item now represents the largest United States investment in Canada, branch establishments coming second.

The largest number of branch plants of United States companies in Canada is located in Ontario, although there is a tendency to utilize Western Canadian points to a greater extent. At least twelve United States manufacturers of agricultural and farm implements have branches in the Dominion and about as many makers of automobiles. In the latter case, the parts are usually imported separately and assembled in this country. Several United States manufacturers of chemicals, drugs, patent foods and cereals have factories or distributing houses on the Canadian side of the international line. A large number of firms manufacturing and supplying various machinery, fittings and plant are also doing business in Canada in a similar way.

Lengthy List of Articles.

This United States commercial invasion applies to a lengthy list of articles. Among the companies establishing here before the war are manufacturers of: asbestos, barrels, blind rollers, buttons, carpet sweepers, corsets, condensed milk, bags, corks, carriages, couches, brass goods, billiard tables, cords, cash registers, disinfectant, fly paper, files, fire extinguishers, fountain pens, gramophones, hardware, pickles, presses, pulleys, razors, rubbers, sealers, shoes, scales, typewriters, watch cases, tobacco, etc. This list gives an idea of the scope of United States industrial interests in the Dominion.

Since informal discussion in various quarters has been heard as to the possibility of favorable tariffs among the Allies and the Dominions after the war, there has been an impetus given to the movement of United States branch plants to Canada, and a number of inquiries continue to be made by United States firms with a view to their establishment in the Dominion. In the event of favorable tariff treatment as between the Allies and the Dominions, these United States manufacturers in Canada expect to be regarded as Canadian manufacturers and thus entitled to the benefits of any such favorable tariff legislation. These firms are now in a position to cater at close range to the demands of the Canadian market and hope also to be in a position to handle some or all of their export trade from their Canadian factories, under present or revised tariffs of various countries.

Industrial commissioners throughout Canada are receiving numerous inquiries in connection with sites in their industrial districts from United States firms contemplating the establishment of a new industry here. The outstanding feature in connection with the inquiries of these United

States concerns seems to be that they are all awaiting the much-discussed preferential tariff of the Allies.

Probably 90 per cent. of the correspondents desire no publicity regarding their inquiries, apparently not desiring their competitors in the United States to be advised of any intention of establishing in Canada.

BANK OF MONTREAL

Preparation for after-war conditions as the immediate duty of all Canadian citizens was emphasized by Sir Vincent Meredith, president, and Sir Frederick Williams-Taylor, general manager, at the annual meeting of the Bank of Montreal this week.

In their excellent appraisal of banking and commerce they urged economy in public and private life, so that the immediate and subsequent burdens of the war may be met; larger production, so that exports can be increased and the home markets more plentifully supplied; and the desirability of immigration, so necessary to achieve the increase in production.

The Bank of Montreal during the past year, despite the difficulties and varying conditions prevailing, made provision for bad and doubtful debts; paid the usual dividends and bonus; and carried a balance to profit and loss. With so many satisfactory financial statements to the bank's credit, the counsellors of the institution are to be congratulated on still another year of excellent achievement.

In the financial statement, printed in full on another page, much interesting detail is given.

The changes in the bank's quick assets for four years were as follow:—

Year.	Ratio of quick assets to liabilities, %.
1916	75
1915	64
1914	55
1913	49

The bank's total assets amount to \$365,215,541. A growth of \$63,000,000 in total deposits was made during the past year. The deposit figures for the past three years are: October, 1916, \$299,200,000; October, 1915, \$236,000,000; October, 1914, \$197,200,000. Some \$4,500,000 Bank of Montreal notes are in circulation.

Nearing a century of financial service, the influence of the Bank of Montreal has grown from provincial to national and international scope. The institution has been a considerable factor in advancing and maintaining the credit of Canada throughout the world. At the head of the institution are men of great capability and reputation in the persons of Sir Vincent Meredith, the president, and Sir Frederick Williams-Taylor, general manager. They are surrounded by an influential directorate and a businesslike staff. The Bank of Montreal is known everywhere as one of the world's strongest financial institutions.

Mr. D. J. Scott has been appointed Manitoba manager of the Sun Life of Canada, succeeding Mr. W. D. McCallum, who has been appointed the company's manager for China, with headquarters at Shanghai.

Hon. Robert Lynn Cox has resigned as general counsel and manager of the Association of Life Insurance Presidents, to accept a position as third vice-president of the Metropolitan Life Insurance Company. Mr. Cox has been identified with the association from its beginning, having been appointed secretary and attorney at the time that Mr. Grover Cleveland was made its first chairman and general counsel, early in the winter of 1907. When Mr. Cleveland died in June of 1908, Mr. Cox was chosen as head of the organization. Mr. Cox entered upon the work of the association shortly after the conclusion of four years' service as a member of the New York Assembly, which service included the period of the Armstrong legislative investigation and the enactment of the life insurance laws resulting therefrom. He was a member of the joint legislative committee which conducted the investigation in 1905 and also of the assembly standing committee on insurance which in 1906 acted upon the report of the joint committee. It was during these two years that he had his first intimate contact with the life insurance business.

NEW INCORPORATIONS

Seven Companies with Capital of Over \$1,000,000 Each—
Twenty-two New Charters for Ontario

Canada's new companies incorporated this week number 42. The head offices of these companies are located in five provinces. The total capitalization amounts to \$19,428,000.

The largest companies are:—

Canada Truck Company, Limited	\$4,900,000
Canadian Mining Corporation, Limited	1,660,000
Hudson Copper Company, Limited	2,000,000
International Manufacturing Company, Limited...	1,000,000
Kenyon Copper Mines, Limited	1,250,000
King Midas, Limited	2,000,000
Murray Mogridge Mining Company, Limited....	2,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	22	\$13,230,000
Quebec	7	5,274,000
British Columbia	8	709,000
Manitoba	4	165,000
Alberta	1	50,000
	42	\$19,428,000

The following is a list of charters granted during this week in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Victoria, B.C.—Ormond Copper Mines, Limited, \$500,000.

Trail, B.C.—East Trail Water Company, Limited, \$10,000.

North Temiscaming, Ont.—Quebec Mining Corporation, \$2,000,000.

Windsor, Ont.—Sun Realty Company, Limited, \$25,000. C. W. Brainard, C. J. Sanger, E. W. Vas Vary.

Quebec, Que.—Produits B. O. Compagnie, Limitée, \$20,000. J. A. Lesage, J. E. Caron, J. E. Gingras.

Sherbrooke, Que.—Universal Asbestos Company, Limited, \$50,000. H. R. Fraser, F. S. Rugg, H. M. Terrill.

Thessalon, Ont.—Hudson Copper Company, Limited, \$2,000,000. R. E. Laidlaw, E. F. Raney, Alice Hawkins.

Ottawa, Ont.—International Manufacturing Company, Limited, \$1,000,000. L. Patterson, A. O. Hoyt, J. A. Harriss.

Edmonton, Alta.—The Provost Manufacturing Company, Limited, \$50,000. G. H. Stoddart, O. T. Ross, J. C. Sherry.

Cookshire, Que.—The Wax and Glassine Paper Company, Limited, \$225,000. R. A. Pringle, T. A. Burgess, L. Cote.

Bala, Ont.—Bala Electric Light and Power Company, Limited, 25,000. J. P. Weeks, G. B. Jackson, Agnes G. Tudhope.

Niagara Falls, Ont.—Bissel Carpet Sweeper Company of Canada, Limited, \$100,000. W. B. Sturup, J. W. Bicknell, A. T. Maher.

Port Arthur, Ont.—Leece, Limited, \$10,000. W. B. Leece, Harriet Leece, R. H. McFarlane; the New Ontario Contracting Company, Limited, \$40,000. W. F. Langworthy, A. J. McComber, G. McTeigue.

Hamilton, Ont.—McGregor Shirt Company, Limited, \$100,000. R. B. McGregor, W. J. Leonard, Laura M. McGregor; the Canadian Desmond and Stephan Manufacturing Company, \$50,000. A. H. Gibson, G. H. Levy, C. H. Higgins.

Vancouver, B.C.—Kimsquit Fisheries, Limited, \$24,000; the Davis Logging and Trading Company, Limited, \$50,000; Western Theatre Company, Limited, \$20,000; Saba Brothers, Limited, \$30,000; Nanoose Collieries, Limited, \$50,000; Nickson Construction Company, Limited, \$25,000.

Montreal, Que.—Israel and Oppenheimer (Canada), Limited, \$50,000. J. W. Blair, C. A. Hale, A. Angers; the Canadian Bottlers' Association, Limited, \$20,000. O. Gagnon, J.

E. Ranville, E. Boulais; Canada Truck Company, Limited, \$4,900,000. J. W. Blair, F. J. Laverty, R. E. Hannan; Canadienne Bonne-Baie, Limitée, \$9,000. Z. Filion, J. A. Houle, L. Lamothe.

Winnipeg, Man.—J. A. Chmelnitsky, Limited, \$100,000. Annie Chmelnitsky, J. A. Chmelnitsky, G. Chmelnitsky; Anglo-Canadian Engineering Company, Limited, \$20,000. C. N. Dalgeish, D. N. Stevens, W. P. Rourke; Herbal Drink Manufacturers, Limited, \$20,000. G. Butterworth, W. Sanger, N. Balan; Manitoba Stores, Limited, \$25,000. A. Henry, A. Johnson, T. Borgford.

Toronto, Ont.—The Radium Institute of Toronto, Limited, \$40,000. W. H. B. Aikins, A. H. Robertson, Evelyn W. Booth; Virtue and Liberty Motor Sales, Limited, \$40,000. F. C. Virtue, J. Liberty, A. G. Sylvester; Consolidated Investments, Limited, \$60,000. R. P. Tucker, W. A. Brodie, Florence E. Moore; Laura Secord Candy Shops, Limited, \$200,000. W. H. McGuire, G. F. Rooney, N. Phillips; Kenyon Copper Mines, Limited, \$1,200,000. J. F. Mackenzie, A. L. Reid, Hazel A. Thompson; Canadian Auto Sales Company, Limited, \$40,000. R. D. Hume, J. J. Greenan, Florence M. Thomson; King Midas, Limited, \$2,000,000. F. M. McDowell, G. R. Sproat, C. H. Kemp; United Smoke Shops, Limited, \$100,000. F. Denton, A. Macdonald, E. M. Miller; Murray Mogridge Mining Company, Limited, \$2,000,000. W. B. Sturup, J. S. Duggan, C. A. S. McKay; Canadian Mining Corporation, Limited, \$1,660,000. K. D. Mackenzie, W. W. Perry, H. C. Leggott; Canadian Aeroplanes, Limited, \$500,000. R. H. Parmenter, A. J. Thomson, W. S. Morlock, S. Fremes and Company, Limited, \$40,000. S. King, O. Henman, W. Cherry.

IT BROUGHT HALF A MILLION DOLLARS

The commercial intelligence branch of the department of trade and commerce, Ottawa, has received a letter from a Montreal house exporting metals, minerals and chemicals, stating that as a result of replying to an inquiry which was published in the weekly bulletin of the department of trade and commerce about three months ago they received an order immediately amounting to \$123,000 from an English purchasing house. This was followed by a second order amounting to \$427,000, making a total of \$550,000 of business within three months resulting from the reading of one inquiry in the weekly bulletin of the department of trade and commerce. The manager of that company would be willing to pay a high subscription price for the weekly bulletin if it were necessary, but this publication is sent free to any business man who takes an interest in overseas trade. Inquiries for Canadian products are constantly being received by the commercial intelligence branch from all the countries where Canadian trade commissioners and commercial agents are stationed.

BIG FUTURE FOR MINING INDUSTRY

Better Chances Here of Locating Valuable Minerals Than in Any Other Country

Our total mineral production amounts now to over \$150,000,000 annually. This year's production will probably be \$165,000,000.

These statements were made by Mr. A. A. Cole, mining engineer of the Temiskaming and Northern Ontario Railway and president of the Canadian Mining Institute, in an instructive address to the Empire Club, Toronto, yesterday. While admitting agriculture as the greatest industry in Canada, Mr. Cole drew attention to the fact that 47 per cent. of the Temiskaming and Northern Ontario Railway's total freight revenue during the past five years was derived from minerals. Taking the whole of Canada, minerals contributed in the year ended March, 1913, 38 per cent. of the railroad freight, agriculture 16 per cent. and manufactures 14.8 per cent.

Minerals and War.

The speaker then dealt with the vital importance of mineral resources in connection with the war, pointing out that the principal French coal field, and that one now in the possession of the Germans, is the field of Valenciennes, which is the continuation of the main Belgian field, the whole being known as the Hainault Basin. The coal output of France for the year 1913 was 40 million tons, the bulk of which was probably supplied by the Valenciennes field.

The iron-bearing formation outcrops in the German acquired province of Lorraine, but the deposits continue in gradually increasing depth coming west in French territory. The French engineers soon located the continuation of these iron deposits by means of bore-holes and at once began development, and in the face of considerable difficulties by the year 1914 they had developed a larger iron industry than was on the German side of the line, and had greater ore reserves. The French deposits occur in what is known as the Briey valley, and these form one of the most important iron ore areas in Europe. The production of this area in 1913 was about 30 million tons. This area has been in the possession of the Germans since the beginning of the war, and it has been estimated that last year it supplied 60 per cent. of the total German iron ore production.

Mr. Cole stated that if the Germans could have made a breach in the French lines at Verdun, which was one of the strongest points in the line, it would mean that the French would have to consolidate their lines at a considerable distance from Verdun, and this would not only relieve Metz, but would remove the valuable iron deposits from the immediate danger zone.

Canada Leads in These.

Mr. Cole then mentioned some gratifying features in regard to the place of our mineral resources in their international place. "In a list of our mineral resources," he said, "you will find that few of the important ones are missing, and in some of those we lead the world."

"Our coal resources are the greatest in the world."

"Our asbestos deposits in the Eastern Townships of the province of Quebec supply most of the asbestos of commerce."

"The greatest nickel deposits in the world are located at Sudbury. Ontario has the largest body of high-grade talc on the continent at Madoc; the largest body of high-grade feldspar on the continent in the Richardson mine near Verona; the greatest mica mine on the continent at Sydenham, and the greatest graphite mine at Calabogie, and a recent molybdenite find within thirty-five miles of Ottawa may soon outstrip all rivals."

"We also have one of the richest silver camps in the world at Cobalt, and the most promising of the younger gold camps on the continent at Porcupine."

Our smelters at Deloro and Thorold also produce more refined cobalt than all the other refineries in the world put together.

"With such a magnificent heritage we would be very delinquent in our duty if we did not give the mineral industry the careful attention that it deserves."

Mr. Cole thought there is good reason to believe that "we are now exporting a great quantity of raw material which could be much more profitable, so far as the national

interests are concerned, if made the basis of manufacturing industries at home; and also importing supplies, a considerable proportion of which we could quite readily and most advantageously produce ourselves. In some cases it will be necessary merely to indicate the opportunities that exist for the establishment of new industries to effect the desired end; in other instances government encouragement will be required.

Bright Future Ahead.

Speaking of the future, Mr. Cole said there is certain to be legislation introduced regarding the Canadian mineral industry. This will receive more intelligent treatment if we have a public well informed on the subject to back it up. He concluded: "Anyone who looked over the unbroken forest of Northern Ontario a dozen years ago and predicted that this district would soon be producing twenty millions in gold and silver annually would have been put down as a fantastic dreamer. But that is a fact to-day, and the output is continually increasing. And yet only a small portion of the country has been prospected. Running north-east and north-west from Cobalt and extending to the Arctic ocean is the great Canadian pre-Cambrian shield, the basement formation of the continent. It contains thousands of square miles and offers to prospectors better chances of locating valuable mineral deposits than can be found in any other country in the world."

"Turning from such a past record and looking forward into the future, it requires no very vivid imagination to see other Cobalts and other Porcupines converting the wilderness into thriving hives of industry."

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended December 2nd:—

Hudson Bay Mines, 62,608; Dominion Reduction Company, 86,000. Total, 148,608 pounds, or 74.3 tons.

From Elk Lake—

Miller Lake O'Brien Mines, 51,900 pounds.

The total shipments since January 1st, 1916, now amount to 29,411,176 pounds, or 14,705.5 tons.

NEW DIRECTORS OF GREAT-WEST PERMANENT LOAN

The new board of directors of the Great-West Permanent Loan Company, of which Mr. W. T. Alexander is the president, is made up as follows:—Messrs. W. T. Alexander, Hon. A. C. Rutherford of Edmonton, J. H. G. Russell, Winnipeg; J. G. Hargrave, R. G. Affleck, D. E. Sprague, E. L. Taylor, S. D. Lazier, Dr. A. D. Carscallen and F. H. Alexander.

These directors will also control the Imperial Canadian Trust Company and the Canada National Fire Company, the allied companies.

Dr. E. S. Popham, Captain William Robinson, E. D. Martin and E. F. Hutchings, who have been directors of the Great-West Permanent Loan Company, have resigned and all their stock in the company has been purchased.

DRYDOCK FOR VANCOUVER

An Ottawa dispatch says:—Arrangements have been completed for the construction of a large floating drydock at Vancouver. The structure will be a 16,000-ton, double-section dock, capable of handling a boat of 18,000 tons, which is the measure of maximum requirements on the Pacific to-day. The company is the Vancouver Drydocks, Limited, with Mr. Charles Meek, of Vancouver, as the moving spirit. Bonds to the amount of two million dollars have been sold to Breed, Elliott & Harrison, of Cincinnati. A ship repair and ship-building plant is a part of the plan decided upon. Contracts for construction and machinery, are being let, and the company announces that it will have the dock in operation within a year. There will be subsidy aid from the governments of both the Dominion of Canada and the province of British Columbia, on the ground that the dock will be a commercial and naval asset.

Steamers sailing from Canadian ports on the Pacific at present are forced to dock for repairs at Hong Kong, at Kobe, Japan, or in Australia.

MANITOBA'S RURAL CREDITS BILL

Outline of the Scheme—Bonding Powers—Question of Foreclosure

The Manitoba government has issued the following memorandum in regard to the proposed rural credits scheme:—

The purpose of the bill is to provide capital for agricultural development and create a standard form of investment based upon farm mortgages, and to create securities, issue bonds, and to loan money for such purposes.

The bill shall create an organization to be called "The Manitoba Rural Credits Association," the head office of which shall be in Winnipeg. The bill shall provide for an authorized capital of \$1,000,000, divided into 40,000 shares of \$25 each.

Bonding Powers.

The association shall be authorized to issue bonds from time to time to an amount which shall not exceed 90 per cent. of the amount of the underlying security—viz., the mortgages.

The bill shall authorize the lieutenant-governor-in-council to guarantee such bonds up to but not exceeding a total of \$9,000,000 from time to time as the money is required. The bonds shall bear interest at 5 per cent. per annum, payable half-yearly, shall be guaranteed by the province, shall be free of all local taxation, and shall be disposed of by the treasury department.

There shall be a board of management consisting of five members; the chairman shall be known as the commissioner and shall be appointed by the lieutenant-governor-in-council. Two members shall be appointed by the union of municipalities, and two members by the lieutenant-governor-in-council, and two of such four members shall represent the party which received the largest number of votes at the last election, and two may represent the party which received the next largest number of votes at the last election.

Control of Association.

For the purpose of preventing the association from becoming commercialized, the capital of the association shall always be vested in the government and the borrowers.

The paid-up capital shall always determine the total investment of the association as it must always represent the difference between the mortgages which are the underlying security, and the bonds.

The government may subscribe for the first \$100,000 of the shares, and every borrower shall subscribe for at least 5 per cent. of his loan in shares of the association.

The municipalities of the province shall be the unit of the organization, and no money shall be loaned in any municipality until a by-law has been submitted to the ratepayers for the purpose of bringing the act into operation in that municipality.

A committee shall be appointed by the municipal council, but not necessarily consisting of its own members, to supervise all loans arising in that municipality and to recommend same to the board. The secretary-treasurer of the municipality shall be authorized to receive applications for loans, and the bill shall provide that this service shall be added to his duties without expense to the association.

The bill will authorize the government to make a general levy upon the rural municipalities of the province, through the office of the municipal commissioner, for an amount not to exceed 5 per cent. of the total amount loaned in any municipality in each year, for the purpose of providing against losses should same arise (the liability under this clause is very remote, and the authority may never be exercised).

For the purpose of reducing the cost of borrowing, the registrars of the different land titles offices shall be authorized to receive mortgages, register same, and report on the title without charge to the association.

Where mortgages are in arrears of either principal or interest, or farms are deteriorating on account of neglect or mismanagement, the board may take proceedings to foreclose upon its own initiative or upon the advice of the municipal committee.

As to Mortgages.

1. All loans shall be secured by a duly recorded first mortgage on the farm within the municipality in question.

2. Every such mortgage shall contain an agreement providing for the payment of the loan on an amortization plan by means of a fixed number of annual instalments, sufficient to cover the first charge on the land at a rate not ex-

ceeding 5 per cent. per annum, and a second charge for administration and profit at a rate not to exceed 1 per cent. per annum on the unpaid principal, the said two rates combined constituting the annual interest rate on the mortgage.

3. Such amounts to be applied on the principal in such a way as will extinguish the debt within an agreed period of not less than 20 nor more than 40 years.

4. Mortgages shall be drawn for 20, 30, or 40 years and shall provide for payments as aforesaid sufficient to retire the loan at maturity.

5. Such payments shall be paid into a sinking fund and shall bear interest at 3 per cent. per annum compounded.

6. All such loans made on such first mortgages may be made for the following purposes and for no other:—

(a) To provide for the purchase of land for agricultural uses.

(b) To provide for the purchase of equipment, fertilizers and livestock necessary for the proper and reasonable operation of the mortgaged farm.

The term "equipment" to be defined by the board.

(c) To provide buildings and for improvements on the land. The term "improvements" to be defined by the board, who may vary same in different cases.

(d) To liquidate the indebtedness of the owner of the land mortgaged, existing at the time, or indebtedness subsequently incurred for the purposes mentioned in this section, the board to at all times first approve such expenditures.

Fifty per Cent. of Value.

7. No such loan shall exceed 50 per cent. of the value of such land mortgaged, such value to be ascertained by appraisal, and the value of the land for agricultural purposes shall be the basis of such appraisal, and the earning power of such land shall be the principal factor.

8. No such loan shall be made to any person not at the time engaged, nor desiring to become engaged in the cultivation of the land mortgaged, or of whose experience and ability to cultivate the land the board may have reasonable doubts.

9. In case of the sale of the mortgaged land with the consent of the board, the board may permit the said mortgage and the shares of the vendor in the said association to be assumed by the approved purchaser. In the case of the death of the mortgagor, his heir or heirs, or his administrator or administrators shall have the option within sixty days of such death of assuming such mortgage and the shares of the deceased. No mortgagor shall have power to will or devise any shares he may hold to any person other than the heir or heirs to whom he bequeaths the mortgaged farm.

10. The amount of a loan to any one borrower shall not in any case exceed a maximum of \$10,000, nor shall in any case be for a less amount than \$500.

11. Every applicant for a loan under the terms of this act shall make application on a form to be prescribed by the board. Such application shall state the objects for which the said loan is to be applied, and shall furnish such other information as may be required, and there shall be provided penalties for wilful misstatements.

Eight per Cent. per Annum.

12. Every borrower shall pay simple interest on all overdue payments at the rate of 8 per cent. per annum, and by express covenant in the mortgage shall undertake to pay when due all taxes, liens, judgments and assessments which may be levied or assessed against the land mortgaged. In the event of same not being paid when due they shall be paid by the board and shall become part of the mortgage debt and shall bear simple interest at the rate of 8 per cent. per annum.

13. Every borrower shall undertake to keep insured to the satisfaction of the board all buildings, the building or existence of which was a factor in the determination of the amount of the loan. Such insurance policy or policies shall be made payable to the mortgagee as his interest may appear at the time of the loss, and at the option of the mortgagor and subject to the general regulations of the board, the sums so received may be used to pay for the re-erection of the buildings destroyed.

14. Every borrower who shall be granted a loan under the provisions of this act shall enter into an agreement in a form and conditions to be prescribed by the board, that if the whole or any portion of his loan shall be expended for any purpose other than those specified in his original application, or if the borrower shall be in default of any condition or covenant of the mortgage at any time, or in the event of

the death of the mortgagor, or his sale of the land, the whole of the loan shall at the option of the mortgagee become due and payable forthwith, provided that the borrower may use part of the said loan to pay for his shares in the said association.

15. All payments under this act upon the amortization plan by borrowers shall be made on the first day of December in each year including the first of such payments.

Sinking Fund Deposits and Audit.

Payments into sinking fund shall be kept in a separate account and shall not be invested in mortgages, but may be invested in Dominion government bonds, or bonds of the provinces of Canada, or in municipal bonds, or school district bonds.

The association shall be authorized to receive deposits provided this clause is within the jurisdiction of the legislature to enact.

All mortgages shall be registered in the office of the comptroller-general who shall issue certificates from time to time showing the amount of such mortgage. The books of the association shall be regularly audited by the comptroller-general.

A reserve account shall be created and 25 per cent. of the net profits of each year's administration shall be carried to reserve. The board shall have authority to declare dividends from time to time, but no dividend shall be declared by the board of management until such time as the reserve account is equal to 20 per cent. of the paid-up capital.

GERMAN FIRMS WATCH THEIR AGENTS

The attention of the commercial intelligence branch of the British board of trade has been called to the care which German firms have displayed in watching their agents. In Norway, for example, it is stated that if the agent of a German firm lets a year elapse without showing a fair amount of business passing, he is called upon by one of the heads of the firm and asked for explanations, and if these are not satisfactory he is immediately replaced by another agent. On the other hand it is asserted that there are firms holding British agencies who have done no business for years, but their English principals do not trouble to send over and investigate. The slackness of the agent is sometimes attributable to the fact that German agencies for the same class of goods are also held by him. Statements of this kind all point to the fact that entry into new foreign markets is beset by difficulties which must be understood and met.

Canadian exporters will need also to watch their agents.

Approximately 90 per cent. of the stock of the Quebec Bank—24,000 shares out of 27,350—voted in favor of accepting the offer of the Royal Bank to purchase the bank's assets.

CANADA'S Live Stock Industry

It should be under Federal Control.

Present Statistics are Unsatisfactory.

Are our Banks equipped for Live Stock Loans?

JANUARY, 1917

PRICE 50c

WAR AND PRICES

In Canada, according to the figures of the department of labor, in retail prices the cost of some 30 staple foods rose from \$7.42 for July, 1914, to \$7.98 for July, 1915, \$8.46 for July, 1916, and \$8.63 for August, 1916. In wholesale prices, the trend of which is shown in the above chart, the general index number rose from 134.6 in July, 1914, to 150.2 in July, 1915, 178.8 in July, 1916, and 178.5 in August, 1916, but had reached 180.9 in May, 1916. Great advances in metals and chemicals as well as in wool, jute, flax products, hides and leathers accounted to great extent for the rise, but the food groups were also up considerably.

In Canada as well as in other countries, wheat, flour, sugar and tea were amongst the first commodities to advance

COURSE OF WHOLESALE PRICES IN CANADA,
1890 to 1915.

Average prices, 1890-1899=100. Number of commodities:

Figures of the department of labor, Ottawa.

owing to the effect of war in interrupting normal trade and supply; a demand for army supplies contributed to the rise in meats. Metal markets were also disturbed as there was speculation in material for war supplies, but it was expected that the decrease in the demand for industrial purposes would more than off-set the war demand. In rubber, coke, gasoline, lumber, raw furs, wool and cotton markets, similar influences lowered prices for a time especially in the last. A financial crisis and a brief holding back of shipment by sea in some parts also tended to stop trade and lessen production, at the same time making the supply of some commodities uncertain for a time. Orders for military equipment soon caused advances in wool, leather, etc., as well as in foods and later in metals. In the latter a great demand first developed for machines for the manufacture of munitions, and as these were finished, metals and explosives for munitions were still in greater demand.

The contractors on several sections now under construction of the new Welland ship canal have received advance notice that all work is to be discontinued at the close of the present season. This is stated to be a war measure to reduce expenditure and free labor for munitions works.

THE TORONTO GENERAL TRUSTS CORPORATION

DIVIDEND No. 82

Notice is hereby given that a dividend of Two and one-half per cent. (2½%) has been declared upon the paid-up Capital Stock of this Corporation for the quarter ending December 30th, 1916, being at the rate of Ten per cent. (10%) per annum, and that the same will be payable on and after the 2nd of January, 1917.

The Transfer Books of the Corporation will be closed from Wednesday, the 20th of December, to Saturday, the 30th of December, both days inclusive.

RECOVERY IN BRITISH COLUMBIA

Developments in Industries, Mining and Agriculture—
Improving Coast Ports

(Staff Correspondence.)

British Columbia is rapidly recovering from the unfavorable conditions which developed in 1913. Every statistical record shows monthly increases. Vancouver is the centre of the commercial activity of the province, and may be taken as a standard. Some of its figures for the first ten months of this year, as compared with the corresponding period for 1915, are:—

	First ten mos., 1915.	First ten mos., 1916.
Bank clearings (Vancouver)	\$229,547,562	\$260,459,070
Customs returns (Vancouver)....	4,283,591	5,127,446
Building permits (Vancouver)....	1,552,599	2,025,820
Inland revenue (Vancouver).....	418,988	551,109
Postage stamp sales (Vancouver)	373,516	477,682

Why is this? Never before in the history of the province has there been such industrial activity. In 1912, when times were at their best, the lumber industry was the principal industry. The pulp and paper industry is new. It might almost be said that the manufacture of shingles is new also, at least the present large production is, compared with that of two or three years ago, when production was nominal.

New Shipbuilding Contracts.

Another new industry is shipbuilding. Under the provisions of the legislation passed last spring, ten contracts have already been fixed with the provincial government, and four boats are building at Vancouver and three at Victoria. When these are finished others will be put under construction. These vessels are destined as lumber carriers. The number mentioned does not include the steel steamer, now being built at North Vancouver, nor the steel stern-wheeler under construction at Yarrow, Limited, Esquimalt, which is about to be duplicated immediately. The building of these ships is giving employment to a large number of men, but the great feature is that carriers will be available for British Columbia products, a handicap that is serious at present. The first vessel will be launched in January.

The mineral production of the province is expected to be the largest on record.

Improving Coast Ports.

Big port improvements at both Vancouver and Victoria are an indication of what trade is expected in the near future. The government is spending three or four million dollars constructing a breakwater (almost completed) and piers at Victoria, while on Burrard Inlet it has built a large dock. The Canadian Pacific Railway has plans for seven new piers at Vancouver, which will be constructed as occasion warrants. Because of urgent need of increased facilities it will extend Pier D, and as soon as this work is finished, construction of Pier B will be proceeded with. The cost will be \$1,000,000.

The big oil companies are spending much money. At Victoria, during recent months, the Imperial Oil Company has spent \$150,000 in establishing headquarters for its island business. At Ioco, on Burrard Inlet, it has established very extensive works, where about 300 men are employed. On Burrard Inlet, also, the shell company has started work, which is preliminary to the construction of a refinery and the expenditure of several millions of dollars.

An instance of business coming here because of the war is that the Canadian Explosives, Limited, Victoria, is producing 850,000 pounds of high explosives every month, which is the largest production of any powder factory in Canada.

Employment is being given to double the number of men than in 1912, at higher wages, and this employment promises to be permanent. Lack of labor is being felt. Not only are mining, lumbering, and the pulp and paper manufacturing chief industries, but agricultural production is steadily increasing. Under the new system of agricultural credits the government will assist a large number of farmers financially. Imports, which amounted to \$25,199,125 in 1914, dropped to \$16,434,970 in 1915.

USEFULNESS OF CHARTERED ACCOUNTANTS

Accountancy is Key to Business Details—Recognition
by Authorities

There is hardly one who does not realize that the accountant can be of help in the business world. He can help to rectify mistakes and to unravel knotty subjects, and, best of all, he can keep us on the straight and narrow path. Probably the great majority of us are in a position to understand well his potential, if not his actual, usefulness, remarked Mr. J. Porter Joplin, of Chicago, president of the American Association of Public Accountants, when addressing the Dominion Association of Chartered Accountants at Regina.

The accountant's duty is one of service. If he is true to his obligations, he will endeavor to make himself worthy of confidence in every sense of the word. He will have his ideals, and he will not forsake them at anybody's bidding. He will constantly seek to keep in line with the best and most helpful ways of doing things, and the individual's or firm's prosperity will be the best proof of his worth. Details of affairs will be inviolate in his keeping, while suggestions for improvements will be constantly at service.

It is no slight task, the fulfilment of this obligation which the accountant is under. Although he knows it well himself the trend of affairs in the nation's growth keeps it before him and puts him mentally on the quiver, giving a chance for expression to all the best that is in him.

Need for Recognition.

But there are few entirely one-sided games in this world. Now what of the duty—the responsibility—toward the accountant? It may be summed up in the word "recognition." If he is to do his best work, he must be recognized for what he is—a business aid and adviser, trained for that purpose and to that end, and of use in both private and public affairs.

A larger measure of recognition is being constantly granted to the professional accountant in both Canada and the United States, but as yet the community has scarcely begun to enjoy the benefits which would follow if the public were more fully informed as to how its interests could be safeguarded and conserved through a closer contact with the profession. It is this closer contact that accountants' associations are in a position to bring about.

Few men in this day and generation would think of attempting surveys or engineering projects, or arguing their own law cases. In the one case they would go to an engineer, in the other to a lawyer. But when it comes to business details, they seem quite willing to believe that intuition and good intention, rather than broad, practical acquaintance with and training in underlying principles, can safely be the guiding star.

In United States and Canada.

Talents increase with use, and the more the accountant feels that the public is depending upon his services, the greater will be his incentive to make those services of increasing value. The greater also will be his opportunity for doing so.

In the United States the federal commissions which have been created within recent years are granting a fair measure of recognition and the United States National Association of Accountants is being applied to for advice in important matters. This argues well for the future, and is doubtless only a counterpart of conditions in Canada while the recognition rendered by the British government to members of this profession for their valuable services is so well known that it is not necessary to dwell thereon. When full recognition is given the chartered accountant, his usefulness will extend to broader fields than would seem now to be the case on this continent.

The prevailing car shortage on the railways of Canada is admittedly serious, and the railway commission will open an inquiry at Toronto on December 11th, to investigate the conditions existing. The Canadian Pacific, the Grand Trunk, the Michigan Central and the Toronto, Hamilton and Buffalo Railways, acting also on behalf of other railroads in Canada have applied to the board for an order increasing the demurrage charge from \$1 to \$4 for each day a car is held after the expiration of the free time allowed.

The Hamilton Provident and Loan Society

DIVIDEND No. 91

Notice is hereby given that a Dividend at the rate of Eight per cent. per annum has been declared for the half year ending December 31st, 1916, upon the paid-up Capital Stock of the Society, and that the same will be payable at the Society's Head Office, Hamilton, Ontario, on and after Tuesday, the 2nd day of January, 1917.

The Transfer Books will be closed from the 15th to the 31st of December, both days inclusive.

NEW FACTORIES COMING

Tractor Company May Build at Whitby and Fuse Company at Montreal

Interests associated with the Commonwealth Tractor Company, of Kansas City, propose to establish a factory at Whitby, Ontario. The company will be known as the Canadian Tractors Company. A joint stock company will be formed to manufacture "Never-slip" tractors. The town of Whitby is asked to guarantee \$100,000 10-year 5 per cent. bonds and to grant the company exemption of taxation for municipal purposes, except school rates, and taxes for local improvement, and all war taxes upon lands, buildings, machinery, plant and manufacturing accessories as may be used strictly for the manufacturing business in Whitby. The tax exemption is requested for ten years from January next.

Site of 50 Acres.

A site of 50 acres is to be acquired, which, with factory, machinery and equipment, when completed, will be valued at approximately \$200,000. The company will employ an average of from 100 to 150. In the proposed agreement with the town of Whitby, Mr. Guy R. Creelman, of Fenton, Michigan, agrees "within sixty days after the incorporation of the company to procure an assignment to said company of an order for 600 tractors given by the Allied National Corporation to the Commonwealth Tractor Company, and no bonds shall be delivered by the bank manager hereinafter mentioned until the assignment of the said contract and delivery of the same to the said company. The Commonwealth company may reserve the right to deliver all necessary samples and such machines as the company are not able to deliver."

Mr. W. N. Smith, president of the Monarch Tractor Company, of Watertown, Wis., is to be managing director and mechanical adviser of the new company at Whitby. He is the originator and patentee of the "Never-slip Tractor," and was formerly acting with the Commonwealth Tractor Company, of Kansas City, Mo. He is said to control a large volume of business in the shape of orders from Russia for these tractors.

Fuse Company at Montreal.

The International Manufacturing Company, a subsidiary of the International Arms and Fuse Company of America, will build a plant near Dominion Park, Montreal, at an estimated cost of \$1,000,000. The financing is being done in New York. The company will make time fuses. A contract for the building, 350 feet by 370 feet, has been awarded to Anglin's, Limited.

The Acme Rubber Company, Toronto, has an option on the factory premises of the Ware Manufacturing Company, Oakville, now out of business, and wish to start the manufacture of rubber tires and other automobile accessories there. The company consists of 250 bondholders and stockholders. Only high-class male adult labor will be employed. Thirty hands will be necessary to start. The plant is worth \$35,000. The company has asked the town for free water and a guarantee of the interest on the bonds amounting to \$50,000.

A by-law has been passed by the ratepayers of Elmira, Ont., to grant certain concessions to the Consolidated Rubber Company, who will establish a branch factory there.

Pembroke, Ont., is to have a new plant, with Messrs. J. F. Munro, E. A. Dunlop, M.P.P., and Thos. Pink among the local men behind the enterprise. The building will cost \$10,000 and the machinery \$75,000. It will employ about 200 men on the work for which the new company has a large contract.

New Industries for Vancouver.

The locating of two new industries in Vancouver is announced by Industrial Commissioner Davison. These industries have decided to move from New Westminster and in Vancouver will double their plant and output. They are the Schaafe Machine Works and the Vulcan Iron Works. Four waterfront lots have been leased by the Schaafe Machine Works on the industrial island under Granville Street bridge. Mr. Davison reported that he had several interviews with Mr. O. W. Barbour, a Scottish thread manufacturer, who is seeking a site for the removal of the firm's big thread works in Scotland.

The Vancouver Creosoting Company has established a plant at North Vancouver, with an expenditure of \$300,000.

On December 1st work started at the Swanson Bay plant of the Empire Pulp and Paper Company. This is the pulp mill built by British capital, but which has been idle for some years.

IS RURAL CREDITS SCHEME SOUND?

Farmers Will Probably Want to Know Where Profits are Derived

Discussing the proposed rural credit system in Manitoba to be introduced by the provincial government, a western reader of *The Monetary Times* says:—

"It is doubtful whether the farmers will warm up to the scheme in the way anticipated. They are really a very much better informed class than they were a few years ago, and are going to ask some very pertinent questions of the government. There is a feeling amongst some of us that the farmers will ask that the scheme be made self-supporting, and may resent any suggestion of charity. They will undoubtedly want to know whence the profits are derived which are to provide a dividend on the stock. The requirement that the farmer must subscribe stock to the extent of 5 per cent. of his loan will not be popular. For instance, a borrower who wants \$4,000 to meet his obligations must take a loan of \$4,200.

Work of Municipal Treasurers.

"The government considers the municipal clerks highly paid officials, who can readily give their time to securing applications and attending to details of examination of securities, signing of mortgages, etc., without reward. In point of fact, the average secretary-treasurer of the municipality is a busy man, who takes the job for the sake of \$200 or \$300 a year salary. In this respect the scheme is a very faulty one. One would suppose that our governments had experimented enough in undertaking commercial enterprises such as the operation of the telephone, the proprietorship of the grain elevators, the distribution of seed grain, and the handling of hail insurance.

Example in Saskatchewan.

"We have a particularly striking example in the administration of the municipal hail insurance of Saskatchewan. At the annual meeting early in the summer there was much boasting that during some three years of operation, out of every dollar collected by the commission seventy-three cents had been returned to the farmers, while a comparison with the companies showed that of their collections only thirty-seven cents had been returned as indemnities for losses sustained. The report adds: These figures are very significant. Most significant, indeed, they were. The Municipal Commission referred with pride to their accumulated surplus of something like \$500,000, quite overlooking the fact that they were carrying \$30,000,000 of insurance. This year has been a disastrous one for hail insurance, and the commission acknowledges that it is in poor financial position. It hopes some day, when taxes are paid, to be able to meet about 40 per cent. of the losses, but this is doubtful. In the meantime, the hail insurance companies are paying losses in full. So much for the attempt to do business in disregard of sound principles."

SUCCESSFUL LIFE INSURANCE YEAR

Life insurance companies generally report an increased year's business and satisfactory progress in all their activities. Various factors have contributed to this advance. Some of them can be tabulated as follows from information received from the companies by *The Monetary Times*: (1) The public have a better appreciation of the use and value of life insurance; (2) improved salesmanship; (3) lapses were less; (4) prohibition helped collections; (5) distribution of war claims; (6) Western Canada's crop; (7) publicity.

The outlook for the coming year is bright and in the words of a life insurance company's president: "When the war is brought to a successful conclusion the life insurance companies in Canada will be prepared for a growth which will fully compensate the difficulties of these war times."

A. Hignell**, Secretary-Treasurer, Guelph.

1. The object of the present issue is to provide new buildings (now practically completed) to purchase and install spinning plant and additional looms and other equipment.

2. The Balance Sheet for the year 1915 shows that after paying the 7 per cent. dividend on the Preferred Stock outstanding, there was earned over 10 per cent. on the Common Stock, and the Balance Sheet for the first six months of 1916 shows 15 per cent. on the Common after paying 7 per cent. on the Preferred.

3. The Company is in no way dependent on the war and will not be subject to after-war depression.

4. For the past two years the orders for the Company's products have at all times been from three to five months ahead of output.

5. The Company now supplies 90 per cent. of the Canadian manufactured goods of the kind it makes, of which there are about \$9,000,000 in value imported annually.

6. Customs Duty on the raw material is only the war tax of 5 per cent. to 7½ per cent., while the finished product is protected by a duty of 27½ per cent. to 42½ per cent.

7. The management of the Company is in excellent hands.

8. The legality of the issue has been passed on and approved by Messrs. Holden & Grover, Toronto.

9. Application to list the Stock on the Toronto Stock Exchange will be made as soon as regular dividends are well established on the Common Stock.

PRICE: \$100 per share, carrying a bonus of 20 per cent. of Common Stock.

THE BANK OF MONTREAL

**Sir Vincent Meredith, Bart., President, and Sir Frederick Williams-Taylor, General Manager, Insist Strongly on Policy of Preparedness—
Economy, Production and Immigration Its Principal Features—
Temporary Character of Canada's Industrial Activities.**

The 99th Annual Meeting of the Bank of Montreal was held at the head office of the Bank of Montreal on Monday, December 4th. Sir Vincent Meredith, Bart., President, and Sir Frederick Williams-Taylor, General Manager, in their addresses dwelt particularly on the policy of preparedness that Canada should follow in order to be ready for the period of readjustment that would likely prevail after the close of the European war.

Sir Vincent Meredith, Bart., President, in his address to Shareholders, said:—

THE PRESIDENT'S ADDRESS.

I hoped when I last had the pleasure of addressing you that before this annual meeting the end of the cruel and devastating war, which has convulsed Europe, would be, if not reached, at least within measurable distance. In this expectation we have been disappointed. No one can fix the day of its termination, but I am sure I express your feelings when I say we hold an unshaken confidence of the ultimate victory of Britain and her Allies.

Canada, inspired by a deep-rooted loyalty to the Empire, has given and is still prepared to give freely her gallant youth and monetary means to the great cause, upon the success of which her liberties and national existence so greatly depend.

The year has again been one of considerable anxiety to all those engaged in financial affairs. Our profits have been curtailed by payments of Government taxes at home and abroad, while earnings on loans in Canada have been affected by reduced borrowings on the part of our customers. It is not, however, an unfavorable feature that the prosperity of large manufacturing industries and business in general has produced a curtailment of bank loans and converted borrowers into depositors. The low rates of interest on that portion of our reserves carried in New York have also been a contributing factor to diminished earnings compared with those antecedent to the war. But despite these disabilities, we have been able, after making what we believe to be full provision for bad and doubtful debts, to pay our usual dividends with the customary bonus and to carry a balance to credit of Profit and Loss Account. I trust, therefore, that under the circumstances you will consider the results of the banking year satisfactory.

RELATIONS OF UNITED STATES AND ALLIED COUNTRIES.

The wide ramifications of the business of the Bank make us necessarily deeply concerned with commercial conditions in other countries. In Great Britain, general trade has been spurred to great activity by the war's demands. There has been no lack of employment, wages have risen, money has been circulated freely, returning to the Banks in the form of increased deposits, and for the time being, at least, prosperity has prevailed, despite the displacement of labor by the war.

In the United States, also as a result of the war, there is an activity in business unexampled in its history. The shipments of gold to that country in payment of munitions, grain and other commodities have reached a sum in excess of \$700,000,000 since the outbreak of the war. This huge inflow of the precious metal, together with the fact that under the new Federal Reserve Act the proportion of reserves required to be carried by the Banks has been reduced, is causing concern to many financial men, who fear that it will bring about a period of inflation to be followed by a serious financial reaction.

At present these conditions are serving a useful purpose to the Allied Countries by causing a plethora of money, thereby enabling them to borrow at comparatively reasonable

rates of interest. If the United States market will continue to look with favor on further Allied loans, any menace to the financial situation to that extent will be removed.

The recent action of the Federal Reserve Board in counselling caution in the investment of American Bank funds in Treasury Bills of Entente Powers it is thought may be intended as a warning to imprudent or inexperienced bankers. It is hoped, however, that it will not bring about a diminution in Allied borrowings in the United States, with the possibility of a check in the volume of trade with Europe.

The Allied loans so far issued in New York aggregate \$1,585,000,000, of which sum Great Britain has borrowed \$860,000,000, France \$570,000,000, Russia \$130,000,000, and Italy \$25,000,000.

BUSINESS CONDITIONS IN CANADA.

As a result of the phenomenal crop of a year ago, coupled with vast expenditures by the Allied Governments in this country for munitions and by our own Government for requirements in connection with the war, high wages are being paid for all classes of labor, and trade conditions at the moment in Canada are buoyant in nearly all lines of business. The few exceptions will, generally speaking, be found in industries concerned with the production and sale of luxuries.

Owing to unusual adverse climatic conditions and decreased acreage, the yield of wheat this season will probably not exceed in quantity in the North-West one-half of last year's bountiful crop and will fall somewhat below the average in the older provinces; but the farmers will be largely compensated for the diminished yield by the high prices being paid for grain and all other farm products. Estimates this season are, as is usual, conflicting, but those believed to be most reliable give a wheat crop for the three North-West Provinces of 160,000,000 to 175,000,000 bushels, and for all Canada 185,000,000 to 200,000,000 bushels, and it is not improbable it may exceed these figures. Were it not for the fact that our shipments of grain to Great Britain will probably be curtailed by a shortage of ocean tonnage, the results might be looked upon as not unfavorable on the whole.

In this connection I may add that the past season has been very propitious for the dairy trade, the production of cheese and butter exceeding all previous records and marketed at unprecedentedly high prices.

The sudden reversal in the position of Canada from a debtor to a creditor nation, as respects foreign trade, has been very remarkable. In the seven months of the fiscal year to October 31st the excess of imports over domestic exports of merchandise was, as recently as 1913, no less than \$145,000,000, and in the like period of 1914 the adverse balance of trade amounted to \$60,000,000. Then the gap began rapidly to close. The production of munitions of war of every description, together with the bountiful harvest of last year, carried the exports to an unprecedentedly high figure. In the seven months to October 31st, 1915, the value of domestic exports exceeded imports by \$73,300,000, and in the corresponding period of this year the excess of exports over imports has reached the large sum of \$160,000,000.

Nor has this reversal of the balance of trade been accomplished by contraction of imports; in the present year the value of imports has outstripped all previous records. The change has been effected entirely by shipments abroad of the huge crop of 1915, and the large output of war supplies, the exports of agricultural products in the seven months' period to October 31st having risen from \$75,500,000 in 1914 to \$233,500,000.

It is scarcely necessary to add that this striking change in foreign trade balance has greatly ameliorated the financial situation, and is at once a cause and reflex of the existing commercial activities of the country.

SUCCESS OF DOMESTIC LOANS.

In a little more than a year, Canada has issued two Domestic Loans amounting to \$200,000,000, and the Canadian Government has borrowed in New York \$95,000,000. The success of our internal loans is a matter of pride and congratulation. It is due largely to the spirit of loyalty of our people and a determination to do all within them to bring the war to an early and successful conclusion.

So far, a depletion of Bank deposits in consequence of these contributions has not taken place; in fact, they show month by month a gratifying increase. It must not be forgotten, however, that these increases are only partially due to the savings of our people. They may be accounted for to a very considerable extent by the husbanding of resources by our large corporations, a prudent and wise precaution in view of the uncertain conditions which now prevail and will continue to exist during the continuance of the war.

The Minister of Finance, to whom the country owes much for his wise and far-seeing administration of our financial affairs, will doubtless keep in view these conditions when making further calls on our resources, which of necessity he must do from time to time.

The net debt of Canada on October 31st last was \$636,000,000, an increase within the year of upwards of \$200,000,000. The war expenditure has now reached \$23,000,000 a month and is increasing. Ere long the public debt of Canada will reach a billion dollars and involve an interest charge of not less than \$45,000,000 annually. While it is true that through adventitious circumstances public revenue has increased during the last year or two, no dependence can be placed on the continuance of this buoyancy, so that we will have to face a heavy interest charge on account of public debt, and a resulting taxation.

It is obvious, therefore, that if Canada is to escape the disability of being made a dear country to live in, the strictest economy in Government expenditures will have to be practised and all demands for public aid involving new burdens be held severely in check.

The high cost of living is again causing much concern among many. The change from suburban to city life, owing to its many attractions, has been in process for some years, with a corresponding decline in production and in increased demand for all commodities. This circumstance, with the enormous demands of all countries for the products of the farm and field, has been contributory causes, if they are not wholly responsible, for the high and increasing prices of all necessities. The improved conditions under which farm labor is now carried on, by reason of the facilities given by rural mails and the less arduous means of communication, have ameliorated many of the former hardships of farm life and a movement back to the land may be hoped for. But so long as the war lasts and the men who have been withdrawn from productive occupations are engaged in fighting our battles, I fear we can look for little relief from the acute conditions which now confront us.

POLICY CANADA SHOULD FOLLOW.

There are three objects to which every effort must be bent:—

Economy—that we may be enabled to provide the Government with funds to do our part to win the war and to make provision for taxes which we shall undoubtedly be called upon to pay.

Production—that we may increase our exports and furnish more plentifully our home markets; and above all

Immigration—(which will bring about increased production so necessary to our well-being) to be promoted at all times and under all circumstances, more particularly of settlers who seek the land.

The Railway situation in Canada has been a matter of some anxiety to those connected with financial affairs. The Dominion Government has, as you are aware, appointed a Commission of capable and experienced men to thoroughly investigate the situation in respect of the newer transcontinental railways, and while I cannot, of course, anticipate the findings and recommendations of this Commission, I may be allowed to express the hope that neither Government ownership nor Government operation will ensue, either of which, I am convinced, would prove detrimental to the best interest of Canada.

And now, as my remarks draw to a close, I am tempted, contrary to my usual practice and unrestrained by the old

adage, "Never prophesy unless you know," to look into the future. The thoughts of many men are turned towards the problems that will confront us after the war. Government Commissions are dealing with them; the press devotes much space to their discussion; international conferences have met, but our first, obvious and imperative duty is to WIN THE WAR.

When that is done, new conditions will unquestionably supervene. It seems probable that for some months to come, orders for munitions and war supplies will continue to keep our industrial plants actively employed.

OUTLOOK FOR POST BELLUM PERIOD.

A temporary check in business generally may be looked for when peace is in sight, but I do not anticipate that any lengthened cessation of our commercial and industrial activities will immediately ensue. The period of reconstruction will probably not be accomplished for several months, and during this time Europe should provide a market for all we can produce, and new markets, perhaps, will be opened to us which we have never yet been able to reach.

These countries, however, will be "beating their swords into ploughshares," straining their energies to the conversion of munition plants into factories for the production of goods for both home and foreign trade in the effort to regain their former markets, to liquidate foreign debts and to recover the gold of which by necessity they may have been temporarily deprived.

When the rehabilitation has been effected, we in Canada must be prepared to meet in our own markets the keen competition of foreign goods. To cope successfully with the competition, expenditures on capital account should be avoided as far as possible, and resources conserved. Efficiency, efficiency, efficiency must be our watchword, conjoined with economy in all walks of life.

With regard to immigration I do not share the optimistic views of many of our friends as to the immediate outlook. That in time we will receive a large influx of new settlers there is no doubt, but for a period we shall be at a disadvantage owing to a deficiency of tonnage to carry them to our shores from Europe, and it is not improbable that Continental nations will, for the purpose of self-preservation, place an embargo on all emigration. Great Britain, for similar reasons, though she may not take such drastic measures in regard to her daughter nations, will no doubt discourage intending emigrants from leaving her shores. This I say without for a moment meaning that efforts to secure immigration should be in any way relaxed.

Canada is bearing up magnificently under the strain of this world-wide war, and her sacrifices will be amply repaid by the engendering of a spirit of self-reliance, and she will emerge, a comparatively little known country, to take her rightful position in the affairs of the nations.

The future, as I have said, is beset with new problems and is not entirely free from financial anxieties, but by a young people possessing great national spirit, a territorial Empire and unrivalled natural resources, the future can be looked forward to with hope and confidence.

THE GENERAL MANAGER'S ADDRESS.

Sir Frederick Williams-Taylor, the General Manager of the Bank, then made his annual address, as follows:—

Gentlemen:—In this, the twenty-ninth month of the war, it is my duty to present for your approval the ninety-ninth annual statement of the Bank of Montreal.

Also, it is my combined duty and privilege to explain the chief changes in the balance sheet now before you. First, however, let me comment briefly upon the factors that bear most importantly upon the future course of our affairs and that have influenced our banking position in the year under review.

The outstanding business feature in Canada is an industrial condition more abnormal in character than ever before in the history of this Bank, or of this country.

The same statement applies in a greater or lesser degree to several belligerent and neutral countries, but in Canada economic conditions as well are in an unnatural state. This is partly due to the war, also a result of suspended immigration and of a lengthy period of an extravagance of which we are now feeling the cumulative effect.

Canada sold her record crop of last year at high prices, as in the years of the American Civil War, while this year

we are disposing of a moderate crop at such steadily mounting prices that we again reap a golden harvest about equal in amount to that of 1915. The total value of last year's crop was \$799,000,000.

Our much criticized adverse trade balance has disappeared as though by magic, and our exports are now vastly in excess of our imports:—

	1914.	1915.	1916.
Exports for year ended 31st October	\$459,300,000	\$550,500,000	\$1,172,700,000
Imports for year ended 31st October	514,600,000	421,700,000	716,900,000
Total trade for year ended 31st October	\$973,900,000	\$972,200,000	\$1,889,600,000

Many of our great industries have converted big floating debts, a cause of anxiety, into cash surpluses. As a natural outcome, our stock markets are booming. Not only is unemployment unknown, but unskilled labor commands wages two and a half times greater than the pay of our volunteer citizen soldiers, who so splendidly risk their lives for their country, while men engaged in "factory piece work," can earn as much as a college professor. It is, therefore, not surprising that the unanalytical minded, or those preoccupied with their own affairs, or those who have not contributed in flesh and blood to the Cause, should complacently say "Times are good."

Among those who do not join in this refrain are the men and women of the salaried class and those with small fixed incomes. These have been hard hit by war prices and are indeed finding it difficult to make both ends meet.

The present buoyant industrial conditions are obviously the direct outcome of a steadily increasing demand by the Allies for food, clothing and other munition of war at rapidly rising prices, yielding large profits to the producers.

Payment for these war exports and for our surplus crops, coupled with loans of \$275,000,000 effected in New York since the outbreak of hostilities, have brought money into the country at a rate not only unprecedented, even in the days of our heavy borrowing in London, but so undreamed of that we can advantageously ponder on what might have been our condition had there been no war.

An American authority has said: "The war has saved the United States from a great industrial and financial calamity."

In many respects conditions in Canada are comparable with those in the United States. In two notable respects they differ. Our neighbors across the border are adding to their wealth at a pace without precedent in history, but, unlike the Dominion, unpunished by increasing national debt and loss of human life.

There is another side to this picture on which it is not well to dwell unduly, but which should be kept clearly before us. Post bellum conditions will surely weigh upon us more heavily or less heavily in proportion to our present indifference or our foresight, and in direct ratio to the steps we take to provide for inevitable problems and difficulties. Our agricultural production brings not only prosperity but stability; apart therefrom, though the cost of these alleged good times will not fall equally upon individuals. Canada as a whole will pay, and is paying already in hard cash, reflected in a formidable national debt and in a great public debt per capita. We are also paying in that most priceless of all treasures, the blood of the manhood of our country. So far the cost to us of the war is 14,000 lives plus 45,000 casualties, and in money \$354,000,000.

The transient nature of our increased exports alone is a simple index to a situation that commands the attention of all thinking people.

These views may not be acceptable to all, but they are commonsense and based upon arithmetical facts. To be forewarned is to be forearmed.

These are the main factors that have influenced and will influence the banking position—the movement in deposits and loans and the safety of both. Therefore, in my opinion, the business of this Bank should be conducted with such views plainly before us until the situation clears.

There are two obvious means of lightening Canada's coming burden—viz., thrift and immigration. The two are closely allied, for only by practising national and personal economy or thrift can we reduce our high cost of living—that

most effective barrier to immigration. Upon immigration we mainly depend for the fuller development of our unsurpassed natural resources.

Thrift is overdue but can be started forthwith; immigration must wait, but should follow in natural sequence. I have no words at my command with which to adequately urge the necessity of an organized and an individual effort to promote thrift.

The timely and eloquent "Call to Action" of our Minister of Trade and Commerce commands attention. I am not sure that it should not be preceded by a "Call to Reason," in order that the importance of the problems of the situation be impressed upon those who are living in, let us say, the paradise of the unwise.

Sane optimism and self-confidence are admirable national qualities and should be the order of the day. There is a point where optimism loses its value and the danger of over-confidence begins. That is the point for nations to avoid.

To sum up, we are going to win the just war we are waging, we are bound to win the war, but let us emerge from it unexhausted, in order that the victory over our enemies may be perpetuated and recurrence of such insensate destruction rendered impracticable.

With the advent of peace will come relief to our Empire, but to financial and trade conditions peace will bring a necessity for sudden readjustment, that in Canada, as elsewhere, must tax every resource to the utmost. I am satisfied that our banks stand prepared to meet these new conditions with the adaptability and strength that have made them the bulwark of the Canadian financial situation.

I now come to matters of detail.

LONDON.

Throughout the year under review, the trend of money rates in London has been steadily upwards, and, therefore, notwithstanding heavy income tax, the substantial reserves we carry at that reserve point have been employed with profit to ourselves, also with advantage to the Empire, as the chief securities in which we deal, either by way of loan or purchase, are British Government securities.

It is not out of place to mention here that this Bank is among the important and appreciated lenders of short money in the London market, and though it is not for us to take praise for this, yet the fact is not to be lost sight of when weighing Canada's assistance to the Empire in this war.

In this connection I may say that as a borrowing centre London remains closed to the Dominions except for such loans as our Government effect from the Imperial Government for war purposes. On the other hand, some of our Provincial Governments and several municipalities have repurchased largely their outstanding long-dated London loans and refunded them in New York, thus helping the sterling exchange situation. The obligant also has profited through reduction in capital debt.

The help that can in this way be rendered to Great Britain in maintaining the value of the pound sterling is in itself sufficient reason why all our public bodies with loans afloat in London should give this matter their loyal and early attention.

UNITED STATES.

With the exception of one brief season, both call and time money in New York have remained abundant and therefore cheap.

The call rate averaged 2.30 per cent. throughout the year, as compared with 2.39 per cent. the preceding year. It will be obvious to you that it is not very profitable to lend money at such rates, but our policy remains unchanged of carrying important reserves in New York, no matter what the earning power may be.

During the Bank's year, Canada borrowed in New York by way of public loans \$153,000,000. This sum includes the Dominion Government loan of \$75,000,000, borrowed naturally on terms dictated by the lender, terms that should have been better but might have been worse had our credit not stood so high. Of the latter sum \$25,000,000 was for refunding purposes.

In the previous year Canada borrowed in New York about \$142,000,000 and in 1914, \$25,000,000.

The interest on Canada's indebtedness abroad—mainly to Great Britain and the United States—now amounts to about \$175,000,000 a year.

It is worthy of special mention that since August, 1914, New York has loaned no less than \$2,000,000,000 to foreign countries, thus establishing itself in an important position among the great loaning centres of the world.

PROFITS.

As for our profits during the past year, I have little to add beyond what I have mentioned already, except to say that as usual the profits shown are actual net earnings, after making full allowance for doubtful debts and for the annual losses that seem inseparable from the business of banking.

DEPOSITS.

The range in Canadian Bank deposits has been as follows:—

31st October, 1914	\$180,800,000
31st October, 1915	1,240,300,000
31st October, 1916	1,531,800,000

In congratulating ourselves on this increase of \$388,000,000, it is well to remember that in these two years Canada borrowed in the United States the sum of \$270,000,000 that naturally went to swell Bank deposits.

Our own total deposits have increased \$63,000,000 during the year and are \$102,000,000 greater than in 1914, the figures being:—

31st October, 1914	\$197,200,000
31st October, 1915	236,000,000
31st October, 1916	299,200,000

The increase in our savings deposits has been satisfactory.

CIRCULATION.

Our notes in circulation are \$4,500,000 more than a year ago. This year's tax on our circulation, payable to the Dominion Government, amounts to \$160,000.

QUICK ASSETS.

The ratio of our quick assets to liabilities has increased to 75 per cent. from 64 per cent. a year ago and 55 per cent. the preceding year. This increased percentage is sound and wise in our opinion, owing to the fact that we carry large deposits of a special character.

CURRENT LOANS IN CANADA.

The diminution in our current loans in Canada is directly due to the remarkably ease in the financial position of industrial companies as a result of providing war supplies and munitions. Our current loan figures, exclusive of advances to Dominion Government, are as follows:—

31st October, 1914	\$108,800,000
31st October, 1915	99,100,000
31st October, 1916	87,800,000

Our loans to municipalities have varied as follows:—

31st October, 1914	\$ 9,000,000
31st October, 1915	11,200,000
31st October, 1916	11,300,000

Current loans of other Banks in Canada are about the same as last year, but \$25,400,000 less than in October, 1914.

The General Manager then presented his Supplemental Report.

The President then moved, seconded by Mr. R. B. Angus, that the report of the Directors, now read, be adopted and printed for distribution among the shareholders.

Mr. C. Campbell Nelles—"I have examined the statements that have been issued, and I feel that, apart from any formal vote of thanks that may be passed, a special expression of appreciation by an individual shareholder may not be out of place. It seems to me that the statement regarding liquid assets calls for special commendation and appreciation of the work of the Board, to whose efforts it is due that we have such a Statement as that produced to-day."

The President expressed the gratification of himself and the Board at the kind words of Mr. Nelles, and then put the motion to adopt the report, which was carried unanimously.

Mr. A. E. Ogilvie moved, seconded by Mr. D. Forbes Angus, that Messrs. James Hutchison, C.A.; J. Maxtone Graham, C.A., and George Creak, C.A., be appointed Auditors

of the Bank for the ensuing year, and that the remuneration be not more than \$15,000, to be divided equally between them (or to be otherwise divided as may be thought best), and that the ballot for the Auditors be taken at the same time as the ballot for the Directors is taken. This was unanimously adopted.

Mr. William Yuile moved, seconded by Mr. James Rodger, that the thanks of the meeting be presented to the President and Directors for their attention to the interests of the Bank.

Mr. Yuile—"Before this motion is put I would like to congratulate our President on the honor that has been bestowed upon him by our King, which we appreciate as an honor to our Bank as well as to our President, and which has been met with universal satisfaction not only by the shareholders, but by the general public." (Applause.)

"As to the statement, I am very glad to see that the Directors have carried out the injunction 'Safety First.' The increase in our liquid assets from 64 per cent. to 75 per cent. shows the prudence they have exercised during strenuous financial times. I especially congratulate them on the call loans which have been placed in Great Britain and the United States. These call loans placed outside the country are almost equal to gold in our vaults, and really better, because not only do we not have to pay the storage and cost of carrying that bullion, but we are getting some interest on the money, and can lay our hands upon it whenever it is needed. I therefore congratulate the Directors on continuing the policy they adopted some years ago." (Applause.)

Mr. James Rodger, in seconding the motion, said that during the past year many serious problems must have faced the Directors, upon whose proper solution depended not merely the prosperity of the Bank itself and its shareholders, but the prosperity of the City of Montreal and the commercial activities of Canada, and even the Dominion itself. The report presented showed that these problems had been courageously met and satisfactorily dealt with.

The motion was then carried, with applause.

Mr. C. B. Gordon moved that the thanks of the meeting be given to the General Manager, the Assistant General Manager, the Superintendents, the Inspectors, the Managers and other Officers of the Bank for their services during the past year.

In presenting the motion, Mr. Gordon said:—"While the Shareholders know that very much of the success of this institution depends upon the President and Directors, yet we appreciate that the affairs of a great bank such as this must be largely carried on by the staff. I know Sir Frederick Williams-Taylor gives such close attention to the affairs of the Bank that we get the very best service possible. In fact, the staff, all over the Dominion, gives a service so loyal and devoted that the best interests of the Bank are always served."

Mr. Gordon pointed out that during the past year the work had been heavier than usual, owing to so many employees being at the front. There were many others who wished to go to the war, but had to stay at home, because their services were more valuable to their country here. This was, he said, the true national service, which meant that the best fitted should stay at home. As the war progressed the need for this became more and more apparent.

The President—"Before putting the motion to the meeting, may I be allowed to say that any measure of success the Bank has achieved during the past year has been largely due to the untiring efforts of your General Manager, together with the assistance of a capable and hard-working staff?" (Applause.)

The motion was then seconded by Mr. C. R. Hosmer and unanimously adopted, with applause, and was responded to by the General Manager, Sir Frederick Williams-Taylor.

BOARD OF DIRECTORS.

The vacancies on the Board of Directors were filled by the appointment of Captain Herbert Molson, of Montreal, and Mr. Harold Kennedy, of Quebec, the new Board of Directors being as follows:—

D. Forbes Angus, R. B. Angus, A. Baumgarten, H. R. Drummond, C. B. Gordon, E. B. Greenshields, C. R. Hosmer, Harold Kennedy, Sir William Macdonald, Hon. Robt. Mackay, Wm. McMaster, Sir Vincent Meredith, Bart., Capt. Herbert Molson and Lord Shaughnessy, K.C.V.O.

The meeting then terminated.

At a subsequent meeting of the Directors, Sir Vincent Meredith, Bart., was re-elected President, and Mr. C. B. Gordon was elected to the office of Vice-President.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Quebec, Que.—The city has been given authority by the provincial legislature to borrow \$799,000.

Chatham, Ont.—Taxpayers are to vote on the proposed expenditure of \$45,000 on the local hydro system.

Laval des Rapides, Que.—The private bills committee of the legislative assembly gave authority to the municipality of Laval des Rapides to issue a loan of \$35,000 without sinking fund.

Ontario.—The following municipalities are interested in the Welland-Bridgeburg hydro radial: Townships—Crowland, Humberstone and Bertie. Villages—Humberstone, Port Colborne and Fort Erie. Towns—Welland and Bridgeburg.

Alberta.—The following school district bonds have been awarded: (1) Kern S.D., \$1,200, 6-years 7 per cent.; Waterloo S.D., \$600, 6-years 7 per cent.; Poplar Ridge S.D., \$300, 6-years 7 per cent., to Messrs. W. Ross Alger and Company, Edmonton, at 102.25.

(2) Fox Coulee S.D., \$1,000, 10-years 7 per cent., to Messrs. Kerr, Fleming and Company, Toronto, at 103.468.

(3) Cold Lake S.D., \$1,400, 10-years 7 per cent.; Chip Lake S.D., \$1,200, 10-years 7 per cent., to Messrs. Kerr, Fleming and Company, Toronto, at 103.116.

(4) Lyncot S.D., \$1,400, 20-years 7 per cent., to Messrs. Kerr, Fleming and Company, Toronto, at 106.333.

The \$1,600 issue of the St. Paul S.D., which was not taken up by the Alberta School Supply Company, was awarded to Messrs. Kerr, Fleming and Company, who were the second highest bidders.

Saskatchewan.—The following is a list of bonds reported sold:—

School Districts.—Oriole, \$1,300. Western School Supply Company, Regina; Springbrook, \$2,500. Regina Sinking Fund Trustees.

Rural Telephone Companies.—Camberley, \$14,000. Wood, Gundy and Company, Toronto; Kerrobert Northern, \$11,000. Nay and James, Regina; South Melaval, \$8,700. J. A. Thompson, Winnipeg; Stelcam, \$2,700. H. O'Hara and Company, Toronto; Lake Johnston, \$3,500. Regina Public School Sinking Fund; Dandy Rose, \$4,000. W. L. McKinnon and Company, Toronto; Garnock, \$3,300. W. L. McKinnon and Company, Toronto; Hubbard, \$2,000. W. L. McKinnon and Company, Toronto.

Towns.—Oxbow, \$16,000. W. L. McKinnon and Company, Toronto; Radville, \$6,500. W. L. McKinnon and Company, Toronto.

British Columbia.—The total assessment of the cities of British Columbia is given by Mr. R. Baird, provincial inspector of municipalities as \$410,512,724. This compares with \$460,724,889 in 1915, a reduction of nearly 19 per cent. Compared with 1915 the figures are:—

	1915.	1916.
Vancouver	\$224,202,883	\$214,358,910
Victoria	109,627,987	88,041,294
New Westminster	24,532,094	18,838,355
Prince Rupert	22,026,018	14,427,761
North Vancouver	19,016,035	15,787,090

Total assessments of the districts of the province have been cut from \$222,162,061 in 1915 to \$199,727,749. The principal reductions have been made in the following municipalities:—

	1915.	1916.
Burnaby	\$24,288,970	\$28,991,050
North Vancouver	12,927,390	10,866,971
Oak Bay	11,401,800	10,206,326
Point Grey	36,323,944	32,922,843
Saanich	24,100,160	22,075,980
South Vancouver	37,203,936	31,048,732

In the case of the cities, exemptions have been increased from \$32,365,678 to \$38,206,881, while in the districts they have been reduced from \$6,058,631 to \$5,054,535. Population figures are the same as in 1915.

Saskatchewan.—The following is a list of bond applications granted by the local government board:—

School Districts.—Picnic Lake, \$1,600. Secretary-treasurer, P. Price, Edam; Caithness, \$1,600. T. Roberts, Estu-

ary; Prairie Flower, \$1,000. M. S. Hesla, Lajord. All 10-years, not exceeding 8 per cent. annuity.

Rural Telephone Companies.—Round Plains, \$17,000, 15-years, not ex. 7 per cent. annuity. R. Beckett, Wynot; North Prairie, \$3,800, 15-years, not ex. 8 per cent. annuity. F. Strand, Preeceville; Raymore, \$500, 15-years, not ex. 8 per cent. annuity. H. E. Martin, Raymore; Coleville, \$12,000, 15-years, not ex. 8 per cent. annuity. A. G. Budger, Coleville; North Redvers, \$2,000, 15-years, not ex. 8 per cent. annuity. Alex. Coleman, Redvers.

Villages.—Bruno, \$1,800, 10-years, not ex. 8 per cent. instalment. B. Patterson, Bruno; Estuary, \$1,300, 10-years, not ex. 8 per cent. instalment. R. H. Street, Estuary; Estuary, \$500, 7-years, not ex. 7 per cent. instalment. R. H. Street, Estuary; Lawson, \$2,700, 15-years, not ex. 8 per cent. instalment. O. W. Juckes, Lawson.

BIDDING FOR BONDS

Halifax's bond issue was tendered for by bond houses from United States, Toronto, Montreal and maritime provinces. For other recent issues there has also been brisk bidding. Particulars of some of the purchases are given below:—

Halifax, N.S.—Mr. J. J. Hopewell received the following bids for the issue of debentures or stock, sufficient to produce at the price offered the sum of \$130,000.00, to be used by the city for the following purpose:—

To redeem consolidated fund debentures, 1880,	
due January 1st, 1917	\$183,000.00
Under chap. 51, acts 1905; chap. 84, acts 1909.	
Less provided by general sinking fund	53,000.00
	\$130,000.00

The first-named firm received the award.

R. M. Grant and Company, Boston	98.59
Emilius Jarvis and Company, Toronto	98.32
F. B. McCurdy and Company, Halifax	98.10
Eastern Securities Company, Halifax	98.02
Harris, Forbes and Company, Inc., Montreal	97.64
A. E. Ames and Company, Toronto	} 97.13
J. C. MacIntosh and Company, Halifax	
Brent, Noxon and Company, Toronto	97.86
For \$130,000—	
Nesbitt, Thompson and Company, Montreal	98.77
A. H. Martens and Company, Toronto	98.57
For either block—	
Nova Scotia Trust Company, Halifax	98.22
For \$135,000—	
R. C. Matthews and Company, Toronto	96.85

Thorold, Ont.—For \$36,000 6 per cent. 30-year bonds the following bids were received from Toronto houses by city treasurer D. J. C. Munro:—

Bank of Commerce	106
Canada Bond Corporation	105.46
R. C. Matthews and Company	105.10
Mulholland, Bird and Graham	105.03
Emilius Jarvis and Company	104.57
Royal Securities Corporation	104.56
Imperial Bank	104.53
A. E. Ames and Company	104.32
Wood, Gundy and Company	104.28
A. H. Martens and Company	104.06
Brent, Noxon and Company	103.69
G. A. Stimson and Company	103.03

Lindsay, Ont.—\$95,000 5 per cent. 10-year bonds were awarded to R. C. Matthews and Company, Toronto.

Bruce County, Ont.—\$42,000 5½ per cent. 10-year bonds were awarded to Messrs. Mulholland, Bird and Graham, Toronto. The tenders were:—

Mulholland, Bird and Graham, 100.99; W. A. Mackenzie and Company, 100.78; G. A. Stimson and Company, 100.77; Jarvis and Company, 100.77; Brent, Noxon and Company, 100.75; Royal Securities Corporation, 100.715; Imperial Bank, 100.68; C. H. Burgess and Company, 100.65; R. C. Matthews and Company, 100.65; A. H. Martens and Company, 100.60; A. E. Ames and Company, 100.53; R. A. Daly and Company, 100.40; Canada Bond Corporation, 100.38; Wood, Gundy and Company, 100.27; W. L. McKinnon and Company, 100.05.

RAILROAD EARNINGS

The following are the weekly earnings of Canada's transcontinental lines during November:—

Canadian Pacific Railway.

	1916.	1915.	Inc. or dec.
November 7	\$3,036,000	\$3,015,000	+ \$ 21,000
November 14	3,051,000	3,035,000	+ 16,000
November 21	2,984,000	2,960,000	+ 24,000
November 30	4,086,000	4,104,000	— 18,000
Total	\$13,157,000	\$13,114,000	+ \$ 61,000

Grand Trunk Railway.

November 7	\$1,244,959	\$ 986,765	+ \$258,194
November 14	1,283,901	971,715	+ 312,186
November 21	1,202,291	935,884	+ 266,407
November 30	1,612,562	1,296,507	+ 315,995
Total	\$5,343,653	\$4,080,871	+ \$1,252,782

Canadian Northern Railway.

November 7	\$ 885,000	\$ 806,500	+ \$ 78,500
November 14	825,100	820,800	+ 4,300
November 21	853,000	768,900	+ 84,100
November 30	1,159,200	1,139,000	+ 20,200
Total	\$3,722,300	\$3,534,200	+ \$188,100

The following is the Canadian Pacific Railway's comparative statement for October, 1916:—

	1916.	1915.	Change.
Gross	\$13,237,086	\$13,443,214	— \$206,128
Expenses	7,562,346	6,863,780	+ 698,566
Net	5,674,739	6,579,434	— 904,695

The Grand Trunk Railway's October figures are as follow:—

Gross	\$4,618,000
Expenses	3,269,883

Net for October, 1916	\$1,348,117
Net for October, 1915	1,063,805

Increase	\$ 284,312
--------------------	------------

The Canadian Northern Railway system's earnings and expenses for October were as follow:—

	1916.	1915.	Inc. or dec.
Total gross earnings. \$	3,716,800	3,678,500	+ \$ 38,300
Operating expenses ..	2,496,500	2,421,500	+ 75,000
Net earnings	1,220,300	1,257,000	— 36,700
Aggregate gross earnings from July 1st.	14,423,800	10,380,800	+ 4,043,000
Aggregate net earnings from July 1st.	4,222,300	3,111,000	+ 1,111,300

Minneapolis, St. Paul and Sault Ste. Marie Railway's October comparative statement is as follow:—

	1916.	1915.
Operating revenue	\$1,185,387	\$1,016,817
Total expenses	700,647	627,305
Operating income	484,740	389,512
Percentage of expense to revenue.	54.5	56.4

PAPER MILL FOR WINNIPEG

A paper mill for Winnipeg is a proposal backed by Mr. J. D. McArthur, lumberman and railroad builder.

The intention is to build a mill and install a plant capable of turning out, at the commencement, 50 tons of paper a day. There are great areas of material in northern Manitoba. The raw material can be brought to the city by barges on the Red River from the Winnipeg River and Lake Winnipeg districts, making the cost of hauling much lower than many other mills have to face.

ROYAL BANK'S NEW BRANCH

The Royal Bank of Canada has just opened a branch in the Imperial Oil Building, corner of Church and Court Streets, Toronto. The bank occupies practically the whole of the ground floor and has very handsome and useful premises. This new branch commences business with many good accounts, which are expected to increase in number in a comparatively short time.

Mr. W. F. Brock, a capable and well-known banker, is in charge of this branch of the Royal Bank.

BANK OF MONTREAL WINS

A cable message from London on Wednesday said: The Court of Appeal to-day rendered a unanimous judgment in favor of the Bank of Montreal, with costs, in the now famous Banbury case, on the ground that Mr. Galletley, the bank's branch manager at Victoria, B.C., had no authority to bind the bank, and was not in duty bound to give advice to a customer. No negligence whatever was shown on the part of the bank.

The decision is considered here a most important one, as it reverses the findings of two jury trials in the lower courts, and further establishes the basis of relation between banker and client.

BELIEVES IN BUSINESS AND INCOME INSURANCE

Mr. H. T. Dunn, of Toledo, a vice-president of the Willys-Overland Company, and president of the Fisk Rubber Company, has taken out life insurance for a little more than \$1,750,000.

Part of the insurance is made out in favor of the companies with which Mr. Dunn is connected. The rest is income insurance for his wife and daughter, paying them hand-some annuities after his death.

Mr. Dunn is 41 years old, and five physicians who examined him pronounced him an excellent risk. The policies were issued by 12 companies, the largest risk assumed by any one company being in the neighborhood of \$250,000.

Mr. Richard P. Gough, managing director of the Sellers-Gough Fur Company, Limited, has been elected a director of the Home Bank of Canada.

We Own and Offer

Anglo-French War Loan Bonds Yielding about **6 $\frac{3}{4}$ %**

Due October 15, 1920—Interest Payable April 15, October 15.

Denominations \$100, \$500, \$1,000.

These Bonds are issued jointly and are an obligation on the entire United Kingdom of Great Britain and Ireland, and the French Republic. Both principal and interest are free from any present or future British or French taxes.

Bonds delivered free of charges to any point in Canada.

Special Circular Sent on Request.

MacDONALD, BULLOCK & COMPANY

PERSONAL NOTES

Mr. Malcolm C. Oswald is now sole partner of the firm of Oswald Brothers, Montreal. Lieutenant F. F. Archbold died from wounds in England in October.

Lieutenant-Colonel C. W. Rowley, the well-known Winnipeg banker, has been selected as esquire of the Order of the Hospital of St. John of Jerusalem in England.

Mr. Frank McPhillips has been appointed president of the Dominion Permanent Loan Company, and Hon. Thomas W. McGarry, Ontario provincial treasurer, vice-president, to fill the offices made vacant by the death of Hon. J. R. Stratton and Mr. D. W. Karn.

Premier H. C. Brewster, of British Columbia, has chosen his cabinet as follows: Attorney-general, Hon. M. A. MacDonald; minister of railways and agriculture, Hon. John Oliver; minister of finance, Hon. Ralph Smith; minister of lands, Hon. E. D. Patullo; minister of mines, Hon. Wm. Sloan; provincial secretary and minister of education, Hon. J. D. MacLean; minister of public works, Hon. J. H. King.

Lieutenant-Colonel Ballantyne, vice-president and managing director of Sherwin-Williams Company of Canada, has been granted leave of absence in order to take up military duties. Messrs. H. M. Ashby and Geo. A. Martin, of the staff of the company, have been added to the board of directors, replacing Sir Inigo Thomas and Mr. J. W. Carson, who will devote their time to the British subsidiary, Messrs. Lewis Berger and Sons.

Mr. G. H. Hodgetts, recently appointed accountant of the Toronto branch of the Bank of Hamilton, has been appointed assistant manager at that branch. Mr. J. F. H. Barr has been appointed manager at West Toronto, succeeding Mr. W. W. McGillivray, the latter being appointed an inspector. Mr. F. M. Robinson, recently manager at Owen Sound, has been appointed manager at Dundas, succeeding Mr. C. W. Niblett, the latter being appointed manager at Owen Sound in place of Mr. Robinson. Mr. W. H. Leck has been appointed manager at Norwood, succeeding Mr. A. E. Conron.

Sir Thomas White, interviewed by the London Times regarding Canada's financial position, said it was exceptionally strong. He had believed from the beginning that the war would be of long duration, and the financial policy adopted was to face a higher interest rate and make long-term issues rather than to rely on short-date borrowings. This materially helped in making Canada's loans successful, because of the speculative element of probable appreciation after the war. He anticipated a favorable balance of 400 million dollars in the present year.

Hon. A. E. Kemp, Canada's new minister of militia, is a native of Quebec, having been born at Clarenceville in 1858. He has had a successful career as a manufacturer in Toronto, and was for two years—1895 and 1896—president of the Canadian Manufacturers' Association. Three years later he was elected president of the Toronto board of trade, an office which he held for two years. In 1898 he went as a delegate to the British Association at its annual meeting in Bristol, and in 1900 as a delegate to the fourth congress of chambers of commerce of the empire in London.

Mr. George Burn, general manager of the Bank of Ottawa, has retired after 37 years' service in the bank. Owing to ill-health Mr. Burn recently relinquished the position of president of the Canadian Bankers' Association. Mr. Burn came to Canada after Scottish banking experience in 1866. He is well known in Canadian banking circles and his opinions are much respected by fellow bankers. The Bank of Ottawa's paid-up capital, which was \$575,796 when Mr. Burn joined the institution, has grown to \$4,000,000, and the rest account to \$4,750,000. Mr. Burn is to be elected to the directorate of the bank at the annual meeting of the shareholders to be held on December 20.

Mr. Samuel Tovel Bastedo, superintendent of Canadian government annuities, is of United Empire Loyalist stock. He is the son of Captain D. T. Bastedo and was born at Hamilton, Ont. Mr. Bastedo was educated in the schools of the county of Oxford. He was for 27 years an official in the Ontario civil service, 16 years as private secretary to the late Sir Oliver Mowat, two years as private secretary to the late

Hon. Arthur S. Hardy, and seven years as deputy commissioner of fisheries. He was appointed a commissioner in January, 1908, by the Dominion government to negotiate with the different provinces for the relinquishment of their fishery rights. When engaged in this work he was recommended by the Dominion government to Ambassador Bryce as British commissioner under the International Fisheries Treaty between the United States and Great Britain, Professor David Starr Jordan being the United States representative, the duties to run concurrently. After being engaged upon these duties for over a month, he received at Westminster, B.C., a telegram from Sir Richard Cartwright that he had appointed him superintendent of annuities, Mr. Bastedo having for one year—from August, 1906, to August, 1907—been Ontario manager at Toronto for the Annuities Company of Canada, which had its head office in Winnipeg. (This company withdrew from the field of insurance upon the announcement being made that the Canadian government was going to sell annuities.)

Mr. H. H. Stevens, M.P., of Vancouver, who recently visited Ottawa in regard to the removal of obstacles to the progress of shipbuilding in British Columbia, has returned to his province well satisfied with the government's action in this matter. Mr. Stevens is one of our best known Pacific Coast citizens. He is active and throws his time, thought and energy into anything he undertakes. He is one of the many Englishmen in Canada who have achieved a full measure of success. Born in Bristol, England, he came to Canada with his parents when a young boy, his public school and commercial education being acquired in Peterborough, Ontario. He has now been in British Columbia for 22 years. First working as a clerk in a general store, he later became accountant and business manager of a large retail grocery in Vancouver. In 1906 he was chief accountant and secretary of a large trust company, later opening offices as auditor and financial broker. Mr. Stevens was elected a member of the Vancouver city council both in 1910 and 1911. As chairman of the board of health he originated a huge trunk sewerage scheme for Greater Vancouver District, which was perfected by Mr. R. S. Lea, the famous sanitary engineer of Montreal. This work is now almost completed. He was elected to the federal house of commons in 1911 by 3,256 majority. To judge his work by what his friends concede he has secured for his constituency, there is this list: Large dredging operation of harbor, \$2,000,000; wharf; grain elevator, with capacity of 1,300,000 bushels and costing \$700,000; appointment of harbor commission. He was also largely responsible for the scheme of terminal railway and wharfage extension to cost \$5,000,000 to \$7,000,000 and secured a subsidy for dry dock to cost \$5,500,000; and worked for the extension of postal facilities and construction of postal stations. At present he is engaged in a controversy with the Canadian Pacific Railway in an endeavor to release the port of Vancouver from railroad control and bring it under the control of the harbor board.

STONY INDIANS SHOCKED GRAIN

Thousands of Acres, Too — Some Interesting Farm Narratives of Alberta

[The following article is contributed to *The Monetary Times* by Mr. Wm. Toole, president of the Mortgage Loans Association of Alberta. He is Southern Alberta manager of the investment department of the Canada Life Assurance Company and head of the firm of Toole, Peet and Company, Calgary. Mr. Toole went to Winnipeg in 1889 and joined the Canadian Pacific Railway land department in 1890, remaining with that company until 1905, when he organized his present Calgary firm. He went to that city for the Canadian Pacific Railway as land inspector for the province of Alberta in 1893, and a couple of years later was appointed district land agent for that company for Alberta. He has been in that province ever since. Mr. Toole has had exceptional opportunities for acquiring an intimate knowledge of Western Canada and its agricultural possibilities, and, as he says: "I hope I will never have to leave it."—Editor, *The Monetary Times*.]

Sentiment and Facts.

Many persons talk and write about the province of Alberta as a great cattle and horse ranching territory, "nestling," as they say, "in the valleys of the foothills in the shade of the snow-peaked Rocky Mountains, etc." This is perfectly true, but it is apt to create the impression that our resources are limited to ranching, which, in this country, applies to cattle and horse-raising. Our province enjoys almost unbelievable advantages from its proximity to the mountains. Our timber, mineral and coal areas are very large, and as yet only partially surveyed. The province is well supplied with lakes and rivers, which abound with fish, and the natural facilities for irrigating large areas from the mountain-fed streams flowing eastward through the fertile plains provide the largest irrigation areas on the continent of America. Up to the present they are developed to the extent of providing water at the low rate of 50 cents per acre per annum for hundreds of thousands of acres.

Our climatic conditions are certainly, in my opinion, superior to any other part of the world in which it has been my privilege to live, and their suitability to the raising of a healthy race can be best judged by the fine, clear, sturdy appearance of the people. So far as stock and grain production is concerned, our reports are the best evidence. Last year we raised some 60,000,000 bushels of wheat, the spring wheat averaging 35.93 bushels per acre, and the winter wheat, or "Alberta Red," to which I have already referred, 39.37 bushels per acre. This year—1916—our estimated wheat yield is 41,500,000 bushels, the spring wheat averaging 28 bushels and the winter wheat 30 bushels per acre.

Amateur and Experienced Farmers.

In considering grain yields, and every agricultural return, in a new country, the fact that there are so many inexperienced people starting and playing at farming should be taken into consideration. If the average yield for the province of the experienced farmers were published it would be pretty nearly as attractive as the yields on the two 1,000-acre fields to which I have referred. It should also be remembered when reading returns and statistics of a province so very large that its diversified topographical features influence climatic and atmospheric disturbances, which, some years, have a depreciating effect on general averages.

When all is said and done, it is the citizens who make a country, and Alberta has been magnificently endowed in that respect. During the last two years we have raised the largest quantity of agricultural products in our history; and it is estimated that there is an increase of 25 per cent. in our summer fallowed lands ready for cropping next spring. That accomplishment would have merited no comment had the province at the same time not made the glorious record of sending a larger percentage of soldiers to fight for the noble cause of the British Empire and her Allies than any other province in the Dominion of Canada, and to their additional credit it must be said they have already proven themselves capable of holding their own and doing an equal "bit" with soldiers from any other part of the Empire.

It is true that good Providence has caused our fertile lands to send forth unprecedented yields, but the men and women, and even the boys and girls of our province, are entitled to admiration for their unceasing energy. It was no uncommon sight to see Alberta women and girls driving

four and five-horse teams in the varying pursuits of farm life during last season, and the farmers' wives and daughters were particularly noticeable in the harvest season taking the place of the good men who had gone forth to fight for our country and the protection of the women and children. No part of Canada realizes more seriously than Alberta that the women and children must be protected against the enemy's horrible atrocities of the past two years, and, as evidenced by the voluntary enlistment returns, the men have gone forward, not in hundreds, but in thousands, from this province, and are erecting everlasting monuments on the battlefields in France and Belgium.

Large Stock Rancher.

I could instance many interesting narratives in connection with farming in Alberta to show the tremendous accomplishments by our comparatively small but rapidly increasing population. Last year, I was chatting with Mr. Lane during the harvest season, and asked him how the cutting was progressing. He said he had forty-two binders working that day. That immediately interested me, coming from Mr. George Lane, best known as one of Canada's largest and most successful cattle ranchers. Think of it! George Lane requiring such an outfit to harvest grain on the very plateau lands that only a few years ago the ranchers were endeavoring to advertise as no good for anything but cattle and horse-raising.

It is only fair to state, however, that Mr. Lane was not one of the selfish decryers of the productiveness of the country. He kept on working, increasing his holdings and sowing seeds of various varieties, animal and cereal, always intermingling the good seeds of kindness and encouragement and faith in the country.

To-day, he is not only one of Canada's largest stock ranchers, but has the proud distinction of owning a "bunch" not once but twice as large as any other Percheron breeder in the world of registered Percheron horses. He uses five of these fast-stepping horses under each binder. They average twenty miles, cutting twenty acres per binder per day, which means that George Lane in the harvest season of 1915 was cutting a swath of wheat six to eight feet wide, equal to 840 miles per day, the distance between Calgary and Winnipeg.

How the Indians Helped.

This year, on account of shortage of labor in Alberta, and so many of Mr. Lane's men having enlisted, he was unable to keep so many binders going, but he nevertheless managed to harvest and thresh hundreds of thousands of bushels of wheat and other grains. He could not find labor for stooking, but the ever-resourceful George thought of the Stony Indians, and, as he says, with the kindly influence of the Rev. John McDougall, they were able to persuade Alberta's native ladies of the emergency of the situation, and, like their white sisters, they decided to help in garnering the precious golden grain. They arrived at the farm at Pekisko and Willow Creek in large numbers, discarded their furs and fine feathers, and, with the assistance of their children, the squaws of the famous Stony Indians shocked the grain, not hundreds, but thousands of acres. Mr. Lane believes Alberta is destined to be as fine a hog-raising country as any part of America. He will ship between 2,500 and 3,000 pigs this winter. The development of the hog industry in Alberta during the past few years has been most marked, and its influence in the more prompt payment of interest by the smaller farmers has also been very noticeable.

A country's greatness and responsibility is, after all, judged, first, by the integrity, energy and ability of its people, and then by its natural productiveness. There is absolutely no doubt about the natural or material endowments of Alberta, and I firmly believe that our citizens, who have shown themselves to be so patriotic, unselfish and resourceful in the sad and trying period through which we are gradually emerging can be relied upon with the fullest confidence to meet their interest obligations and take proper care of the funds entrusted to their stewardship.

The Bank of Toronto has opened a branch at Sibbald, Alberta, under the management of Mr. James Murray, formerly manager at Kipling, Sask., branch. Mr. James Maguire, manager at Colonsay, Sask., has been transferred to the Kipling branch and Mr. Barry I. Meyer, the accountant at Colonsay, is made manager at that point.

County of Simcoe Guaranteed

ISSUED BY

Town of Orillia

5½% Bonds.

Due 1st July, 1917, to 1946.

While issued by the Town of Orillia, these bonds are guaranteed absolutely, both as to principal and interest, by the County of Simcoe, and really rank as county securities.

The Bonds are issued in such form that it is possible to obtain a permanent investment for any desired period during the next thirty years for either a small or large amount.

CONTROL OF MUNICIPAL EXPENDITURES

Working of Alberta's Legislation Analyzed—Value of Local Government Board

The powers of Alberta municipalities are derived from the provincial legislature, in the case of cities by the provisions of the charters granted to these cities; and it is well known that these are not necessarily uniform. In this connection a model charter for all cities in the province is at present under consideration of the minister of municipal affairs, being of the nature of a consolidation of the different individual city charters in operation in Alberta by including in the new charter all such clauses as these cities may have in common, with options so as to render it elastic enough to meet local conditions. This is a step in the right direction, said Mr. D. Mitchell, assistant city comptroller of Edmonton, in an address before the Union of Alberta Municipalities.

Continuing, Mr. Mitchell said: Uniform charters are not necessarily a guarantee in themselves of uniform efficiency. The principle is already sanctioned in regard to uniform statutes regulating local improvement councils, rural municipalities, villages and towns, while cities continue to operate, as stated, under special charters. It is gratifying to note that in the direction of a uniform system of accounting for the province progress is being steadily made. The benefits accruing from such a system, if designed according to the most approved grouping and distribution of accounts, will be at once apparent whenever anyone attempts to institute comparisons of the financial standing of the various municipalities of similar importance.

Control of Borrowing Powers.

In terms of the act constituting the board of public utilities it is enacted (Sec. 88): "When a local authority desires to provide for the raising of a loan by way of debenture or upon the security of stock for the purpose of any work or undertaking, the acquisition of property or any other object within its jurisdiction, application shall be made to the board for permission to do so." This certainly is a provision which, indirectly, is one of the most effective means of control of expenditures (capital expenditures) at present in force. It is effective, because in order to spend the money we must first have the authoritative sanction to raise it.

For Average Lifetime of Assets.

There are certain limits imposed by statute upon the borrowing powers of municipalities. These are defined in the case of cities by their charters, and by the town act as regards the towns. In the former, for example, in the city of Edmonton, the amount of bonded debt of the city at any time outstanding shall not exceed 20 per cent. of the total amount of the assessment in respect of lands and special franchises, according to the last revised assessment roll. The town act similarly prescribes that contracting of long-term debts shall not exceed 20 per cent. of the rateable property of the town. Bonds are also not to be issued for a longer term than forty years in any case, and it is directly in the interest of every municipality that the period for repayment of such loans should not be greater than the average lifetime of the asset as far as possible. For example, in the instance of a municipality borrowing for the purpose of the erection and installation of an electric light plant for a small town, the following might be assumed as the basis of arriving at the proper period for repayment:—

	Cost.	Term.	
Land	\$ 1,000.00	40 years	\$ 40,000.00
Buildings	3,500.00	15 "	52,500.00
Machinery	10,000.00	10 "	100,000.00
Pole line	5,000.00	20 "	100,000.00
Meters, etc.	1,000.00	12 "	12,000.00
	\$20,500.00	Divided into	\$304,500.00

would show the average lifetime to be 14.85, or, say, 15 years. Now, it would appear to be too extended a period to provide for repayment in this case, certainly at anything over twenty years at the most; 15 years would be the ideal term.

This is where the benefits of the work of a local government board are demonstrated, by restricting the duration of the loan to a period for redemption which will approximate as nearly as possible to the actual or estimated lifetime of the asset. The board thus exercises a salutary restraint

on too ambitious or optimistic drafts on the future by appraising the needs of a community and its financial ability to undertake future obligations. There is little doubt that had such a restraining hand been laid in earlier times on towns, possibly many liabilities lightly undertaken would never have been permitted. Of similar importance are the provisions of the Town Act, sections 190 and 193, which refer to submission of bond by-laws to the minister of municipal affairs, under which a town may apply to the minister for a certificate approving the by law, and which certificate is to be according to following tenor:—

(1) "In terms of the Town Act, the Minister of Municipal Affairs hereby certifies that the within by-law is valid and binding, and that its validity is not open to question in any court on any ground whatever."

Grading Bond Issues.

The provisions of these various sections, including the countersigning of bonds by the minister issued under such approved by-laws, effectually dispose of those objections and legal technicalities which have been a source of annoyance to local authorities when negotiating the sale of their bonds in former years. Such arrangements naturally suggest a further step which might be worthy of consideration, namely, would it not be possible to institute a method of grading municipal debenture issues by which these might be classified as of Grade or Class A, or Class B or C, according to the financial status of the town concerned, so that the anomalous situation, which so frequently arises of one municipality selling at one price for a given grade of bond, and another at a better or worse price for a similar class, would be avoided? In other words, the government controls the municipal units, either directly by specific enactment, or by power of veto placed in the hands of the electorate or citizens by their public acts; while the municipal councils, by the exercise of their authority and control, regulate the administrative machinery under their direction.

A clear conception of the duties and responsibilities relating to the respective classes of control is of prime importance; and it may be stated as an infallible rule that the acts of councils must have constant reference to their vesting or originating authority, otherwise their proceedings inevitably become *ultra vires*. No council can confer an authority which it does not itself possess, and no executive appointee may exceed the scope of his commission as an officer. In no other career may a person be guilty of negligence, or even gross violation of the functions of office, probably involving pecuniary loss to the community, and evade the responsibility so readily as in the municipal. Loans for temporary or current purposes are prescribed by the terms of the city charter or town act, as the case may be, there being a restriction usually that in the former these may not exceed 80 per cent. of the estimated amount of taxes for municipal or school purposes, or of 75 per cent. in the case of towns.

WESTERN FARMERS' MERGER

Organizations in Manitoba, Alberta and Saskatchewan are Likely to Combine

The question of amalgamation of the Grain Growers' Grain Company, Limited, and the Alberta Farmers' Co-operative Elevator Company was the principal question for consideration at the annual meeting of the former company. The proposed plan of amalgamation has been accepted with unanimity both by the Alberta company and the Grain Growers' Grain Company. At the meeting some shareholders talked along the line of a form of federation that would make it unnecessary for the various units comprising the farmers' companies and associations to lose their identity. Some suggested laying the matter over for another year. The consensus of opinion, however, of the shareholders was in favor of co-operating along the lines suggested by the directors, and the vote, *The Monetary Times* is told, was practically unanimous.

The Saskatchewan Co-operative Elevator Company may also merge with the other two companies. The combination will be known as the United Grain Growers Company, Limited, with a capital stock of \$5,000,000.

Capital of Three Companies.

The three companies have stock as follows:—

	Authorized.	Subscribed.	Paid up.
Grain Growers' Grain Company, Winnipeg...	\$2,000,000	\$1,440,166	\$1,073,179
Alberta Farmers' Co-operative Elevator Company, Edmonton.....	1,000,000		301,737
Saskatchewan Co-operative Elevator Company, Regina	2,500,000	2,358,900	627,342

The companies obtain their revenue from grain elevation, storage, screening, etc., the handling of live stock, machinery, binder twine, coal, and other lines. Last year's income and profits from these sources were as follow:—

	Income.	Expenses.	Profits.
Grain Growers' Grain Company	\$1,566,452	\$994,997	\$571,455
Alberta Farmers' Co-operative Elevator Company	843,426	560,942	282,484
Saskatchewan Co-operative Elevator Company			757,275

The Grain Growers' Grain Company paid a dividend of 10 per cent. for the year. The Alberta Co-operative Farmers' Company and the Saskatchewan Co-operative Elevator Company each paid a dividend of 8 per cent.

Various Lines Handled.

The amount of grain and other products handled by the three organizations of western farmers are as follow:—

	Bushels of grain.
Grain Growers' Grain Company	48,375,420
Alberta Farmers' Co-operative Elevator Company	19,320,556
Saskatchewan Co-operative Elevator Company	43,198,000

For the year ended August 31st, 1915, exclusive of machinery, the total volume of sales of the Grain Growers' Grain Company, Winnipeg, amounted to over \$1,062,393, or an increase of slightly over 84 per cent. This was made up as follows: flour, \$54,309.53; woven wire, \$52,290.88; lumber, \$121,485.03; posts, \$15,165.34; builders' supplies, \$13,714.68; coal, \$60,067.49; oil, \$477.85; apples, \$39,227.40; barbed wire, \$49,038.36; twine, \$648,905.47; miscellaneous produce and supplies, \$7,711.45.

Under the item of builders' supplies was included: cement, plaster, sash and doors, builders' hardware, paper and such articles. And under the item of miscellaneous produce and supplies is included: galvanized sheet metal goods, such as roofing, shingles and siding, ventilators, well curbing, culverts, shipping drums for oil, etc. Of these articles, the largest item is binder twine, the total amount handled for the 1915 season amounting to 6,750,000 pounds as against 2,395,000 pounds for the year previous. The total profits of this department, exclusive of machinery, after paying all

expenses of management and operation, was, in 1915, \$21,921.

During the past year the Alberta company handled 36,224 hogs, 7,659 sheep and 36,244 cattle, also 1,002 cars of supplies, divided as follows: flour and feed, 164; twine, 133; coal, 370; posts, 204; hay, 30; lumber and building material, 42; salt, 7; fruit, 20; wood, 9; wire, 23.

EXPORTERS NEED GOOD LINGUISTS

Lord Shaughnessy's remarks on the need for more study of foreign languages are supported by an article in the British Export Gazette, which urges the fullest possible use of the Italian language, alike in catalogues, price lists, correspondence and as a sine qua non equipment of commercial travellers. "Italians are excusably proud of their beautiful tongue, and if, as buyers, they prefer to do business in their native language, it is only right and proper that the seller should adapt himself accordingly." Italian is an easy language to learn, and its acquisition should be encouraged among the junior members of the staffs of exporters.

Another appeal in the matter of studying foreign languages comes from Mr. J. Picton Bagge, acting British consul at Odessa. Exporters should, he says, either go out to Russia themselves or at least send capable representatives to study the market and its requirements and get acquainted with Russian merchants, and he adds: "They should also make arrangements to send out after the war younger men to represent them. As it is probable that not many men can be found at the present time with an adequate knowledge of Russian, it would be well to send such as have some knowledge of other European languages. It is suggested that exporters, if unable to effect arrangements for placing these young men in Russian offices, would find it profitable to send them out to Russia and maintain them there for some months while learning the language. The supply of British subjects who at present know Russian is very limited, and it stands to reason that, however honest a Russian merchant may be, he cannot have the same interest as the British merchant in furthering the interests of British trade as opposed to that of other nations."

GRAIN GROWERS' RESULTS

Good results were obtained last year by the various farmers' grain companies in the western provinces. The Grain Growers' Grain Company, Limited, of Winnipeg, made profits amounting to \$571,455. The company's satisfactory results for the past two years compare as follow:—

	1916.	1915.
Income, grain and merchandise account	\$1,566,452	\$880,436
Operating expenses	994,997	650,649
Balance	\$ 571,455	\$229,786
Stock account, etc.	+ 1,349	— 2,823
	\$572,804	\$226,963

The company's assets aggregate \$2,939,824, of which the sum of \$565,542 represents funds in bank and on hand, an exceptionally strong feature, and one in which the company may well take pride. In 1915, this item was only \$2,956. Among the liabilities are provision for war tax, \$104,381; profit and loss account, \$150,763; reserve, \$600,000; provision for 10 per cent. dividend, \$100,500.

Since its inception the company has handled 205,018,324 bushels of grain. Last year's receipts were 48,375,420 bushels.

The company's balance sheet reflects a strong position, good management and direction.

The Grain Growers' Export Company, a subsidiary concern, made a profit of \$196,000. The Grain Growers' British Columbia Agency, a subsidiary company at New Westminster, had operated at a loss for the year, but at a profit for the past six months. The co-operative supply department made a small profit, handling machinery, twine, etc., to the value of more than \$1,250,000. More than 600 cars of live stock were handled.

The Bank of Hamilton has opened a branch at Brant, Alta., under the management of Mr. D. Towers.

LEGAL NOTICES

THE L. D. CAULK COMPANY OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 20th day of November, 1916, incorporating Arthur Fry, secretary; Mary Little, bookkeeper; Jacob Dean Musselman, manager; Ralph McLean, student-at-law, and John Charles McKay MacBeth, barrister-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell and deal in goods, wares and merchandise of all kinds; (b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To apply for, purchase or otherwise acquire any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (d) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (e) To enter into any arrangements with any authorities, government or supreme, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with or surrender any such arrangements, rights, privileges, concessions and franchises; (f) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors or associates in business) or the dependents or connections of such persons, and to grant annuities, pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (g) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (h) To purchase, take in lease or in exchange, hire or otherwise acquire, any real personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business or capable of being profitably dealt with in connection with any of the company's properties or rights, for the time being, and in particular any machinery, plant, stock-in-trade; (i) To construct, improve, maintain, work, manage, carry out or control any roads, ways, branches or sidings, bridges, reservoirs, watercourses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, working management or control thereof; (j) To aid in any manner any corporation any of whose shares of capital stock, bonds, debentures or other obligations are held or in any manner guaranteed by this company, and to do any act or things for the preservation and protection, improvement and enhancement of the value of any such shares of capital stock, bonds, debentures or other obligations, and to any and all acts tending to increase the value of any of the property at any time held or controlled by this company; (k) To purchase, take or acquire by original subscription or otherwise, and to hold, and, with or without guarantee, to sell or otherwise dispose of shares, stock, whether common or preferred, debentures, bonds, and other obligations in and of any other company, and to pay for such shares, stocks, debentures, bonds and other obligations either in cash or partly in cash, or to issue shares of this company fully paid up or partly paid up in payment, and notwithstanding the provisions of section 44 of the said Act to use the funds of the company in the purchase of shares, stock, debentures, bonds and obligations in and of any such other company, and to vote on all shares so held through such agent or agents as the directors may appoint; (l) To remunerate any person for services rendered to the company, in such manner as the company may deem expedient, and more particularly with the approval of the shareholders by the issue and allotment of shares, bonds or other securities of the company, wholly or partly paid up, but nothing in this clause contained shall be deemed to limit the power of the directors to fix and pay the salary of any and all officers, servants, agents and employees of the company; (m) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable and transferable instruments; (n) To lend money to customers and others having dealings with the company and to take security for the loan of such money; to guarantee the performance of the contractual and other obligations of any such persons and to give any guarantee or indemnity as may seem expedient; (o) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (p) To pay out of the funds of the company all expenses of or incidental to the

formation, registration and advertising of the company, or in or about the promotion of this company or the conduct of the business; (q) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (r) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with others, and either by or through agents, sub-contractors, trustees or otherwise; (s) To do all such other things as are incidental or conducive to the attainment of any one or more of the above objects, and so that the objects specified in each paragraph of the clause shall, except when otherwise expressed in such paragraph, be in no wise limited or restricted by reference to or inference from the terms of any other paragraph or to or from the name of the company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere, by the name of "The L. D. Caulk Company of Canada, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 22nd day of November, 1916.

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of one and one-half per cent. (1½%) on the Common Stock of the Dominion Textile Company, Limited, has been declared for the quarter ending 31st December, 1916, payable January 2nd, 1917, to shareholders of record December 15th, 1916.

By order of the Board.

JAS. H. WEBB,
Secretary-Treasurer.

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of February, 1917, for the right to cut pulpwood and pine timber on a certain area situated on the Black Sturgeon River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure, for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honourable the Treasurer of the Province of Ontario, for ten thousand dollars (\$10,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$10,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,
Minister of Lands, Forests and Mines.
Toronto, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

TREASURY NOTES WERE NEEDED SECURITY

Mr. Frank A. Vanderlip, president of the National City Bank, in an interview said that, far from acting as a stabilizing influence on finance in the United States, he believed that the recent action of the federal reserve board in advising against the purchase in the United States of short-term treasury notes of the Allies would operate in the opposite direction. Mr. Vanderlip said he considered that a large United States purchase of easily convertible foreign securities would be at this time a thing much to be desired.

"It would act to cure the two great monetary evils confronting us," he explained, "the two evils being, first, that the United States imports too much gold; and secondly, that when the time comes for export, business will be hurt by the turn of the tide. The purchase of the treasury notes would have prevented the further import of gold, because the notes would have paid for supplies; and, also the purchase of the notes would have given to the United States securities that could be dumped into the European market when the tide turned, just as England unloaded her United States securities. Thus the United States would have been able to retain the gold it had at the time the readjustment came at the end of the war, when lessening of the gold base would mean a readjustment of credits eight or ten times as large."

Application for letters patent has been made by the Wellington Milling Company, Limited, Wellington Station, P.E.I., \$10,000. L. J. McDonald, A. O'Connell, A. T. McLellan.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE SIMPLE ANNALS OF A SUCCESSFUL SALESMAN.—(How he made his opportunity.)—The most important thing a salesman has to sell is his services, for consider, when the salesman sells his services he has disposed of his most valuable asset. If he puts this sale over right, the rest follows as a matter of course. Listen to the story of a salesman who sold his services well. Mr. H. was a clerk in a financial office in a small city in Canada. His equipment was simple—a fair education and an indomitable ambition. Like many good men he felt sure there was a better place and a brighter future for him somewhere, and he was content to abide his time, only he was determined not to wait for his opportunity but to make it. Casting about, he learned that successful life insurance soliciting was a very lucrative profession. He could not afford to give up his job for the moment, so he devoted his time to study at night. In brief, Mr. H. soon mastered his subject and found he could increase his income considerably by writing insurance in his leisure moments. In a short time he felt he was justified in giving up his position as a clerk, and arranged to come to Toronto and connect himself with my agency. From the start he has made, he should earn \$5,000 a year with comparative ease. What is the moral? Had he not been stirred by ambition, had he not been willing to sacrifice a part of his evenings to better himself, he would still be earning \$75 to \$100 a month. This is a human document from life and only one of many we will be glad to show. We have a few good openings for applicants of unquestioned integrity and with the highest grade references. No others will be considered. Give full particulars of your business career in making application. W. A. Peace, Branch Manager, Imperial Life Assurance Co., 20 Victoria St., Toronto.

THE WELL-KNOWN WINNIPEG REPRESENTATIVE of an Eastern manufacturing firm of high standing is open to take an additional agency. In close touch with leading business firms, government and municipal officials from Winnipeg to Vancouver. Member of leading clubs, etc. Address Box 19, *The Monetary Times'* Office, Toronto.

A SUCCESSFUL Financial Corporation, with a large paid-up capital, desires to secure the services of an energetic, experienced, capable and reliable person, to organize and manage a Stock and Bond Department at a fixed salary, or salary and commission. If successful, future assured. State salary and give references. Correspondence confidential. Address Box 17, *The Monetary Times*, Toronto.

STRONG INSURANCE and Financial Firm located in Edmonton desire the General Agency of a tariff fire insurance company for the Province of Alberta. Can guarantee an income from Calgary and Edmonton of at least \$20,000 the first year. Address in strictest confidence, "General Agents," care of *The Monetary Times*, Toronto.

MOOSE JAW RENTAL AGENTS.—The Ralph Manley Agency, Limited, Walter Scott Block, Moose Jaw, handle the renting of Moose Jaw Improved City Property. Their facilities permit them to rent and re-rent property as well as looking after collections and any necessary repairs. Established 1908. Correspondence solicited.

Messrs. Lazard Brothers and Company, the London bankers, recently announced their preparedness to purchase \$75,000 Canadian Northern Land Grant 4 per cent. bonds at 93 per cent. At the end of June, 1915, there was outstanding of this issue £511,700, and in currency another issue of \$2,000,000.

	<u>22,575.84</u>
	<u>1,348.91</u>
	<u>\$ 572,804.33</u>

Winnipeg, 27th November, 1916.

We beg to report to the Shareholders that we have audited the Books and Accounts of The Grain Growers' Grain Company, Limited, for the year ending August, 1916, and that, in our opinion, the above Balance Sheet as at that date is properly drawn up so as to exhibit in condensed form a true and correct view of the state of the Company's affairs according to the best of our information and the explanations given us, and as shown by the Books of the Company. We have examined the Securities for the Investments and found them in order.

JOHN SCOTT, C.A.,
W. H. BEWELL, } Auditors.

Following is a Comparative Statement, showing the business development year by year since the company was organized.

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

A Good Living Wage

A Profitable Future

A Provision For Old Age

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policy-holders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

*Note.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending Oct., 1916, were: imports 1916, \$49,464,853; 1915, \$56,531,364, and exports 1916, \$206,126,802; 1915, \$118,782,516. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

WHAT ECONOMIC RECONSTRUCTION MEANS

Maximum Output Per Capita Per Diem for Three Prime Orders of Workers

The following is a summary of the paper which was read by Mr. James Carmichael Smith, at the Royal Colonial Institute, London:—

1. Of the five prime organs or institutions of the Body-National, domestics and economics are the most fundamental.

2. The real living members of the Body-National, and of each of the constituent organs thereof, are men, women, and their offspring, working at suitable occupations, and resting in comfortable homes.

3. The normal objective, or ideal, of human activities, for each pair of marriageable adults, should be the creation and maintenance of comfortable homes inhabited by healthy, intelligent workers, together with their joyous and happy developing offspring.

4. Disciplined muscular, mental, and moral man-power and woman-power—these are the real wealth and strength of every nation.

Prime Orders of Workers.

5. Economic reconstruction, in goodwill, means the humane and equitable adjustment of the relationships between the three prime orders of workers—capitalists, entrepreneurs, laborers; bondholders, shareholders, employees; the administrative, supervisory, and the executive staffs of work, so as to bring into being a business situation wherein the operations of industry, commerce, and finance may attain unto the highest degree of effective efficiency, manifesting as the maximum output of wealth and of services, per capita, per diem—every worker doing the best possible in every kind of business.

6. This desirable business situation has not been realized by means of the economics of *laissez faire*, of unrestricted individual competition, within the domain of distribution by the method of exchange; with money as the legal and customary instrument of exchange, and, consequently, the effective instrument of distribution for both cash and credit business dealings.

Regulated Corporate Co-operation.

7. This desirable business situation can be realized only by means of the economics of *camaraderie*, of regulated corporate co-operation within the domains of production, distribution, and exchange—wherein “strikes” and “lock-outs,” the wasteful and destructive policy of (a) *ca’canny* and sabotage shall be eliminated, and the policy of (b) maximum output per capita, per diem, shall be accepted by the three prime orders of worker as the objective, or ideal, of economic operations in every kind of business.

8. Profit or surplus wealth, being the special product of the business-like co-operation of the three prime orders of workers, should be proclaimed, by law, as the joint-property of all the co-operators employed in the same gainful business.

Some Positive Proposals.

9. The positive proposals for bringing into being this desirable business situation are:—

(a) The enactment of laws converting the capitalists, or bondholders, of every gainful business into preference shareholders with the legal restriction, or elimination, of the wrecking powers of distraint now possessed by the capitalists, or bondholders.

(b) The enactment of appreciation and depreciation-sharing laws, making suitable and adequate provision for (x) the standardization of money-values; for (y) the adjustment of the legal value, or debt-paying power, of money, in a manner equitably reciprocal to the variations in the exchange value, or purchasing-power, of money; and for (z) the location or fixation of the Settlement-Point, or equation of exchange, at the mean of the variation in the exchange value, or purchasing-power, of money, between inception-time and maturity-time, in every credit, or inter-temporary, business dealing.

(c) The enactment of profit-sharing laws making suitable and adequate provision for the distribution of the profit, or surplus wealth, resulting from the co-operative activities of capitalists, entrepreneurs, and laborers employed in the same business enterprise, “unto each ac-

ording to his work.” Such profit, or surplus wealth, at each recurring dividend-time, should be divided into two equal parts and distributed as follows:—

i. The one-half of such profit, or surplus wealth, being distributed among the entrepreneurs severally, according to the measure of their share-holdings.

ii. The other half of such profit, or surplus wealth, being distributed among the capitalists and the laborers, severally, according to the measure of their income-earnings—whether in the form of rent, interest, wage, or salary.

In War, In Peace.

10. The capitalists, entrepreneurs, and laborers are the ever-enduring orders of workers in every kind of business enterprise, in like manner as the commissioned officers, non-commissioned officers, and the rank and file are the ever-enduring orders of soldiers in every kind of military enterprise.

11. In peace, after the war, economic reconstruction should manifest itself, in practice, as the United Empire and the Allied nations of working comrades; as, during the war, military reconstruction has manifested itself, in practice, as the United Empire and the Allied nations of fighting comrades.

HAIL INSURANCE LOSSES

That the abnormally high loss rates this year demands an increase in rates was the general opinion expressed at a meeting of hail insurance officials held in Calgary recently. An association will be formed to deal with ratings, agency commissions, etc. No definite decision as to rates will be arrived at until the new association is fully organized.

The state hail insurance commissioner of North Dakota pronounces a failure the compulsory hail insurance plan in that state. The scheme has been in effect six years, and has never been able to pay losses in full, though the rates have been successively raised. Last year \$33,116 was collected, and \$33,125 paid out on a basis of only 38 per cent. of the losses sustained by the fund.

WILL NOT SELL TREASURY BILLS

Great Britain and France will not sell treasury bills in the United States, as proposed last week. The announcement was contained in the following statement issued by J. P. Morgan and Company:—

“We have been instructed by the British and French government to withdraw their treasury bills from sale.

“We have accordingly expressed to those institutions and investors which had already placed orders with us for these securities that the sellers wish to be released from the obligations to deliver, and they have been good enough to accede.

“This action is because, as explained by the British chancellor of the exchequer and by the French minister of finance, these governments desire to show every regard to the federal reserve board, a governmental body of which the secretary of the treasury and the comptroller of currency are ex-officio members.

“We may add that the sale in limited amount of these treasury bills, payable in dollars in New York, have never been an essential part of the allied governments’ financial plans, but have for some time been under consideration with a view to furnishing a credit medium that would accommodate the United States banking demands for an instrument of short maturity and of such limited volume that the government could always undertake to lay down gold in New York sufficient to meet the matured bills.

“It was believed further that these bills would have furnished at the end of the war an excellent measure of protection to the United States financial situation, inasmuch as these steadily maturing obligations of the foreign governments would have tended to prevent heavy drafts of gold from this market.”

Mr. C. B. Gordon, Montreal, was made vice-president of the Bank of Montreal at the annual meeting. Capt. H. Molson, Montreal, and Mr. H. Kennedy, Quebec, have been added to the bank’s directorate.

Life Companies' Assets Trebled; Business Doubled

DEVELOPMENT and Growth of Canadian Life Insurance Companies
During the Past Decade—Elimination of Doubtful Practices—
Influence of the United States on Canadian Life Underwriting.

IN Canada's early days life insurance was the smallest of the financial institutions. Only one Canadian company was operating, and the total insurance in force of all companies did not exceed \$30,000,000. The banks, however, grew in number and importance. Nineteen new banks sprang into existence within seven years after Confederation, and the total capital doubled. Mr. Herbert C. Cox, president of the Canada Life Assurance Company, referred to these facts to-day in addressing the Association of Life Insurance Presidents at New York. His topic was "A Decade of Business Progress in Canada." It was unusually interesting and instructive. "Canada," said Mr. Cox, "is subject to two great influences, that of Great Britain and that of the United States. The greatest or most forceful influence upon life insurance in Canada twenty years ago came from the United States." Mr. Cox continued:—

The best financial minds were at work in the building up of United States companies, and it is true that the formidable rivals to business in Canada had their springs of energy in New York. Canadian life insurance, endeavoring on the one hand to hold fast to British ideals, was swayed on the other by the aggressive methods of its competitors from the south. Gradually the Canadian companies awakened to a situation which required their utmost skill for solution. Unfortunately there had been and still continued a form of competition among themselves which was harmful to the business and while this strenuous rivalry between Canadian as well as American life insurance companies resulted in a great stimulus to, and large increase in the business written, a larger measure of co-operation would have been the wiser course.

It is the good fortune of Canada,—in some respects the doubtful fortune,—to have repeated in Canada anything which has considerable vogue in the United States. Though not of this doubtful benefit, the Armstrong investigation of life insurance aroused great interest, and soon after Canada had an investigation, with the result that the business was cleared of some unfounded aspersions and some admittedly injurious practices were removed. The outcome of this investigation was the Insurance Act of 1910, under the provisions of which Canadian companies are now working.

As an outcome of better conditions in the field and in home offices, which were developing in fact long before the insurance investigation, Canadian executives have had time to give more thought to plans for the betterment of policy contracts and the paying of dividends to policy-

holders. Contracts have been interpreted more liberally for many years, and claims have not been contested on technical grounds. Larger cash values, even exceeding those contained in old policy forms, have been allowed, and free or paid-up policies have been issued for more than was guaranteed many years ago when the insurance was first taken out. The better companies now give to policyholders the benefit of the doubt, whether the point be one of contract or one of those questions of justice and equity which are always arising for decision in a large company. For instance, there was at the beginning of the decade a strong tendency to treat as lapsed policies which could not technically be proven to be in force, but recently the automatic nonforfeiture clause has been made to apply (when requested by the assured) to old policies, thus preventing their technical lapse under terms of the old contract, and in most companies policies are generally considered in force so long as a margin of loan or cash value exists.

In tracing the influences which have been at work during the past ten years in bringing about these improvements in the conduct of the life insurance business in Canada, there can be no question that organized co-operation between the head offices of companies and agents had much to do with the abolition of wasteful practices. The Life Officers' Association, founded in 1894, had objects somewhat similar to the Life Presidents' Association, and one of its earliest reforms was the banning of competitive literature, ratio comparisons, and mutual abuse. These reforms could not have been accomplished except by the companies in their association agreeing together to discontinue issuing unfair comparisons. The folly of that wasteful form of competition is now seen and the loss which was sustained by agents spending their time vilifying one another instead of working in co-operation to raise the general tone of the business and impressing the public with the value of life insurance.

The life insurance agents of Canada, having organized themselves into the Life Underwriters' Association of Canada in 1906, gave most valuable support to the Life Officers' Association in carrying out these reforms, and also initiated several improvements of their own. The rebating of premiums was brought to a sudden stop, not only through the operation of the Insurance Act of 1910, which forbade it under heavy penalties, but even more because of the agreement reached by the underwriters themselves before the act came into force, that they would not rebate. In most towns and cities the local associations

introduced pledges for their members to sign, placing them on their honor not to offer a rebate. The effectiveness of these measures was proven by the fact that rebating practically ceased without resort to the law.

The effect of these reforms, many of them initiated at the beginning of the last decade, was marked. Lapses decreased and for the year 1907 the net gain in business in force of all Canadian companies was 47 per cent., as compared with 34 per cent. the year before. This excellent showing continued, the percentage in succeeding years, 1907, 1908 and 1909, rising to 50, 53 and 55 per cent. respectively, and there has been no loss of momentum up to the present time. When agents and companies cease their destructive tactics and employ their energies constructively, the general result cannot but be favorable. It is unquestionable that these important changes conducted to the companies securing more business, the agents more income, and the general public more satisfaction.

Large Increase in Assets.

Up to that time life insurance, which through fifty long years had struggled to secure its share of attention, could muster for all companies a total of only \$102,000,000 assets, with \$400,000,000 as the total insurance in force.

In the past ten years Canadian companies have made an increase in total assets of 170 per cent. and an increase in business in force of 109 per cent. The almost trebling of assets and doubling of insurance in force within this limited space is the greatest tribute to the improvement in methods. The fact that only four new companies entered the field during the decade, raising the total from twenty-two to twenty-six, indicates that it was this improvement rather than an increase in the number of companies operating which accounted for the better record.

The wave of prosperity which reached Canada in 1896 was still rising ten years later, and the life insurance companies were prepared for a fair harvest. Had it not been for the improved methods of securing business, however, the results could not have been so favorable and the public might have more readily turned to other forms of investment, of which there were many offering. The general expansion of business, the prosperity of the farmers who had reaped abundant harvests, the railway extensions and increase in earnings, the discovery of silver and gold in Northern Ontario, and the continued large production of gold in British Columbia, all gave a stimulus to trade and finance which reacted on Canadian insurance business.

Life Insurance Companies' Investments.

The field for investment of life insurance funds in Canada has been found most favorable, not only by Canadian and British companies, but by many of those in the United States. Of Canadian bonds and debentures, chiefly government and municipal, Canadian companies have taken \$104,000,000 during the last ten years, which represents 38 per cent. of their total assets, and real estate mortgages, which have been available at good rates of interest, have absorbed another 35 per cent. The purchasing of Canadian securities by United States investors for several years, and indeed in larger degree now than ever, has been one of the most convincing proofs of the stability of Canada's financial arrangements and indicates a confidence for which there are many reasons. Up to August, 1914, Canada had been borrowing principally in the international markets, London contributing a large portion of the funds required for the general development of the country. On the outbreak of war the London and European markets were closed to Canadian borrowers and since then the United States has absorbed an increas-

ing portion of Canada's government and municipal debentures.

One of the most satisfactory incidents in connection with the taxation bill adopted at the last session of the Canadian parliament, was that the life insurance companies were especially exempted from the tax on corporations. It is the well-defined policy of the Canadian government, a policy which has been adhered to by both political parties, that life insurance companies shall not be subject to a federal tax. A fund is raised by assessment of the various companies doing business in the Dominion only sufficient to support the department of insurance, and this is the only contribution asked. Taxation exists in the provinces, to which the companies have made opposition, but the tax remains.

Unjust imposts of this kind provoke bitterness, and the time will come when policyholders on both sides of the line will protest in no uncertain manner against the undue taxation of the funds they have thriftily set aside against a day of adversity. During the last two years, the life insurance companies doing business in Canada were obliged to pay to the several provincial governments nearly one and a half million dollars, or 1.69 per cent. of the total premium income. The same form of imposition exists in the United States in even greater proportion, as 2 per cent. is the highest tax we are called upon to pay in Canada whereas in some States the tax reaches as high as 5 per cent.

All Companies are Affected.

It has been thought by some that as Canada is a part of the British Empire and therefore at war, the life insurance companies there may be subject to a greater risk, but it should be remembered that the business done in Canada has for many years been shared between the Canadian, United States and British companies, and whatever may happen in Europe has an effect upon all life insurance interests on this side of the Atlantic. The effect upon Canadian companies has not been a matter of concern, as the actual war losses were only 13.3 per cent. of the expected on the total business of the companies for the year 1915.

The Canadian companies have as a whole experienced a particularly favorable mortality apart from war claims, so that it may be said the lower mortality among the general body of policyholders has to a great extent offset the higher mortality among the enlisted men, who are as a rule not heavily insured because of their comparative youthfulness; therefore, in so far as the Canadian companies are concerned, and this applies also to the United States companies, the war claims during 1915 have had no disturbing effect upon the mortality rate as a whole. These gross war claims amount to approximately .134 of 1 per cent. of the mean Canadian business in force, which is the equivalent of about thirteen cents upon each one-thousand-dollar policy. What the future holds in store for all the insurance companies by way of losses arising out of the war no one at present can forecast, but it is quite safe to say that no anxiety is felt by the life insurance companies on this continent.

The Beaver Fire Insurance Company's loss ratio for eleven months was 30 per cent., and the expense ratio for the year will be in the neighborhood of 16 per cent. The company's net gross income will show at about the same figure as last year, and net premium income will show a decrease of about 10 per cent. The Beaver company took \$25,000 of the first Dominion war loan and \$25,000 of the second war loan, besides investing during the year \$10,000 in the Anglo-French 5 per cent. external loan.

Canada Must Prepare for Peace Problems

Important Work Awaits the Attention of a Canadian Board to Study Post Bellum Problems—Germany is Preparing and will fight for Markets.

“WHAT is best to do? To wait till that time comes, and then in the confusion and in the maze of worrying, disappointed, dislocated activities which will busy us at that time, to sit down and in that guise and under those circumstances try and work out what we shall do for the future? Let me in all sincerity, in all kindness, but in all truthfulness say that there is not a great country that I know of that is so sound asleep as Canada is to-day in that very particular.”—Sir George Foster, speaking at Toronto.

BODY OF CALM BUSINESS MEN

They Are Needed in Canada to Study Now the Problems of the Peace Period

“A long period of very great depression will be the aftermath of this war. Territory has to be repaired and trade has to be reconstructed. The great question of capital versus labor has to be settled, for it has been 50 years’ work to get the two to agree in Canada. After the war there will need to be many new factories, and new trade and new connections must be worked up. All places that are flourishing to-day are flourishing because of the war. What is required is a body of calm business men who will study the question from every viewpoint, and give a general consensus of opinion.”

This is the suggestion made by Mr. E. F. B. Johnstone, K.C., well-known lawyer of Toronto, director of the Royal Bank of Canada and several other financial institutions.

What Is Going to Happen?

Addressing a large audience at Montreal, Mr. Johnstone said:—

“What is going to happen to Canada after this war shall be over? Canada must and will be seriously affected, for Canada is a country largely agricultural. It has manufacturing concerns, and is a country of production, mines and lumber industries. To develop Canada, there are three things absolutely essential—men, money and peace.

“The banks here have plenty of money on deposit to pay the government requirements. The money paid for munitions is paid out of Britain’s borrowing. We have no new assets, and the United States is the only large market benefiting. The matter and outcome is largely problematical. Canada is one of, or I should say, is, the finest country in the world. We have the climate, the soil, the production, and we have abundant soil and land to give away. No other country to-day can show the same record.

“By virtue of the fact that we have had over 400,000 men taken away, our production power is reduced about one-sixteenth. Many, in fact the majority, of the people left behind are women and children.

“And a large percentage of the men who do return will return physically unfit. These men will be a load that we must carry. We will carry them cheerfully, but nevertheless they will be a load. We will be lucky if 50 per cent. of those who are gone come back fit to resume work.

How to Liquidate War Debt.

“How are we going to liquidate our war debt? What about that? Two hundred thousand people a year to Canada would mean nothing. As the power of production is the man, and taking one in three as proportion, it would only mean about 75,000 men to a country where there are vast tracts of vacant and open territory, open since the days of Adam. We are easily capable of taking one million people per annum, and not feeling it.

“For example, out in the western provinces, we get men from the Old Country. Nothing is done for them. They live alone on the prairies, four or five miles from their nearest neighbors. Our new settlers are left too much alone. A remedy should be found for such a lamentable state of affairs at once. Canada is to-day the only country open and free to settlers.”

GERMANY IS GETTING READY

At This Moment the Hun is Devising Plans to Invade Foreign Markets

“We shall be face to face with a nation whose standards of morals are tuned according to the awareness of the people with whom they come in contact. If you will look closely you will find that one continuous coherent policy has permeated the Prussian state machine for the last two decades—viz., to bend or break weaker or less sophisticated nations to its iron, soulless will; and the remorseless way she has trampled Belgium and Serbia under foot throws a lurid light on the way she was in pre-war days trying, and alas! succeeding, in conquering much of this habitable globe in the sphere of economics and industry. But what is of greater moment to you and to me is to understand this clear issue—that when this terrible war, with its trail of death, destruction and awful waste is over, when it has passed into the crucible for historical analysis, just that very moment this machine-ridden nation will commence to exercise all the blandishments of a sycophant in order once more to wrest our markets from us.”

This is the warning given by Mr. Herbert Kershaw, of the department of commercial intelligence of his Majesty’s board of trade, in an instructive address to the business men of St. John, N.B., this week. Mr. Kershaw is in charge of the exhibition of enemy samples (now being shown in that city) and loaned to Canada at the request of Sir George Foster.

Must Begin Now.

“Remember, the world has not yet recovered from the stupefaction with which after 12 months of war it was forced to realize what prodigious military preparations Germany has been secretly making for 20 years or more. Surely we are not again going to be taken by surprise at the great schemes and far-reaching plans she is at this moment devising to invade foreign markets. Depend upon it, she will show no mercy. It is rank suicide to set out unarmed on a road that you know is infested with highwaymen. Yet that will be our position unless we at once commence to polish up our weapons and set our defences in order. It will avail us nothing to jog placidly along now with blurred vision just because money is plentiful and our lockers are bursting with orders. We should prepare our soil for rotation crops, so that when so much of our machinery has ceased turning out munitions of war it can rapidly be turned on to commodities of peace.

Be Under no Delusion.

“If we of the British empire are to prevent the Germans from ever again setting out to conquer the world economically, to impose their yoke of frightfulness (whether in war or in commerce) on law-abiding nations, we must here and now gird up our loins and get our weapons primed and sharpened for the industrial strife which is bound to supervene the very moment the terms of peace are signed and the clash of arms and the boom of cannon have given place to the throb of the engine and the rhythm of the loom.

“We must be under no delusion about this. Germany is preparing with great intensity of purpose, and with the assistance of the best brains in the country, elaborate schemes for getting her goods into every possible available market, so

soon as the seas are again free. Depend upon it, Germany will be feverishly anxious to develop her export trade, as this is the one way in which she may be able to repair the ravages brought about by her artificial internal methods of financing the war. She will be brought to bay, and will fight with every fair and unfair weapon she possesses.

"This is no fanciful picture. It is sober reality. The German will be as merciless in trading as he has been in war. Moreover, as in the past he will mask his parasitical greed by obsequiousness, artful blandishments, bluff and all the other methods of which he was a past master, and which he will have developed to greater efficiency during the war.

Some of the German Methods.

"Soon again we shall have the poor, cringing Teuton exciting our pity, coming into our workshops and offices and carrying off our inventions, methods, names of customers and so forth from under our very noses. Again he will appeal to the rapacity of the merchant by offering to send a British-made article to Germany and have it copied on a large scale at a reduced price; and when he has got his claws into the market, and the British manufacturer has lost his trade, he will probably grin and send up his prices; or if the ground is suitable he will very likely bundle the British or Canadian merchant out of the market, too."

SASKATCHEWAN MARKETING BONDS

Tenders close to-morrow for an issue of \$500,000 5 per cent. province of Saskatchewan bonds.

CLASSIFYING CANADA'S MAN-POWER

The National Service Board of Canada will make investigations and formulate plans that will in some measure provide for those adjustments in Canada's national life necessary for the maintenance of the agricultural and other basic industries of the Dominion at that high point of production and efficiency so absolutely essential to the successful prosecution of the war, while continuing unimpaired the indispensable public services of the country. To accomplish these results, and insure the maximum production of war material and equipment, the services of all available men and women of Canada must be utilized in such a manner as will, while achieving these purposes, permit of the release from their present employment of men who, physically fit and of suitable age, may desire to serve overseas with Canada's military or naval forces.

An inventory of every male between the ages of 16 and 65 residing in Canada is to be taken in the first week of January.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Brockville, Ont.—December 8—Mr. M. McCartin's bakery. Loss and cause not stated.

Baddeck, N.S.—November 29—Telegraph House. Loss, \$800.

Brandon, Man.—December 6—Experimental Farm. Loss, \$30,000. Cause, supposed spark from blower of straw-cutter.

Campbellford, Ont.—December 10—Dickson Bridge Works Company's plants. Loss, \$50,000; partially insured.

Delhi, Ont.—December 3—Sovereign Glove and Mitt Company's factory. Loss, \$40,000. Supposed incendiary.

Drummondville, Que.—December 5—Boiler department and coal elevators of Etna Powder Company.

Elmsdale, Ont.—December 10—Mr. J. W. Macdonald's store. Loss, \$8,000; partly insured.

Grand Prairie, Alta.—November 28—Mr. A. M. Anderson's residence. Cause, coal oil lamp exploded.

Halifax, N.S.—December 3—Marine Navigation Company's offices, Pickford and Black's building, occupied by R. B. Seeton and Company, H. F. Burton, I. H. Mathers and Company, Geo. MacKeen and Company on the lower floor; Capt. Neil Hall, F. A. Giles and Company, Smith, Tyrer and Company, Marine Navigation Company and Messrs. Pickford and Black.

Hensall, Ont.—November 29—Commercial Hotel. Loss slight. Cause, dropped match or cigar stub. Mrs. Drake's residence. Cause, exploded coal oil lamp.

Moncton, N.B.—November 28—Mr. H. Steeve's livery stables. Loss, \$3,000.

Montreal, Que.—Mr. J. A. Comeau's automobile storage and repair shop, 1013 East Marie Ann Street. Loss, \$30,000.

Newcastle, N.B.—December 8—Mr. J. D. Buckley's Commercial Hotel. Loss, \$3,400.

Ottawa, Ont.—December 9—Titus Block, 168-184 Sparks Street. Loss estimated, \$60,000. Principal losers and estimated losses: F. W. Woolworth and Company (5, 10 and 15 cent store)—Stock and interior heavily damaged. Loss, \$25,000; partly insured. Mrs. J. D. St. Denis Lemoine, owner of block—Loss on building, about \$8,000; partly insured. W. Nixon, confectioner—Loss about \$6,000; partly insured. Harry Brouse, jeweller—Loss by water and smoke about \$1,500; insurance less than 50 per cent. Quinn-Giles, druggists—Loss, \$8,000; insured. J. B. Reid, stationery—Loss, \$7,000; partly insured. Dr. W. H. Liddle, dentist—Loss about \$1,000. Hutt and Bilodeau, tailors—Loss, \$300. W. E. Scrivens, insurance agent—Loss, \$400; insured. R. Darling, woollens—Loss, \$300. R. R. Sparks, insurance agent—Loss, \$400; insured. K. Teaken, ladies' tailor—Loss, \$1,000; some insurance. H. Langford, jeweller—Loss, \$1,500; partly insured.

Peterboro', Ont.—December 11—Quaker Oats Company's plant destroyed and other buildings. Cause, supposed ignition of dust in the drying-room adjacent to the boiler-house caused explosion. Plant and stock are valued at \$1,600,000. Insurance is placed from parent company Chicago offices. Five deaths and eleven missing.

Quebec, Que.—December 1—Rear of Mr. Boiteau's grocery store. Loss, \$100. Cause, defective wiring.

December 5—The Cyrille Falardeau tannery. Loss, \$6,000. Insurance—Stock: St. Paul, \$1,000; Guardian, \$3,500; Globe and Rutgers, \$1,500; Northern, \$3,000; total, \$9,000. Building: Liverpool and London and Globe, \$1,000; Royal, \$1,000. Loss, about \$6,000.

St. George, N.B.—December 8—Seventeen buildings, including seven stores. Loss, \$60,000.

St. John, N.B.—November 29—Mr. C. J. Wilson's residence and that of Mr. G. Stevens. Loss, \$5,000.

Springhill, N.S.—November 27—Fire at Springhill mines of Dominion Coal Company.

Summerside, P.E.I.—December 13—Business section, involving eighteen buildings. Loss, \$325,000; insurance, \$175,000 amongst thirty companies.

Vancouver, B.C.—December 5—Mr. R. Casselman's residence, 937 Cordova Street East. Loss, \$1,500. Cause, overheated furnace.

December 7—Vancouver Casket Company. Loss, \$3,000. Cause unknown.

Victoria, B.C.—December 1—Mr. E. E. Corbett's residence, Cedar Hill Crossroad, near Quadra Street. Loss, \$2,000.

All mailed papers are sent direct to Friday evening trains. Any subscriber who receives his paper late will confer a favor by complaining to the circulation department.

MANITOBA'S RURAL CREDIT SCHEME

There appears to be some magic in the word "government." It exercises a hypnotic power over the community. Our governments have failed in nearly every business enterprise they have undertaken. The construction of the National Transcontinental Railway by the Laurier government has created a large debt and a railroad tangle. The Borden government in their distribution of seed grain and collection of the indebtedness have shown an incapacity in that direction which would ruin an ordinary business in three months. The Whitney government legislated competition out of business before they went into selling electric power. The Roblin government of Manitoba purchased the Bell Telephone Company in order to reduce rates, but the rates have been increased. They spent much money of the province in the purchase of grain elevators, which they operated for only a year or two and which are now rented at an inadequate return. The erection of Manitoba's parliament buildings resulted in a grave scandal.

Now the Norris government proposes to lend money to the farmer on mortgage. Although a reduction in the rate of interest of 1 per cent. (which is all the government expect to secure and which is only about two-thirds of 1 cent a bushel on the wheat crop of the province) we are assured that the result of this measure will be increased production, larger immigration and general prosperity.

The government states it can make a profit on the transactions. It is difficult to discover how the money can be borrowed at 5 per cent. and loaned at 6 per cent. and a considerable profit still accrue to the government's loaning association. The reply seems to be that the government can manage this business more efficiently and more economically than private interests. It should not take many years to demonstrate the fallacy of that reasoning and of the figures which the government are now quoting. The experiment, however, will likely cost the province something.

IMMIGRATION.

Labor, including the matter of immigration, will prove a problem after the war, upon the solution of which the degree of our welfare will largely depend. To talk glibly of immigration as a solution of economic ills is surfacing a serious subject. The thoughtful men of the country are practically unanimous in the opinion that immigration from Europe in any great volume after the war is not likely for some time. Sir Vincent Meredith, speaking at Montreal last week, did not share the optimistic views of many as to the immediate outlook. That in time we will receive a large influx of new settlers he thought there was no doubt, but for a period we shall be at a disadvantage owing to a deficiency of tonnage to carry them to our shores from Europe. "It is not improbable," he added, "that continental nations will, for the purpose of self-preservation, place an embargo on all emigration. Great Britain, for similar reasons, though she may not take such drastic measures in regard to her daughter nations, will no doubt discourage intending emigrants from leaving her shores."

This he said without for a moment meaning that efforts to secure immigration should be in any way relaxed. Upon well directed immigration depends much of our progress. The intricacies of the situation in Europe make a complex immigration problem here. There is much thinking and hard work ahead of those who direct the immigrant to this great country.

THE TRADE WAR

In the United States, the opinion is heard that talk of a trade war after the conflict of arms, is glib, coming more from readiness of speech than of thinking. This view is expressed by the New York Journal of Commerce, which says: "The nations which have been fighting each other for more than two years and seem likely to be at it for at least another year, will find their skilled labor force sadly depleted, their capital exhausted in providing for the enormous consumption of the war monster, their governments burdened with heavy debt and their activities subject to severe taxation to meet the debt charges and the needs of recovery. The nations will in effect be invalidated, with a struggle before them for the restoration of industrial and commercial health."

In those very facts, and in others, we think, is the foundation of the trade war. Convalescing nations will be told by their doctors to stop whining and get out for exercise. If Germany has ten dollars left, five will be used as a subsidy for something or other. The German will be a keen competitor in all markets even if only to earn a dry piece of daily bread. Great Britain will be an aggressive competitor, for it has learned the secret of organization and precedent breaking for the business of war. Those assets will be adapted to the business of peace. The United States is wealthy and ambitious, with an eye upon several markets in which it will have keen competition. Then there are the matters of British Empire trade organizations and Allied tariff pacts. There is also in Allied business the sentimental side, which blood has painted in fast colors. At least, there seems to be the necessary factors for a considerable trade skirmish, if not a war.

The United States may care to think that peace will bring no startling changes or unusual competition in the

world's markets. Those who hold that view surely cannot appreciate how deeply into the life and flesh of the Allies the great war has gone. Here is what a leading New York banker (who is writing for *The Monetary Times Annual*) says: "These nations, impoverished by war, will not sit down to a period of economy and save and pay their debts; they will press their advantage in world's commerce and trade and make money with which to carry and pay the enormous indebtedness under which they must struggle."

BUILDING SHIPS

Canada is building ships for Norway. This is done with the permission of the Imperial government. The London Times says that the construction of large ships at present in Canadian yards for neutral owners "certainly seems remarkable" but not more so than the fact that vessels should now be allowed to be built in the United Kingdom for neutral firms.

Since the beginning of war, 1,820 merchant marine vessels with gross tonnage of 3,328,584 have been sunk. It will probably take ten years to replace the tonnage lost in war time. A great part of it is British. Canada's enterprise in building ships is laudable, but these ships should be constructed for British, not foreign, owners. The British Empire needs new tonnage now; it will need more after the war. Cannot the Empire's governments and the shipping interests agree to build at present only for the family?

"TIMES ARE GOOD"

"Many of our great industries have converted big floating debts, a cause of anxiety, into cash surpluses. As a natural outcome, our stock markets are booming. Not only is unemployment unknown, but unskilled labor commands wages two and a half times greater than the pay of our volunteer citizen soldiers, who so splendidly risk their lives for their country, while men engaged in 'factory piece work' can earn as much as a college professor. It is, therefore, not surprising that the un-analytical minded, or those preoccupied with their own affairs, or those who have not contributed in flesh and blood to the cause, should complacently say, 'times are good.'"

WHAT IS ADVERTISING?

An interesting study of the psychology of advertising for the advertising man and for the student, containing, in addition to the theoretical material, much experimental data, has just been published.

In the development of the work the basic principles of psychology which are related to advertising and their application; the complexity of an advertisement is reduced to its elements to show with mathematical exactness the effect of the various elements, the results of laboratory experiments are compared with results of actual advertising campaigns, showing the strikingly close relationship between the business and the theoretical test.

The author analyses action, showing why advertisements lack in effectiveness, and indicates devices which will improve pulling power.

"Advertising and its Mental Laws." By Henry Foster Adams, Ph.D. Price \$1.50. Published by Macmillan Company of Canada, St. Martin's House, Toronto.

Sir Frederick Williams-Taylor, a banker whose admirable combination of courage and caution give the greatest weight to his utterances, in these words, causes further thought for the future. A few years ago, we were on the high tide of prosperity. It was the result of a lengthy period of development, borrowed money, and the accompanying speculation. Just as the reaction had set in the war commenced. Being on this side of the Atlantic, our geographical good luck and fortune in natural resources, gave a taste of the prosperity of war. That is the foundation of the so-called good times in Canada to-day. They are passing. Serious problems will confront us after the war. Who are planning and acting to meet these problems, so that the adverse factors may be mitigated? The federal government must not hesitate to ask the nation's business men to help them handle the nation's two big jobs—the war and the period to follow.

THE BANK'S ADVICE

A visitor came to Canada in 1912. He made various investments, called at Victoria with a social introduction from Sir Edward Clouston, and while there made enquiry of the manager of the Bank of Montreal regarding an investment of approximately \$125,000. He came into touch with a lumber company, who had a substantial contract with the city of Victoria, but who were having difficulty in financing it. The visitor decided to lend the lumber company \$125,000, upon which he was to receive 8 per cent. interest and 12½ per cent. of the profits that might arise from the contract, taking as security a second mortgage on their properties.

The lumber company were unable to carry out their undertaking and as a result the visitor took action against the Bank of Montreal, claiming damages for alleged negligence and breach of duty.

The case has been in three courts, the final result being unanimous judgment in favor of the Bank of Montreal. This is a gratifying decision. Canada's bank managers are well-trained, responsible men whose word is of great value to investors. Were a court decision, however, to fix such serious responsibility upon our bank managers, for information given by them without prejudice and with the best of intentions, one of the most reliable sources of information would be denied to all those interested in Canadian investments.

EMPLOY A SOLDIER

In "A Call to Employers" Sir Edmund Walker, president of the Canadian Bank of Commerce, says:—

"I presume much of the work to be done by the Military Hospitals Commission leads directly to the larger work of land and industrial settlement. For obvious reasons we shall hope that many of the returned soldiers will take up land. The manner of selecting such land so that communities of loyal men shall be planted in every province, of caring for the soldier-farmer in his early years of settlement, and of lending him money for improvements, is of prime importance. . . . To-day, every employer of labor, manufacturer, merchant, banker, or whatever his calling, should be considering how he can employ a few partly disabled men, and thus do something more in carrying the burdens of the war."

The Wine and Spirit Vaults, Limited, with Quebec charter, have increased their capital stock from \$10,000 to \$45,000.

TORONTO TO HAVE BIG HOTEL

Company Has Been Organized with Strong Directorate— Four Million Dollar Structure

Toronto is to have a new hotel. If the present plans are carried out, it will be one of the finest on the continent. The Anglo-American Hotel Company, which has been organized by some of Toronto's best known citizens, will commence next spring to construct this new first-class hotel on the site of Yonge Street Arcade at a cost of about \$4,000,000. The Toronto city council have granted a fixed assessment for a term of years in respect of this hotel, thus admitting the necessity for such accommodation and their desire to encourage its establishment.

Strong Directorate Elected.

The directors of the new enterprise include the following prominent men: Sir William Mackenzie, Sir Henry Pellatt, C.V.O., Messrs. E. F. B. Johnston, K.C., Geo. P. Schofield, Alfred Rogers, H. C. Cox, F. D. Corey and J. McE. Bowman. Mr. McE. Bowman, a former Toronto man, is the president of the Commodore, Manhattan and Biltmore Hotel Companies, New York. He is one of the most successful hotel men anywhere. The Commodore, now being constructed, is the largest hotel ever built. It will have 2,000 rooms. Mr. Bowman will give considerable personal attention to "The Devonshire," which is to be the name of the new hotel. The consent of His Excellency the Governor-General, the Duke of Devonshire, has been obtained for that purpose.

Need for Accommodation.

The need for first-class hotel accommodation in Toronto has been strongly expressed by travellers and tourists, and is recognized by the leading business men of that growing city. Toronto's necessity for such an hotel is a fact which its citizens, visiting the United States and Europe, appreciate when comparing their home city with cities of even smaller size and incomparably fewer attractions. Good hotel accommodation attracts tourists. The reputation of a city lacking such accommodation keeps them away.

Despite Toronto's great increase in population and development, a first-class hotel has not been built there in the past decade. On the authority of the Toronto board of trade there are only 850 really first-class hotel rooms in the city. When this total of 850 rooms is compared with similar accommodation available in Buffalo (2,300), Detroit (2,600), and Cleveland (2,900), a profitable future for a first-class hotel in Toronto that will rival in attraction the best hotels of other cities, seems assured. Some of the reasons indicating that a new first-class hotel in Toronto should prove a profitable investment are: The present accommodation is admittedly below existing requirements, which are increasing rapidly. Passenger traffic is increasing. The Toronto Street Railway alone carried 150,000,000 passengers in 1915. Toronto is the main terminal of all electric lines of importance in Ontario, and has already several hundreds of miles of electric railways centre here and reaching various important points in the province. American travellers to all parts of Canada, east of Lake Superior, stop at Toronto. Toronto is the entrance to the rich mining camps and development of the north, the gateway to all the famous central Canadian summer resorts—Muskoka, Algonquin Park, Temagami and other lines of tourist travel. Toronto is the prosperous centre of supply for the richest and most developed province in the Dominion. It is the educational and religious centre of the province. The annual exhibition (the Canadian National Exhibition) brings an increasing number of visitors to the city each year. The total admissions have reached in one season a million. Athletic meets and theatres and many special attractions attract residents from surrounding towns.

Good Location Chosen.

The new hotel will be centrally located. It will have a direct street car service from the depots and all parts of the city, and is to be in the heart of the business district, almost adjoining two of the largest departmental stores in America and close to the principal theatres.

The United Hotels Company will be financially interested in "The Devonshire," and it will form a link in that company's chain of hotels. The United Hotels Company is interested in the operation of one of the largest chains of hotels in the world, which hotels are located along the prin-

cipal routes of travel in the United States, and include, among others, the Bancroft, Worcester, Mass.; the Holyoke, Holyoke, Mass.; the Ten Eyck, Albany, N.Y.; the Robert Treat, Newark, N.J.; the Tutwiler, Birmingham, Ala.; the Lawrence, Erie, Pa.; the Portage, Akron, Ohio; the Jefferson, Peoria, Ill. The United Hotels Company is also interested in the recently opened Royal-Connaught Hotel at Hamilton, Ontario.

The company has authorized capital of \$4,500,000, of which \$2,000,000 is 7 per cent. cumulative preferred stock and \$2,500,000 of common stock. The shares have a par value of \$100. The company will offer in the near future \$2,000,000 of the preferred stock. It is anticipated that Toronto's citizens particularly will strongly support this project, as it should prove of such great value to the general community.

NEW INCORPORATIONS

Sixty-six New Charters Granted—Pulp and Paper Company Has Capital of \$6,500,000

Canada's new companies incorporated this week number 66. The head offices of these companies are located in seven provinces. The total capitalization amounts to \$12,892,000.

The largest companies are:—

Anzac Porcupine Mines, Limited	\$1,000,000
The Michipicoten Power and Paper Company, Limited	6,500,000
Pacific Lime Company, Limited	1,500,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	9	\$ 8,035,000
Quebec	20	1,328,000
British Columbia	7	1,719,000
Manitoba	4	270,000
Saskatchewan	0	295,000
Alberta	15	1,205,000
New Brunswick	2	40,000
	66	\$12,892,000

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Quebec.—The synopsis of municipal statistics prepared by Mr. G. E. Marquis, head of the provincial bureau of statistics, gives the following figures:—

On December 31st, 1915, there were in the province of Quebec 1,241 municipalities of all kinds, divided as follows:—County, 72; rural, 878; village, 200; town, 76; city, 15.

The area of organized municipalities (in acres), 22,494,382; population, 2,321,137; roads (length in miles of): (a) Public roads, 32,696; (b) macadamized roads, 2,090; (c) gravelled roads, 1,375; sidewalks, 2,262.

The number of dwelling-houses erected was 6,576; value, \$9,637,137; number of factories erected, 483; value, \$974,784.

Persons paying taxes numbered 518,324; acres of taxable land, 20,029,802. Estimated value: (a) Of taxable immovables, \$1,274,899,601; (b) of taxable immovables, but temporarily exempt, \$66,098,863; (c) of non-taxable immovables, \$365,660,974; (d) estimated value of revenue, \$1,011,878.

The municipal receipts were: (a) Ordinary, \$27,294,278; (b) extraordinary, \$31,873,428, total, \$59,167,706; and the expenses: (a) Ordinary, \$28,978,615; (b) extraordinary, \$30,175,057, total, \$59,153,672.

Municipal assets were divided as follows: (a) On hand, arrears, etc., \$28,822,084; (b) value of movables and immovables, \$154,826,164; total, \$183,648,248. Liabilities are: (a) Unredeemed debentures, \$155,667,587; (b) other debts and loans, \$27,168,292; total, \$182,835,879.

Service: Aqueducts, 436; families served, 246,365; sewer pipe systems, 103.

Fire protection service: Villages provided therewith, 72; subsidies paid by the government, \$17,220; number of fires which occurred in villages, 53; losses, \$340,568; indemnities received from insurance companies, \$180,104.

Value of public utility undertakings owned by municipalities: Aqueducts and sewers, \$52,482,337; gas, \$345,032; electric light, \$2,867,081; tramways, \$185,432; telephones, \$307,230.

Fort William, Ont.—Taxpayers are to vote on the issuance of \$80,000 bonds for collegiate purposes.

Hamilton, Ont.—On January 1st taxpayers are to vote on the \$61,000 sewer by-law and the \$50,000 sanitarium by-law.

Montreal, Que.—The recommendation of the aldermen is that an issue of \$1,000,000 bonds be made to cover the year's deficit.

North Bay, Ont.—Ratepayers have carried a by-law granting a free site and building worth \$15,000 and tax exemption for five years to a Toronto toy factory.

British Columbia.—The following bonds have been certified by the British Columbia municipal department: Coquitlam—Bonds numbered 1 to 17, \$8,175.42, issued under by-law No. 94, local improvement waterworks, 10-years, 6 per cent., payable half-yearly.

Edmonton, Alta.—The borrowing of \$650,000 from the Imperial Bank and the hypothecation of certain debentures as security for the payment of this amount was considered by the council. The bank has agreed to lend the city the amount at 6 per cent., and the debentures to be hypothecated are from a total of \$719,000 undisposed-of issues which the city holds.

Edmonton, Alta.—The following school debentures, amounting to \$20,100, which have been approved by the Alberta Public Utilities Commission, have been purchased at par by the Alberta School Supply Company, of Edmonton, Alta.: Emerson S.D., No. 1283, \$3,000; Bideford Consolidated S.D., No. 13, \$3,500; High Bank S.D., No. 3107, \$1,200; Englewood S.D., No. 3320, \$1,200; Valley Springs S.D., No. 3051, \$1,300; Oyen S.D., No. 3058, \$6,000; Grand Springs S.D., No. 3025, \$1,300; West Centre S.D., No. 3344, \$1,200; Percy Lake S.D., No. 3346, \$1,400.

Toronto, Ont.—Four recommendations of finance commissioner T. Bradshaw included in his comprehensive report, of which *The Monetary Times* printed the main features, have been adopted by the city council. They are: (1) Collect taxes one month earlier. (2) Stop unnecessary works during war. (3) Conference of department heads to consider absolutely necessary works. (4) Arranging of financing for new works before awarding of contracts.

The city council on Monday are to deal with the by-law regarding an issue of bonds to cover arrears in current revenue, which amounts to \$5,225,000.

Edmonton, Alta.—Three separate tenders are called for by the Alberta department of education for \$16,300 7 per cent. bonds, to be made as follows, the closing date being December 22nd:—

(1) Nose Hills Consolidated S.D., \$2,000, 10-years, 7 per cent. (Maturing January 15th, 1927.)

(2) Big Valley S.D., \$1,000, 20-years, 7 per cent.; Youngstown S.D., \$4,000, 20-years, 7 per cent.; village districts, \$5,000. (Maturing January 15th, 1937.) Sale of village district issues subject to confirmation by school boards.

(3) Windy Hill S.D., \$1,500, 10-years, 7 per cent.; Valleyfield S.D., \$1,200, 10-years, 7 per cent.; New Holland S.D., \$1,400, 10-years, 7 per cent.; Chartier S.D., \$400, 10-years, 7 per cent.; Langford S.D., \$1,000, 10-years, 7 per cent.; Golden Meadow, \$1,200, 10-years, 7 per cent.; Yuma S.D., \$1,200, 10-years, 7 per cent.; Eastgate S.D., \$1,400, 10-years, 7 per cent.; total, \$9,300. (Maturing January 15th, 1927.)

All required information may be obtained from Mr. M. C. Elliott, manager of the debenture branch.

Saskatchewan.—The following is a list of bond applications granted by the local government board:—

School Districts.—Buffalo Hump, \$1,500, 10-years, not ex. 8 per cent. annuity. Secretary-treasurer, J. E. Webb, Norquay; South Creek, \$1,600, 10-years, not ex. 8 per cent. annuity. W. Smith, Milestone; Argus, \$1,000, 10-years, not ex. 8 per cent. N. A. Lindberg, Fairy Glen; Sibbald Lake, \$1,500, 10-years, not ex. 8 per cent. annuity. J. Davidson, Glaslyn.

Rural Telephone Companies.—Graham-Chatsworth, \$1,200, 15-years, not ex. 8 per cent. annuity. Victor Rooke, Picnic; Maidstone, \$13,000, 15-years, not ex. 8 per cent. annuity. E. W. McLaren, Maidstone; Antelope, \$2,800, 10-years, not ex. 8 per cent. annuity. Jas. Chalmers, Antelope.

Rural Municipality.—Bright Sand, \$5,000, 20-years, not ex. 7 per cent. instalment. Herbert Knight, Bright Sand, Sask.

The following is a list of bonds reported sold from November 27th to December 1st, 1916:—

School Districts.—Wayne Valley, \$1,500. Nay and James, Regina; Dollard, \$5,500. Kerr, Fleming and Company, Regina; Hazel Dell, \$1,200. C. H. Burgess and Company, Toronto; Mildred, \$1,400. C. H. Burgess and Company, Toronto; Devonshire, \$1,200. C. H. Burgess and Company, Toronto; Sibel Plains, \$400. Kerr, Fleming and Company, Regina; Macrorie, \$5,500. W. L. McKinnon and Company, Regina.

Rural Telephone Companies.—North Forget, \$1,000. Kerr, Fleming and Company, Regina; Oak Hill, \$1,000. Nay and James, Regina; Bruce, \$2,000. J. A. Thompson, Winnipeg.

Villages.—Blaine Lake, \$500. W. L. McKinnon and Company, Regina; Theodore, \$1,800. W. L. McKinnon and Company, Regina.

SASKATOON'S FIRE PREVENTION METHODS

Commissioner Yorath, of Saskatoon, in his annual report, says: When a local authority attempts to reduce the appropriation for the fire department, it is often argued that an increase in the fire loss will be the result with a consequent increase in insurance rates. In Saskatoon this statement is not found to be correct, the following being the fire loss and the department's appropriations for 1914-1916:—

	Department appropriation.
During 1914 the fire loss was \$269,974	\$70,106
During 1915 the fire loss was \$106,146	58,719
During 1916 (ten months) the fire loss was \$23,679	58,700

Concurrently with a reduction in the annual appropriations of \$11,406, there has been a reduction in the fire loss from \$269,974 in 1914 to \$23,679 for the first ten months of 1916. This result has been obtained by: (a) Increased efficiency in department; (b) obtaining a clean city by having an annual clean-up week in the spring; (c) a continual inspection of property to see that all combustible goods or rubbish are properly protected or removed; (d) appealing to the public through the local newspapers to avoid careless practices likely to cause fire.

PROFESSION OF FIRE INSURANCE

Elements That Bring Success to Young Underwriters—
Culture and Commonsense

Without some ambition, no man need waste time in laboriously following a fire insurance career. Few positions worth having fall to the lot of those who have put forth no effort to obtain the position. Looking around at what has taken place in other spheres and professions, we see everywhere a distinct raising of the standard of efficiency and of the levelling up of status, said Mr. J. Ewart Hodgins, A.C.I.I., inspector of the St. Lawrence Agency of the Western Assurance Company and British Empire Agency of the British America Assurance Company, at the meeting of the Toronto Insurance Institute. Examinations and probationary service, once sufficient to class the examinee as fully qualified, no longer hold good, great stringency in matriculation and higher qualifications all round as a test of merit being the rule. What relation do they bear to insurance? Simply that the same rules will inevitably apply to that calling. To meet such conditions, we in this age have distinctly increased facilities for the acquisition of cultured knowledge and for attaining scientific efficiency. These facilities are widespread in both a general and a special sense. One of the special provisions is the annual examinations of the Toronto Institute, in devising and perfecting which the best expert brains in the profession in Toronto have devoted much time. The importance of the work done is much under-rated now, or, at any rate, not sufficiently perceived by many in the insurance world. This is only a young country, but there must be some other cause for this lack of education on the part of the rising generation of insurance men.

Ideas from England.

In the motherland every consideration is granted to the student of fire insurance. Promotions follow in the wake of success at the institute examinations, and, indeed, in some of the offices promotion will not be given to any of the clerks—be they juniors or seniors—unless they have qualified themselves for promotion by diligent study and have obtained success at the examinations. A great number of the offices go so far as to grant a bonus to those members of their staff who have proven themselves to be successful at the yearly institute examinations. Is it not time the managers here in Canada realized that they need to put forth some effort in order to raise the standard of efficiency amongst the young men, and to at least see that promotion is always granted to the young man who has devoted his time, his money and his talent in order to fit and equip himself for a higher position in his profession? Native wit and the observation which one can hardly help bringing to bear on the principles and details of his business, will help him through a great many difficulties, and the lazy but confident student of the business may often successfully trust to these, but the victories of neither commerce nor science are achieved in this fashion, and the case is similar with fire insurance.

Character and Commonsense.

An important aid to self-culture for a young insurance man is the study of character, and it is, perhaps, one of the minor attractions of an insurance career that in following it the means for this educative study are so amply and pleasantly afforded.

A finely balanced judgment, not marred too seriously by any blemish common to frail humanity, will command for the possessor a position of some importance.

To possess merely a well-trained memory, the result of a certain amount of everyday experience, does not necessarily imply knowledge. The acquisition of knowledge will be aided by the habit of seizing every reasonable opportunity which may present itself for studying and thinking out questions for ourselves as they may come under our own personal notice. The view we may take may not be that favored by our seniors, in which case further study of an interesting kind arises from the opportunity of watching the later developments of results and noting how and in what way the official views act better in given circumstances than the one which we ourselves had favored. To use a quotation from an insurance paper read some years ago before the Federated Insurance Institute, viz.: "Our function in the world's

life is to become original and self-devoted, as far as our gifts and disciplined experience can compass. No man is to exist as a mere echo."

There is no royal road to success. The plums of the profession invariably go to the officials who are of a studious nature, combined with that great essential which is requisite in our business as well as that of all others, viz., sound commonsense.

CANADA'S BANK CLEARINGS

The following are the returns of Canada's bank clearing houses for the weeks ended December 7th, 1916, and December 9th, 1915, with changes:—

	Week ended Dec. 7, '16.	Week ended Dec. 9, '15.	Changes.
Montreal	\$ 90,390,773	\$ 65,814,716	+ \$24,582,057
Toronto	60,330,754	44,519,857	+ 15,816,897
Winnipeg	66,008,603	68,209,521	— 2,200,918
Vancouver	7,454,352	6,208,540	+ 1,245,812

CLEAN RECORD OF MORTGAGE COMPANIES

With Business Restricted to Mortgage Loans and Sound Investments, No Losses Have Been Made

No Canadian mortgage corporation—the business of which had been restricted to loans on mortgages and other sound investments—has ever failed to pay its debenture holders in full. There appears to be no doubt that the only two such companies which ever got into difficulties did so because of some attempt to get rich quickly. This is an excellent record, and one which was discussed at some length in *The Monetary Times* of October 27th.

Increasing Sale of Debentures.

The debentures of these companies have become a popular investment in Canada, as the following table shows:—

Date.	Debentures payable in Canada.	Debentures payable in Great Britain and elsewhere.
1880	\$ 244,660	\$22,968,108
1885	4,341,793	30,456,335
1890	8,300,694	45,123,546
1895	11,272,570	45,854,391
1900	15,044,231	35,650,417
1905	21,394,845	43,555,832
1910	23,643,107	69,276,605
1913	25,159,650	96,059,466

The above figures show the amount of debentures payable in Canada, and also those payable in Great Britain and elsewhere, issued by mortgage corporations doing business in the Dominion.

The totals for 1913, now revised, are different to those given in *The Monetary Times* previously, owing to an error in the government returns.

English Loan Company.

Only a few of the smaller mortgage loan companies have encountered difficulties, and these occurrences were many years ago. The English loan Company, of London, was wound up, but all the creditors, including whatever debenture holders there were, were paid in full. The shareholders received very nearly the par value of their stock, something over 96 cents on the dollar. The depositors and debenture holders lost nothing.

The assets of the Ontario Investment Association were taken over by the Dominion Savings and Investment Society, and the debenture holders were paid in full.

The liquidation of the Farmers' Loan and Savings Company was closed in November, 1907. The debenture holders' claims were allowed in full, whereas the depositors' claims were reduced by 15 per cent., in order to put them on the same footing with the debenture holders, so that while the debenture holders were paid 88 per cent. of the full claim, the depositors were paid 88 per cent. of 85 per cent. of their claim.

Atlas Loan Company.

The liquidation of the Atlas Loan Company commenced in 1903, and the final dividend was paid in 1908. All the records of the company were destroyed under order of the court made in 1908. Without these records it is impossible to speak definitely, but the recollection of the liquidator is that some arrangement was made with the debenture holders under which they were to accept 37 cents on the dollar in payment of their claims. The liquidator, however, was successful in realizing from the assets more than was at first expected, and as a result the debenture holders received more than the 37 cents that they had undertaken to accept. It is believed that they were paid at least 46¾ cents on the dollar, probably something more, but in the absence of the records this cannot be confirmed. A suit to determine whether debenture holders were entitled to priority over depositors was carried to the supreme court, which decided that they were not entitled to priority, and must rank equally on the estate.

The stocks and bonds owned outright by the Atlas Loan Company were sold by the liquidators for \$158,000, and four parcels of real estate in Toronto, Essex Glengarry and other counties for \$101,000. The mortgages brought \$42,842, entered at \$35,000 on the books, and the book debts realized \$47,494 which was \$12,000 more than they appeared at in the books of the company, which had never been properly

kept. This \$12,000 was made up of increases that had come to light after a special audit of the books had been made by the liquidators. The liquidators found that the company had been keeping thirty-two brokers busy on the stock markets here, in New York, Buffalo, Montreal and St. Thomas. In all these cases, all the good securities held had been sold or pledged by the brokers except in the case of one firm, which held shares valued at \$97,000, with an equal liability against them.

Imperial Loan Company.

Certain debentures were issued by the Imperial Loan Company when Mr Pollman Evans, of the Union Life Assurance Company, was active in its affairs. These debentures in every case were a matter of exchange, such as, for instance, the issue of Imperial Loan debentures for Union Life stock or for Dominion Trust stock. No cash was paid for these particular debentures, and they have all been cancelled since. There were a few debentures issued subsequently, but these are not yet due. They are 50-year debentures bearing 5 per cent. interest, and amounting to about \$32,000.

The Canada Permanent Mortgage Corporation and the London Loan and Savings Company of Canada advanced the Imperial Loan Company, about two years ago, sufficient money to pay their entire debenture indebtedness in Scotland at that time, leaving only the Evans debentures, noted in the previous paragraph.

Have Made Excellent Record.

From the information available, therefore, the debenture holders of the Atlas Loan and the Farmers' Loan companies have been the only holders of Canadian mortgage debentures who have sustained any losses. Even in those cases, they did not lose all. It was known publicly at the time of the failure of the Atlas Loan Company that the manager of the company had become a partner in a brokerage house. It was quite patent that he could not give proper attention to both the brokerage and the loan business.

The failure of the Farmers' Loan Company followed the collapse of the land boom in Toronto in the eighties. The greater portion of the assets of that company, we believe, was in vacant lands in Toronto Junction. These could not be realized at the time and disaster followed. No mortgage corporation now loans on vacant real estate, they all having profited by the Farmers' Loan Company's experience, thus strengthening their position considerably.

The record of Canadian mortgage corporations, therefore, is one which they may well regard with pride. Considering the amount invested and the period covered, it is doubtful whether such a record can be duplicated.

UNITED STATES IS PUSHING DOLLAR EXCHANGE

According to London advices, New York is keen in furthering dollar exchange. Some of the leading United States financial institutions are making efforts to supplant the sterling bill by the dollar bill. The procedure, as explained by the London representative of the New York Evening Post, is somewhat as follows: Usually, the importer in Great Britain of cotton or of other goods or commodities from the United States goes to his banker there and obtains terms from that bank for accepting his bill; so that, through the means of the sterling bill he may be able to pay the shipper of the goods from the United States. Now, however, certain prominent United States financial institutions approach the English importer and offer to finance the whole transaction. They agree to give an advance to the importer on certain terms of interest, payment then to be made to the New York importer through the "dollar bill."

To meet the objection on the part of the importer, who might be uncertain as to the ability to obtain United States currency at the date of maturity to cover the bill, the United States houses concerned offer to arrange even that matter in advance by guaranteeing exchange at a certain level. A certain amount of business appears to have been carried through on these lines; but English bankers are pretty much alive to the situation, and wherever possible are preparing to compete with these devices by giving their customers such terms as shall make it still profitable to keep to the system of the English sterling bill. Yet the development is of interest as showing the efforts New York is making to become not only a great lending centre, but a great centre on which it is hoped bills will be drawn.

FINANCIAL SITUATION OF UNITED STATES

Dangers Arise from Speculation, Plus Desire of Easy Profits—Over-supply of Credit

A further result of the United States Federal Reserve Board's "warning," has been the flotation in Japan of a \$50,000,000 British government loan. This has been fully subscribed and arrangements have been made for the transfer of the credit to the United States. The object of the transaction is to provide dollar exchange in the United States.

The loan raised in Japan is for 100,000,000 yen, which is equivalent to \$50,000,000, and it is in the form of three-year exchequer bonds, bearing interest at 6 per cent. The bonds were offered at par. Exchange on Japan has been at premium in New York for some time past, and while it is expected that the transfer of the credit will influence exchange rates, a banker in close touch with the negotiations said that he did not believe the consummation of the transaction would change the position in view of the fact that current imports of merchandise were far in excess of United States imports. He said that under the circumstances it was reasonable to expect that the triangular exchange transaction would check United States gold exports to Japan.

Asking Only Credit for Goods.

Criticism of the Federal Reserve Board's action continues. Speaking at a special meeting of the Association of the State Banks of New York in Syracuse last week, President Elliott C. McDougal, of the Bank of Buffalo, said:—

"These foreign governments are not asking from us permanent capital. They are asking only credit for goods purchased from us at very profitable prices. Messrs. J. P. Morgan and Company tell us that they expected to pay, when due, the treasury bills recently offered and withdrawn. These credits are perfectly legitimate and are just as liquid in theory and practice as the great bulk of the credits granted to its customers by any commercial bank. You bankers know that the notes given by your customers which you hold are liquid, not in the sense that as a matter of daily practice they are paid when due—only a small proportion of them is so paid—but because, if loans are carefully made, payment can be enforced if necessary.

Do Not Need Gold.

"Not only is it true that we do not need gold. We are better off without it. At present, there is too much inflation of home credit, due partly to our unusual imports of gold, and partly to the expansion inseparable from the inauguration of the federal reserve system and the cheap credits which it induced. Nothing is more dangerous than credit which is too cheap.

"With or without this unusual expansion, which is beyond reasonable bounds, there will be a period of readjustment after the war. How violent that readjustment will be, no one knows. No one condition will do more to stabilize credits at that time and to prevent violent fluctuations in foreign exchange with consequent inevitable disturbance to domestic business than an adequate supply of foreign treasury bills or other short-time securities in the hands of our bankers. There is credit enough in this country for all of our legitimate needs, including even the enormous needs of our railroads, for credits to all foreign purchasers of our goods, and for a reasonable amount of credit in addition. In fact, there is an over-supply of credit. Contraction of credit is needed to-day. We are blind to that need. For these reasons, if for no other, absorption of part of this over-supply by a round amount of foreign credits would be not a danger but a safeguard.

Real Danger Arises from Speculation.

"What I have said is unimportant as compared with a real danger which faces us, about which the Federal Reserve Board says nothing. That danger arises from the speculation now under way in this country, plus the desire of excessive quick and easy profits in legitimate business, both encouraged by an over-supply of credit, and the growing discontent with normal profits and hard work. The country has gone crazy. It would be better for us to supply even permanent capital for legitimate purposes to foreign countries than to encourage speculation and inflation at home.

"In our amateurish, theoretical discussions not only have we considered only one very small part of a complete whole,

but have been blind to a real danger. As President Cleveland once said: 'It is a condition and not a theory that confronts us.' Our home expansion to-day is most dangerous. Unless checked, it promises greater dangers. This actual danger, rather than a theoretical one, should command the attention of bankers to-day."

DO WE WANT A NICKEL COIN?

Professor Leacock Has Submitted a Scheme—Mr. T. W. Gibson Suggested Cobalt Coin Last Year

A proposal whereby the Dominion can make \$5,000,000 to \$10,000,000 by substituting nickel for silver coins has been submitted to the Federal authorities at Ottawa by Professor Leacock, of McGill University, Montreal. The professor, explaining his scheme, points out that silver is only a token to-day and can be replaced by nickel or tin or celluloid for that matter. He would call in the \$20,000,000 of silver coins in circulation and sell the metal in them as bullion.

Cost of Coinage.

There is about 70 cents worth of silver in a dollar's worth of coins. Nickel is worth 50 cents a pound and the total coinage would be replaced for \$350,000. The cost of coinage would be offset by the saving now and in the future in buying nickel instead of silver.

The professor proposes that the banks should act as agencies in exchanging the nickel for the silver coins. He undertakes to carry out the scheme himself without salary. He suggests that the original recoinage should bear the stamp: "War money of Canada, 1917," and it would act as a monument of Canada's national thrift.

Coin of Cobalt.

A somewhat similar proposal was made by Mr. T. W. Gibson, deputy minister of mines, Ontario, over a year ago, who then suggested a coin made of pure cobalt. He pointed out that the five-cent piece is the least desirable of our Canadian silver coins, mainly because of its smallness in size and the consequent difficulty in handling it, and especially of distinguishing it from the 10-cent piece without close ocular examination. Why should it not be replaced by a coin made of pure cobalt, intermediate in size between the 10-cent piece and the 25-cent piece? asked Mr. Gibson. "Such a coin would have many advantages. It would be readily distinguishable from all other coins. It would be attractive in color, pure cobalt being similar in appearance to pure nickel, but somewhat more silvery, and tarnishing slowly, if at all. Being very hard, it would be difficult to counterfeit. Lastly, the chief source of cobalt being for the present in Canada, a cobalt coin would be distinctively Canadian, and its introduction would strike a chord to which the national consciousness would readily respond. The coin could be called a cobalt just as the United States 5-cent piece of copper-nickel alloy is called a nickel. By comparison, however, a pure cobalt coin would be greatly superior in appearance and every other respect to the so-called nickel, which contains only 25 per cent. of that metal."

Cobalt Oxide Production.

From the silver refineries of Ontario last year 314,906 pounds of cobalt oxide valued at \$254,447 were shipped. For the first nine months of 1916, the total was 378,733 pounds, valued at \$231,947. Until the outbreak of war, trade in cobalt was good with England and the continent of Europe. There is now little prospect of a revival of the demand for cobalt on a large scale until war gives place to peace. The chief use of cobalt has been in the form of oxide for the production of cobalt blue and in the manufacture of porcelain, enamelled ware, etc. Experiments are being made with cobalt with a view to its use as a substitute for nickel in the plating of metallic objects, and it may find employment in the making of alloys, notably of steel.

A survey of the accounting system of the Saskatchewan government is to be undertaken by Messrs. Price, Waterhouse and Company, the well-known chartered accountants.

THE TORONTO GENERAL TRUSTS CORPORATION

DIVIDEND No. 82

Notice is hereby given that a dividend of Two and one-half per cent. (2½%) has been declared upon the paid-up Capital Stock of this Corporation for the quarter ending December 30th, 1916, being at the rate of Ten per cent. (10%) per annum, and that the same will be payable on and after the 2nd of January, 1917.

The Transfer Books of the Corporation will be closed from Wednesday, the 20th December, to Saturday, the 30th, both days inclusive.

Winnipeg, December 1st, 1916.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends, and Future Plans

Brompton Pulp and Paper.—The stock has been admitted to the unlisted department of the Montreal Stock Exchange.

Canada Bread Company.—The directors of the Canada Bread Company have declared the regular quarterly dividend of 1½ per cent. on the preferred shares, payable January 1, 1917, to holders of record December 17th.

Canadian Locomotive Company.—The 20th preference stock dividend of 1¼ per cent. quarterly, payable January 1st, 1917, to holders of record of December 20, 1916, has been declared. This company is one of the few who have not been obliged to pass its preference dividend. The company was organized in 1911.

Dominion Copper Products Company.—Among the companies receiving authority to increase capital this week was the Dominion Copper Products Company, its second addition in a short time. The amount of capital was increased from \$1,000,000 to \$3,500,000. A consolidation of the Dominion Bridge Company's other subsidiary, Montreal Ammunition Company, is suggested as a reason of the addition.

British Columbia Electric Railway Company.—For the four months ended October 31st, the company's earnings were as follow:—

	1916.	1915.	Increase or decrease.
Gross	\$2,202,571	\$2,073,697	+ \$128,874
Expenses	1,908,768	1,928,530	-- 19,762
Net	\$ 293,803	\$ 145,167	+ \$148,636

Ogilvie Flour Mills Company, Limited.—The company's common stock has been placed on a 10 per cent. basis by the declaration of a dividend of 2½ per cent. It was stated at the conclusion of the directors' meeting by President C. R. Hosmer that the decision to place the stock on an annual basis of 10 per cent. was chiefly arrived at owing to the fact that the company's earnings are now of such proportions as to warrant an increase from 8 per cent., the revenue from milling alone in the fiscal year ended August 31st last having amounted to nearly 6 per cent. on the stock. The company has been piling up its resources for years and is now in such a position that the shareholders are entitled to a larger disbursement.

Acadia Sugar Refining Company.—The annual return of the company shows the debit of profit and loss account as \$239,590, and the net trading loss as \$199,142. The directors state that the principal factors in bringing about this result were the low prices ruling for refined sugar throughout the year, as compared with raw sugar, coupled with the cost of labor, coal, packages, etc.

The company's assets total \$5,916,128. Plant, etc., accounts for \$4,135,329, stock \$1,372,210, trade debts owing \$144,114, unexpired insurance \$17,966, cash \$6,916, and profit and loss \$239,590. Liabilities are as follow: Capital stock, \$2,725,333; loans against bonds, \$1,456,730; loans from bank, \$1,466,516; trade debts, \$260,248; and directors' fees, \$7,300.

Dominion Steel Corporation.—Mr. Mark Workman, on his return from Pittsburg, stated that Dominion Steel Corporation planned additions and betterments which would increase output and reduce costs. In company with officials he had made a careful survey of equipment in a number of the leading plants at Pittsburg and the improvements planned would benefit the corporation. The cost would be financed entirely out of earnings and would not involve any addition to capital charges.

A Pittsburg despatch states contracts involving a sum said to be between \$2,500,000 and \$3,000,000 have been let to the H. Koppers Company by the Dominion Iron and Steel Company, of Canada, for the construction of by-product coke ovens. The ovens will be erected at Sydney, Nova Scotia.

The Dominion Iron and Steel Company, through extensive contracts, has need for the by-product ovens, and they will be built on the most improved plans, that the by-products from the coke can be extracted to full advantage.

Collingwood Shipbuilding Company.—This company, which is one of the largest enterprises in the country, has been acquired by a syndicate including leading interests in Canada Steamships which will create a new corporation, with a capital of \$2,000,000 in common stock.

The capital of the Collingwood Shipbuilding Company is \$1,250,000, and the vendors will receive \$150 per share for their stock in the form of 6 per cent. ten-year first mortgage bonds, and also \$650,000 of the common stock of the new \$2,000,000 company. It is provided that the new company may issue preferred stock, if necessary, to provide capital for extensions only, but that the earnings of the company, which has been in existence for interest accruing upon the bonds are to accumulate in a sinking fund for their redemption, and that no dividends are to be paid on the common stock until the bonds are cancelled. The Collingwood Shipbuilding Company has two drydocks at Collingwood and also a long-term renewable lease of the government drydock and repair plant on the harbor front at Kingston.

The owners of the Collingwood Shipbuilding Company include Messrs. A. Macdougall, Duluth, president; T. Long, Collingwood, treasurer; S. Dymont, Barrie, and H. B. Smith, of Owen Sound, who is also a director of the Canada Steamships Lines, Limited.

RAILWAY AND TOWNSITE SUIT

An action involving the Grand Trunk Pacific Railway Company, the Grand Trunk Development Company, the Transcontinental Townsite Company, the purchase of townsites and right-of-way for Grand Trunk Pacific branch lines through Saskatchewan and Alberta, the securing of a section of land from the Dominion government is being heard in the Manitoba Court of King's Bench.

The Transcontinental Townsite Company (in liquidation) started the suit by claiming the sum of \$761,174.22. The Grand Trunk Pacific Development Company entered a statement of defence, together with a counter-claim for \$2,025,000.

The Michipicoten Power and Paper Company, Limited, has been incorporated, with head office at Toronto, and capitalization of \$6,500,000, to carry on a general power and pulp and paper business, involving the sale by Lewis Miller Wood, of Toronto, to the company of lands, pulpwood areas and water-power rights.

DIVIDEND No. 91

Notice is hereby given that a Dividend at the rate of Eight per cent. per annum has been declared for the half year ending December 31st, 1916, upon the paid-up Capital Stock of the Society, and that the same will be payable at the Society's Head Office, Hamilton, Ontario, on and after Tuesday, the 2nd day of January, 1917.

The Transfer Books will be closed from the 15th to the 31st of December, both days inclusive.

By order of the Board.

D. M. CAMERON, Treasurer.

Hamilton, November 29th, 1916.

A TIME-TRIED INVESTMENT

This is not only one of the largest and strongest, but also one of the oldest of the Canadian financial institutions. It has a record of more than sixty years of steadily increasing success, stability and strength. In this time an experience has been gained which entitles its Directors and Officers to be considered experts in the selection of choice, safe securities for the investment of its funds.

Its record, experience and strength constitute it an unusually safe Depository for Savings, and its Debentures have long held a very high place in the estimation of those conservative, cautious investors both in Great Britain and Canada, who prefer absolute safety to a high rate of interest. In Canada they are a LEGAL INVESTMENT FOR TRUST FUNDS, and are accepted by the Canadian Government as the Deposits required to be made by Insurance Companies, etc.

We shall be glad to send you a specimen Debenture, a copy of our last Annual Report, and full particulars on receipt of your address. Write for them to-day.

STATE INSURANCE IS A GUESS

Managed Usually by Political Appointees—Competition Brings Service and Results

"Some advocate monopolistic insurance, managed by the state, in connection with the administration of workmen's compensation laws, guessing that state management can give lower rates and as good service as can private enterprise. Why act on a guess, when the facilities for a practical test are so readily available? Anyway, why not give those who pay the freight their choice of conveyance?" These questions were asked by Mr. Edson S. Lott, president of the United States Casualty Company, at the recent conference of the International Association of Industrial Accident Boards and Commissions.

"Mutual insurance charges a certain amount at the beginning, with the right to collect more from the policyholder at some future time if the first amount is not enough—that is, if all the premiums collected are not enough to carry to final maturity (years hence) all the losses incurred in the same class or group. In other words, the policyholders insure each other, and the association does not really insure anyone if the premium it collects is not enough. The real strength behind the mutual associations lies in the fact that the financially good policyholders can be compelled to pay at least a part of the losses of the financially bad policyholders.

Pledges Resources to Fulfil.

"The stock insurance company charges a fixed rate of premium (agreed upon in advance) for the risk carried, thereby making the cost definite for the payroll expended; and, without further liability on the part of the policyholder, pledges all its resources to the fulfilment of its obligation—taking the place of the employer and assuming all his risks.

"There are those who think that 'the state' should carry on all business enterprise, except their own; they should be compelled to patronize the state fund.

"There are others who believe that workmen's compensation insurance is in the nature of poor relief and therefore to be provided for by a tax upon employers, and that such tax should be collected and disbursed by the state, as are taxes for the maintenance of poorhouses, etc.; if convinced by that theory, they belong in the state fund.

Excel in Service.

"Still others maintain that competition is no longer the life of trade, but—on the contrary—the death of trade; that if the insurance of compensation risks is left open to competition, the cost of getting the business for the various competitors will be high—because each competitor will spend large sums to get the business away from other competitors—and that if all employers are forced by law to insure in a state fund, then the waste caused by competition will be saved. Of course, if they believe that and overlook the fact that the chief competition between stock companies is to excel in service they will patronize the state fund.

Politicians Instead of Experts.

"But note the facts: State fund insurance is merely ordinary mutual insurance usually managed by officers appointed by the head of the political party in power, instead of by business men responsible to those who pay the premiums.

"The state is not responsible for a penny to anyone in case of the insolvency of the fund. It is in no sense a guarantor.

"Public enterprise under the United States system of government has not yet been and never should be substituted for private enterprises which properly serve the public.

"Compensation insurance premiums are not taxes any more than life or fire insurance premiums; for compensation is not charity, it is a legal right. It was substituted for the legal right to collect accident 'damages.'

"Competition is still the best way to get good service and diminished cost. Competition in rates does mean death, hence the adequacy of rates should be publicly regulated; but competition in service is not only the life of service, but absolutely essential to its well-being."

CANADIAN STEEL COMPANIES

They Had a Good Year and the Outlook is Good—Higher Steel Prices

The surplus earnings of the Canadian steel companies for this year have been considerably greater than those for 1915. Official figures will not be available for some weeks yet, as the fiscal year of the Nova Scotia Steel and Coal Company and the Steel Company of Canada closes on December 31st, while the Dominion Steel Corporation's year will close on March 31st next. Estimates indicate that the continuance of abnormal profits in this industry will double the steel companies' surplus earnings of this year, as compared with 1915. The Canadian companies, emulating the example of the United States concerns, have placed themselves in a financial position which should not be easily shaken by a possible prolonged reaction when urgent war business ceases. Some of the companies are increasing plant efficiency by expenditure out of surplus profits in addition to paying off debts. Most of the companies have learned adaptability and will be better prepared to take advantage of new opportunities which may develop, whether from favorable tariff conditions or some other factor.

What Latest Figures Show.

The latest available official figures of three of the most important companies (Scotia, Dominion, and Steel of Canada) are for 1915, but they will give an idea of the likely position in view of the heavy business being done and the substantial profits made. Here are the figures of the three companies combined:—

	1912.	1914.	1915.
Assets	\$18,818,000	\$17,752,000	\$24,130,000
Liabilities	13,213,000	8,220,000	6,558,000
Surplus	5,604,000	9,532,000	17,571,000
Net earnings	7,261,000	4,347,000	12,328,000
Available for dividends ..	3,690,000	370,000	7,782,000

On the combined common stock capital of \$51,097,700. the year's surplus of \$6,224,579 in 1915 represented profits at the rate of 12.2 per cent., against a balance before common stock dividends of \$2,156,195, equal to only 4.2 per cent. earned in 1912—previously the best year from the viewpoint of the common shareholder.

Higher Steel Prices.

Some time ago, Colonel Thomas Cantley, president of the Nova Scotia Steel Company, stated that it was then clearly evident that Canada and the United States would during the ensuing 12 months face a steel famine unprecedented in the history of this continent. He quoted at the time forging billets at \$52, as compared with \$25 a year previous. The price has touched \$69, Pittsburgh. That figure represents the quoted price, but it does not follow, under existing conditions, that any tonnage of billets can be had at that price.

If the war should stop there will still be, in the opinion of Colonel Cantley, a strong demand for steel. For a year before the war the railways, not only in Canada, but on the rest of the North American continent and the whole of South America were in great need of different forms of equipment, the chief constituent of which is steel. Meanwhile Germany and Belgium, both of which sent large quantities of steel products to South America, have been out of the market, and it will be a long time—from two to four years, it is estimated—before they can again commence to cater in that field. The year 1916 for Canada's steel companies has been good and the outlook is excellent.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended December 8th:—

McKinley-Darragh-Savage Mines, 83,674; Beaver Consolidated Mines, 76,131; Dominion Reduction Company, 84,000; Coniagas Mines, 112,815; Trethewey Silver Mines, 76,456; total, 433,076 pounds, or 216.5 tons.

The total shipments since January 1st, 1916, now amount to 29,844,252 pounds, or 14,922.1 tons.

THE BROMPTON PULP & PAPER COMPANY is one of the largest producers in Canada of ground-wood pulp, kraft pulp and kraft paper, for sale. It also manufactures newsprint paper, box board and lumber. The administration and management of the Company's affairs are in the hands of F. N. McCrea, M.P., of Sherbrooke, who has been associated with the lumber business of the Eastern Townships for a lifetime, and J. A. Bothwell, who has been General Manager of the Company for the past seven years. Previous to its reorganization the Company was a close corporation. The reorganization is for the purpose of further developing certain of the company's assets, increasing the working efficiency of the plant by certain improvements and additions and providing necessary working capital.

From a letter to us signed by J. A. Bothwell, general manager, we summarize the following information:

"Available wood supply estimated to be sufficient for 60 years' operations at present capacity.

OUTPUT

"Present production consists of the following:—

Groundwood pulp..	30,000 tons	per annum
Newsprint paper...	16,500 "	" "
Kraft pulp.....	12,000 "	" "
Kraft and fibre paper	9,000 "	" "
Box board.....	10,500 "	" "
Merchantable timber	15,000,000 ft. b.m.	" "
Shingles.....	5,000,000 pcs.	" "
Railroad ties.....	30,000 "	" "
Miscellaneous timber	1,000,000 ft. b.m.	" "

ASSETS

The Balance Sheet of the new Company as at November 1st, 1916, shows Assets as follows:—

Net Fixed Assets (Properties, timber limits, plants, waterpowers, etc.).....	\$ 9,518,000
Net Liquid Assets (after deducting all Current Liabilities, including Loans)	1,137,000
Total Net Assets.....	\$10,655,000
Deduct Outstanding Bonds and Preferred Shares.....	3,655,000
Net Assets available for Common.....	\$ 7,000,000

"The old Company's earnings for the year ending October 31, 1916, show approximately \$650,000, after deducting payment of Bond and Bank Interest but before deducting War Tax. It is estimated that earnings for the year 1917 available for Common Shares, but before deducting War Tax, should total \$2,000,000."

Application has been made for quotation of the Common Shares on Montreal Stock Exchange.

Complete Circular on Request.

MUST DEVELOP EXPORT TRADE

What Will Take the Place of War Orders When Peace Comes?

The problem of export trade is one of the most important confronting Canada. "We must bear steadily in mind," said Sir Edmund Walker recently, "that the fight for the world's trade in every kind of product may be beyond anything we have ever seen before; so that, while it is scarcely possible that we can come through this great experience without learning and taking a much more important place among the advanced manufacturing nations, we may have to pass through a very trying time before we achieve success. When the rebuilding of the destroyed parts of Europe begins we should benefit in our timber and lumber trades and in other ways.

Every Canadian Interested.

"Every Canadian should be interested in the question of adequate markets and adequate shipping to enable British Columbia to handle one of her main sources of prosperity. Again, on both Atlantic and Pacific coasts vast possibilities in fishing exist which demand the last word in scientific knowledge applied to methods of catching, of curing, and of

Note.—The upper line represents the per capita trade (merchandise only) of Canada, and the lower line the total per capita trade of the United States. The latter is based upon figures from the *Annalist*, and the former upon official returns. In the case of the United States the official monthly estimate of the population was used to determine the per capita trade, and in the case of Canada the official estimate of the population as in July, 1914. Coin and bullion imports and exports of Canada, July, 1914, to July, 1916, represent largely shipments under special arrangements between the Canadian government and imperial authorities, and are, therefore, abnormal, and are not indicative of Canadian trade movements, hence they are excluded altogether in determining the per capita share of Canada's foreign business.

marketing. When the hard times follow the war in Europe, the kind of food which is cheapest and at the same time most sustaining will have the largest market. We have the food, but we are backward in preparing it, and we greatly lack applied knowledge such as we may witness in Scotland and Norway.

Exports Per Capita.

"In July last, the value of Canadian exports was equal to \$28 per head, as compared with an average of about \$11.50 for the four years preceding March 31st, 1914. This result is due to the fact that Canada has resources for which the war has created extraordinary demands. But what will take the place of war orders to maintain our export trade?"

Mr. Frank A. Vanderlip, president of the National City Bank of New York, recently indicated what appeared to him some of the most important advantages and handicaps in the outlook for foreign trade development. His words apply to Canada almost equally as well as they do to the United States. "Among our advantages," he said, "are our unequalled supplies of cheap food and raw material and our vast home market which gives us a background of large scale manufacturing. This large scale manufacturing even under the handicap of wages twice those paid by some of our competitors still permits us to manufacture as cheaply as they do. Then we have the advantage of disorganized foreign markets, of a long period in the neutral markets during which the trade of our competitors has been interrupted, giving us an extraordinary opportunity for entering those markets.

Among the Handicaps.

"Among the handicaps are the facts that our merchants are in a measure untrained and inexperienced in foreign trade. Our laws are framed to prohibit co-operation. Although we must face combinations that are not amenable to our laws we will meet the competition not alone of combined producers but of combined nations erecting tariff barriers specially designed to impede us. We will feel severely our lack of government co-operation with business men, and we must meet the competition of other countries where that co-operation will be developed to the highest degree, where instead of suspicion of the motives of business men governments will confer with men and shape national policies by their advice and to their advantage."

Canada and the United States.

The accompanying chart comparing our foreign trade with that of the United States was plotted by Mr. John Appleton, the well-known financial and commercial writer, of Toronto.

While our export trade has more than doubled since the outbreak of war, it remains to be seen how well it will be maintained after the war.

ANOTHER INDUSTRY GOES TO UNITED STATES

The Partington Pulp and Paper Company, Limited, of St. John, New Brunswick, has sold its mill and timber lands to interests in the United States. The purchase price is approximately \$3,000,000. The purchase includes 372,000 acres of spruce and fir wood and 1,000,000 feet of hardwood. The entire tract of timber land purchased comprises nearly 30,000,000 cords of wood. This is the most notable purchase of pulpwood land ever made in Canada by United States paper and pulp manufacturers.

The purchasers are conjointly the Oxford Paper Company, of Rumford, Maine, U.S.A., and the Bryant Paper Company, of Kalamazoo, Michigan, U.S.A.

The purchasers are incorporating a new company, to be known as the Nashwaak Pulp and Paper Company, with offices at 200 Fifth Avenue, New York city. This company proposes to increase the output of the Partington sulphite mill from 60 to 80 tons of bleached sulphite pulp daily. This increased production is to begin at an early date.

The chief reason for the purchase of the Partington property is, it is understood, in order to secure the timber lands. The Nashwaak Pulp and Paper Company will manufacture pulp at the Partington mill at St. John, New Brunswick. It will be shipped from there to the Bryant Paper Company's plant at Kalamazoo, Michigan, and to other companies in America which desire to purchase the pulp.

The Oxford Paper Company, of Rumford, Maine, manufacture daily 100 tons of book paper, 130 tons of soda pulp and 110 tons of sulphite pulp. The Bryant Paper Company, of Kalamazoo, manufacture daily 200 tons of book and 50 tons of coated paper. This company has not previously operated a pulp mill.

The officers of the company are as follow: Hugh J. Chisholm, president; L. M. Bickford, vice-president; F. E. Tufts, treasurer; J. H. Drummond, secretary; and N. M. Jones, general manager of the mill and timber lands at New Brunswick. The directors are: Hugh J. Chisholm, F. E. Tufts, Frank H. Milham, and W. B. Milham.

Over 20,000 tons of basic iron were sold at Buffalo to Canadian firms last week.

LUMBER IS BEING EXPORTED

What British Columbia Mills Have Produced During 1916—Shingles and Logs

(Staff Correspondence.)

Vancouver, December 11th.

When the figures for 1916 are compiled they will doubtless show considerable improvement in the lumber industry in British Columbia. Some of the big mill plants have been idle all the year, but every month there is new activity. Increases in prices, from 10 to 20 per cent., have taken place. Production of shingles has been well maintained all through the summer, when usually there is a quiet period, and prices to-day are higher than ever before. Prices are, for instance: Perfections, \$2.90; XXXXX, \$2.45; Eureka, \$2.70; and XXX, \$2.15. The price of the better grades of shingles is almost \$1 more a thousand than two years ago. This branch of the lumber industry has felt the lack of labor more, since bolts have become scarce, but two or three large plants that had to stop operations temporarily have resumed cutting. Bolts are higher in price, being \$7 to \$7.50 per cord, while cedar logs for shingle purposes are \$12, also a high figure.

Shingle shipments from British Columbia to the United States for first nine months of 1915 were 879,191,000, and in 1916 for the same period, 890,745,000.

Log production to the end of September amounted to 734,087,410 feet, which is about 45,000,000 feet more than for the whole of last year, when the cut was 688,811,698 feet. In 1914, logs scaled were 555,891,197 feet, so that the cut for this year probably will be nearly double that of two years ago. Even at that, there is no surplus on the market, with prices firm at ordinary prices, although lumber cedar is a record, being \$16 per thousand feet of logs.

Lumber production of British Columbia sawmills in 1912 reached 902,000,000 feet, cut by coast mills, and 360,000,000 feet by the manufacturers in the interior. In 1915, the cut was lower than for any of the five previous years, being 428,000,000 feet and 155,000,000, respectively. The production this year will compare favorably with any year except 1912, for many coast plants that had been idle were cutting, and almost every mill in the interior has been active.

Shipping by Water.

Export of lumber by water was greater in 1915 than for any of the five previous years, being 70,000,000 feet. This result is accounted for by large shipments to the British admiralty. This year the amount will not be so large, but it will nevertheless be a good average figure. For the first six months of 1916 exports of lumber were 18,728,354 feet, as compared with 20,362,111 in 1915.

The best year of production in the lumber industry, as shown by provincial figures, was 1913, when it was \$33,650,000. In 1914 it was \$28,680,000, and in 1915, \$29,150,000. This year it will be greater than in 1915.

Prospects are Good.

Prospects for the industry are encouraging. Export business has been obtainable, but could not be accepted in instances because of the lack of transportation facilities. This will be overcome in a measure by the construction locally of seven lumber carriers. Once regular traffic is resumed with Europe, a great demand is expected. The local market for lumber is steadily increasing. That trade is offering is indicated by the purchase by the Canadian Dollar Company of the Ruskin mill of the E. H. Heaps Lumber Company, the machinery of which will be brought to Burrard Inlet and incorporated in a new mill to be built by the Dollar Company, the product of which will be for export only. This company has established its fleet headquarters in Vancouver, although its other headquarters are in San Francisco, where it is known as the Robert Dollar Company.

Export of logs in 1915 was 106,874,935 feet, a large figure as compared with previous years because the embargo on export was lifted in the latter part of 1914. Up to the end of August the export amounted to 42,168,000 feet. The embargo will be replaced once there is local demand for what logs are being cut.

Mr. D. M. Finnie, assistant general manager of the Bank of Ottawa, has been appointed to the chief executive position, following the retirement of Mr. G. Burn. Mr. Finnie's first position with the Bank of Ottawa was as manager of the Arnprior branch.

CANADIAN SHIPS FOR NORWAY

Protest is Made in London—Vessels for Norway—Encouragement of Shipbuilding in Canada

Mr. Bonar Law told the British House of Commons recently that the question of Canadian shipbuilding for Norwegian owners was under discussion with the Canadian government. It will be recalled that a Canadian order-in-council has been passed removing the war disabilities regarding shipbuilding in Canada for neutrals.

In Vancouver, contracts for three 8,800-ton steamers, valued at \$3,500,000, have been signed, two with the Wallace shipyards at North Vancouver, and one with Coughlin and Sons, in Vancouver, and only required this assurance of the government that a transfer would be granted on completion to become effective. Orders for seven or eight other vessels will also, it is said, be given, and the total value will reach \$20,000,000, the number of men employed be 2,500, and the monthly pay roll be \$120,000.

The Chinese Mail Steamship Company (owners of the Pacific mail steamer "China") are understood to have bought two ocean steamers under construction at the Wallace shipyards for \$2,500,000 each, delivery to be made within ten months.

Two transatlantic cargo vessels, now being built in Polson's yards, Toronto, for Norwegian owners at a cost of \$1,000,000, will be completed next summer.

Protest from London.

Messrs. Donald Macleod and Company, 52 Leadenhall Street, London, England, have written to the London press, stating that they have the "three 8,800-tonners, Robert Dollar type, one delivery end of July-early August, one October, and one November, building by the Wallace Shipbuilding Company, Vancouver, and we can sell them at \$145 (£29) a ton for the first steamer and \$140 (£28) for the two later; also two 7,000-tonners building by Vickers, Montreal, delivery end of 1917, for which we will try \$135 (£27) a ton, all net to us."

"British owners," says Messrs. Macleod, "can still secure these contracts, but now only after the Norwegian holders have taken their profit," and they protest. The London Times says of their protest: "The prices indicated above include the profit to the Norwegian contractors. The construction of large ships at the present time in Canadian yards for neutral owners certainly seems remarkable, but not more so than the fact that vessels should now be allowed to be built in the United Kingdom for neutral firms."

Drawback Granted on Ship Material.

As a measure of government encouragement for shipbuilding in Canada, an order-in-council has been passed at Ottawa granting a 99 per cent. drawback of customs duties paid on materials used in the original construction of ships measuring over 500 tons gross tonnage built in Canada to be exported for outside registry. The vessels must be constructed so as to obtain a registry in Lloyd's satisfactory to the minister of customs, and their export on completion must, in each case, be authorized by order-in-council.

ANGLO-FRENCH BONDS

The Anglo-French 5 per cent. bonds in New York have sold down to around 93½, the lowest on record, the previous low figure having been 93½, which was reached in March last. The new decline was said to be connected with the announcement that part of the Hercules Powder Company's 47½ per cent. extra dividend would be paid in Anglo-French bonds. This will mean a distribution of about \$3,500,000 of the bonds to the stockholders. In August last, the Dupont Powder Company, in declaring a 25 per cent. dividend, announced that 19½ per cent. would be paid in Anglo-French bonds at 97½.

The issue is still in the distribution stage and the market is suffering occasionally from the breaking up of large individual blocks.

About \$25,000,000 of these bonds are said to be held in Canada. The high price of 96 was reached in New York on account of a Canadian purchase.

Protection Doubly Sure

You protect your family from possible want, by Life Insurance.

But do you realize that if you do not make **A WILL** your estate may be disposed of by law very differently from the way you would wish? You can be assured that your heirs will receive full protection if you will permit the Sterling Trusts Corporation to advise you on this important matter.

We make no charge for assisting in drawing up your will—and will store it in our Safety Deposit Vaults free, when we are named as executors.

An officer of the company will be pleased to give you full information and advise on wills.

CANADA MUST BE THRIFTY

Conservation of Funds Necessary for War and to Increase Nation's Strength

An analysis of the trade returns indicates that many unnecessary articles are being imported by Canadians. The thoughtless expenditure of profits and earnings which are directly due to the prosperity brought about here by the war, is tantamount to assisting the enemy. Such expenditures lessen our financial ability to help wage war.

In the United Kingdom two policies, both applicable to Canada, are being urged, the character and importance of which are thus outlined by Sir George Paish:—

Men of Business.

"Two competing policies are being advocated in regard to the financing of the war. One of them is the discouragement of all expenditure at home that can be avoided, and the contribution, either in the form of loans or in the form of taxation, of every penny that can be spared to the National Exchequer. The other is that the production of the United Kingdom should be stimulated by the State and by individuals to the utmost limit of possibility; that thereby the exports should be largely increased, partly by wresting from the enemy as much as possible of their foreign trade, and partly by the opening up of new trade all the world over, but especially within the Empire. We ourselves do not see that if these two policies are recommended with reason and commonsense there is any conflict between them. We say, therefore, let both policies be urged forward with all our might, but let us never become mere enthusiasts. Let us remember that in matters of trade we must be men of business, and, therefore, all our plans must be practicable."

What Security Holders Think.

As a borrowing country, we may well heed the viewpoint of holders of Canadian securities. Speaking for British holders of our stocks and bonds, The London Economist says:—

"The economy of the Canadian people, coupled with their increased production, has not only brought about a wonderful change in the foreign trade situation, but also in the banking situation. When war broke out bankers were heavily loaned, but the Canadian people, out of their greatly increased income and their relatively still greater surplus, have redeemed a substantial amount of loan. Furthermore, they have largely increased their deposits with bankers, with the result that the position of bankers is entirely different from that immediately prior to the war. In calling attention to the really remarkable change in the financial condition of Canada we trust the Canadian people will not be disposed to become more extravagant in consequence of their greater prosperity, but on the contrary, will continue to exercise the great self-denial they have practised since war began, and, on the one hand, will seek to increase their production, and, on the other, to keep down consumption, in order that they may redeem as much of their indebtedness as possible to other countries during the war, and in order that they may be in a strong position to face the future when the war comes to an end and the demand for their manufactured products is again more or less confined to their own country."

The national campaign for greater thrift, which is being carried on by the Canadian government and the banks, should have the strongest support.

Depends on Finances.

A manifesto issued by leading bankers and others in Great Britain, pointed out that in a long war, success depends mainly upon the respective financial resources of the combatants, and the consequent power of one of them to maintain, or to add to, its fighting strength when the other's is declining, or is not capable of expansion. It is not in doubt that the financial resources of the Allies, when fully mobilized and wisely controlled, will be vastly greater than the enemy's.

"No one can realize the vastness of the task before the nation," said the document, "without becoming keenly conscious that it demands the strenuous co-operation of every man and woman, youth and maiden in the country; that the nation's energies must be completely concentrated upon the production of really essential things; and that the production of all non-essentials must be wholly stopped. Moreover, not

only must the nation avoid the consumption of all non-essentials, but must even restrict the consumption of essentials to the limits of efficiency."

At the request of the Canadian Bankers' Association a committee consisting of Mr. H. V. F. Jones, assistant general manager of the Canadian Bank of Commerce; Mr. C. A. Bogert, general manager of the Dominion Bank, and Mr. J. P. Bell, general manager of the Bank of Hamilton, are formulating a national thrift campaign.

CANADA UNITED FOR PREPAREDNESS

In the annual report of the St. John, N.B., board of trade, the following paragraph appears:—

"A study of the western grain situation, as it affects eastern ports, firmly convinces the St. John board of trade council that if we are to successfully compete with ports in the United States for the export of Canadian produce we must (1) provide adequate terminal facilities; and (2) we must inaugurate a campaign of education in the west in favor of the utilization of Canadian ports for the export of Canadian grain, as well as for the general export and import business of the country. Our slogan henceforth should be, 'Canadian Ports and Canadian Railways for Canadian Business,' and we should not be content until this idea permeates the whole of Canada. Millions of Canadian dollars have been spent in building and equipping transcontinental lines of railway and in developing Canadian ports to handle traffic originating on these lines, and in the great war that is now in progress Canada has made enormous sacrifices of blood and treasure in order that our national ideals may be conserved and that our country may be preserved from foreign aggression. These tremendous sacrifices demand of Canadians that they should present a united front to the world, not only with respect to the conservation of national ideals and to the protection of our national trade, but for the upbuilding of Canada as a part of the British empire. This does not mean a policy of unneighborliness toward friendly powers, but it does mean the cultivation of the idea that Canada east and Canada west must stand together in business affairs as they are standing together to-day in the affairs of the empire."

Mr. W. R. Bawlf has been elected to the directorate of the Northern Bank to fill the vacancy caused by the death of Mr. H. T. Champion. Mr. Bawlf is well known in the grain business. He is president and general manager of the N. Bawlf Grain Company, Limited, a director of the Fort William Elevator Company, Limited, and of the Dwver Elevator Company, Limited. Mr. Bawlf is also vice-president of the Winnipeg grain exchange.

LEGAL NOTICES

THE L. D. CAULK COMPANY OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 20th day of November, 1916, incorporating Arthur Fry, secretary; Mary Little, bookkeeper; Jacob Doan Musselman, manager; Ralph McLean, student-at-law, and John Charles McKay MacBeth, barrister-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell and deal in goods, wares and merchandise of all kinds; (b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To apply for, purchase or otherwise acquire any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (d) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (e) To enter into any arrangements with any authorities, government or supreme, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with or surrender any such arrangements, rights, privileges, concessions and franchises; (f) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors or associates in business) or the dependents or connections of such persons, and to grant annuities, pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (g) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (h) To purchase, take in lease or in exchange, hire or otherwise acquire, any real personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business or capable of being profitably dealt with in connection with any of the company's properties or rights, for the time being, and in particular any machinery, plant, stock-in-trade; (i) To construct, improve, maintain, work, manage, carry out or control any roads, ways, branches or sidings, bridges, reservoirs, watercourses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, working management or control thereof; (j) To aid in any manner any corporation any of whose shares of capital stock, bonds, debentures or other obligations are held or in any manner guaranteed by this company, and to do any act or things for the preservation and protection, improvement and enhancement of the value of any such shares of capital stock, bonds, debentures or other obligations, and to any and all acts tending to increase the value of any of the property at any time held or controlled by this company; (k) To purchase, take or acquire by original subscription or otherwise, and to hold, and, with or without guarantee, to sell or otherwise dispose of shares, stock, whether common or preferred, debentures, bonds, and other obligations in and of any other company, and to pay for such shares, stocks, debentures, bonds and other obligations either in cash or partly in cash, or to issue shares of this company fully paid up or partly paid up in payment, and notwithstanding the provisions of section 44 of the said Act to use the funds of the company in the purchase of shares, stock, debentures, bonds and obligations in and of any such other company, and to vote on all shares so held through such agent or agents as the directors may appoint; (l) To remunerate any person for services rendered to the company, in such manner as the company may deem expedient, and more particularly with the approval of the shareholders by the issue and allotment of shares, bonds or other securities of the company, wholly or partly paid up, but nothing in this clause contained shall be deemed to limit the power of the directors to fix and pay the salary of any and all officers, servants, agents and employees of the company; (m) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable and transferable instruments; (n) To lend money to customers and others having dealings with the company and to take security for the loan of such money; to guarantee the performance of the contractual and other obligations of any such persons and to give any guarantee or indemnity as may seem expedient; (o) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (p) To pay out of the funds of the company all expenses of or incidental to the

formation, registration and advertising of the company, or in or about the promotion of this company or the conduct of the business; (q) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (r) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with others, and either by or through agents, sub-contractors, trustees or otherwise; (s) To do all such other things as are incidental or conducive to the attainment of any one or more of the above objects, and so that the objects specified in each paragraph of the clause shall, except when otherwise expressed in such paragraph, be in no wise limited or restricted by reference to or inference from the terms of any other paragraph or to or from the name of the company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere, by the name of "The L. D. Caulk Company of Canada, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 22nd day of November, 1916.

THOMAS MULVEY,

Under-Secretary of State.

J. C. M. MACBETH, Toronto,

Solicitor for the Company.

22-2

THE BEAVER BOARD TIMBER COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 13th day of November, 1916, incorporating James White Bicknell, John Bruce O'Brien, Morley Carman vander Voort and Aubrey Thomas Maher, students-at-law, and John Stuart Duggan, barrister-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on the business of pulp manufacturers, importers and dealers, and to manufacture, export, prepare, buy, sell and deal in pulpwood and pulp, either mechanically or chemically prepared, and other articles incident to the manufacture of pulp and articles in the making of which pulpwood or wood pulp form constituent parts; (b) To carry on the business of lumbermen, timbermen and sawmillers, and to acquire, buy, sell and deal in timber lands and timber limits and in standing timber and rights or licenses held by persons to cut or remove such timber and acquire and deal in timber and logs, and to manufacture and deal in lumber, ties, laths, shingles and other wood products and in extracts, essences and by-products thereof and in all articles of which timber or wood may form a constituent part; (c) To purchase, construct, charter and navigate vessels or construct and operate tramways on lands owned or controlled by the company so far as may be necessary for the business of the company; (d) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (e) To acquire or undertake the whole or any part of the business, property or liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (f) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (g) Subject to section 44 of the said Act, to take or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (h) To enter into arrangements with any authorities, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions; (i) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors in business) or the dependents or connections, of such persons, and to grant pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (j) To promote any company or companies for the purpose of acquiring or taking over all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (k) To purchase, take on lease or in exchange, hire or otherwise acquire, any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business and in particular any machinery, plant, stock in trade; (l) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (m) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company, if authorized so to

LEGAL NOTICES

do by the vote of a majority in number of the shareholders present or represented by proxy, at a general meeting duly called for considering the matter, and holding not less than two-thirds of the issued capital stock of the company; (n) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (o) To do all or any of the above things and all things authorized by the letters patent or supplementary letters patent as principals, agents, contractors or otherwise, and either alone or in conjunction with others; (p) To do all such other things as are incidental or conducive to the attainment of the above objects and of the objects set out in the letters patent and supplementary letters patent. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Beaver Board Timber Company, Limited," with a capital stock of fifty thousand dollars, divided into 500 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 15th day of November, 1916.

Solicitors for the company.

BISSEL CARPET SWEEPER COMPANY OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 28th day of November, 1916, incorporating Willis Bertram Sturup, law clerk; James White Bicknell, and Aubrey Thomas Maher, students-at-law; Thomas Stewart Hagan Giles, accountant, and John Stewart Duggan, barrister-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell, export and deal in carpet sweepers, vacuum sweepers and other sweepers, cleaners or house furnishing goods; (b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or right; (c) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (d) To apply for, purchase or otherwise acquire, any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (e) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (f) Notwithstanding the provisions of section 44 of the said Act, to take, or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (g) To purchase, take on lease or in exchange, hire or otherwise acquire any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, and in particular any machinery, plant or stock in trade; (h) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (i) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (j) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company if authorized so to do by the vote of a majority in number of the shareholders present or represented by proxy at a general meeting duly called for considering the matter, and holding not less than two-thirds of the issued capital stock of the company; (k) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (l) To acquire, hold, sell and convey any real estate requisite for the carrying on of the undertaking of the company; (m) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (n) To do all such other things as are incidental or conducive to the attainment of the above objects, and of the objects set out in the letters patent and supplementary letters patent. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Bissel Carpet Sweeper Company of Canada, Limited," with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of

Niagara Falls, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 29th day of November, 1916.

THOMAS MULVEY,

23-2

THE WALTER BITON COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 14th day of November, 1916, incorporating David Henderson, William Henry McGuire, George Francis Rooney and Nathan Phillips, barristers-at-law, and William Patrick O'Meara, student-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To acquire and take over as a going concern the business and assets generally, including the good-will and liabilities, of the business now carried on by the Walter Biton Company, and to issue in payment or part payment therefor fully paid up and non-assessable shares of this company for such amounts as may be agreed upon to carry on the above-named business in all its branches; (b) To buy, sell, import and export and otherwise deal in rubber goods and combinations and substitutions thereof of all kinds, and to buy, sell, import and otherwise deal in woolen goods of all kinds; (c) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated or necessary to enable the company to profitably carry on its undertaking. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Walter Biton Company, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 20th day of November, 1916.

THOMAS MULVEY,

Under-Secretary of State.

22-2

The British Pacific Iron and Steel Company, of which Mr. W. H. McLaws, of Calgary, is president and Mr. George A. MacKenzie is managing director, has secured a site on the Fraser River, near Eburne, B.C., for a steel rolling mill, etc.

Mr. W. R. Baker, C.V.O., secretary to the Canadian Pacific Railway, and assistant to the president, has, at his request, been relieved from his duties and placed on the retired list. Mr. E. Alexander, formerly assistant secretary to the company, succeeds Mr. Baker. Mr. Baker's association with the company dates from its inception in 1881. From 1883 to 1900 he was general manager of the Manitoba and Northwestern Railway, but returned to the Canadian Pacific Railway when that line was acquired by the Canadian Pacific.

Mr. D. J. Scott, of the Sun Life, has been elected president of the Winnipeg Life Underwriters' Association. The other officers are: Honorary president, Mr. C. C. Ferguson, Great-West Life; past president, Mr. D. J. Johnson, Etna Life; vice-president, Mr. H. S. Boynton, Metropolitan; treasurer, Mr. W. T. Hart, Policyholders' Mutual; secretary, Mr. W. M. G. DeBrisay, London Life. Board of management—Messrs. H. B. Andrews, Imperial Life; C. M. Twiss, Manufacturers' Life; A. W. Newman, New York Life; F. B. Blackley, Western Life; and J. H. Calahan, Prudential Life.

Mr. W. Cromwell Gurney, who was recently appointed a director of the North American Life Assurance Company, was born at Toronto and received his education at the Model School, Harbord Collegiate, and School of Practical Science, University of Toronto, graduating in 1898 in mechanical and electrical engineering. He then entered the Gurney foundry after a thorough business training in various positions. He was made vice-president in 1906 and general manager in 1910, and upon the decease of the late Mr. Edward Gurney, his father, he was made president. Besides being president of the Gurney Foundry Company and director of the North American Life, he is a director of the Gurney North-West Foundry Company, Winnipeg, the Gurney-Massey, of Montreal, and the Gurney Heater Manufacturing Company, of Boston. His attention has been given largely to the mechanical end of the business.

Montreal, November 28, 1916.

THE ROYAL BANK OF CANADA ANNUAL MEETING

The Annual General Meeting of the Shareholders of The Royal Bank of Canada for the election of directors and for other business will be held at the Head Office of the bank, in Montreal, on Thursday, the 11th day of January next. The Chair will be taken at 11 o'clock a.m.

C. E. NEILL,
General Manager.

Montreal, December 1, 1916.

TRETHEWEY SILVER-COBALT MINE, LIMITED DIVIDEND No. 14.

Notice is hereby given that a division of profits equal to five per cent. (5%) on the issued Capital Stock of Trethewey Silver-Cobalt Mine, Limited, will be made to Shareholders of record on 12th December, 1916, payable on 22nd December, 1916.

The transfer books will be closed from the 12th till the 22nd day of December, both days inclusive.

By order of the Board,

L. J. PASHLER,
Secretary-Treasurer.

Toronto, December 1, 1916.

DOMINION TEXTILE COMPANY, LIMITED NOTICE OF DIVIDEND

A dividend of one and one-half per cent. (1½%) on the Common Stock of the Dominion Textile Company, Limited, has been declared for the quarter ending 31st December, 1916, payable January 2nd, 1917, to shareholders of record December 15th, 1916.

By order of the Board.

JAS. H. WEBB,
Secretary-Treasurer.

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of February, 1917, for the right to cut pulpwood and pine timber on a certain area situated on the Black Sturgeon River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure, for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honourable the Treasurer of the Province of Ontario, for ten thousand dollars (\$10,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$10,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,
Minister of Lands, Forests and Mines.
Toronto, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

CENTRAL CANADA LOAN AND SAVINGS COMPANY QUARTERLY DIVIDEND

Notice is hereby given that a Dividend of Two and One-Half per Cent. (2½%) for the three months ending December 31st, 1916, at the rate of Ten per Cent. per annum, has been declared upon the Capital Stock of this Institution, and the same will be payable at the Offices of the Company, Toronto, on and after Tuesday, the 2nd of January, 1917. The Transfer Books will be closed from the 18th to 30th December, both days inclusive.

By order of the Board,

E. R. WOOD,
President.

PROVINCIAL PAPER MILLS COMPANY, LIMITED DIVIDEND NOTICE

Notice is hereby given that a Dividend of One and Three-Quarters per Cent. on Preferred Stock and One per Cent. on Paid-up Common Stock of this Company, has been declared for the current quarter, both payable January 2nd, 1917, to Shareholders of record at the close of business on December 15th, 1916.

By order of the Board,

S. F. DUNCAN,
Secretary.

Dated Toronto, December 11th, 1916.

DIVIDENDS AND NOTICES

THE CANADIAN CROCKER-WHEELER COMPANY, LIMITED

DIVIDEND NOTICE

The Directors of the Canadian Crocker-Wheeler Company, Limited, have declared a One and Three-Quarters per Cent. ($1\frac{3}{4}\%$) dividend on the Preferred Stock of the Company for the three months ending December 31st, 1916, to Shareholders of record, December 15th, 1916. Also a dividend of One and Three-Quarters per Cent. ($1\frac{3}{4}\%$) on the Common Stock of the Company for the three months ending December 31st, 1916.

The Stock Books will be closed from the 15th to the 31st of December, both days inclusive.

Checks will be mailed to Shareholders on December 30th, 1916.

By order of the Board,

L. R. GRIMSHAW,
Secretary-Treasurer.

St. Catharines, Ontario.
December 7th, 1916.

ILLINOIS TRACTION COMPANY

NOTICE OF DIVIDEND No 48.

The regular dividend of one and one-half per cent. ($1\frac{1}{2}\%$) on the preferred stock of the Illinois Traction Company will be paid January 1st, 1917, for the quarter ending December 31st, 1916, to shareholders of record, December 15th, 1916.

By order of the Board,

GEO. M. MATTIS,
Secretary.

Champaign, Ill.

Not only at such international events as the Panama-Pacific Exposition, but also in exhibits of a more local nature the Canadian Pacific Railway has lost no opportunity of representing Canadian resources in the United States. Displays of Canada's resources, including minerals and fruit, but more particularly the products of the western farms, are maintained at a number of the chief centres throughout the United States. One of the exhibits recently established is at the Bureau of Industry and Agriculture, conducted by the Chicago Herald on the second floor of the Ashland block, corner of Clark and Randolph Streets, Chicago. At this bureau are exhibits showing the resources of many of the States of the United States, and also of Canada.

WESTERN CANADA FLOUR MILLS COMPANY, LIMITED

The Board of Directors of Western Canada Flour Mills Company, Limited, have declared a Dividend of Two (2) per cent. for the three months ending 30th November, 1916, payable 15th December, 1916. The Transfer Books of the Company will be closed from the 5th to the 15th December, 1916 (both days inclusive).

R. G. O. THOMSON,
Secretary.

Toronto, December 1st, 1916.

THE STEEL COMPANY OF CANADA, LIMITED

PREFERRED DIVIDEND No. 22.

Notice is hereby given that a dividend of $1\frac{1}{4}$ per cent. on the Preferred stock of the Company for the quarter ending December 31st, 1916, has been declared.

The same will be paid on February 1st, 1917, to shareholders of record at close of business January 13th, 1917.

By order of the Board,

H. H. CHAMP,
Treasurer.

Hamilton, Ontario, November 21st, 1916.

Messrs. A. H. Martens and Company, stock and bond brokers, Toronto, have opened a branch in the Standard Bank Building, Ottawa, under the management of Messrs. R. H. Pringle and C. T. Fillan.

For the six months ended October 31st, this year, the Canadian Northern Railway has moved, in round figures, 200,000 tons of coal from the mines in the Cardiff and Drumheller districts alone, as compared with 100,000 tons for the similar period in 1915, or an increase of 100 per cent., according to a statement of Mr. D. B. Hanna, third vice-president of the Canadian Northern. This coal, almost entirely of semi-bituminous character, is marketed throughout the Canadian prairies to points as far east as Winnipeg, where it meets the competition of the anthracite from the fields of Pennsylvania. No decrease in the demand is in evidence. The Canadian Northern expects to improve upon this showing for the next period of comparison.

Municipal Bond Sales For 1915

Compiled, Revised and Tabulated from Official Reports

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; "Positions Vacant," "Agents or Agencies Wanted," 3c. per word; other condensed advertisements, 3c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance.

THE SIMPLE ANNALS OF A SUCCESSFUL SALESMAN.—(How he made his opportunity.)—The most important thing a salesman has to sell is his services, for consider, when the salesman sells his services he has disposed of his most valuable asset. If he puts this sale over right, the rest follows as a matter of course. Listen to the story of a salesman who sold his services well. Mr. H. was a clerk in a financial office in a small city in Canada. His equipment was simple—a fair education and an indomitable ambition. Like many good men he felt sure there was a better place and a brighter future for him somewhere, and he was content to abide his time, only he was determined not to wait for his opportunity but to make it. Casting about, he learned that successful life insurance soliciting was a very lucrative profession. He could not afford to give up his job for the moment, so he devoted his time to study at night. In brief, Mr. H. soon mastered his subject and found he could increase his income considerably by writing insurance in his leisure moments. In a short time he felt he was justified in giving up his position as a clerk, and arranged to come to Toronto and connect himself with my agency. From the start he has made, he should earn \$5,000 a year with comparative ease. What is the moral? Had he not been stirred by ambition, had he not been willing to sacrifice a part of his evenings to better himself, he would still be earning \$75 to \$100 a month. This is a human document from life and only one of many we will be glad to show. We have a few good openings for applicants of unquestioned integrity and with the highest grade references. No others will be considered. Give full particulars of your business career in making application. W. A. Peace, Branch Manager, Imperial Life Assurance Co., 20 Victoria St., Toronto.

THE WELL-KNOWN WINNIPEG REPRESENTATIVE of an Eastern manufacturing firm of high standing is open to take an additional agency. In close touch with leading business firms, government and municipal officials from Winnipeg to Vancouver. Member of leading clubs, etc. Address Box 19, *The Monetary Times*' Office, Toronto.

STRONG INSURANCE and Financial Firm located in Edmonton desire the General Agency of a tariff fire insurance company for the Province of Alberta. Can guarantee an income from Calgary and Edmonton of at least \$20,000 the first year. Address in strictest confidence, "General Agents," care of *The Monetary Times*, Toronto.

TWO TORONTO ESTATES

The estate of the late Mr. Edward Gurney, Toronto, is valued at \$817,803.82, made up as follows: Stock in the Gurney Foundry Company, Toronto, the Gurney Heater Manufacturing Company, of Boston, Mass., and the Gurney Northwest Foundry, of Winnipeg, valued together at \$629,650; life insurance, \$95,049.51; residence on Walmer Road, with furniture and personal effects, \$75,000; cash receivable and other miscellaneous assets, \$18,104.31; total, \$817,803.82.

The late Mr. Samuel Morley Wickett, Toronto, died intestate. Administration is being sought. The estate is inventoried at \$185,928.58, less loans by bank and brokers, with interest to December 8th, \$109,458.38. This reduces the estate to \$76,470.20.

A fine all-Canadian calendar has been issued by the Northern Life Assurance Company, London, Ont. The picture used is "Canadians Retaking Trenches at St. Julien" by the Canadian artist, Mr. E. R. Glen.

DEBENTURES FOR SALE

City of Saskatoon SASKATCHEWAN

Sale of Tax Certificates

The City of Saskatoon has for sale a limited number of Tax Sale Certificates representing property purchased at the tax sale held on November 1st, 1916. This investment is **gilt edge**, as many of these certificates represent improved property, in the centre of the city, and all are excellent security for the taxes. The purchaser is assured of 10% per annum on his investment, or a clear title to the property within 3 years from November 1st, 1916. The purchaser should pay subsequent taxes when they become arrears, and will receive a premium of 10% per annum on all taxes so paid. If redemption is made the day after buying the certificate the purchaser still gets the 10%.

As the best of these certificates are being rapidly taken up, intending investors should **act promptly**. Till the end of the year the City is selling these certificates for the taxes and costs only.

Full information regarding certificates available. Terms, etc., can be had upon application to the **Tax Department, Saskatoon.**

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

A Good Living Wage

A Profitable Future

A Provision For Old Age

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

*NOTE.—It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending Oct., 1916, were: imports 1916, \$49,464,853; 1915, \$56,531,364, and exports 1916, \$206,126,802; 1915, \$118,782,516. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

BROMPTON REORGANIZATION COMPLETED

Some particulars regarding the reorganization of the Brompton Pulp and Paper Company have been given in a previous issue of *The Monetary Times*. This company has now completed the arrangements. According to Messrs. Greenshields and Company, Montreal, this new pulp and paper company has a capitalization of \$2,000,000 of 7 per cent. preferred stock, \$7,000,000 of common stock, and an issue of \$1,655,000 of 6 per cent. bonds.

The Brompton Pulp and Paper Company is one of the largest producers in Canada of ground wood pulp, "Kraft" pulp and "Kraft" paper. It also manufactures newsprint paper, box board and lumber. It owns extensive water-powers and timber limits in the St. Francis River district in Quebec.

The leading interests, who have been identified with the company for a great many years, retain their connection with it, the board of directors of the new company being as follows: Mr. F. N. McCrea, M.P., president, Sherbrooke, P.Q.; Mr. E. W. Tobin, M.P., Sherbrooke, P.Q.; Mr. J. N. Greenshields, K.C., president Wayagamack Pulp and Paper Company, Montreal; Mr. C. C. Wilson, Odell Paper Company, Auburn, Me.; Mr. W. N. Munroe, Odell Paper Company, Auburn, Me.; Mr. H. W. Beauclerk, Montreal; Mr. Horace E. Munroe, Odell Paper Company, Auburn, Me.; Mr. J. A. Bothwell, general manager, East Angus, Que.

The \$7,000,000 of common stock has been sold by Messrs. Greenshields and Company and associates at \$59 a share. The stock is selling on the unlisted department of the Montreal Stock Exchange at between \$72 and \$73 a share.

ONTARIO SELLS \$2,000,000 BONDS

Tenders for the \$2,000,000 province of Ontario ten-year 5 per cent. gold bonds were opened on Tuesday by Hon. T. W. McGarry, provincial treasurer, dated December 1st, 1916, payable, principal and interest, in gold at the office of the provincial treasurer, Toronto, or at the Bank of Montreal, New York. The highest tender was that of Messrs. Campbell, Thompson and Company, Toronto, at 99.596 and accrued interest. The list of tenderers and the amounts, all with accrued interest, are as follow:—

Bond and Goodwin, New York	
A. B. Leach and Company, New York	
Cummings, Prudden and Company, New York.....	
Hornblower and Weeks, New York	98.12
Tillotson and Wolcott Company, New York.....	
Colgate, Parker and Company, New York.....	
Campbell, Thompson and Company, Toronto.....	99.596
Canada Bond Corporation, Toronto	
Providence Savings Bank and Trust Company, Cincinnati	99.22
Breed, Elliott and Harrison, Cincinnati	
R. M. Grant and Company, New York.....	
R. A. Daly and Company, Toronto	
Kean, Taylor and Company, New York.....	98.57
Bioren and Company, Philadelphia	
Harris, Forbes and Company, Incorporated, Montreal	98.76
Æmilius Jarvis and Company, Toronto	98.051
G. A. Stimson and Company, Toronto	98.51
Wood, Gundy and Company, Toronto.....	
A. E. Ames and Company, Toronto	98.6377

An offer was received from Mr. George Kiteley, of Glenside, Ontario, for the purchase of \$2,000 at 97.

A large percentage of these bonds will probably be placed in the United States.

Mr. C. O. Stillman has been made a director of the International Petroleum Company, Limited. Mr. Stillman takes the place of the late J. G. Lamont. The board of directors of the company is as follows: Mr. W. C. Teagle, president; Mr. G. H. Smith, vice-president; Hon. W. J. Hanna, vice-president; Hon. W. Nesbitt, K.C., Mr. J. L. Englehart, Sir Edmund Osler, Capt. Henry Keswick, M.P., and Mr. C. O. Stillman.

United States' Attitude to Foreign Loans

MORE Loans Will Be Sought There By Allied Powers
and it Will Be Bad Business to Refuse Them, Says
a California Banker — Britain's Financial Strength.

SHOULD the United States stop foreign loans? is a question answered in a decisive manner by Mr. J. S. Macdonnell, vice-president and cashier of the First National Bank of Pasadena, California. A copy of his analysis of the financial position of the United States and of the nations (including Canada) seeking funds there has been sent to *The Monetary Times* by the author. The Dominion is greatly interested in the attitude of the neighboring republic to foreign loans, that being Canada's money market at present for ordinary requirements. If particular reference is made to Great Britain, says Mr. Macdonnell, it is only because that country is the heaviest borrower and dominant partner and banker for the entente allies, and statistics are more readily obtainable regarding her financial situation. Should the Teutonic nations be in a position to avail themselves of credits in America, the arguments for or against extending them such credits would be equally valid. Neither Germany or Austria-Hungary finds it advantageous to place loans in the United States in large amounts at present, because the allied blockade renders the transport of goods from America difficult, if not impossible. When peace is declared the central empires will probably wish to place large credits, and it will be undoubtedly good business to accommodate them.

Great Britain owes us somewhat over \$1,000,000,000. Can she ever pay this back? Will she ever pay it back? Is there an end in sight to this borrowing? Should we not demand heavier and heavier collateral till this seemingly insatiable drain is stopped?

We have not been used to big figures, continues Mr. Macdonnell. We are like children who have learned to count up to 100 and are lost in the mazes of arithmetic. The limit of our comprehension has been reached in figures quoted by our prohibition friends when computing the annual liquor bill of the United States. We have practically taken no part in world finances until now. We have just begun to do some world banking. We are not doing all or the major part of it. Britain has lent abroad to other countries since the war began at least three times as much as we have. The world will not cease wagging should we stop doing business abroad, any more than Pasadena's business would stand still if our leading grocery and hardware should close their doors for a period and refuse to sell goods. But we would suffer.

The principal banking function which we are performing, internationally speaking, is that of depositary—very useful—but how long would a bank last or pay dividends that kept all its deposits in the vault? The images raised by the war are Cyclopean in their immensity, and this has its advantages. Principles which have been indistinct in their application have become recognizable in the hugeness of the examples. For instance, the difference between money and credit has been sharply defined in its relation to exchange.

When France and Britain placed the Anglo-French loan in 1915, people began to figure how long \$500,000,000 would last at the rate of \$25,000,000 per day, and concluded that as it would last only twenty days, England must be nearly bankrupt. It was not money the British government wanted or it would not have come here and paid higher than 5 per cent. when it could borrow at home for 4. Neither would it have been made a misdemeanor for Englishmen to subscribe to that particular loan, as was the case. It was, however, urgently convenient to purchase many things in the United States, and it was not at all convenient to pay \$4.86 for only \$4.50 worth of goods, in addition to the ordinary, or perhaps extraordinary, profit demanded by the seller or manufacturer. The position simply was that New York was sending more goods to London and Liverpool than were coming this way. England needed a lot of things in a hurry and we had them. The Anglo-French loan had exactly the same effect as though \$500,000,000 worth of goods had been put in ships and sent to America. The same applies to the more recent credits established.

The basis of credit is not money, but rests on three considerations: first, integrity; second, the proceeds of past production; and, third, the ability to produce now and in the future. I do not ask a man who requests a loan how much money he has, but I do like to know what his assets and the goodwill of his business are worth.

As to the matter of integrity, which is not questioned by those of quiet mind, unless they have an ulterior motive to serve, it may be remarked that Great Britain has never yet repudiated payment or defaulted in interest upon a debt, and she has been doing business for several hundred years under the same name.

As to proceeds of past production, which, by the way, are the result largely of her own extension of credit

abroad, she holds in securities of the various Americas about \$20,000,000,000 value, and there are in addition approximately \$30,000,000,000 securities within Great Britain—\$50,000,000,000 as evidence of continuous energy and success. That ought to justify a loan of \$1,000,000,000 for temporary purposes—even unsecured.

The increment before the war from investments in England was about \$360,000,000 per annum—that is the surplus which remained after all British business was taken care of—and which consequently found its way into other parts of the world. Again, Britain digs more than \$300,000,000 of gold annually from the bowels of the earth. And perhaps it would not be unfair after the test to which British self-governing dominions all over the world have been put in blood, to take for granted that their physical assets will be available in case of need.

But what of her ability to produce in the future? It ought to be at least as good as it is now, when 5,000,000 men are fighting. The fact is that there are more workers in Britain to-day than before the war started. Where did they come from? They came from the leisure classes, both at the top and at the bottom, from the aristocracy, the gentry, the retired business and professional men (early retirement has always been the practice), from the ranks of those who were involuntarily unemployed, and the youth who might otherwise be still dependent upon parents—and last and most important, from the women. Production is being kept up, exports go over the seas as before, and what we have to worry about is not the inability of England to keep on producing when the war ends and her men come back to work, but the competition that will be ours.

Moreover, Britain began the war with the methodical idea that she was going to pay as she went. She did not begin by hanging her hopes upon indemnities which she might or might not collect by force of arms. Still she is on a gold basis. She has not yet borrowed a single pound without first providing by taxation for interest and a liberal sinking fund. Government revenues for 1916 will be over \$2,500,000,000. That is to say, England has borrowed from the United States to date less than five months' income. Money compounded at 5 per cent. will

double in about thirteen years. Supposing the chancellor of the exchequer should propose to devote the amount of surplus of \$300,000,000, or one-third of that, say, \$100,000,000, to a sinking fund, some mathematician will inform us that the whole British war debt would be taken care of in a comparatively few years.

More loans will be sought. It will be bad business to refuse them. The unsecured notes of Britain and France are as good as the secured ones. The probability is that exchequer notes will be issued, which, being an external credit and subject to the entire taxing power of the country, must in any circumstances be good, whether the war is won or lost. These notes will probably carry a very attractive rate for thirty, sixty or ninety-day paper, and would be protected by an abundant supply of gold to be held in Ottawa. It has even been hinted that if collateral were demanded, it would be agreeable to the allied governments that gold in an unprecedented and extraordinary amount might be sent to this country. This would be anything but an unmixed blessing. These foreign loans are not a matter of interest only to the eastern states. Practically all the food products and the majority of exports of every other nature (excepting munitions) of this country come from the great central, southern and far western sections. Pasadena, for example, has profited by the sale of our own commodities to foreign governments. It becomes, therefore, a matter of even local patriotism to encourage this legitimate business.

Exchequer notes bear the same relation to the present British loans as commercial paper does to collateral loans. If the unsecured loans are not good, the collateral is not either. For even United States corporations are largely financed by foreign capital. We are like a man with an enormous income who spends it all every year and saves nothing. It is the savings of France and England that are financing the war. What we waste would be used by Germany to keep a first-class fleet in being. We would never miss the money. If it is thinkable that all the civilized nations of Europe should go bankrupt, then it won't matter much what kind of securities we hold. But they will not. My impression is that a lot of this money that is presently ours will slide back into the pockets of the nations that know how to save.

SASKATCHEWAN SELLS BONDS

For an issue of \$500,000 5 per cent. 15-year bonds of the province of Saskatchewan, 12 bids were received and Messrs. Harris, Forbes and Company, Incorporated, Montreal, received the award. The bids were:—

Messrs. Harris, Forbes and Company, Montreal	96.31
Mr. W. Jennings O'Neill, Winnipeg	96.18
Wood, Gundy and Company, Toronto	95.68
Spitzer, Rorick and Company, Toledo	95.30
Canada Bond Corporation, Toronto	95.22
W. A. Mackenzie and Company, Toronto	94.87
A. H. Martens and Company, Toronto	94.77
Nesbitt, Thompson and Company, Toronto	94.70
Macneill and Young, Toronto	94.50
Æmilius Jarvis and Company, Toronto	94.42
C. H. Burgess and Company, Toronto	94.30
Mr. Carmichael	94.12

Mr. D. J. Dyson has been elected mayor of Winnipeg.

Fifty salesmen of the New York bond house of Messrs. Harris, Forbes & Company, ten of them from Chicago, twenty from Boston and twenty from New York, visited Montreal on Saturday last. They were met by the Montreal manager of Harris, Forbes & Company, Incorporated, Mr. R. A. Stephenson, and under his guidance visited the principal institutions.

PROSPERITY AND INFLATION

What is the Position of the United States To-day? What will it be After the War?

BY A BARTON HEPBURN, LL D.,
Chairman of the Board, Chase National Bank,
New York.

NEW INCORPORATIONS

Capitalization of Forty-two New Companies is \$9,977,500 —Munitions, Mining and Power Companies Lead

Canada's new companies incorporated this week number 42. The head offices of these companies are located in five provinces. The total capitalization amounts to \$9,977,500.

The largest companies are:—

Cluff Ammunition Company, Limited ...	\$1,500,000
Dominion Milk Corporation, Limited	1,250,000
Porcupine V. N. T. Gold Mines, Limited..	3,000,000
South Bay Power Company, Limited	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of companies.	Capitalization.
Ontario	24	\$8,796,500
Quebec	13	1,118,000
British Columbia	2	45,000
Manitoba	2	10,000
New Brunswick	1	8,000
	42	\$9,977,500

The following is a list of charters granted recently in Canada. The head office of the company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Loyalist, Alta.—Jacobson's, Limited, \$20,000.
Bassano, Alta.—Pierce and Currie, Limited, \$20,000.
Saskatoon, Sask.—Sunnyside Farm Limited, \$20,000.
Rosthern, Sask.—Dirks-Hanten Company, Limited, \$10,000.
Swift Current, Sask.—The Western Locators, Limited, \$20,000.
Victoria, B.C.—Provincial Canning Company, Limited, \$35,000.
Victoria, B.C.—Industrial Advertising Company, Limited, \$10,000.
Brandon, Man.—A. A. Evans, \$5,000. J. W. McCrea, H. L. McCrea.
Chamberlain, Sask.—Palmer Brothers and Sanders, Limited, \$25,000.
Wilkie, Sask.—Geo. E. Van Blaricom and Company, Limited, \$25,000.
Lethbridge, Alta.—The Mastodon Mining Company, Limited, \$100,000.
Unity, Sask.—The Farmers' Co-operative Lumber Company, Limited, \$20,000.
Purple Springs, Alta.—The Riverside Ranching Company, Limited, \$20,000.
Mission City, B.C.—General Machinery and Equipment Company, Limited, \$10,000.
Shawbridge, Que.—A. Henderson, Limited, \$10,000. V. Martineau, A. Jodoin, C. Jodoin.
Moose Jaw, Sask.—Kern Agencies, Limited, \$20,000. F. A. Bean Farms, Limited, \$150,000.
Lachine, Que.—W. E. Ranger, Limitée, \$20,000. W. E. Ranger, J. E. Ranger, H. Dupont.
Roberval, Que.—La Compagnie, Limitée, \$20,000. T. L. Bergeron, E. Lindsay, A. Levesque.
Cobalt, Ont.—Pinene Company, Limited, \$50,000. A. S. Holmes, A. N. Davis, J. W. Mahon.
Sussex, N.B.—Howard Brothers, Limited, \$8,000. T. N. Howard, F. W. Howard, S. E. Hayward.
Guelph, Ont.—Dalyte Lamp Company, Limited, \$200,000. J. E. Carter, J. Davidson, J. Kennedy.
Cobalt, Ont.—Groch Centrifugal Flotation, Limited, \$25,000. F. Groch, J. W. Moffett, A. Roscoe.
Strassburg, Sask.—The Strassburg Arts Stone, Marble and Granite Company, Limited, \$5,000.
Hull, Que.—Le Club Social Outaouais, Limitée, \$5,000. G. Montpetit, A. Thibault, J. A. Faulkner.
New Carlisle, Que.—North American Mining Company, \$20,000. F. Blois, J. F. Marcotte, J. H. Kelly.

Burt's Corner, N.B.—E. Burt Lumber Company, Limited, \$20,000. E. Burt, R. E. Burt, S. Howland.

Sudbury, Ont.—Nickel Range Hotel Company, Limited, \$200,000. J. Valin, A. J. Manley, D. M. Morin.

Cavan, Ont.—Cavan Rural Telephone Company, Limited, \$3,500. J. C. Swain, O. McGill, J. Kennedy.

Winnipeg, Man.—United Tire and Accessories Company, Limited, \$5,000. M. Koffman, N. Katz, I. Galeky.

Chatham, Ont.—Richmond Gas and Oil Company, Limited, \$40,000. W. G. Ryan, W. W. Scane, B. Jaspersen.

Chatham, Ont.—Pure Gas and Oil Company, Limited, \$40,000. J. C. Stewart, R. A. Richardson, G. D. Atkin.

Brandon, Man.—Great-West Investment Company, Limited, \$80,000. H. W. Lawlor, G. Burnett, A. G. F. Ross.

Montreal East, Que.—The Mooney Chocolate Company, Limited, \$175,000. E. E. Howard, J. DeWitt, H. E. A. Rose.

St. Catharines, Ont.—The St. Catharines Machinery Company, Limited, \$40,000. G. Wilson, H. Shortt, Nella L. Nelson.

Three Rivers, Que.—Eureka Shoe Company, Limited, \$100,000. J. E. Coulin, J. Charbonneau, C. J. E. Charbonneau.

St. Paschal, Que.—The Electrical Company of St. Paschal, Limited, \$15,000. Rev. A. Beaudet, A. Chapleau, B. M. Dechènes.

St. Rose du Degé, Que.—La Compagnie D'Aqueduc de Ste. Rose du Degé, \$20,000. W. Soucy, J. Tremblay, J. Quellet.

Calgary, Alta.—The Fairplay Publishing Company, Limited, \$15,000; Clapp, Anderson and Creagan, Limited, \$20,000; the Elgin Motor Sales Company, Limited, \$20,000; the Mitchell Fruit Company, Limited, \$50,000. Folkins and Campbell, Limited, \$50,000.

Winnipeg, Man.—Adanac Grain Company, Limited, \$100,000. A. Farquhar, O. G. McNabb, E. D. Honeyman; Hygiene Products, Limited, \$40,000. W. Scott, W. Berlon, B. J. Cossey; Rosemount, Limited, \$50,000. J. B. Coyne, F. K. Hamilton, S. F. Moffatt.

Edmonton, Alta.—The Cube Coal Company, Limited, \$20,000; the Edmonton Cartage Company, Limited, \$20,000; the Northern Production Company, Limited, \$800,000; the Northern Fiscal Agency, Limited, \$20,000; Wilson, Limited, \$20,000; Nor'-West Motors, Limited, \$10,000.

Hamilton, Ont.—Turner Day and Woodworth of Canada, Limited, \$25,000. A. Macfarlane, L. Macfarlane, W. B. Scott; Carnation Milk Products, Limited, \$200,000. T. Hobson, H. S. Lees, J. M. Telford; Geo. W. Stout, Limited, \$40,000. G. W. Stout, G. Swanwick, F. W. Nutt; the Trusty House, Limited, \$48,000. C. J. I. Eames, H. J. McKenna, Minnie A. Eames.

Vancouver, B.C.—Pacific Lumber and Trading Company, Limited; Kootenay River Lumber Company, Limited, \$50,000; Namu Box Company, Limited, \$24,000; Sewall Lumber and Trading Company, Limited, \$25,000; Bickley Bay Logging Company, Limited, \$10,000; British Columbia Equipment Company, Limited, \$100,000; Pacific Lime Company, Limited, \$1,500,000.

Montreal, Que.—Allambra Amusement Company, Limited, \$20,000. A. Sperkados, P. Sperkados, E. Sperkados; La Compagnie Immobilière du Parc Amherst, Limitée, \$49,000. E. E. Vallée, J. E. Cadotte, A. Courtois; R. M. K. Novelty Manufacturing Company, Limited, \$19,000. L. E. Bernard, E. Bourdages, E. O'Sullivan; Majestic Theatre Company, Limited, \$250,000. L. Joron, J. C. Barlow, H. Descary; Dollard Realities, Limited, \$50,000. P. M. Wickham, F. J. Laverty, C. A. Hale; De Grosbois Mining Company, Limited, \$500,000. A. J. Allaire, L. Laurendeau, A. Malo; National Coal and Grain Company, Limited, \$20,000. J. W. Dillon, J. H. Dillon, J. A. Bambrick; Le Roy Herbert, Limitée, \$10,000. A. Spiers, A. Herbert, M. Le Roy; the Stave Manufacturing Company, Limited, \$50,000. H. Wooland, T. J. Coulter, W. F. Lee.

Toronto, Ont.—Rosedale Motors, Limited, \$200,000. W. G. Hammond, A. McInnis, Marie O'Brien; Britnell Jennings Garage, Limited, \$40,000. J. M. Duff, J. G. Hamilton, D. McWilliams; South Bay Power Company, Limited, \$1,000,000. D. McArthur, J. Aitchison, B. T. McAvoy; Porcupine V. N. T. Gold Mines, Limited, \$3,000,000. J. S. Duggan, T. S. H. Giles, J. W. Bicknell; Equity Sales Corporation, Limited, \$150,000. E. M. Dillon, R. T. Birks, E. R. Ashall; Chartered

Investments, Limited, \$100,000. J. Y. Murdoch, F. A. Hammond, Helen B. Palen; Empire Brush Company, \$40,000. S. Scott, A. Shulman, W. H. Taylor; Atlantic Coast Development Company, Limited, \$50,000. R. A. Nevitt, W. Lunan, H. R. Burrows; Dominion Milk Corporation, Limited, \$1,250,000. H. M. McCance, G. N. Shaver, A. Robertson; Standard Stampings, Limited, \$45,000. J. F. Edgar, N. R. Tyndall, J. E. Maybee; National Dry Goods, Limited, \$100,000. I. Rice, D. Kertzer, M. Geller; the Spencer Heater Company of Canada, Limited, \$500,000. T. H. O'Neill, A. T. Hawley, C. H. Polson; the Castle Manufacturing Company, Limited, \$100,000. E. C. Fetzer, A. Whitehead, J. C. Macfarlane; Cluff Ammunition Company, Limited, \$1,500,000. A. W. Homstead, N. R. Kay, L. F. Lambier; Forgings, Limited, \$100,000. W. J. Irving, E. H. Brower, J. R. Rumball.

CANADIAN FINANCIERS' TRUST COMPANY

After a five-days' trial in the supreme court of British Columbia at Vancouver, which attracted considerable interest, a special jury gave an unanimous verdict for the plaintiff company in an action brought by Canadian Financiers' Trust Company against the estate of the late G. R. Ashwell, of Chilliwack, B.C., who died in 1913. The action was to compel payment of \$6,000 for calls made in 1913 on five blocks of shares aggregating to \$40,000 subscribed for by the deceased between 1909 and 1911.

The defendants alleged that the deceased was an old man and mentally incapable of doing business when he subscribed for the shares and that there had been misrepresentation both as regards the business carried on by the plaintiff company and the earned profits and they counterclaimed for a rescission of the contracts and the return of \$12,000 paid.

Colonel G. H. Dorrell and Mr. Donald Smith appeared for the plaintiff company and Mr. C. W. Craig for the defendants.

RESIGNATION OF HON. W. J. HANNA

Hon. W. J. Hanna has resigned the portfolio of provincial secretary of Ontario, remaining in the provincial cabinet as minister without portfolio. Hon. W. D. McPherson, K.C., member for seat "B," north-west Toronto, has been sworn in as provincial secretary, and Hon. W. H. Hearst has assumed the additional burden of the portfolio of agriculture, with the assistance of Professor Creelman, president of the Ontario Agricultural College, as commissioner of agriculture. The Ontario government thus loses the active services of Hon. W. J. Hanna, one of the most efficient and business-like ministers of the Crown. Mr. Hanna has acquired an enviable reputation as a public man which will long remain in the memory of the Canadian people.

In referring to the resignation of Mr. Hanna as due to the press of private business, Premier Hearst paid a tribute

to the work of his colleague. "Mr. Hanna, in quitting this department, leaves behind him a record of accomplishments during his 12 years of service, unexcelled by that of any public man in Ontario," he said. "His work in connection with prison reform, and for the welfare of the feeble-minded and unfortunates in the province, has made a reputation for him, not only on this continent, but in Europe, and will stand as an enduring monument of his ability and energy as a public man. Mr. Hanna will still continue as a member of the government without portfolio; the cabinet will, therefore, have the advantage of his mature advice and assistance in public matters, and particularly in connection with all matters pertaining to his late department, in which he will continue to take the greatest possible interest."

Mr. Hanna has important and influential business interests, his chief association being that of director and counsel of the Imperial Oil Company.

CANADA'S BANK CLEARINGS

The following are the returns of Canada's bank clearing houses for the weeks ended December 14th, 1916, and December 16th, 1915, with changes:—

	Week ended Dec. 14, '16.	Week ended Dec. 16, '15.	Changes.
Montreal	\$ 82,591,505	\$ 70,668,095	+ \$11,923,410
Toronto	61,822,827	45,077,690	+ 16,745,137
Winnipeg	55,543,080	62,667,863	— 7,124,783
Vancouver	6,885,808	5,233,713	+ 1,652,095
Ottawa	5,223,273	4,296,782	+ 926,491
Calgary	6,893,034	5,435,196	+ 1,457,838
Hamilton	4,584,619	3,528,180	+ 1,056,439
Quebec	3,771,485	3,649,467	+ 122,018
Edmonton	2,713,347	2,182,996	+ 530,351

When War Orders Cease, What Then?

This important subject is discussed in the forthcoming Monetary Times Annual by the following prominent Captains of Industry:—

SENATOR CURRY, President, Canadian Car & Foundry Co.
T. H. WATSON, President, Canada Machinery Corporation.
Lt.-Col. F. NICHOLLS, President, Canadian General Electric

BASIL MAGOR, Vice-President, National Steel Car Co.
C. S. WILCOX, Chairman of Board, Steel Co. of Canada.
H. COCKSHUTT, President, Cockshutt Plow Co.

Here are a few of the many questions on which they express their views:—

1. How much Munition Machinery will be Scrapped?
2. What is the Financial Position of the Industrial Cos.?
3. What will be the Labor Situation after the War?
4. What will Volume of Domestic Business be when Peace comes?
5. Is there any hope for a Substantial Export Trade?
6. Will Wages and Material be Higher or Lower after the War?

FEDERAL RESERVE BOARD'S "WARNING"

The Federal Reserve Board of the United States, headed by one Paul Warburg, has the lungs of the government, the vision of a newcomer in international finance, the modesty of one on whom Mars has forced riches, and the tremulous voice of the scared. The board's recent warning to American bankers in regard to investment in further foreign loans, has shown that organization to be high-minded but somewhat flustered at the great financial importance which the United States has achieved since the war.

Events have moved rapidly. War loans now total \$49,000,000,000. The cost of the war next August will have reached \$75,000,000,000. The United States has loaned \$2,215,000,000 to belligerents and neutrals since August, 1914. Over \$800,000,000 of gold has been shipped into the United States in the same period, half of it having been shipped via Canada. Predictions as to the impossibility of finance being able to handle a great war, have been shattered. Neutrality in finance has proved impossible. So, as an American banker recently said, the United States is just beginning to do some world banking and is in the position of a child that can count up to a hundred and is lost in the mazes of arithmetic.

Bankers have not been perturbed by the Federal Reserve Board's desire to be conscientious and watchful. The "warning" has been taken as read and is now duly filed. Great Britain and France have bowed to the Federal Reserve Board's solemn decision and will not issue the proposed treasury notes in the United States. They will finance in some other way. They, good, sound buyers, must have certain supplies which the United States can furnish. The United States merchants want to sell and the United States bankers and investors want to finance the transactions. So the thing will be done,

and the Federal Reserve Board will acquire further knowledge of sleepless nights which come of financing their best customers.

S. CLAUS

(Reprinted from The Monetary Times of a year ago).

Long ago, one, Santa Claus, took out naturalization papers and became a British citizen. As a matter of fact, there is no more German blood in Claus than there is in a bottle of red ink. Like many a true-born Britisher, Claus cut away from home in his early years, chased the rough edges of the globe, chose his stamping ground, married well, raised his children, and making money, spent it on doing good, regardless of nationality. That the Reichstag wanted to corner his ideas and let the State run them was merely a link in the chain of Prussianism and an incident in the life of Claus. Since then, more cobwebs have grown over that scheme than over the German navy. Claus has gone on, knowing his strength but not abusing it, for his British characteristics are strong.

Claus, christian name Santa, believes in the gospel of youth. He never raised a "boy to be a soldier," but he gives them all a good, healthy mind and fist. He lives in an atmosphere of peace and goodwill, but not at any price. Claus is human. He never had ambitions to be glassed in colors in stained windows. While usually he gets stage-set by admirers in a mixture of holly berries, batting, olive branches, stuffed doves and plum pudding steam, his vision was never so poor that he could not see through the German peace proposals. He rolls in millions. He does business in pounds sterling, dollars, francs, and so on,—and even in marks.

The cares of looking after a few million children are a joy to him. As soon as a youngster wears a white collar that cuts his ears, a black and yellow neck bow, a small pair of boots that raise misery among ten unoffending toes, a tailor-made suit that matches the fashion plates, and a perfumed handkerchief, and, most of all, as soon as belief fails,—as soon as all this happens to a graduating youngster, that youngster stands a good chance of being cut off Claus' list.

Claus thinks a great deal of the child who believes in him. Claus says that faith in the right cause never went wrong yet; he is pro-British, pro-ally, pro-civilization, from the top of his toque to the tip of his toe. The boy of seven who sticks to his belief that there is a Santa Claus has a special place in the ledger. The boy who scorns the juvenile traducer who speaks of his father as a barefooted burglar dropping a tin whistle in a well-hung stocking, with mother accessory to the act, the boy who scorns such modern, made-in-Germany ideas, that boy is Santa's own. He believes in the boy and in the boy's sister who believes in him. And he never forgets the parent who acts as agent of Claus according to regulation. He knows that the child lives who believes that Santa really exists, that the hero with uplifted sword always marries the golden-haired princess and lives happily ever after, that life is good, and that babies come from departmental stores. No matter what goes wrong, Claus manages to steer the right course. He is the constant expression of belief, confidence, faith. He believes; and the little children and the grown-ups believe. He comes with his greetings again, the same as ever, "A merry Christmas, the old flag still flying, and soon again, peace and goodwill among men!"

INVESTING IN MINES

Lack of information often causes the public to judge the mining industry by the losses they make when gambling in mining stocks. When a man gambles in wheat and loses, he does not blame the agricultural industry. He usually keeps quiet as to his losses. Privately he confesses that the losses are due to his own ignorance or inability properly to size up the wheat situation or the men involved in the deal. He should treat the mining industry in the same way.

Mr. Arthur A. Cole, mining engineer of the Timiskaming and Northern Ontario Railway, in addressing the Empire Club, Toronto, recently said: "If a man is heard blaming the mining industry for his losses, he is simply proclaiming that he is a gambler in mining stocks. On

enquiry, it will usually be found that although he may be a shrewd, careful and successful business man in his own line, when he comes to mining he puts aside shrewdness and commonsense and ignores usual business methods. Under the circumstances, the die is loaded against him and he has not an ordinary gambler's chance."

If a man is offered a bargain in real estate he would not think of paying over his money before he has made a personal investigation of the property or had got an expert opinion on it, or both; yet, when buying a mining property, the same man is known often to invest his hard-earned savings without anything more than a vendor's report.

"If you wish to invest in the mining industry, and not simply gamble," said Mr. Cole, a mining engineer of excellent reputation, "use ordinary business principles and commonsense. I know of no other industry that gives larger returns for the capital invested."

HALIFAX TO SEE ENEMY SAMPLES

Notable Exhibition Will Open There Next Week— Maritime Provinces' Interest

With a total attendance of 742 people for the week, establishing a new record for a city the size of St. John, N.B., the exhibit of enemy-made goods closed in that centre last week. These exhibits were loaned to Canada by the British government at the request of Sir George Foster. The importance to the community in having been brought in close touch with German methods and German productions will result, it is believed, in extending the overseas trade from the port of St. John. A large number of samples of almost every description were taken from the exhibit for experimental purposes, and one firm in Nova Scotia has asked for the use of the plows in order that copies may be taken. The three maritime provinces have shown remarkable interest in the exhibit and visitors from the following centres were among those who attended: Fredericton, 8; Hampton, 7; Montreal, 9; Moncton, 13; St. Stephen, 3; Sussex, 3; McAdam, 3; Truro, 2; Sydney, 2, and Bloomfield, 2.

The exhibition will open at Halifax on December 29th, and will then be returned to England. Mr. Herbert Kershaw, representative of the British government's department of commercial intelligence, is in charge of the exhibits, and in an interview at St. John, N.B., said:—

"To dwell in the past is not only archaic but it engenders atrophy. Take St. John, for example. The history of her splendid reputation for the building of wooden ships is rightly cherished, but surely it is rather for the school room than the counting house; rather as material for eventually lining a picture which shall only serve to bring out in greater relief the prosperity and progress, which await achievement at the hands of the citizens.

Danger of Prosperity.

"We of this great empire have the most splendid heritage that any nation in history was ever favored with; but as a consequence our responsibilities are large and manifold. Industry and trading will become paramount factors when the war is over. Are we altering our instruments to the new exigencies of industrial warfare? There is so much we have to shed, so much we shall have to assimilate. We have been rather too canny, too reserved, too comfortable. We shall have to become more optimistic and more adventurous in commerce. The great danger of prosperity is that it produces lethargy and self-centredness. Where money is plentiful it may be much easier to buy anywhere to gain a paltry cent or two; but it is much less patriotic than bravely to face the hardships of manufacturing on a competitive basis and thus increase the demand for labor in the locality. To encourage and develop manufacturing in St. John and New Brunswick is the one way to keep your promising and clever youths here on the spot. And what brilliant men have been cradled here.

"The time ought to be rapidly approaching when the emigration from New Brunswick of its most capable and enter-

prising citizens will be a thing of the past, when the still smouldering embers of the great fire shall have been extinguished forever. Just also as charity begins at home, so must there develop a more courageous desire to use local capital for the establishment of local industries. What a strange paradox it is that so many of us should succumb to the hypnotism of distant investments, where we have no opportunity of watching over them, rather than assist with our means in the development of local industry over which we can exercise daily vigil!

"It is sometimes proudly said by those who ought to know that owing to the absence until recently of an up-to-date adventurous spirit in industry St. John has felt the shock of the great war less than most cities. This is a dangerous impression; it is merely putting a premium on inertia. Adopt this principle universally and the world would lapse into an evil state of senile decay. The fame of a warrior is in proportion to the risks he has taken and often to the temporary defeats he has overcome.

"In common with practically all parts of the empire there is a beautiful spirit abroad in St. John of imperial comradeship, and there is abundant evidence that the leading manufacturers and merchants are realizing that the war has completely changed the face of things alike socially and industrially. The future of Canada now rests on the broad and invulnerable base of eternal deeds accomplished by her glorious sons overseas. She feels her courage and virile strength as she never felt it before. Since 1914 the word 'Canadian' connotes fresh and more wonderful attributes. Canada is realizing her selfhood. But noble and gallant feats of arms must be backed up by courage and enterprise in the arts of peace and industry. As one of the golden gates to the great ocean highway, St. John must play a more and more important part in the development of the empire."

Dr. H. Wilberforce Aikens and Mr. D. F. McMillan, who has been for a number of years on the staff of Mr. John J. Dixon in the Toronto office of Messrs. E. & C. Randolph, have been made members of the Toronto Stock Exchange.

Mr. W. E. Phin, of Hamilton, and Mr. I. Pitblado, K.C., of Winnipeg, have been elected directors of the Bank of Hamilton to fill the vacancies caused by the death of Mr. George Rutherford, and the retirement of Mr. C. H. Newton, of Winnipeg, owing to ill-health.

Mr. W. D. McPherson, K.C., is provincial secretary of Ontario in succession to Hon. W. G. Hanna resigned. He has a long record of public-spirited service behind him and his selection is generally regarded with favor. In announcing the choice of Mr. McPherson, Premier Hearst said that Mr. McPherson, by his ability, experience and qualifications generally, was eminently fitted for this work. "The close study he has made of the many problems presented by the returned soldier, as chairman of the Soldiers' Aid Committee, has specially fitted him to give advice to the government on all phases of this most important subject," added the premier.

BANK OF OTTAWA

The issued annual reports of Canada's chartered banks show that the past year was somewhat a better year for banking operations. The Bank of Ottawa's yearly return also confirms this. Profits were \$591,205, as compared with \$531,268 in the previous year. Dividends absorbed \$480,000 and the war tax \$39,330, the sum of \$118,179 was carried forward, and a special reserve of \$200,000 was formed.

The bank's deposits continued to grow during the year and now amount to \$42,864,123. A high percentage, some 45 per cent., of assets are in readily available form. Various changes have occurred in the bank's assets, as in the case of other banks, indicating a share in national and imperial financing. Call loans show expansion and current loans are about \$3,000,000 less than in the previous report. These changes are in accord with the requirements of the present day and show how carefully the executive officials of the Bank of Ottawa are serving their customers and shareholders in these difficult days.

CHANGE IN COMPENSATION LAW URGED

That the British Columbia government permit to employers in that province the option of either subscribing to the accident fund as provided by the British Columbia workmen's compensation act, carrying their casualty insurance with companies approved of by the workmen's compensation board, and that such employing concerns as could prove themselves to be financially responsible be permitted to carry their own insurance by way of reserve funds or other financial arrangement suitable to the board, was the request of Mr. Harold Robertson, of Messrs. Barnard, Robertson, Heisterman and Tait, who acted as spokesman for a deputation, which waited on Premier Brewster, composed of representatives of leading local companies and large employers of labor, as well as representatives of insurance companies which have been carrying on a casualty insurance business.

Mr. Robertson presented two petitions, one signed by 1,000 employers from all sections of the province, the other signed by 1,200 or more business men.

Mr. Robertson urged that the workmen's compensation act, like other measures of the kind in operation elsewhere, is as yet only experimental legislation and that sufficient definite data on the results of the operation of the principle elsewhere are not as yet available to warrant the government tying itself to any particular system such as incorporated in the measure passed at the last session of the legislature of British Columbia.

ROYAL BANK'S EXCELLENT PROGRESS

With the satisfactory achievements of the past decade to the credit of the Royal Bank of Canada, that institution continues its forward advances. In its latest report, the bank's assets are larger by \$55,000,000 and deposits have increased \$45,000,000.

The figures indicate the continued growth of the bank's business. The principal accounts of the bank compare as follows:—

	1916.	1915.
Total assets	\$253,261,427	\$198,299,123
*Liquid assets	121,127,663	84,894,462
Total current loans and discounts	124,864,658	106,552,634
Total call loans	32,448,031	18,982,459
Deposit in central gold reserve ..	6,500,000	3,000,000
Deposits bearing interest	140,862,199	117,519,330
Deposits not bearing interest ...	59,365,396	37,456,997
Profits for the year	2,111,307	1,905,576
Balance carried forward	852,346	676,472

*Equal 53 per cent. of liabilities to public.

Profits for the year amounted to \$2,111,307, equivalent to 17.87 per cent. on the average paid-up capital, against \$1,905,576, or 16.48 per cent. in 1915. With the balance brought forward from the previous year, the total amount available for distribution was \$2,787,779, and this was divided as follows: Dividends, \$1,417,207; transferred to officers' pension fund, \$100,000; written off bank premises account, \$250,000; war tax on bank note circulation, \$118,226; contribution to patriotic fund, \$50,000; leaving the balance to be carried forward to profit and loss of \$852,346.28.

One of the recent developments of the bank's business results from the chain of branches which it has built up in the British West Indies and other southern countries and this has been a material aid to the growing foreign business of Canada. The consolidation with the Quebec Bank goes into effect at the end of the year.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended December 15th:—

Aladdin Cobalt Mine, 44,600; La Rose Mine, 87,390; Mining Corporation of Canada, 87,000; Buffalo Mine, 64,934; McKinley-Darragh-Savage Mines, 76,716; Dominion Reduction Company, 154,000; total, 154,000 pounds, or 77 tons. From Haileybury—Pittsburg Loraine Co., 62,642 pounds.

The total shipments since January 1st, 1916, now amount to 29,998,252 pounds, or 14,999.1 tons.

The following are the ore shipments, in tons, from Cobalt Station, for the month ended November 30th:—

	Tons.
Buffalo Mine	31.6

CANADIAN CAR'S EXECUTIVES

Mr. W. W. Butler has been appointed vice-president and managing director of the Canadian Car and Foundry Company, Limited; and Mr. F. A. Skelton, secretary-treasurer, has also been elected a vice-president, at the request of Senator Curry, president, in order to strengthen the organization in connection with the large contracts the company is now undertaking at its various plants.

Senator Curry, during the past couple of years, has devoted himself almost entirely to the carrying out of the \$8,-

Mr. W. W. BUTLER,
Appointed Vice-President and Managing Director
Canadian Car and Foundry Company.

500,000-contract for the Russian government, and has made his headquarters continually in New York, having made and arranged frequent trips to Montreal in connection with the company's Canadian enterprise. This tremendous undertaking is now being successfully completed, and he will now take a good rest.

The appointments have been favorably received, Mr. Butler for many years past has been an outstanding figure in

Mr. F. A. SKELTON,
Elected Vice-President of Canadian Car and
Foundry Company.

the car industry of the country. Mr. Butler came to Canada to establish the Dominion Car and Foundry Company, and was at the head of it till its absorption by the Canadian Car and Foundry Company, Limited. Mr. Skelton was formerly connected with Canada Car Company, Limited, and has been closely associated with Senator Curry ever since the consolidation was effected. Mr. Skelton, to a large extent, has been

interested in the many financial affairs of the company and it is doubtless on account of the large contracts that are now being undertaken by both the Car Company and its chief subsidiary, the Canadian Steel Foundries, Limited, that his appointment is announced to the office of vice-president. Both Mr. Butler and Mr. Skelton have been most intimately associated with Senator Curry for a number of years and are in a position to carry out the company's policies in its various plants.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends, and Future Plans

Smart-Woods, Limited.—The directors announce the payment of all arrears in dividends on the preferred stock, amounting to 7 per cent. These, with the regular quarterly of $1\frac{3}{4}$ per cent., will be paid January 2 to shareholders of December 20. In September an extra $1\frac{3}{4}$ per cent. was paid.

Minneapolis, St. Paul and Sault Ste. Marie Railway Company.—This company has been authorized to issue \$1,500,000 $4\frac{1}{2}$ per cent. short-term notes for the purpose of buying more equipment. Officers of the company state that the money is necessary to provide equipment to handle larger shipments of copper and iron ore.

Howard Smith Paper Company, Limited.—Directors of the C. Howard Smith Paper Company have wiped out arrears on the preferred stock by the declaration of 7 per cent. for 1915 and $5\frac{1}{2}$ per cent. for the first three-quarters of 1916, payable on the 20th inst. This action follows the payment of 7 per cent. last month for 1914.

Riordan Pulp and Paper Company.—The management of the Riordan Pulp and Paper Company, Limited, is now in a position to state that the net profit of the Ticonderoga Pulp and Paper Company for the current year after allowing for bond interest, sinking fund and preferred dividends will exceed 100 per cent. on the outstanding common stock.

Imperial Tobacco Company of Canada.—The company's results for the year ended September 30th, compared with the company's returns of the previous year are as follow:—

	1916.	1915.
Net profits	\$2,756,619	\$2,313,425
Preferred dividends	481,800	481,800
Ordinary dividends	1,620,150	1,350,125
Surplus	654,669	481,500

Porto Rico Railways Company, Limited.—The comparative statement of earnings for November is as follows:—

	November, 1915.	November, 1916.	Increase or decrease.	Per cent.
For November:				
Gross	\$ 62,565.45	\$ 67,046.26	+ \$ 4,480.81	+ 7.16
Net	34,573.57	33,679.53	— 894.04	— 2.58
For Eleven Months:				
Gross	684,825.74	758,281.02	+ 73,455.28	+ 10.73
Net	341,536.80	373,765.85	+ 32,229.05	+ 9.44

International Milling Company.—For the year ended August the trading profits of the International Milling Company were \$661,915, as compared with \$411,199 for the year previous. The comparative figures are as follow:—

	1916.	1915.
Trading profits	\$661,915	\$411,199
Bond interest	42,515	44,000
War taxes	80,000	
Preferred dividend	70,357	70,357
Common dividend	297,000	280,000
Surplus	171,000	16,842

In 1915 a common stock dividend was paid of 15 per cent., amounting to \$120,000, from profit and loss.

Messrs. Horace Munroe, of Auburn, Me., and T. McAvity Stewart, Montreal, have been appointed directors of the Brompton Pulp and Paper Company.

Prince Albert, Sask.—December 11—Windsor Hotel. Loss, \$50,000; Mr. D. K. Banning's stables. Loss, \$2,000.

Summerside, P.E.I.—December 13—Conflagration. Loss, \$325,000. Sinclair and Stewart lost stock valued at \$150,000. The firm occupied two buildings, one owned by Neil Sinclair, valued at \$25,000; the other by Otto Crabbe, worth \$1,500. Total insurance, \$143,000. Hon. John J. A. McNeil's warehouse with contents, barn, blacksmith shop, \$8,000; building occupied by several tenants, \$5,000. Tenants' loss as follows: J. Steele, barber, \$500, stock; A. Ching, grocery, \$3,000, stock; A. Rogers, agent, \$500, furniture, etc.; Arnott and Stavert, agents, \$500, furniture, etc.; H. H. Beer, stock of boots, \$3,000. J. E. Dalton's store and Mrs. McLellan's bookstore. Loss, \$20,000. Neil Sinclair, building, occupied by W. B. Mills, dry goods. Loss, \$5,000. C. McCullough, tailor, building and stock, \$4,000. C. Milligan, tailor, building and stock, \$5,000. J. H. Locke, grocer; R. Silliphant, butcher, stock, \$3,000; building owned by C. C. Gardiner, \$2,000. Thos. Andrews, agricultural implements, etc., warehouse and stock, \$12,000. F. W. Strong and Company, general stock, warehouse and stock, \$33,000. H. P. Strong, building occupied by C. Lafferty, barber; H. Strong, lawyer; E. W. Strong, lawyer; W. J. Lidstone, store, \$25,000. P. Bowness, photograph studio, undertaking rooms, residence, occupied by himself, store by J. Tadton, butcher. Total loss, \$1,800. John McInnes, tinshop and tools, \$1,600; Mrs. Maude Murphy, double tenement house, \$2,500; Johnson Raynard, residence, \$1,000; A. S. Philips, furniture, \$500; Royal Bank of Canada, damaged, \$500; barn owned by H. Holman, damaged, \$200. The insurance on the property burned and damaged is distributed over the following companies: Royal Exchange, \$13,250; Acadia, \$10,550; General of Paris, \$15,000; Western, \$8,000; Norwich Union, \$11,000; Palatine, \$10,000; Northern, \$4,500; Scottish Union and National, \$3,000; Royal, \$4,500; Law, Union and Rock, \$8,000; Phoenix of Paris, \$5,000; Nova Scotia, \$1,000; Home of New York, \$1,400; Yorkstone, \$13,000; National of Hartford, \$12,000; Continental, \$11,000; General of Perth, \$8,500; Caledonian, \$6,500; British-American, \$6,000; Quebec, \$3,500; St. Lawrence Underwriters, \$1,000; Fidelity-Phenix, \$2,700; Queen, \$6,000; Commercial Union, \$2,000; North British and Mercantile, \$7,000; Union Assurance Society, \$6,600; Phoenix of London, \$6,500; Atlas, \$5,000; Guardian, \$6,500; Springfield Fire, \$2,000; Canadian Fire, \$5,000; Phoenix of Hartford, \$2,500; Canada Accident, \$5,000; British Crown, \$6,000; Anglo-American, \$1,100. Another fire occurred in Summerside on Saturday, December 16th, \$12,000 damage being done. George Godkin, jewelry; Percy Enman, druggist; Harry Allen, dentist, were burned out. Bruce McKay and Company's store was slightly damaged. Three men were arrested, charged with incendiaryism.

Watford, Ont.—December 8—Mr. Davis' three houses, Church Street; insured.

Wingham, Ont.—November 28—Mr. T. Wheeler's barns, Turnberry township.

Winnipeg, Man.—December 4—Woodbine Hotel. Loss, building, \$20,000; contents, \$25,000. Fire started in furnace-room.

SASKATOON KEEPS MOVING

Modern in all respects the thriving city of Saskatoon keeps well in the van of western progress. The municipal annual report recently issued is favorably regarded in financial circles. A new booklet, circulated by the board of trade, points out many opportunities offered by this centre, "from which to-day the commerce of central and northern Saskatchewan surges in an incessant stream over five great bridges." Commissioner F. MacLure Sclanders will furnish applicants with a copy of an attractive booklet, descriptive of Saskatoon and district, which is well illustrated, or any specific data required by commercial and manufacturing interests.

BANK OF COMMERCE REPORT

One of the most reliable indications of Canada's banking and business position is the annual report of the Canadian Bank of Commerce. This strong institution, with its widespread organization, reflects in its latest financial return a favorable position throughout the Dominion. Its figures show the growth accruing during the past twelve months, the totals being as follow:—

	1916.	1915.
Net profits	\$ 2,439,415	\$ 2,352,935
Assets	250,421,840	288,427,579
Liabilities to public	258,598,176	220,932,234
Liabilities to shareholders ..	29,829,403	29,489,605
Total deposits	229,896,152	194,523,078

Assets as shown above are greater by \$38,000,000, and total deposits were augmented by nearly \$35,000,000.

From the official return it is seen that the profits of \$2,439,415 with the balance of \$461,892 were allotted as follows:—Dividends and bonuses, \$1,800,000; circulation tax, \$147,288; transferred to pension fund, \$80,000; patriotic and other subscriptions, \$71,700; balance carried forward, \$812,319.

An increase in cash assets of the bank from \$39,900,000 to \$46,291,000 is shown, of which total \$6,000,000 represents deposits in the central gold reserve. The aggregate quick assets have grown from \$101,173,000 to \$129,341,000 in 1915. The aggregate of the liquid reserves on the latter date was approximately 56 per cent. of the deposit liabilities and just one-half of the total liabilities to the public. The increase in the item of "British foreign colonial public securities and Canadian municipal securities from \$1,719,000 at the end of 1915 to \$17,282,000, reflects the bank's share in furnishing the silver bullets necessary for the successful conduct of the empire's war. Included in this item no doubt are the purchases of war loan bonds and the credits advanced by this and other Canadian banks to the British and Canadian governments and to the imperial munitions board.

Special war conditions have been met in a commendable manner by the Canadian Bank of Commerce, and its usual banking business has been conducted on the careful and efficient lines of normal times.

INVESTMENT NOTES

Dominion Glass Company.—At the annual meeting it was stated the net profits were slightly above \$454,000, as compared with \$353,387 in 1915, and \$625,748 in 1914. The balance at credit of profit and loss is in excess of \$591,000, of which \$102,328 was added, representing the surplus from the past current year's profits. Mr. C. B. Gordon was elected president, Mr. Abner Kingman vice-president. The other directors were re-elected, as follow:—T. B. Macaulay, W. McMaster, D. A. Gordon, Hon. Lionel Guest, Sir Wm. Wiseman, Bart., and Frank W. Ross. The vacancy on the board caused by the death of Mr. G. A. Grier was filled by the appointment of Mr. A. H. Grier, a son of the deceased president.

Asbestos Corporation of Canada.—The following are the company's figures for the ten months of the fiscal year ended October 31st last:—Net profits, \$437,318; less expenditure for renewals and betterments, \$146,575; bond interest, \$125,000; leaving a surplus for ten months, \$165,743, which with surplus at close of previous year of \$284,626, gives a surplus as per balance sheet of \$450,369.

Nipissing Mines Company.—The financial report, as of December 16th, shows cash on hand, \$1,231,776; value of bullion and ore in transit, \$458,367; value of ore on hand, in process, and bullion ready for shipment, \$591,362; making a grand total of \$2,281,505.

The directors of the Nipissing Mines Company declared an extra dividend of 5 per cent., in addition to the usual quarterly dividend of 5 per cent., payable January 20th, to stock of record December 30th. This is the same amount as was paid October 20th last. Books close December 30th, and re-open January 18th.

COPIES OF THE MONETARY TIMES WANTED

Copies of *The Monetary Times* of December 15th last are wanted. Will those subscribers not desiring to file this issue, kindly send their copies to *The Monetary Times*, 62 Church Street, Toronto. In exchange, a month's subscription will be allowed.

CANADIAN DISPUTES ACTS IS EFFICIENT

Of 212 Labor Disputes Referred Under the Act All But 21 Were Ended or Averted

Statistics in regard to the operation of the Canadian industrial disputes investigation act, as furnished to the United States Department of Labor by Mr. F. A. Acland, deputy minister of labor for Canada, and covering the period 1907 to 1916, show that during this period of over nine years some 212 disputes were referred under the act, and of these only 21 were not averted or ended.

The 99 per cent. efficiency of the Canadian industrial disputes investigation act has prompted the Canadian minister of labor to prepare a revision of the act to meet certain objections found in operation. One improvement will reduce the length of time for granting or refusing a board from fifteen to ten days. Where both parties agree to accept the recommendations of the board appointed to investigate the dispute, the same will be considered an agreement between the parties. Industrial agreements may be registered—the same to be effective for not more than five years. Again, a secret vote by ballot is to be required before a strike. When industrial agreements are registered, strikes and lockouts in public utility industries are forbidden, but either party may be relieved from the agreement by the report of the board.

Of the present act, the Bulletin of the United States Department of Labor says:—

"The Canadian industrial disputes investigation act applies to coal mines and metal mines, public utilities, including municipal service corporations, and transportation of all kinds, including occupations subsidiary thereto, and makes it unlawful for employers in these industries and occupations to lock out their workmen or for employees to strike until an investigation of the dispute has been made and a report published by a board appointed for the particular case. The purpose of the act is to prevent and not prohibit strikes and lockouts; it does not aim at compulsory arbitration or to force men to work against their will after all chance of amicable settlement has disappeared.

"After the report of the board has been issued the parties may refuse to accept its findings and start a strike or lockout. This board is appointed, upon application by either side, by the minister of labor or his deputies, and consists of three members, one a representative of the employers, one representing the employers, and a third appointed by these two, or, if they fail to agree, by the government. The board tries, by conciliation, to bring the parties to an agreement, and, if successful, reports its findings; if it is not successful, its report describes the conditions that caused the dispute, usually recommending what appear to be fair terms of settlement. If the parties in the controversy are then unable to agree they may resort to the last measures of industrial warfare."

Statement to The Monetary Times

By BARON SHAUGHNESSY, Pres. of the Company

See The Monetary Times Annual

JANUARY 5, 1917

PRICE 50c

ADULTERATION IN MAPLE SYRUP

"In most of these cases of fraudulent sale, the manufacturer's label distinctly claims the article to be maple syrup; and I have noted the presence of these words on the label where such label has been seen by myself or by the analyst who did the work of analysis." Thus states Dr. A. McGill, Canada's chief analyst, in his recent report. Some 209 samples were purchased as maple syrup by inspectors during the current year.

Of this number, 162 samples were found to be genuine, in the sense of meeting standard requirements for maple syrup. Six samples met these minimum requirements within such narrow limits as to justify suspicion of their genuineness, but these were passed, thus giving a total of 168 samples as probably genuine, being 80 per cent. of the total collection.

Forty-one samples are adulterated, in the sense of being mixtures of cane sugar syrup with maple syrup, but sold as maple syrup.

The inspectors were instructed to demand maple syrup, and the samples now reported were supplied by the vendors as answering this demand. In two instances the vendor, after making sale, and discovering that the purchaser was an officer of the inland revenue department, stated that he did not claim the article sold to be pure maple syrup. In one of these cases the manufacturer's label upon the container claims that the article is maple syrup; in the second case the label bears the words "pure m. syrup," which is undoubtedly intended to make the purchaser believe that he is being served with maple syrup.

There can be no excuse for offering as maple syrup an article which is a mixture, as in these cases, suggests Dr. McGill. The article may be, and in most cases is, a desirable and nutritious food; but it should be placed upon the market under conditions which would correctly inform the purchaser as to its character. It is noteworthy that the uttering of the surrogate article appears to be entirely in the hands of a small number of manufacturers in Montreal and Toronto. The great proportion of samples purchased in localities where maple syrup is recognized as an established farm industry, as in New Brunswick and Quebec, are found to be genuine; and there can be no doubt that a real injury is done to these provinces when the markets offered by our western provinces and our larger cities are supplied by imitations of maple syrup which profess to be the genuine article.

In further comment the chief analyst states: "A correspondent asks information as to the truthfulness of statements made by certain manufacturers of maple syrup, who claim that their product is made from maple sugar, and not directly from maple sap, and that, for this reason, it fails to meet the standards established by the inland revenue department for maple syrup. In other words, these manufacturers assert that their syrup is a purer article than maple syrup made directly from maple sap, and that its purity causes it to fail to respond to government standards.

"The inland revenue department has fully established the fact that any sample of genuine maple sugar, when dissolved in water to the legal consistency of maple syrup, will produce a syrup which fully meets the legal standards for maple syrup.

"It follows that the statements made by manufacturers above referred to are without foundation in fact; and the natural inference is that such claims are made for purposes of fraud, and with intent to secure sale for an article which is manufactured in whole or in part from sugar which is not maple sugar."

THOUSAND MILES OF RAILS FOR FRANCE

From 1,200 to 1,500 miles of railway trackage is needed from Canada for immediate use in France. The Dominion government roads, the Canadian Pacific, Grand Trunk and Canadian Northern are co-operating to meet the sudden demand. Already 300 miles of government railway sidings are in process of being taken up and shipped to France.

The Imperial government has asked the Dominion to help in solving the difficulties of the French railway situation, both in the relief of port congestion and the movement of guns and munitions behind the lines.

The munition work on which the Canadian steel mills are at present engaged precluded any possibility of early delivery of rails, tie-plates, bolts, etc., from those quarters, and it was evident that the situation could be properly and promptly met only by the taking up of Canadian track.

WESTERN CROP ACREAGE

Wheat Required Area Double That of Oats, 10 Times That of Barley and 21 Times Greater Than Flax

A preliminary statement of the areas sown to the principal field crops in the provinces of Manitoba, Saskatchewan and Alberta, for the year 1916, according to the returns of the census and statistics office, taken during the past summer. The returns are complete with the exception of those from 18 subdistricts out of a total of 1,207. For Manitoba the incomplete returns number 1 out of 359; for Saskatchewan 12 out of 506; and for Alberta 5 out of 442. The totals for 1916, with comparative figures for 1911 and 1906, are as follow:—

Acreage of Principal Field Crops of Manitoba, Saskatchewan and Alberta, 1906, 1911, 1916.

Field crops.	1906.	1911.	1916.
Three Provinces—	Acres.	Acres.	Acres.

Fall wheat	83,498	305,788	42,238
Spring wheat ..	140,432	1,334,186	2,529,432
All wheat	223,930	1,639,974	2,571,670
Barley	108,175	164,132	321,482
Oats	476,511	1,221,217	2,030,510
Rye	7,143	14,443	19,027
Flax	6,484	107,473	94,333

The 1915 figures for acreages as compiled to-date are somewhat higher than those of 1916 in the older sections of these provinces, but are lower in the northern and more recently settled districts. The total area under spring wheat in Manitoba in 1915 was 2,748,921, compared with 2,687,439 in 1916. In Saskatchewan the acreage under spring wheat showed little change between 1915 and 1916, being 8,425,632 in the former year and 8,427,060 in the latter. In Alberta an increase from 2,112,912 acres under spring wheat in 1915 to 2,529,432 in 1916 is shown.

The total acreage under these five crops in all three provinces was 8,040,981 in 1906, 17,100,477 in 1911 and 22,814,591 in 1916. Thus there was a gain of 9,059,496 acres between 1906 and 1911 and of 5,714,114 acres during the past five years.

Over \$1,640,000 has been contributed to the British Red Cross Fund by the municipalities of the province of Ontario this year. The books of the fund will be closed on January 15th. All contributions must reach the treasurer before that date in order that they may appear in the report. Contributions received by the treasurer, Hon. T. W. McGarry, after January 15th, will be acknowledged and forwarded to the British Red Cross headquarters from time to time.

CANADA MUST DEVELOP NEW MARKETS

As shown by the accompanying diagram, Canadian exports are finding their way chiefly to Great Britain and allied countries. The United States, however, remains one of Canada's best customers. It is quite evident that our foreign market is confined at present to certain countries which will no doubt always be buyers of Canadian products, but there is need of new and wider fields. For instance, it is reported that Manchuria needs thrashers, and that Australia, needs hardware, both of which are produced in Canada. These are but instances of enquiries from abroad for articles of merchandise which Canada should be prepared to supply. Canada's immediate duty is to furnish everything possible for the prosecution of the war, but it is also imperative that some regard be had for preparedness after the war. This suggestion is made in the monthly letter of the Canadian Bank of Commerce.

The exports from Canada during twelve months ending August, 1914, 1915 and 1916, are as below:—

	1914.	1915.	1916.
Australia	\$ 5,675,842	\$ 5,234,659	\$ 8,255,242
British Africa	4,814,015	4,682,805	4,895,390
British East Indies..	661,002	729,936	1,433,030
British Guiana	629,379	844,768	1,438,763
British West Indies..	5,075,849	4,346,551	5,071,336
Newfoundland	4,841,419	4,170,793	6,046,181
New Zealand	2,075,336	2,817,373	3,736,519
United Kingdom ..	218,254,968	251,021,871	646,504,836
Other British	1,664,773	2,510,318	4,648,271
Argentine Republic ..	1,267,590	1,256,803	2,170,331
France	5,772,422	27,136,345	42,023,926
Germany	4,415,467	9,864	
Japan	1,261,275	1,011,265	1,170,927
United States—			
Merchandise	189,143,410	186,858,984	247,984,238
United States—			
Coin and bullion..	19,890,193	94,705,428	225,467,818
Other foreign	23,200,651	12,311,481	39,068,039

Note.—Owing to the great difference between the amounts of the exports to different countries it has been found neces-

sary in the diagram to increase the width in the case of the United Kingdom and the United States, but in every case the area remains proportionate to the amount of the exports.

Exports of coin and bullion to the United States are shown separately, because during the earlier part of the war they represent the return of gold imported from the United States during the prevalence of abnormally high rates for sterling exchange, and since then they consist of gold produced in other countries and in transit through Canada.

This Investment Guaranteed

The security of our Capital and Reserve, in addition to a first mortgage on improved real estate, is the exceptionally strong guarantee behind our "Guaranteed Investments." This security pays 5% interest, computed from date money reaches the Corporation's office, and is payable half-yearly. Sums of \$500 and upward accepted. Write us or call at office for full particulars of this investment plan.

Winnipeg, December 1st, 1916.

FUTURE OF CAPITAL AFTER WAR

Economists Believe that for Some Time After Peace Money Rates Will Be High

Frequent allusions are made to the future of capital after the war, but it is a treacherous subject, and has been tackled by only a few economists bold enough to venture an opinion where conditions have been so unprecedented as during the past two years. At the same time, as the Wall Street Journal says, it is a very important question, and will become more so as the end of the war draws nearer.

In a recent address Professor Sprague, of Harvard University, said that during a period of some fifteen years preceding the war interest rates manifested a slight, but fairly constant rise in tendency. "In the opinion of most economists," he said, "this upward trend was due to advancing prices throughout the world, which in turn were a result of the large increase in the supply of gold. The rise in commodity prices has continued rapidly since the beginning of the war, and a further advance may be expected not only during its continuance, but also for a short period after its close, when the initial readjustments are being made. In the belligerent countries credits have been expanded upon a stationary or even shrinking gold foundation. For many years after peace the new gold produced will be used to strengthen the credit structure rather than as a basis for future expansion."

Canadian Economist's Opinion.

Another economist who has ventured a prediction on this point is Professor James Mavor, of Canada. He also thinks that interest rates must remain high for a number of years. "If the demand for government purposes connected with the war and its consequences are increased very largely during the next three years—and this is highly probable—we shall have rates for money beside which present rates must appear petty. Practically all the annual increments of credit will be absorbed by the governments, and capital for commercial and industrial purposes must be exceedingly scarce and dear."

Professor Mavor, however, goes on to say that it lies within the power of governments to check any excessive inflation of interest rates. It is the clear duty of all governments, he points out, to refrain from bringing into the market for capital any new demands which can be avoided. All public works which can be postponed ought to be. In short, to facilitate the accumulation of capital by refraining from drawing upon it is the only sound means by which governments can secure a decline in the rate of interest.

Will Differ in Various Countries.

Discussing this question of capital after the war, the London Economist, while accepting in a general sense the view that interest rates will remain high after the war, is of the opinion that "conditions will differ very considerably in different countries, according to the manner in which the war has been financed. Great Britain has suffered little destruction of real capital and her borrowing has been conducted on the sound basis of an adequate revenue from taxation to meet interest on war indebtedness. Her credit will, therefore, emerge from the war sounder and stronger than ever. A gradual reduction in the interest paid on British government loans would speedily be reflected by a lowering of the standard of interest on capital borrowed for commercial and industrial purposes."

Without going too extensively into this matter, the question of the price of capital after the war must not overlook the peculiar feature of the present struggle. It not only means a survival of the fittest in Europe, but it has developed a very intense struggle throughout the great nations of the world in international trade. The United States has loomed up as a great factor in the after-the-war struggle. It is fully realized among all financiers that no sooner will the sword be sheathed in Europe than every attention will be directed to the rehabilitation of trade, as that has been found in this war to be the secret of a nation's success.

Hence, what will assert itself after the war is great competition between the banking forces of the great nations to capture the trade of the world. And competition in banking means the offering of cheap money. The United States federal reserve system can contribute billions of dollars to this expansion of credit. About a month ago it was shown that the

world's note circulation had increased \$9,800,000,000, and that under this has been accumulated \$2,800,000,000 of additional gold by the various countries responsible for the increased circulation. This is a gold reserve of 28.5 per cent., which indicates not such a great inflation as to preclude the extension of banking accommodation in commercial lines, provided, of course, the war comes to an end within a reasonable time. So far, however, banking competition throughout the world after the war is a well-recognized factor. It is a factor that was not developed during previous wars, and this is why the after effects of the present struggle are likely to upset former recognized theories.

HAIL LOSS RATIO, 132 PER CENT.

Companies Had Bad Year in Saskatchewan—Income and Loss Returns

According to the reports filed with Mr. Arthur E. Fisher, Saskatchewan's superintendent of insurance, by the companies engaged in the hail insurance business during 1916 in Saskatchewan, the hail loss ratio approximates on the average 132 per cent. of the premium income. When to this percentage is added the underwriting expense, which covers commissions, adjustments and general office expenditure and which averages 30 per cent., it will be seen at a glance how disastrous for the stock companies has been the hail season of 1916. In short, the companies have not only paid out the total amount of money received by way of premiums, but they have also paid from their reserves an additional amount equal to 62 per cent. of the 1916 premium income.

Income and Losses.

The following tabulated report shows the gross income and gross losses of each company operating in the province this year. Many of the companies accepted notes in payment of premiums and in this schedule the note premium has been considered on the cash basis:—

	Premiums.	Losses.
St. Paul Fire and Marine	\$ 54,802	\$ 86,251
Middle West	39,662	49,690
Excess	102,437	130,739
Acadia Fire	31,860	66,593
Canadian Indemnity	82,582	124,728
Canada Hail	72,542	95,127
Canada National	95,685	193,055
Rochester Underwriters	20,909	29,243
British-America	48,176	64,539
Winnipeg Fire Underwriters	3,150	3,887
Nova Scotia Fire Underwriters	9,657	11,686
Home	102,646	176,608
Canada Security	70,898	83,934
British Crown	193,517	213,330
Canada Weather	21,420	17,391
American Central	18,155	49,823
Connecticut Fire	13,553	24,312
Hartford Fire	96,360	112,592
New York Underwriters	26,192	30,023
Great North	60,474	56,780
Northwestern National	111,751	114,692
Dominion Fire	37,282	26,439
Glens Falls	80,987	76,827
Westchester Fire	23,143	34,209
	\$1,417,853	\$1,872,408

Severe Hail Season.

In compiling the above figures no account has been taken of the matter of reinsurance, hence official figures, which will be obtainable at a later date, will show a large difference in the actual loss sustained by each company, although the gross amount of loss will remain practically the same.

The experience of the companies in former years as compared with 1916 gives some idea of the severity of the hail season of this year:—

Year.	Premiums.	Losses.
1913	\$ 783,194	\$ 485,305
1914	747,838	173,443
1915	1,363,001	438,619
1916	1,417,853	1,872,408

The Hamilton Provident and Loan Society

DIVIDEND No. 91

Notice is hereby given that a Dividend at the rate of Eight per cent. per annum has been declared for the half year ending December 31st, 1916, upon the paid-up Capital Stock of the Society, and that the same will be payable at the Society's Head Office, Hamilton, Ontario, on and after Tuesday, the 2nd day of January, 1917.

The Transfer Books will be closed from the 15th to the 31st of December, both days inclusive.

By order of the Board.

D. M. CAMERON, Treasurer.

Hamilton, November 29th, 1916.

A TIME-TRIED INVESTMENT

This is not only one of the largest and strongest, but also one of the oldest of the Canadian financial institutions. It has a record of more than sixty years of steadily increasing success, stability and strength. In this time an experience has been gained which entitles its Directors and Officers to be considered experts in the selection of choice, safe securities for the investment of its funds.

Its record, experience and strength constitute it an unusually safe Depository for Savings, and its Debentures have long held a very high place in the estimation of those conservative, cautious investors, both in Great Britain and Canada, who prefer absolute safety to a high rate of interest. In Canada they are a LEGAL INVESTMENT FOR TRUST FUNDS, and are accepted by the Canadian Government as the Deposits required to be made by Insurance Companies, etc.

We shall be glad to send you a specimen Debenture, a copy of our last Annual Report, and full particulars on receipt of your address. Write for them to-day.

CANADA'S LONG-TERM LOANS

Nation Has No Floating Liability, Says Sir Thomas White

Firm belief in the strong financial position of Canada and gratitude to the Canadian people for their patriotic support of the two war loans floated by the government is expressed by Sir Thomas White in an interview with the London Times.

The financial policy adopted had been based on the assumption that the war would be a long one. This policy had, from the beginning, to make long-term issues of securities rather than to rely on short-date borrowings which might have to be repaid at times when fresh borrowings on an increasing scale would be required. As a result of this course, Canada had no floating liability, her indebtedness having been postponed ten or fifteen years. Furthermore, this policy had tended to make these issues a success because of the speculative element of probability of appreciation after the war of the securities involved.

No Disturbance to Banks.

Sir Thomas thanked the Canadian people for the support given the two war loans floated in the country, both of which had been doubly subscribed. These loans had caused no disturbance in Canadian banks because there had been left on deposit by the government the amount withdrawn from it by subscribers to war loans and to avail itself of the credits thus established as required. The money had been spent in Canada, and the financial situation had improved until the government had been able, in addition to meeting Canada's war expenditure in the Dominion, to arrange for advances of two hundred millions to the imperial government to assist in meeting its Canadian expenditures.

It has been the aim of the government to cut down its peace-time expenditures to counteract war expenses, and so far this has been more than accomplished. Sir Thomas spoke appreciatively of the assistance he had received from the banks and financial institutions and from the Canadian press without exception. He reviewed the remarkable reversal of trade conditions whereby an adverse trade balance of 300 millions had been turned into a favorable one of 400 or 500 millions for the present year. Increased production, both in munitions and agriculture, had helped to account for this. The policy, which the minister regards as now essential for Canada, as well as for the United Kingdom and the Empire generally, is:—

Canada's Essential Policy.

1. National organization, which will provide the maximum of man-power for the military forces and requisite labor for the vital industries engaged in the production of munitions, supplies, shipping, food, and other necessities of military and civil life.

2. Increase in such production by greater effort and increased efficiency on the part of all engaged in these industries.

3. National economy in food, dress, and personal expenditures generally. Imports other than necessities of life or required for war purposes should be discouraged in order that the exchanges may be maintained and the national wealth conserved for the State.

4. Increased national saving, which will provide funds to take up government securities issued from time to time to meet war expenditure.

5. Organization of the special technical, financial and business ability of the Empire to assist the several governments in the great administrative departments principally concerned with the conduct of the war.

Comment of Times.

"The winning of the war is the only question before the Empire to-day," said the finance minister. "It is the supreme duty of every citizen to consecrate his full powers, capabilities and resources to this great and paramount purpose."

Commenting on Sir Thomas White's statement, the London Times declares it to be the "statement of a man who sees things from the standpoint of the whole Empire, not merely from that of one dominion. It is," declares the Times, "an excellent corrective of a too-prevalent fallacy.

There has been a tendency here to assume that Canada's part in the war is the part of a helper of Great Britain. It has been due, perhaps chiefly, to the gratitude that has been felt for what she has done. Responsible Canadians, like Sir Thomas White and the Canadian officer, whose letter we published the other day, do not see it in that light. They are disposed to resent—though with a proper and not a querulous resentment—the constant talk in this country about 'help' from Canada. Canada, they ask us to realize, is not 'helping' Great Britain. She is fighting a war which is just as truly her war as ours.

"Resolute and uncompromising language of this kind from a Dominion minister, backed, as it is being backed, by equal resolution in action, is a sign of the times. It reminds us that Great Britain is no longer, in anything but sentiment and tradition, the 'mother country' of the Empire. The household of the British dominions is a household of grown men. They have their own part to play in the world; they are conscious of their strength; they have shown that they are quite able to hold their own in the man's quarrel that is this war."

B. E. WALKER, President.

JOHN AIRD, General Manager.

Report of the Auditors to the Shareholders of The Canadian Bank of Commerce.

In accordance with the provisions of sub-sections 19 and 20 of Section 56 of the Bank Act, 1913, we report as follows:—

We have audited the above Balance Sheet and compared it with the books and vouchers at Head Office and with the certified returns from the branches. We have obtained all the information and explanations that we have required, and are of the opinion that the transactions of the Bank which have come under our notice have been within the powers of the Bank.

We have checked the cash and verified the securities representing the investments of the Bank at its chief office and principal branches at a date other than, and in addition to, the verification at 30th November, 1916, and found that they were in agreement with the entries in the books of the Bank relating thereto.

In our opinion the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the affairs of the Bank according to the best of our information and the explanations given to us, and as shown by the books of the Bank.

T. HARRY WEBB, C.A., of Webb, Read, Hegan, Callingham & Co.,	} Auditors.
JAMES MARWICK, C.A., of Marwick, Mitchell, Peat & Co.,	

CANADA'S IRON AND STEEL INDUSTRY

Reflected in Canada's larger production of iron and steel, are the output of the munitions industry, and the larger domestic requirements of last year, together with exports of billets and wire. Mr. J. McLeish, B.A., chief of the department of mines, division of statistics and mineral resources, has compiled the following table. The summary of iron and steel statistics, 1914-1915, are as below:—

	1914. Short tons.	1915. Short tons.
Iron ore shipped	244,854	398,112
Canadian iron ore charged to blast furnaces	182,964	293,305
Imported iron ore charged to blast furnaces	1,324,326	1,314,957
Iron ore charged to steel furnaces.....	37,686	74,872
Pig-iron made	783,164	913,775
Pig-iron and ferro-alloys exported	19,063	26,545
Pig-iron imported	78,680	47,842
Ferro-alloys made	7,524	10,794
Ferro-alloys imported	22,147	13,758
Pig-iron and ferro-alloy consumption ..	872,452	959,254
Pig-iron used in steel furnaces	619,030	747,834
Steel ingots and castings made	828,641	1,020,336
Steel rails made	428,225	232,411
Canadian coke used in iron blast furnaces	330,269	578,743
Imported coke used in iron blast furnaces	590,902	486,022
Iron and steel imported	878,179	771,007

CANADA'S ELECTRIC POWER PRODUCERS

The growing and somewhat insistent demand for power on the part of the municipalities of Ontario for industrial and domestic purposes has brought the question of a reduction of the export quantities granted by license to the hydro-electric companies at Niagara Falls before the department of inland revenue for revision, states Mr. J. V. Vincent, in his annual return. The electricity exportation act provides that licenses to export "shall be revocable upon such notice to the licensee as the governor in council deems reasonable in each case." Under the circumstances a yearly reduction in the quantities to be exported might be deemed a reasonable method of putting an end to the export.

Electrical standardizing laboratories have been established at Ottawa and Vancouver, where the substandards used by the department's inspectors are adjusted and standardized periodically, also such electrical instruments as may be presented by the general public. The equipment for another similar laboratory at Winnipeg has been provided and awaits suitable accommodation for the installation thereof.

The revenue collected from weights and measures inspection was \$112,136; gas and meter inspection, \$46,034; electric meter inspection, \$70,051; making a total from this source of \$228,221.

The amount of electrical energy produced for export and consumption in Canada for the year ended March 31st, 1916, is as follows:—

Name of contractor and place of business.	Units produced for export.		Units produced for use in Canada.		Total output of generating station or other source.	
	K.W. Hours.	H.P. Years.	K.W. Hours.	H.P. Years.	K.W. Hours.	H.P. Years.

INSURANCE PAID BY WIRELESS

Probably the first case of the wireless telegraph being employed to transmit insurance funds to a foreign country is announced by the Prudential Insurance Company of America. The war and the danger of transmission through the customary channels, as well as the immediate need of the beneficiary, made the wireless course necessary, both as a means of safety and speed.

In August, 1896, in Amsterdam, New York, Gertrude E. Orth, took out a twenty-year Prudential endowment policy for \$1,000. Soon afterward she moved to Germany. The policy matured this year, and with the accumulated dividends amounted to \$1,344. The beneficiary desired the money, and the Prudential was anxious to pay it.

The policy proceeds were deposited with the National Bank of Commerce, in New York City, with instructions to notify its correspondent at Frankfort-on-the-Main, Germany, that it had the money for Mrs. Orth. The notification was by wireless and was accepted as cash by the German bank. Mrs. Orth was told and secured her money. She got it in German marks, which, because of their depreciation in value, made the policy proceeds worth about one-third more to her than would have been the case prior to the war.

ONTARIO CHATTEL MORTGAGES

The Ontario provincial government returns of the total number and amount of chattel mortgages on record and undischarged on December 31st, 1915, compared with the past five years' record are as below:—

	Chattel mortgages against all occupations.		Chattel mortgages against farmers.	
	To secure existing debt.	For future indorsation.	To secure existing debt.	For future indorsation.
	No.	Amount.	No.	Amount.
1915	12,010	\$12,432,780	49	\$ 699,942
1914	10,881	28,164,771	60	6,365,509

AUDITORS' CERTIFICATE

We Report to the Shareholders of The Royal Bank of Canada:—

That in our opinion the transactions of the Bank which have come under our notice have been within the powers of the Bank.
That we have checked the cash and verified the securities of the Bank at the Chief Office at 30th November, 1916, as well as at another time, as required by Section 56 of the Bank Act, and that we found they agreed with the entries in the books in regard thereto. We also during the year checked the cash and verified the securities at the principal branches.

That the above Balance Sheet has been compared by us with the books at the Chief Office and with the certified returns from the Branches, and in our opinion is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given to us and as shown by the books of the Bank.

That we have obtained all the information and explanations required by us.

JAMES MARWICK, C.A. } Auditors.
S. ROGER MITCHELL, C.A.
of Marwick, Mitchell, Peat & Co.

Montreal, Canada, December 18th, 1916.

Montreal, 18th December, 1916.

THE BANK OF OTTAWA

FORTY-SECOND ANNUAL MEETING

The Forty-second Annual Meeting of the Shareholders of the Bank of Ottawa was held at its banking house in the City of Ottawa, at 3 p.m. on Wednesday, the 20th inst.

The President, Hon. GEORGE BRYSON, in the chair.

Report of the Directors

The Directors beg to present the Forty-second Annual Report, showing the result of the Bank's business for the year ended 30th November, 1916:—

Balance at credit of Profit and Loss Account, on 30th November, 1915, was.....	\$246,304.69
Profits for the year ended 30th November, 1916, after deducting all expenses of management, and making necessary provision for interest due to depositors, unearned interest on current loans and all bad and doubtful debts	591,205.70
	<u>\$837,510.39</u>
Dividends Nos. 98, 99, 100 and 101, being at the rate of 12% per annum.....	480,000.00
Special Reserve for contingencies	200,000.00
War Tax	39,330.75
	<u>719,330.75</u>
Balance carried forward at credit of Profit and Loss Account	<u>\$118,179.64</u>

It is with the deepest regret that the Directors have to record the death of Mr. David Maclaren, who had been on the Board for twenty-four years, during seven of which he filled the position of President.

Mr. Alexander Maclaren, of Buckingham, was elected to fill the vacancy on the Board.

During the year a sub-office was established at Brownsburg, Que.

The following branches have been closed: Danforth Avenue, Toronto; Keewatin, Ontario; Broad Street, Regina, and the sub-office at Iroquois Falls, Ontario.

The only expenditure on account of premises is the rebuilding at Cochran, to take the place of the one destroyed by fire on July 29th last.

A By-law will be submitted, increasing the number of the Directors from nine to ten, with a view to electing Mr. George Burn to the Board in order that his connection with the Bank may be maintained.

The Head Office and Branches have been inspected during the year. All of which is respectfully submitted.

GEORGE BRYSON, President.
D. M. FINNIE, General Manager.

After remarks from the President and General Manager, the adoption of the report was moved and seconded by the President and Vice-President and carried unanimously.

A motion appointing Messrs. A. B. Brodie and D. McK. McClelland, members of the firm of Price, Waterhouse & Company, auditors for the current year, and fixing the remuneration of these auditors at a maximum of \$5,000.00, was passed.

A By-law was passed increasing the number of Directors from nine to ten.

The Scrutineers reported that the members of the old Board had been re-elected, and that Mr. George Burn, formerly General Manager, had been elected a Director. At a meeting of the newly elected Directors, held subsequently, the Honourable George Bryson was elected President, and Mr. John B. Fraser, Vice-President, for the ensuing year.

To the Shareholders of the Bank of Ottawa,

We have examined the books and accounts of the Bank of Ottawa at its Chief office and at five of its principal branches, and have been duly furnished with certified returns from the remaining branches, and we find that the above statement of Liabilities and Assets at November 30th, 1916, is in accordance therewith. The Bank's investments and the securities and cash on hand at the Chief Office and at the branches visited were verified by us at the close of business, November 30th, 1916, and in addition we visited the Chief Office and certain branches of the Bank during the year, when we checked the cash and verified the securities and found them to be in agreement with the books. We have obtained all information and explanations required, and all transactions of the Bank which have come under our notice have, in our opinion, been within the powers of the Bank. And we certify that the above statement of Liabilities and Assets as at November 30th, 1916, is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs, according to the best of our information and the explanations given to us, and as shown by the books of the Bank.

A. B. BRODIE, C.A., D. McK. McCLELLAND, C.A., Auditors,
Members of the firm of Price, Waterhouse & Co., Chartered Accountants.

Ottawa, 14th December, 1916.

CANADA

NATIONAL SERVICE

PUBLIC NOTICE is hereby given under the authority of the "War Measures Act, 1914," that during the first week in January, 1917, an inventory will be made by the Post Office Authorities, of every male between the ages of sixteen and sixty-five, residing in Canada.

National Service Cards and addressed envelopes for their return to Ottawa have been placed in the hands of all Postmasters for distribution amongst the persons required to fill in such cards. Every male person of the prescribed ages is required to fill in and return a card enclosed in an envelope within ten days of its receipt.

Any person who fails to receive a card and envelope may obtain the same upon application to the nearest Postmaster.

R. B. BENNETT,

Director General.

Ottawa, 15th December, 1916.

GOD SAVE THE KING.

NATIONAL SERVICE WEEK : 1st to 7th JANUARY.

"ECONOMIC ILLITERATES" ARE THE LATEST

Banker F. A. Vanderlip Criticizes Reserve Board's Caution to Banks

Voicing, at a dinner in his honor at Chicago, an appeal for sound thinking in government business and industry, Mr. Frank A. Vanderlip, president of the National City Bank of New York, said:—

"We are a country of economic illiterates. I know of no illiteracy more dangerous to the welfare of a commonwealth."

Mr. Vanderlip touched only briefly on financial matters. "In my judgment, the Federal Reserve Board have ruled unwisely in taking the attitude they have concerning the inadvisability of investment by member banks in very short-term obligations of the belligerent governments," he said. "I believe that such action on the part of the banks would be wise from the strictly banking viewpoint. I believe that it would be wise, because such investment would tend to restrict further gold importations, which may lead to dangerous domestic inflation, and would provide credits which would be better than gold when eventually the exchanges turn against us. That is true, because those credits would not be related to the credit structure which we always build to the full size of our gold foundation.

"State socialism in Europe may develop problems, the like of which have never concerned our minds," Mr. Vanderlip continued. "We may have to meet collective buying, State-aided industries, forms of governmental co-operation with business quite outside our range of thought. Governmental control of ocean-borne commerce, and novel factors in international finance will be subjects for national con-

sideration. Indeed, there may ultimately come out of the great war changes in forms of government that will have profound and world-wide influence.

"Such matters as those are among the things that one may see when he looks outward, but there are other matters quite as grave that are developing directly about us. At the present moment, we are in the midst of a situation created by the autocratic power of great labor unions, the right or wrong solution of which will be followed by consequences which go to the very foundations of the government. Was there ever greater need in the world for just weighing of human rights and economic laws?"

RAILROAD EARNINGS

The following are the weekly earnings of Canada's transcontinental lines during December:—

Canadian Pacific Railway.

	1916.	1915.	Increase.
December 7	\$3,139,000	\$3,046,000	+ \$ 93,000
December 14	3,106,000	3,055,000	+ 51,000

Grand Trunk Railway.

December 7	\$1,151,306	\$1,012,326	+ \$138,980
December 14	1,203,868	1,023,433	+ 180,435

Canadian Northern Railway.

December 7	\$ 917,900	\$ 830,600	+ \$ 87,300
December 14	892,600	823,700	+ 68,900

WHO SHOULD OWN CANADA'S RAILWAYS?

Government Ownership is Not Desirable, but Solution of Existing Problems Will Be Found in Form of Private Management

There are now five government railways in Canada, with a combined mileage of over 4,000 miles. Not one of them earns the interest on the investment in it. In fact, four out of the five, having about 3,600 miles of the total mileage, failed in 1915 to earn even their operating expenses in spite of the fact that they represent an investment per mile which exceeds by \$8,000 the capitalization per mile of the railways of the United States. And yet, in all of the defenses of government ownership that are being put forth in Canada almost no reference is made to who pays the enormous losses of these government railways. The advocates and defenders of government ownership twist, turn, dodge, and duck to avoid this point, when, as a matter of fact, it is one of the most important points to be considered in the whole controversy. If the Canadian public realized how many millions of dollars in taxes government ownership and management is already costing it each year, it would receive in a very different spirit the plausible but sophistical arguments for extensions of this policy with which it is now beguiled. Such is the editorial comment of Mr. S. O. Dunn, editor of the *Railway Age Gazette*.

Burdens and Benefits.

The Grand Trunk Pacific and the Canadian Northern have failed to earn the interest which the government has guaranteed for them. The government cannot avoid paying or reduce this interest by the simple device of making these roads government property. It is already paying many millions of dollars a year in unearned interest on the railways which it now owns, and if it takes over the Grand Trunk Pacific and the Canadian Northern it will have to pay interest on the investment in them from taxes as long as their earnings are insufficient to meet it, just as it now pays from taxes the interest on the investment in the Intercolonial and the National Transcontinental. The question which ought to be considered, then, is as to whether the burdens which the public will have to bear and the benefits which it will derive from the Grand Trunk Pacific and the Canadian Northern will be greater if the government leaves them in private hands or takes them over as its own property. Since the interest to be paid on the investment will be substantially the same under either private or government ownership (the interest of the private companies being already largely guaranteed by the government), the really crucial question involved is whether these railways probably will be more economically and efficiently developed and operated under private or under government management.

Efficiency versus Incompetence.

The economy and efficiency with which they are managed will determine the burdens they will impose on the public and the benefits it will derive from them. This point is receiving almost no consideration from the advocates of government management. Why is this? Obviously, because private management of railways in Canada has, up to this time, been so much more economical and efficient than government management that the advocates and defenders of the latter dare not institute the comparison. Private management of railways in Canada has, in the main, been economical and efficient. Government management has, in the main, been incompetent and wasteful. The conclusion inevitably suggested is that under government management the burdens that would be imposed on the public by the Grand Trunk Pacific would be greater and the benefits conferred less than under private management.

The railway companies are attacked upon the ground that their influence upon public affairs has been bad. They are denounced because, as is alleged, they have secured excessive concessions from the government of Sir Wilfrid Laurier and from the succeeding administration of Sir Robert Borden. But assuming that these criticisms are just, there were two parties to every one of these transactions, the railway company on the one hand, and the government on the other. This being the case, should not the government as well as the railway companies be held responsible for any

unwisdom, impropriety or dishonesty which marked these transactions?

If the government in these transactions showed improvidence, or, as is sometimes implied, was actually corrupt, can this, asks Mr. Dunn, by any process of reasoning, be tortured into an argument for government ownership and management of all the railways? Such allegations, if well-founded, simply mean that the government has been as incompetent and wasteful in dealing with the private railway companies as it has been in managing the state railways. This is hardly a valid argument for extending the policy of government ownership and management.

If the present railway situation in Canada is in large measure a result, as is now widely charged, of the exercise by the private railway companies of an excessive influence on politics and government, the remedy is not necessarily government ownership. The people of the United States have shown that government regulation can be used not only to break, but to completely destroy the influence of the railways in politics. The actual experience of Canada with government ownership and management is the very strongest argument that could be advanced against an extension of that policy in that country. The Canadian railway problem is at this time as difficult as it is important; but its solution should be found in some system of private management subject to public regulation, not in a dangerous and unnecessary extension of government ownership.

The British Dominions General Insurance Company is absorbing the Eagle Insurance Company. The British Dominions, which was organized in 1904, does business in Canada. Its assets are \$167,059, and its liabilities \$63,554.

"Life," the journal of the field force of Canada Life Assurance Company, in the December issue assumes a seasonable and patriotic form, giving photographs of those from the head office now on the service of the King, as well as effective insurance articles.

The Imperial Oil Company, Limited, have decided to grant for the year 1916 to all employees of one year or more service (engaged on a monthly basis), one month's salary; and to all similar employees in the service for a period of from six months to a year, a bonus of two weeks' salary.

His Excellency the Duke of Devonshire, Governor-General, accompanied by Colonel Henderson, Military Secretary, and Captain McIntosh, A.D.C., have paid a visit to the Bank of Montreal. They were met by Sir Vincent Meredith, Bart., president, and Sir Frederick Williams-Taylor, vice-president, and conducted through the several departments.

CANADA MAY BUILD SHIPS

Canadian Government Has the Matter Under Consideration—What is the Best Plan?

A shipbuilding industry may be established in Canada this year. The Canadian government, with a view to granting aid to this industry, has obtained offers for the building of different classes of ships, but these were unsatisfactory. A subsidy equivalent to the difference in cost of construction as between British and Canadian shipyards appears to have been under consideration. At present, however, prices are at such a high level as to make aid on that principle unsatisfactory. This is one of the difficulties at present under consideration by the government, which promises to bring before parliament a measure for the encouragement of shipbuilding with a view to increasing the available tonnage. According to the deputy minister of marine and fisheries, the average value of the vessels on the register of the Dominion at the end of 1914 was \$30 per ton, and on this basis the value of the net registered tonnage of Canada at that date would be \$27,972,660. The new tonnage constructed in 1914 was 43,346 tons, valued at \$45 per ton, or \$1,950,570. At present, Canadian shipyards in Quebec, Montreal, Collingwood and at other points are busy, but only at Collingwood are commercial vessels being built.

British Columbia Leads Way.

British Columbia has already enacted legislation to encourage the building and operating of British Columbia ocean carriers. This measure provides for the lending of 55 per cent. of the cost upon vessels hereafter built in the province and used exclusively in carrying products to and from British Columbia ports. The loan shall not be for more than 35 per cent. of the ascertained value of the vessel, construction of which shall be commenced and completed within twelve months of the coming into force of the act, and used for the carriage of freights upon ocean routes. Loans are to bear interest at the rate of 6 per cent., payable half-yearly.

In further aid of the shipbuilding industry of the province a subsidy shall be paid to the owner who actually paid for the construction of ships, or to his assigns who actually operate her, but not to any middleman or promoter, up to a number not exceeding twenty ships, in ten annual instalments, so computed as to bring the net earnings of the ship up to 15 per cent. on the actual cost, but never more than five dollars a ton dead weight capacity, the first instalment to be paid in the first year after peace is declared.

Shipbuilding plants may be aided by the guarantee of securities for not over 55 per cent. of the actual cost of the plant. A commission is appointed to supervise the administration of the act.

Form of Government Aid.

Some time ago the New York Chamber of Commerce formulated a scheme which it thought might well be adopted as the shipbuilding policy of the United States. Sir George Foster, Canadian minister of trade and commerce, in discussing the question of ocean transportation in the House of Commons, April 26th, 1916, outlined this scheme, and commented on the way it might be applied to the Canadian problem.

Canada, he said, would appoint a commission consisting of any three members of the cabinet whose departments are interested, say, commerce, navy and finance. The government side of that commission would be the ministers of these three departments. Add to these a naval instructor and three practical and experienced men in shipping matters, selected by the government, and you have the commission which would operate in Canada. That commission would have general oversight and direction of the classes of vessels to be built under the scheme, how they should be named, everything in connection with them, and to the extent that it would be possible, the regulation of the rates as well. That committee would then be empowered to enter into contracts with shipbuilding companies to build according to the plans and regulations laid down in Canadian shipyards, and the builders of ships would be allowed the difference between the cost of construction in Canada and in European ports.

The object would be to enable Canadian shipowners to have their ships built in Canada with exactly the same cost to himself as if he had them built in a European port. If this tonnage could be built in a European port at a certain percentage per ton cheaper than in Canada, then the subsidy for construction would be that difference in cost, whatever it was, so as to put the Canadian shipowner on an equality, in the after-competition, with his competitor who had ships built in European shipyards. The time during which this should be carried out would be limited to a period of, say, ten years, so that during that ten years this operation of building would go on.

Then the commission would be empowered to enter into contracts with the shipowners, when the ships were built, and to guarantee to the owners the difference in cost of operating the ships under the Canadian flag and under a European flag, that subsidy to continue for the life of the ship. The commission would ascertain the difference in cost of construction and operation, and pay that difference alone. In that connection the government would place at the disposal of the commission the sum of \$15,000,000 or \$20,000,000 and empower the commission to guarantee the bonds upon the ships built up to 50 per cent. of the value of the ships. Such bonds would be 5 per cent. bonds, and the government commission would get one-half of one per cent. on these bonds returned to its treasury for its work and its supervision.

Would Follow Japan.

Col. Thomas Cantley, president of the Nova Scotia Steel and Coal Company, which, by the way, is constructing a fine steel vessel in Nova Scotia, does not quite agree with this proposal. He favors the system adopted by Japan as best calculated to meet our needs at present. A large increase in tonnage of Japan has been brought about by a shipbuilding bounty of ten dollars per ton for steel steamers over one thousand tons gross, and where these were engined with Japanese-built machinery \$2.50 per indicated horsepower was added to the bounty. The splitting up of the bounty as to hull construction and machinery enable the Japanese government to, in effect, give a larger bounty to the faster and higher powered boats necessary for passenger and mail service.

Whatever system of encouragement is adopted by bounty or otherwise should, thinks Col. Cantley, be for a stated period of years, not less than 10 and not exceeding 15.

Action by Dominion Government.

British Columbia is filling orders for \$5,000,000 of ships, several for Norway. There is an imperial government edict, in which Canada has acquiesced, in regard to the construction of boats for delivery to owners under a neutral flag. Permission was obtained to do this under certain safeguards. The Dominion government agreed to a drawback of 99 per cent. on duty on materials which had to be imported to fill specifications of foreign purchasers. This 99 per cent. need not be paid to the government when the construction takes place under the eye of a government customs officer in charge of the works.

Mr. H. C. Cox, president of the Canada Life Assurance Company, was one of the speakers at the tenth annual meeting of the Association of Life Presidents, held at New York last week. Part of his interesting address was printed in *The Monetary Times*. Among other Canadians present were: Messrs. T. H. Purdom, president, Northern Life; J. Purdom, director, Northern Life; E. M. Saunders, treasurer, Canada Life; J. F. Weston, managing director, Imperial Life; and A. Homer Vipond, of the Montreal branch, New York Life.

Mr. T. De Witt Cuyler, of Philadelphia, has been elected to the directorate of the Guarantee Company of North America, in succession to the late Mr. J. G. Cannon, of New York. Mr. Cuyler, is president of the Commercial Trust Company, Philadelphia, and a director of the Pennsylvania Railway Company, and has been associated with the Guarantee Company of North America, as its counsel in Philadelphia, and as director on its local board there. The Guarantee Company of North America transacts the entire fidelity business of the Pennsylvania Railway Company, and their associated interests, which aggregates \$25,000,000.

You are Alive To-day

But should you be suddenly taken away to-night would your wife, family, and dependents receive the protection that you have always intended they should have?

This protection can only be assured by a properly drawn up will and the appointment of executors who will administer its provisions in an efficient manner.

Let us prepare your will and attend to its administration.

The officers of this company will guard the interests of your estate and your heirs, and will be glad to correspond with you regarding wills, or any other trust business.

PULP AND PAPER IN BRITISH COLUMBIA

New Industry is Developing in That Province—Excellent Outlook for Companies

(Special Correspondence.)

Vancouver, December 18, 1916.

Manufacturing pulp and paper is a new industry in British Columbia, but one that is assuming large proportions. Some years ago the government offered concessions in the matter of favorable leases of pulp timber areas to bona fide companies that would establish industries, but the only one to erect a mill at that time was the Swanson Bay Pulp Company, backed by English capital. A large plant was established, and some sulphite pulp was turned out, but after a short period of operation, the mill was shut down. Two years later the Powell River Company, with United States capital, started its development project at Powell River, where there was water power. This is now a large concern. Another company is the British Columbia Sulphite Fibre Company, which has its mill, manufacturing chemical pulp, at Mill Bay, head of Howe Sound.

Figures of production of pulp and paper show how recent is the development:—

	1911.	1912.	1913.	1914.
Chemical pulp (tons)	90	9,813	10,698	13,000
Paper (tons)	..		45,816	50,307

Operating at Capacity.

The British Columbia Sulphite Fibre Company has been operating to capacity for many months, and is increasing its plant. Its product is shipped to many points, largely to the United States and the Orient. This company is interested in the contract for the steel ship now being built at the Wallace Shipyards, North Vancouver, and which will be used exclusively by the pulp company for overseas delivery of its product. It is probable that other ships will also be built, as the company is the mainspring behind the renewed operation of the mill at Swanson Bay. The operating company is known as the Empire Pulp and Paper Company, and pulp will be shortly turned out of this plant. The British Columbia Sulphite Fibre Company is also behind the construction of the pulp mill at Quatsino Sound, west coast of Vancouver Island, to be known as the Colonial Pulp and Paper Company. That some importance attaches to these latter operations is shown by the recent action in the supreme court, when this company got an order restraining erection of another mill at Quatsino.

The Powell River Company has been operating day and night. It manufactures newsprint exclusively, and ships it to newspapers along the Pacific coast to as far south as the Mexican border, to Australia, Manila and the Orient.

United States Companies Interested.

Several of those interested in the Powell River Company are also concerned in the Forest Mills, Limited, which has taken over the plant at Ocean Falls. This establishment, which includes a sawmill as well as pulp and paper mills, was built by English capital. Just as it started operation, difficulties arose, and the matter was before the courts. Finally arrangements were made whereby United States capital took over the plant. Several hundred men are employed, and it will not be long before it is producing. Kraft paper will be the principal item of manufacture. Those concerned in this company are also interested in the Willamette Paper Company, Portland, Ore., and the Crown Paper Company.

Recent advices from Prince Rupert state that Mr. J. S. Emerson, of Vancouver, is negotiating with the city council of Prince Rupert, respecting the establishment of a pulp mill near that city.

An issue of one million five hundred thousand florins (\$600,000) 5 per cent. bonds of the Netherlands Transatlantic Mortgage Company has been fully taken up by the investing public in Holland. This company does business in the western provinces, and the Canadian headquarters are at Winnipeg. Messrs. L. D. Fortuyn and J. Mees are managing directors.

LEGAL NOTICES

THE L. D. CAULK COMPANY OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 20th day of November, 1916, incorporating Arthur Fry, secretary; Mary Little, bookkeeper; Jacob Doan Musselman, manager; Ralph McLean, student-at-law, and John Charles McKay MacBeth, barrister-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell and deal in goods, wares and merchandise of all kinds; (b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To apply for, purchase or otherwise acquire any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (d) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (e) To enter into any arrangements with any authorities, government or supreme, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain from any such authority any rights, privileges and concessions which the company may think it desirable to obtain, and to carry out, exercise and comply with or surrender any such arrangements, rights, privileges, concessions and franchises; (f) To establish and support or aid in the establishment and support of associations, institutions, funds, trusts and conveniences calculated to benefit employees or ex-employees of the company (or its predecessors or associates in business) or the dependents or connections of such persons, and to grant annuities, pensions and allowances, and to make payments towards insurance, and to subscribe or guarantee money for charitable or benevolent objects, or for any exhibition or for any public, general or useful object; (g) To promote any company or companies for the purpose of acquiring all or any of the property and liabilities of the company, or for any other purpose, which may seem directly or indirectly calculated to benefit the company; (h) To purchase, take in lease or in exchange, hire or otherwise acquire, any real personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business or capable of being profitably dealt with in connection with any of the company's properties or rights, for the time being, and in particular any machinery, plant, stock-in-trade; (i) To construct, improve, maintain, work, manage, carry out or control any roads, ways, branches or sidings, bridges, reservoirs, watercourses, wharves, manufactories, warehouses, electric works, shops, stores and other works and conveniences which may seem calculated directly or indirectly to advance the company's interests, and to contribute to, subsidize or otherwise assist or take part in the construction, improvement, working management or control thereof; (j) To aid in any manner any corporation any of whose shares of capital stock, bonds, debentures or other obligations are held or in any manner guaranteed by this company, and to do any act or things for the preservation and protection, improvement and enhancement of the value of any such shares of capital stock, bonds, debentures or other obligations, and to any and all acts tending to increase the value of any of the property at any time held or controlled by this company; (k) To purchase, take or acquire by original subscription or otherwise, and to hold, and, with or without guarantee, to sell or otherwise dispose of shares, stock, debentures, bonds and obligations in and of any such other company, and to vote on all shares so held through such agent or agents as the directors may appoint; (l) To remunerate any person for services rendered to the company, in such manner as the company may deem expedient, and more particularly with the approval of the shareholders by the issue and allotment of shares, bonds or other securities of the company, wholly or partly paid up, but nothing in this clause contained shall be deemed to limit the power of the directors to fix and pay the salary of any and all officers, servants, agents and employees of the company; (m) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable and transferable instruments; (n) To lend money to customers and others having dealings with the company and to take security for the loan of such money; to guarantee the performance of the contractual and other obligations of any such persons and to give any guarantee or indemnity as may seem expedient; (o) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (p) To pay out of the funds of the company all expenses of or incidental to the formation, registration and advertising of the company, or in or about

the promotion of this company or the conduct of the business; (q) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (r) To do all or any of the above things as principals, agents, contractors or otherwise, and either alone or in conjunction with others, and either by or through agents, sub-contractors, trustees or otherwise; (s) To do all such other things as are incidental or conducive to the attainment of any one or more of the above objects, and so that the objects specified in each paragraph of the clause shall, except when otherwise expressed in such paragraph, be in no wise limited or restricted by reference to or inference from the terms of any other paragraph or to or from the name of the company. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere, by the name of "The L. D. Caulk Company of Canada, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 22nd day of November, 1916.

THOMAS MULVEY,
Under-Secretary of State.
J. C. M. MACBETH, Toronto,
Solicitor for the Company.

BISSEL CARPET SWEEPER COMPANY OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 28th day of November, 1916, incorporating Willis Bertram Sturup, law clerk; James White Bicknell, and Aubrey Thomas Maher, students-at-law; Thomas Stewart Hagan Giles, accountant, and John Steuart Duggan, barrister-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell, export and deal in carpet sweepers, vacuum sweepers and other sweepers, cleaners or house furnishing goods; (b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or right; (c) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (d) To apply for, purchase or otherwise acquire, any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (e) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (f) Notwithstanding the provisions of section 44 of the said Act, to take, or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (g) To purchase, take on lease or in exchange, hire or otherwise acquire any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, and in particular any machinery, plant or stock in trade; (h) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (i) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (j) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company if authorized so to do by the vote of a majority, in number of the shareholders present or represented by proxy at a general meeting duly called for considering the matter, and holding not less than two-thirds of the issued capital stock of the company; (k) To adopt such means of making known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (l) To acquire, hold, sell and convey any real estate requisite for the carrying on of the undertaking of the company; (m) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (n) To do all such other things as are incidental or conducive to the attainment of the above objects, and of the objects set out in the letters patent and supplementary letters patent. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Bissel Carpet Sweeper Company of Canada, Limited," with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Niagara Falls, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 20th day of November, 1916.

THOMAS MULVEY,
Under-Secretary of State.

When You are Old

Who'll provide the money to keep you? Will you then be compelled to keep on working the same as some old men you know? Or will you be able to enjoy an old age of comfort and independence?

A moderate annual saving now—when you can spare the money—invested in an Imperial Endowment Policy will secure you a regular income in your old age; or it will provide for your family should death call you early.

THE IMPERIAL LIFE
Assurance Company of Canada
HEAD OFFICE - TORONTO

LEGAL NOTICE

THE WALTER BITON COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 14th day of November, 1916, incorporating David Henderson, William Henry McGuire, George Francis Rooney and Nathan Phillips, barristers-at-law, and William Patrick O'Meara, student-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To acquire and take over as a going concern the business and assets generally, including the good-will and liabilities, of the business now carried on by the Walter Biton Company, and to issue in payment or part payment therefor fully paid up and non-assessable shares of this company for such amounts as may be agreed upon to carry on the above-named business in all its branches; (b) To buy, sell, import and export and otherwise deal in rubber goods and combinations and substitutions thereof of all kinds, and to buy, sell, import and otherwise deal in woolen goods of all kinds; (c) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated or necessary to enable the company to profitably carry on its undertaking. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Walter Biton Company, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 20th day of November, 1916.

THOMAS MULVEY,
Under-Secretary of State.

22-2

Activity prevails in the Canadian woolen manufacturing industry, as is shown by the declaration of a second bonus of 1 per cent. on the common shares on Penmans, Limited, in addition to the regular quarterly distribution of 1 per cent., making the distribution for the year 6 per cent., a record for the company. The regular quarterly on preferred was also declared.

IMPERIAL MUNITIONS BOARD

In an address to the Canadian Club at Toronto, Mr. J. W. Flavelle, chairman of the imperial munitions board, took sharply to task the people who are critical of the government and of the war supply firms—the "profiteers"—asking them whether they were doing as much, were doing anything to help along the common cause. He referred to the prevailing prosperity, to the great fortunes manufacturers were rolling up, and pointed to Britain, where the manufacturers' plants were at the disposal of the state, and the bulk of the profits kept for the benefit of the state. People did not realize what sacrifice and service meant.

"There is enough dynamic energy in this club, if you had genuine moral earnestness without any reserve, if you put everything into it, to turn this country upside down," said Mr. Flavelle. "It is not true that you are out of politics because politics is dirty—it is because you will not pay the price."

Canada was spending the lives of her best and vast sums of treasure and the only asset that she could hope to get from it was character, and her growing indifference was putting her in danger of missing even that.

"The board with which I have the honor to be identified," he continued, "is responsible to the Imperial authorities. The government of Canada does not seek to interfere with our freedom in any way, as I have indicated, and in no way sought to direct our policy."

Mr. Flavelle mentioned that the board's business amounted annually to two and a half times the normal expenditure of the Canadian government. This was being done by what he called "deputy ministers," with the consent of the Canadian government, but for the Imperial authorities. Was there a suggestion in this, he asked, as to the future government of the British empire?

The Porto Rico Railway Company has declared its regular quarterly dividend of 1¼ per cent. on the preferred, payable January 2 to stock record of December 22.

DIVIDENDS AND NOTICES

Books to be closed from December 21st to January 2nd, 1917, both days inclusive.

By order of the Board,

JOHN T. F. KEENE,

Secretary-Treasurer.

Montreal, December 14th, 1916.

THE REAL ESTATE LOAN COMPANY OF CANADA, LIMITED

DIVIDEND No. 60.

Notice is hereby given that a Dividend at the rate of three and one-half per cent. for the half-year ending 31st inst., has been declared upon the Capital Stock of the Company, and that the same will be payable at the Office of the Company in Toronto, on and after 2nd January, 1917. The Transfer Books of the Company will be closed from 20th to 31st December, both days inclusive.

By order of the Board,

E. L. MORTON,

Manager.

Toronto, 14th December, 1916.

PENMANS LIMITED.

Dividend Notice.

Notice is hereby given that a Dividend of one and one-half per cent. has been declared on the Preferred Shares of the capital stock of this Company for the quarter ending January 31st, 1917, payable February 1st, 1917, to shareholders of record of January 22nd, 1917, also a Dividend of one per cent. on the Common Shares for the quarter ending January 31st, 1917, payable February 15th, 1917, to shareholders of record of February 5th, 1917.

By Order of the Board.

C. B. ROBINSON,

Secretary-Treasurer.

Montreal, December 18th, 1916.

PENMANS LIMITED.

Bonus on Common Stock.

Notice is hereby given that a Bonus of one per cent. has been declared on the Common Shares of the capital stock of this Company, payable February 15th, 1917, to shareholders of record of February 5th, 1917.

By Order of the Board.

C. B. ROBINSON,

Secretary-Treasurer.

Montreal, December 18th, 1916.

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of February, 1917, for the right to cut pulpwood and pine timber on a certain area situated on the Black Sturgeon River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure, for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honourable the Treasurer of the Province of Ontario, for ten thousand dollars (\$10,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$10,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,

Minister of Lands, Forests and Mines.

Toronto, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

CENTRAL CANADA LOAN AND SAVINGS COMPANY

QUARTERLY DIVIDEND

Notice is hereby given that a Dividend of Two and One-Half per Cent. (2½%) for the three months ending December 31st, 1916, at the rate of Ten per Cent. per annum, has been declared upon the Capital Stock of this Institution, and the same will be payable at the Offices of the Company, Toronto, on and after Tuesday, the 2nd of January, 1917. The Transfer Books will be closed from the 18th to 30th December, both days inclusive.

By order of the Board,

E. R. WOOD,

President.

PROVINCIAL PAPER MILLS COMPANY, LIMITED

DIVIDEND NOTICE

Notice is hereby given that a Dividend of One and Three-Quarters per Cent. on Preferred Stock and One per Cent. on Paid-up Common Stock of this Company, has been declared for the current quarter, both payable January 2nd, 1917, to Shareholders of record at the close of business on December 15th, 1916.

By order of the Board,

S. F. DUNCAN,

Secretary.

Dated Toronto, December 11th, 1916.

DIVIDENDS AND NOTICES

THE CANADIAN CROCKER-WHEELER COMPANY, LIMITED

DIVIDEND NOTICE

The Directors of the Canadian Crocker-Wheeler Company, Limited, have declared a One and Three-Quarters per Cent. ($1\frac{3}{4}\%$) dividend on the Preferred Stock of the Company for the three months ending December 31st, 1916, to Shareholders of record, December 15th, 1916. Also a dividend of One and Three-Quarters per Cent. ($1\frac{3}{4}\%$) on the Common Stock of the Company for the three months ending December 31st, 1916.

The Stock Books will be closed from the 15th to the 31st of December, both days inclusive.

Checks will be mailed to Shareholders on December 30th, 1916.

By order of the Board,

L. R. GRIMSHAW,
Secretary-Treasurer.

St. Catharines, Ontario.
December 7th, 1916.

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of one and one-half per cent. ($1\frac{1}{2}\%$) on the Common Stock of the Dominion Textile Company, Limited, has been declared for the quarter ending 31st December, 1916, payable January 2nd, 1917, to shareholders of record December 15th, 1916.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Greenfield Park, Que.—Tenders close on December 28th for \$25,000 6 per cent. 30-year bonds. E. J. Allwright, secretary-treasurer.

Toronto, Ont.—Finance commissioner Bradshaw stated that 79.38 per cent. of the taxes, amounting to \$14,981,712, have been already collected.

Montreal, Que.—The loan for \$1,400,000 to make up the city deficit has been authorized by the private bills committee, and the loan will likely be adopted by the legislature. Some of Montreal's aldermen are opposed to the loan, because it represents another tax on real estate.

Mount Forest, Ont.—The bids for the \$9,000 5½ per cent. 30-year hydro bonds awarded to Messrs. R. C. Matthews and Company, were as follows:—

R. C. Matthews and Company	\$8,991
W. L. McKinnon and Company	8,941
G. A. Stimson and Company	8,914
Canada Bond Corporation	8,895
Imperial Bank	8,868
A. E. Ames and Company	8,850
Brent, Noxon and Company	8,769

Saskatchewan.—The following bond applications were granted by the local government board:—

School Districts.—Teddington, \$1,200, 10-years, not ex. 8 per cent. annuity. Secretary-treasurer, C. Hendricks, Teddington; Ward, \$150, 10-years, not ex. 8 per cent. annuity. L. Wheeler, Hillside; Kirby, \$1,500, 10-years, not ex. 7 per cent. installment. J. Ulrich, Estlin.

Rural Telephone Companies.—St. Boswells, \$16,500, 15-years, not ex. 8 per cent. annuity. W. J. Cummings, St. Boswells; Goldeye, \$7,000, 15-years, not ex. 8 per cent. annuity. C. G. Annable, Noremac; Iron Springs, \$6,000, 15-years, not ex. 8 per cent. annuity. Peter Bohnen, Watson; Warren, \$2,900, 15-years, not ex. 8 per cent. annuity. Wm. Termunde, Lanigan.

The following is a list of bonds reported sold:—

School Districts.—Mathieu R.C.S., \$700. Western School Supply Company, Regina.

Rural Telephone Companies.—Seaforth, \$400. Allan, Gordon and Gordon, Regina; Dummer, \$2,800. W. L. McKinnon and Company, Toronto; Blucher, \$2,200. Wood, Gundy and Company, Toronto; Eagle Hills, \$18,000. W. L. McKinnon and Company, Toronto; Whitewood St. Hubert, \$6,000. Kerr, Fleming and Company, Toronto; Velva, \$14,500. W. L. McKinnon and Company, Toronto; Wawota, \$6,000. Wood, Gundy and Company, Toronto.

Village.—Tribune, \$1,900 and \$1,000. W. L. McKinnon and Company Toronto.

Town.—Assiniboia, \$17,000. Bond and Debenture Corporation, Winnipeg.

Mr. John J. Arnold, vice-president and manager of the foreign exchange department of the First National Bank of Chicago, who is in close touch with business conditions in Canada and other foreign countries, sees strong evidence of prosperity all through Canada, and in a recent interview said that money is plentiful in the Dominion and an optimistic feeling prevails. "The people of Canada, as a whole, have given a fine illustration of courage and patriotism, as well as of business sense and capacity for government. The affairs of the country are well managed, and the progress is both individual and national. Business is going along in an expansive way, much as we see it in the United States. Bank deposits are heavy and general as a result of the high wages and the common prosperity. Manufacturing has been greatly stimulated by the war and this circulates money freely and extensively. The Canadians do not for a moment doubt the outcome of the war, and although their sacrifices have been heavy they will continue to do their part with confidence and cheerfulness."

DOMESTIC WAR LOANS

We are pleased to quote most favorable rates either for buying or selling the old or the new war loan

(Telephone Main 3370.)

CAMPBELL, THOMPSON & CO.
CANADA LIFE BUILDING - TORONTO

In a satisfactory return the net profits of the Dominion Bridge Company for year ended October 31st, are given as \$2,776,390.

The Dominion Textile Company has declared its regular quarterly dividend of 1¼ per cent. on the preferred, payable January 15 to stock record of December 31.

The Laurentide Pulp and Paper Company has declared the usual quarterly dividend of 2 per cent., payable January 2 to holders of record December 26.

CANADIAN SECURITIES IN LONDON

The following record of transactions on the London Stock Exchange in Canadian securities during the week ended November 30th, is compiled by the Canadian Gazette from the Official Lists, and consists of the first and last "markings" and the highest and lowest intervening "markings" unless there is a repetition. The asterisk implies the last recorded transaction where no business has taken place during the week.

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

- A Good Living Wage
- A Profitable Future
- A Provision For Old Age

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policyholders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

AGGREGATE TRADE.						
Merchandise	86,650,011	123,617,209	158,512,286	973,850,105	972,225,291	1,773,069,433
Coin and bullion	52,846,997	26,886,916	5,818,193	112,718,261	175,313,890	255,591,655
Total trade	139,497,008	150,504,125	164,330,479	1,086,568,366	1,147,539,171	2,028,661,088

*Note: It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending Oct., 1916, were: imports 1916, \$40,164,554; 1915, \$56,531,364, and exports 1916, \$206,126,802; 1915, \$118,782,516. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

Canada's Pig Iron, Steel and Coal Production

OUTPUT of Steel Ingots and Castings Increased 42 per cent.; Pig Iron, 28 per cent.; and Coal, 8 per cent. This Year—Some Steel Ingots Made in Electric Furnaces—Largest Production on Record.

THE production of pig iron in Canada this year is estimated at 28 per cent. larger than that of 1915. There has also been a gain of 42 per cent. in the output of steel ingots and castings in the same period. These statements are made in a bulletin of the department of mines, Ottawa. The figures for the current year have been gathered by the department's division of mineral resources and statistics, in charge of Mr. John McLeish, B.A., F.S.S., who is to be highly commended for the invariable promptitude with which the Dominion's mineral production statistics are collected, tabulated and issued.

The records received from the producers show that the production of pig iron and of steel ingots and castings during the first eleven months of the year which together with estimates for December show a probable production of pig iron in Canada during the twelve months ending December 31, 1916, of 1,171,727 short tons (1,046,185 gross tons) and a probable production of steel ingots and direct steel castings of 1,454,124 short tons (1,298,325 gross tons), of which 1,423,485 short tons were steel ingots and 30,639 short tons were direct castings.

The production in 1916 during the first six months and monthly during the last six months was as follows, in gross tons:—

	Pig iron, gross tons.	Steel ingots, gross tons.	Direct castings, gross tons.	Total, gross tons.
Six months ending June ...	501,872	577,999	11,715	589,714
July	82,154	101,178	2,284	103,462
August	78,450	108,889	2,299	111,188
September ...	91,736	116,828	2,524	119,352
October	101,436	126,577	2,924	129,601
*November ..	95,237	119,468	2,745	122,213
†December ...	95,300	119,930	2,865	122,795
Six months ending December	544,313	692,970	15,641	708,611
Twelve months ending Dec..	1,046,185	1,270,969	27,356	1,298,325

*Partly estimated. †Estimated.

The production of pig iron in 1915 was 913,775 short tons and of steel ingots and castings 1,020,896 short tons, showing, as noted above, an increase in the production of pig iron in 1916 of about 28 per cent. and an increase in production of steel ingots and castings of over 42 per cent.

The 1916 production was greater than that of any previous year, the second largest production of pig iron having been 1,128,967 short tons in 1913 and of steel ingots and castings 1,168,993 short tons also in 1913.

Of the total production of steel ingots and castings in 1916, about 43,790 short tons (39,098 gross tons) were made in electric furnaces. In 1915 only 61 short tons were reported as having been made in electric furnaces.

The Dominion department of mines has received from the principal coal operators in Canada, returns of their production for ten months supplemented in most cases with estimates for November and December.

On the basis of the record available, it is estimated that the total production of coal in Canada, during the calendar year 1916 will approximate 14,365,000 short tons (equivalent to 12,825,892 gross tons). The estimate is believed to be fairly close for Nova Scotia and British Columbia. In Alberta, however, there are so many small operators that final returns may show a wider variation from the estimates now made.

By provinces, the estimate is as follows, the figures for 1915 being included for comparison:—

Estimated Coal Production in Canada, 1916 (Short Tons).

	Production of coal, 1915.	1916.	Increase or decrease.
Nova Scotia	7,463,370	6,950,000	— 513,370
New Brunswick ..	127,391	135,000	+ 7,609
Saskatchewan ...	240,107	260,000	+ 19,893
Alberta	3,360,818	4,400,000	+ 1,039,182
British Columbia ..	2,065,613	2,620,000	+ 554,387
Yukon	9,724		
Totals	13,267,023	14,365,000	+ 1,097,977

Increase in Coal Output.

The 1916 production exceeded that of the two previous years, the increase over 1915 being about 8 per cent. Nova Scotia is apparently the only province that has not made an increased production, the decline in this province being a little less than 8 per cent. The increase in Alberta is nearly 32 per cent. and in British Columbia nearly 27 per cent. The production in New Brunswick, Saskatchewan and British Columbia is the highest on record. No estimates are available yet as to the Yukon output.

DEATH OF MR. JAMES HEDLEY

Mr. James Hedley, for nearly thirty years editor of *The Monetary Times*, died on Saturday evening at his residence 79 St. Joseph Street, Toronto, in his seventy-sixth year. The word of his death was received with deep regret by his many friends in Canada, Great Britain and the United States.

The late James Alexander Hedley was born in Prestonpans, Scotland, his father being a Border Englishman and his mother a Fifeshire Scotswoman. He was educated in Canada, and married in 1870 a daughter of the late John MacLeod, member of parliament for Essex county, Ontario. When quite a young man he became a telegraph operator, about the same time as the late Senator George A. Cox and the late H. P. Dwight, of the Great North Western Telegraph Company, both of whom were intimate friends of the late Mr. Hedley. He used to relate a pleasing anecdote of this friendship. Some years ago, he had left Canada on a trip to Europe.

The Late James Hedley.

Upon his return he found that Mr. Cox had left Peterborough for Toronto and had much enlarged the scope of his operations. Said Mr. Hedley, the younger man: "Well, Cox, I see you are as fond of variety as the rest of us." "Yes," was the reply, "both you and I like to get on." Mr. Hedley was a strong admirer of the late Senator's democratic simplicity of mind and manner, attributes which he also shared.

In 1877, an able and forceful writer, he became editor of *The Monetary Times*, a position he retained until 1906. When he assumed the editorship, the journal had been in existence 10 years. Then, in 1867, Canada did not reach from ocean to ocean, but consisted of the two provinces which are now Quebec and Ontario. Confederation had not come; there was not any Yukon, or any Cobalt, or any "North-west." It occurred to a small group of men in Toronto that need existed for a "weekly" of commercial and financial opinion, a paper that should deal intelligently and courageously with insurance, commercial law and practice, and matters relating to investment generally. They decided to start *The Monetary Times*. Mr. Hedley, describing these days, used to say:

"The paper was intended to be, in the domain of business, what *The Nation* afterwards was in the literary field, a vehicle for the views and feelings of Canadians, aiming to be self-governed, patriotically ambitious, resenting dictation and pedantic methods in either government or commerce." He piloted the editorial policy of the journal for thirty years and by his attractive personality won for it the good-will and respect, which that same magnetic personality retained for it.

Mr. Hedley, who was one of the four editors which the journal has known in its half-century, was well liked and respected by his staff at all times. In the publication of a financial and trade paper of this type, he was bound to make enemies in the course of business life. But he did not long cherish resentments and would rather do an antagonist a kindness than maintain a life-long hostility.

Until a year or two ago, he still possessed a remarkable memory and carried a host of interesting stories of Canada's old timers, the pioneers of Canadian business, commerce and finance. Some time ago it was suggested that he should put these reminiscences into book form but unfortunately this was never accomplished. Otherwise our literature would have been richer for an important volume of historical interest and literary merit.

In 1906, after thirty years of the strenuous labors of an active newspaperman, Mr. Hedley decided to enjoy a rest, one which had been well earned. Remaining a director of *The Monetary Times* Printing Company until 1912, he then sold his interest in the enterprise. Afterwards, he was a frequent and welcome visitor to the offices with which he had been associated for the greater part of his business life.

A worthy Canadian he has left his mark upon the time. His loss is mourned by three daughters, to whom sincere sympathy is extended. His wife passed away about a year ago.

TRAMP STEAMERS AND FREIGHT RATES

In an address at Montreal in October, Mr. W. Sanford Evans, chairman of the Georgian Bay Canal Commission, stated that of 25,000 ocean steamers, 23,500 were tramps and the rest liners, the tramps doing the larger part of the business and going wherever they could get the highest freight rates. Tramps bringing wheat from the Argentine, however, carried it at only 1.78 times the freight rate to New York and Montreal, although twice the distance, the reason being that in the longer haul there were fewer non-earning periods in port. Tramps would come to Montreal only when the rates were relatively high to other ports. As the rate from Montreal went up, the Argentine seaboard prices of wheat declined per bushel, because the Argentine had to go over parity to get ships. If Canada cared to sell her wheat at a cent or two less than the Argentine in order to pay a higher freight rate, she could keep the Argentine on the rocks, because the latter would have to pay one and three-quarter times the freight rate. Canada had at one time lately put the Argentine down to 76 cents a bushel at the seaport, and, while the latter country was getting low freight rates, Canada was getting high prices, and all because of her advantage in the freight rates.

The new provincial taxation on amusements and sports in Quebec, which goes into force January 1st, provides for a tax on every admission less than ten cents of one cent; of ten cents or more, but less than thirty-five cents, two cents; of thirty-five cents or more, but not more than seventy-five cents, three cents; of more than seventy-five cents, but not more than one dollar, four cents; of more than one dollar, but not more than one dollar and a half, five cents; of more than one dollar and a half, ten cents.

NEW RECORDS OF BRITISH COLUMBIA MINES

Mineral Output on Pacific Coast May Be Worth
\$40,000,000—Dividends Were Doubled

BY R. B. BENNETT.

British Columbia's mineral production this year will reach a record figure.

The large plants of the Granby Consolidated Mining, Smelting and Power Company at Anyox, and of the Britannia Mining and Smelting Company at Britannia, are instances of the opportunities realized by adequate capital. Estimates of mineral production for 1916 have been placed as high as \$40,000,000, which would be much in advance of the last record. Production in 1915 was \$29,447,508. Prices of metals are high, plants have been working at capacity for a large part of this year, with the exception of a time when operations were somewhat curtailed owing to scarcity of coke. Extensive metallurgical operations also result in greater output of the coal mines.

The production of placer gold in British Columbia in 1915 was greater than since 1907. It was \$770,000, but it compares favorably with any year except those when the Cariboo rush was on. Development of gold-bearing areas in the Cariboo district is still progressing.

Big Producers Here.

The big mining operations of the province are at Grand Forks in the Boundary district, and at Anyox, on the far northern coast, where the Granby Company has smelters, and which aggregate an output of 50,000,000 pounds of copper per year; at Trail, where the Consolidated Mining and Smelting Company has smelting and refining works. This is the largest metallurgical plant in Canada and is handling copper, zinc and lead and a variety of other metals and by-products; and at Britannia where extensive development of low-grade copper areas keep 1,200 men busy. This ore is shipped to Tacoma for smelting. The British Columbia Copper Company has a smelter at Greenwood, which is being operated also. These companies have expended millions, all United States capital with the exception of the Consolidated at Trail, which is controlled by a Canadian Pacific Railway group. Copper ore treated by the big smelters during the present year is as follows:—

	Trail. Tons.	Anyox. Tons.	Grand Forks. Tons.
January	36,986	50,500	88,100
February	37,863	46,380	75,600
March	43,810	67,300	87,200
April	41,771	76,500	91,500
May	43,031	81,400	93,840
June	42,252	74,300	93,700
July	40,268	80,500	96,500
August	46,814	72,360	66,450
September	42,838	76,850	87,634

The Trail figures for the first nine months of 1916 were 21,000 tons more than for the whole of 1915.

The Britannia Mining and Smelting Company's figures for three-year production, 1913-14-15, are: Ore milled, 666,000 tons; crude ore and concentrate shipped to smelter, 113,700 tons. Metal contents: copper, 34,000,000 pounds; silver, 191,000 ounces; gold, 700 ounces.

Coal output of Vancouver Island mines averages about 5,000 tons per day, although in October it climbed a little higher. About 3,500 to 4,000 tons of coke are produced at Union Bay by the Canadian Collieries.

Electrolytic Zinc and Copper.

At Trail there are being established electrolytic zinc and copper refineries. The handling of zinc will mean much for Slocan mines, and because of the demand for this metal, zinc and zinc concentrates shipped from the Slocan for the first nine months of this year were over double for the same period of 1915.

Altogether, the Granby Company employs 2,500 men, with a payroll of \$250,000 monthly. It has an investment of \$19,000,000 in the province. The Consolidated Company has about 2,000 men at work at its smelter and mines. This company is operating the big mines at Rossland, and at Trail a boom is on not surpassed even in the days when

booming was the chief industry. At Sandon, 500 men are employed in the mines of the district as compared with about 100 two years ago. Because of the demand for power, the West Kootenay Power and Light Company is installing another unit at its plant at Bonnington Falls, near Nelson, bringing its generating capacity up to 40,000 horse-power. Another feature of the mining activity is that new properties are being developed, the higher price of metals making this possible. For the first six months of 1916, dividends paid by British Columbia mines totalled \$1,966,354, approximately double the amount for the corresponding period in 1915.

SASKATOON'S SINKING FUND

Commissioner Yorath reported to the finance committee of the city of Saskatoon that the city has in the sinking fund account cash to the amount of approximately \$132,000, which will shortly be increased by \$168,000, making a total of \$300,000, and, as the finance committee would not meet again this year, the commissioner advised that a recommendation be made to the council at its next meeting as to the investment of this sum.

The following investments have been offered or suggest themselves for consideration with the price to yield and available amount:—

(a) W. L. McKinnon and Company—Velva Rural Telephone Company serial bonds, instalments of principal and interest payable March 1st in denominations of \$1,000, 6½ per cent., \$12,000; Willow Heights Rural Telephone Company serial bonds, instalments of principal and interest payable March 1st in denominations of \$1,000, 6½ per cent., \$21,500; South Churchbridge Rural Telephone Company serial bonds, instalments of principal and interest payable March 1st in denominations of \$1,000, 6½ per cent., \$2,700; Hubbard Rural Telephone Company, Limited, 6½ per cent., \$2,000; Dunsmuir Rural Telephone Company, Limited, 6½ per cent., \$2,800; Eagle Hills Rural Telephone Company, 6½ per cent., \$7,000. Total rural telephone company bonds available and which have been approved by the local government board, \$48,000.

(b) W. A. MacKenzie and Company—Dominion of Canada 5 per cent. bonds, due 1931, at 98.75, 5½ per cent., \$100,000. (c) First mortgage 4½ per cent. bonds, due 1944, of the Edmonton, Dunvegan and British Columbia Railway, guaranteed as to principal and interest by the province of Alberta, 5½ per cent., \$100,000.

(d) National City Company, New York—United Kingdom Great Britain and Ireland 5½ per cent. gold bonds, due 1921, at 98¾ and interest, 5½ per cent., \$175,000. (e) United Kingdom Great Britain and Ireland 5½ per cent. gold lands, due 1919, 5¾ per cent., \$175,000.

(f) Wood, Gundy and Company—Coleville Rural Telephone Company 7 per cent. bonds, maturing in 15 instalments, 6½ per cent., \$12,000. (g) North Beinfait Rural Telephone Company 7 per cent. bonds, maturing in 15 instalments, 6½ per cent., \$1,600. (h) Rush Lake Rural Telephone Company 7 per cent. bonds, maturing in 15 instalments, 6½ per cent., \$10,500. (i) United Kingdom of Great Britain and Ireland 5½ per cent. gold bonds, due 1921, at 98¾ and interest, 5½ per cent., \$250,000.

As it is not possible to make an immediate acceptance of Messrs. Wood, Gundy and Company's offer (item i), it is suggested that the council be recommended to authorize the investment of \$250,000 sinking fund moneys in United Kingdom of Great Britain and Ireland 5½ per cent. gold bonds at a price not exceeding 98.50 and interest, New York funds (the price previously paid for these bonds), subject to the approval of the local government board, and when the Bank of Montreal have advanced to the sinking fund account the sum of \$168,000.

The total investment of sinking fund moneys at the end of the current year, including the above, will amount to approximately \$880,111. As the sinking fund levy, according to the city act, is required to be calculated upon an earning basis of 4 per cent., and as the above investment will yield an average of 5.30 per cent., the surplus which can be applied in reducing the 1917 tax levy, if the special legislation recommended in the last report of Commissioner Yorath is obtained, will be approximately \$11,558.

Of the deposit in Central Gold Reserves \$7,980,000 is in gold coin; the balance is in Dominion Notes.

MONTREAL TRAMWAYS BONDS SOLD

The Montreal Tramways Company has sold a \$2,000,000 issue of first and refunding mortgage 5 per cent. gold bonds. These are being offered in the United States by Harris, Forbes and Company, the Harris Trust and Savings Bank and Coffin and Burr, Incorporated. The price of the offering is 96½ and interest. The bonds outstanding at the time the last annual statement was issued was \$13,335,000 and the total amount now outstanding is \$15,330,000.

The Canadian Pacific Railway earnings for the month of November were: Earnings, \$13,401,941.90; expenses, \$7,837,983; net, \$5,563,958.90; decrease, \$799,452; increase in gross, \$50,660.

The Toronto Street Railway's King Street East car barns were destroyed by fire, involving a loss of over \$500,000.

The Royal Securities Corporation, Montreal, have prepared a January booklet descriptive of a number of mortgage bonds purchased by them for their own account and offered as suitable for safe and profitable investment. Information regarding the following bonds yielding from 5½ to 6½ per cent. is included: Riordon Pulp and Paper 6 per cent. bonds; Price Brothers and Company 5 per cent. bonds; Price Brothers and Company 6 per cent. notes; Brompton Pulp and Paper Company 6 per cent. bonds; Wayagamack Pulp and Paper 6 per cent. bonds; Laurentide Power 5 per cent. bonds; Nova Scotia Steel and Coal 5 per cent. debentures; Ames-Holden-McGready 6 per cent. bonds and Calgary Power 5 per cent. bonds. A copy of the circular will be sent on request.

Dominion Government---November, 1916

MUNICIPAL HAIL INSURANCE

The writing of hail insurance by Saskatchewan municipalities, a sort of State system, has during the past year brought some acute problems. For three years the inadequate rates charged were sufficient to meet losses and there was great jubilation by the promoters of the scheme as to the advantage of the cheap rates offered by the municipalities as compared with the much more burdensome rates charged by the companies. The year 1916 has proved a disastrous one. The municipal insurance scheme brought over from last year about \$500,000 of cash and is now busy collecting about \$1,500,000 of this year's premiums. As the premiums are not payable in advance, however, it will be months before the collection is made and the commission can meet its losses, which run about \$5,000,000. All sorts of conferences have been held to devise some method of recouping the unfortunate farmers but no plan has proved feasible.

In the meantime the companies, of which 24 are operating in Saskatchewan, have collected their premiums and paid their losses in a business-like fashion. From the figures supplied by the government, it will be clear that the premiums collected during the season amounted to \$1,417,853, the losses paid being \$1,872,408. The loss ratio is 132 per cent. of the premium income. Adding underwriting expenses, it will be found that the companies have disbursed this year approximately 162 per cent. of the year's premium income.

There is no hostility here to the government undertaking money lending, hail insurance or similar service provided only that the government or municipality, as the case may be, fulfills its obligation without expense to the community at large—in other words, that the scheme shall be a business-like and self-supporting one. The municipal hail insurance plan in Saskatchewan was revised by the government and rates and details of management proposed by the department at Regina.

JAPAN AS A LENDER

As a direct result of the United States Federal Reserve Board's famous "warning" regarding the short-term notes of Great Britain and France, Japan has entered the realms of international finance as a lender. The British and French governments having bowed to the decision of the Federal Reserve Board, agreed not to sell in the United States the securities to which the board took objection. The governments turned to Japan for assistance. Whether or not it was good policy for the United States to encourage that new financial channel, time alone will tell.

Through the governor of the Bank of England and Mr. Kengo Mori, the financial commissioner of the Japanese government in London, an arrangement was made for a public issue in Japan of the British government exchequer bonds to the amount of yen 100,000,000. The British treasury's object in issuing the loan in the Japanese currency was to get dollars by means of remitting the proceeds to America, availing itself of the present state of exchange between Japan and America. The Japanese government in July last provided the British treasury with dollars amounting to \$50,000,000 secured on treasury bills. In the present transaction, it is the Japanese public that is providing the fund. A syndicate of 18 Japanese banks, headed by the Yokohama Specie Bank, was formed under the auspices of the Japanese government, which offered its services to act as an intermediary between the British government and the Japanese syndicate. The result is that only one exchange of views between the governor of the Bank of England and the financial commissioner of the Japanese government in London sufficed to conclude the entire arrangement. The Japanese syndicate asked for no collateral for the loan, and they are undertaking the issue simply for the actual costs. As neither the syndicate nor the public is in position to pay in dollars, the Japanese government, in co-operation with the Bank of Japan and the Yokohama Specie Bank, has undertaken to remit the whole proceeds of the loan for the British government to America, so that the British treasury will be enabled to accomplish the only aim it has by the issue.

The entry of Japan among the ranks of lenders is another of the financial surprises of the Great War.

STATE COMPENSATION INSURANCE

The State system of workmen's compensation, which does not allow the insurance companies to compete, is being given a trial in Canada. The system is unfair to the capital invested by the companies here, capital which frequently has been invited to invest. In some parts of Canada, the State has legislated the insurance company out of existence so far as workmen's compensation is concerned. The provincial government has then proceeded to write the business, free from competition. Any deficits in operation can be made up by the community at large.

Mr. Edson S. Lott, president of the United States Casualty Company, at the recent conference on social insurance at Washington, said: "If the State-managed fund cannot give both lower rates and as good service as can commercial companies, the lawmakers ought not to create a monopoly for it, whereas if it can give lower rates and as good service, it will not need a monopoly. In any event, such a monopoly should not be created in the absence of conclusive evidence that employers and

workmen will be benefited thereby. Monopoly is, at best, a dangerous expedient. Neither stock companies nor mutual associations ask for a monopoly. If a monopoly is given to the State fund, employers must take what is given to them in the way of management and give what is demanded of them in the way of premiums."

If the State decides to undertake workmen's compensation insurance, it should allow the competition of the insurance companies. They ask no favors. They request only that they be permitted to remain competitors. They are content to allow the fittest to survive. When competition is permitted, the authority which regulates compensation payments, decides disputes, etc.—be it a board, commission or otherwise—should not manage the State fund. As Mr. Lott says, it is not just that any administrative body should also be the judicial tribunal to pass

on claims against itself. And it is demoralizing and unfair, in view of the controversies incident to competition frequently and unavoidably arising between private companies and associations and a State fund, that the body which operates the State fund should be permitted to exercise judicial jurisdiction over the competitors of that fund.

British Columbia will be the latest province in Canada to undertake workmen's compensation. The government will, it is hoped, recognize the fairness of allowing the companies to compete for the business, thus allowing the employer freedom of choice as to where his insurance is placed. The State cannot properly claim a monopoly of workmen's compensation insurance, a commodity which the companies have sold at low rates and claims in regard to which, they have settled without delay.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Halifax, N.S.—December 3—Loss, \$11,940. Insurance: National Insurance Company, \$2,000; Acadia, \$5,000; St. Paul, \$1,000; Aetna, \$4,000. On office furniture—Halifax, \$1,000; Home, \$1,000. F. S. Whittaker, St. John, was the appraiser.

Hamilton, Ont.—December 21—Shoe store and photo studio, 663-5 Barton Street East, owned by Mr. W. R. Turnbull. Loss, slight.

Kingston, Ont.—December 22—Canadian Locomotive Company's coal elevator and hopper. Loss, \$3,000.

Lindsay, Ont.—December 27—Mr. A. L. Campbell's grocery store. Loss, \$3,000.

Oka, Que.—December 27—Trappist monastery. Loss, \$60,000.

Ottawa, Ont.—December 26—Rolla L. Crain Company's printing plant, 145-9 Spruce Street. Loss, \$100,000.

Peterboro', Ont.—The insurance on the Quaker Oats Company's plant included Lloyd's, London, Underwriters, \$176,500; Hamilton, New York, \$60,000; Dixie, Greensboro, N.C., \$12,500; American Lloyd's, New York, \$80,000; United States Underwriters, New York, \$40,000; Stuyvesant, New York, \$30,000; Provincial \$30,000; Northwestern National, Milwaukee, \$25,000; Great Western Lloyd's, New York, \$40,000; National of Great Britain, \$50,000; Colonial Assurance Company, New York, \$25,000; National of Paris, \$21,000; Union Underwriters, New York, \$45,000; Fine Arts and General, London, \$22,500; North River, New York, \$25,000; North Empire, \$20,000; British Crown, London, \$23,000; Ohio Millers Mutual, \$20,000; United States, New York, \$20,000; Norwegian Underwriters, \$17,500; Factory Underwriters, Toronto, \$10,000; Hand-in-Hand, Toronto, \$10,000; Canadian Millers, \$15,000; Dominion Fire, Toronto, \$10,000; Anglo-American, Toronto, \$10,000; Millers and Manufacturers, Toronto, \$10,000; London and Lancashire, \$65,000; British Dominions, \$25,000; North River, New York, \$10,000; Lumber Underwriters, New York, \$10,000; Liverpool and London and Globe, \$26,000; Mount Royal, \$13,500; National Union, \$23,000; State of Pennsylvania, \$10,000; New York Fire and Marine Underwriters, \$15,000; Sun of London, \$12,500; Pennsylvania Mutual, \$10,000; Glens Falls, \$10,000; New York and Boston Lloyd's, \$17,500; National Underwriters of America, \$30,000; Pacific, New York, \$7,500; Merchants, New York, \$7,000; Wellington, Galt, \$5,000; Millers and Manufacturers, Toronto, \$5,000; Merchants Fire, Toronto, \$4,000; Monarch, Ontario, \$2,500; North Empire, Winnipeg, \$5,000; National-Ben Franklin, \$5,000; Economical, Ontario, \$2,500; Stuyvesant, \$10,000; Excess, London, \$5,000; Cornhill, \$5,000; Factory, Toronto, \$5,000; Western Millers Mutual, \$7,500; Millers Mutual, \$7,500; National F. and M., Elizabeth, \$5,000; Central Manufacturers Mutual, Ohio, \$5,000.

Revelstoke, B.C.—December 18—Revelstoke Lumber Company's mill at Pungston Creek.

Vancouver, B.C.—December 19—Parisian Tailors' store, 606 Granville Street. Loss, \$7,500. Cause unknown.

Wlarton, Ont.—December 24—Canada Furniture Company's factory. Loss, \$70,000. Cause, supposed hot box. One death.

Windsor, Ont.—December 20—Barracks of No. 2 Construction Battalion. Cause, overheated stovepipe.

Windsor, N.S.—December 17—Dominion Atlantic Railway freight shed and three cars. Loss, \$10,000.

Winnipeg, Man.—December 22—731-749 Corydon Avenue. Losses total \$10,000, including J. Dowd's hardware store, \$1,500; Miss B. Given's confectionery store, \$1,000; S. Horton, grocer, \$3,500; E. Brand, furrier, \$800.

CAUSES OF ACCIDENTS

Mr. A. O. Dufresne, of the Quebec department of mines, comments in his annual return regarding causes of accidents as follows:—

We deem it fairer, however, to attribute the accidents to the following causes: lack of discipline; the workmen's imprudence; their wish to run risks rather than make an extra effort by going a few steps to avoid a falling rock; their recklessness in passing beneath the box of a cable-derrick or other suspended machine; their habit of trusting their eyes to judge of the solidity of the roof of their working places rather than by sounding it with a tool; the tendency to assume risks even if they endanger their lives, such as battering down arches of fallen rock rather than removing the rocks one by one; walking on the railway track knowing that cars are running; to save time in drilling they do not hesitate to use the bottom of a hole already fired; machinery is oiled or greased while in motion; too heavy loads are carried to save going over the same ground twice. In some mines and quarries, stones are broken with hammers. This should not be allowed, it too frequently happens that pieces of stone strike the workmen in their faces or the eyes, and there is another one-eyed man. In other places an iron wedge is used instead, which is far preferable. Unfortunately, through clumsiness, the striker sometimes misses the wedge and hits his companion's wrist. To avoid such risk, an iron rod about 20 inches long is used in some places to hold the wedge. This has given full satisfaction.

Two accidents were caused by belts and pulleys in mills. A carpenter had a bone of his little finger of the right hand broken when the latter was caught between a belt and the pulley around which it ran. A sweeper, working near a pulley in motion, had the middle finger of his right hand injured when the broom was snatched out of his hands by the pulley.

Some companies have undertaken a systematic campaign for the prevention of accidents. The general plan followed consists in getting all the head foremen and gang-foremen together periodically to show them the measures to be taken for preventing the recurring of accidents and remind them of the methods already suggested. All machinery in use is inspected at regular periods. All dangerous places are guarded by protective appliances: thus, openings in floors are closed, gearing-wheels are covered, etc. In some mines special precautions are taken, thus in most open-workings and large quarries blasts are fired by electricity.

A CALL TO EMPLOYERS

By SIR EDMUND WALKER

The end of the war is not in sight, but the wounded and otherwise disabled soldiers are coming back, and it is not too early to come to close grips with the problem of finding employment for those who have no claims on previous employers, and of caring for those who are partly or completely disabled.

We have to consider what we owe to the man who has fought to defend our lives, our property and our liberty, and we have to consider how to prevent the disorganization of industrial society when the soldiers come back in large numbers and the making of army supplies has come to an end.

We do not wish the soldiers' home-coming to mean except perhaps temporarily a cause of industrial disturbance. We want, on the contrary, to find in it a great opportunity to increase the prosperity and happiness of that part of the Empire which they have fought to save.

Losses and Gains.

We shall have lost forever the laboring power of our heroic dead and of those few who are totally disabled. We shall have gained the labor of many women untried before the war; we shall have gained the added strength, physical and mental, of countless soldiers who through the war have "found" themselves; and we shall, in much fewer cases, have returned soldiers who are more or less wrecked, physically or mentally, but who are not quite useless to the community.

I presume much of the work to be done by the Military Hospitals Commission leads directly to the larger work of land and industrial settlement. For obvious reasons we shall hope that many of the returned soldiers will take up land. The manner of selecting such land so that communities of loyal men shall be planted in every province, of caring for the soldier-farmer in his early years of settlement, and of lending him money for improvements, is of prime importance.

Training Canada's Soldiers.

Meantime the hospitals commission has, added to its other burdens, the duty of making suitable for work, by training and by the use of newly invented implements, men who would otherwise in many cases be a charge upon the country and a monument of our ingratitude.

In my younger days the one-legged and one-armed soldier was always present, eloquent of war, and not without

a meaning to the community—"lest we forget." We were used to seeing a bank messenger with one sleeve pinned to his breast and his handsome commissionaire coat covered with medals.

To-day, every employer of labor, manufacturer, merchant, banker, or whatever his calling, should be considering how he can employ a few partly disabled men, and thus do something more in carrying the burdens of the war.

Many a machine shop can use a certain number of one-armed and one-legged men with hardly any loss in efficiency. The hospitals commission sends them out better prepared to lessen the effect of their disabilities than the wounded soldiers of other wars.

What Injured and Others Can Do.

In a recent campaign to raise money for the British Red Cross, two officers totally blind from the effect of wounds appeared before the public. Both had been trained in the wonderful establishment in England administered by Sir Arthur Pearson. One of these blind officers is now employed as an expert electrician, while the other is a competent actuary and already engaged in soliciting life insurance.

Totally blind men are being trained as stenographers, taking shorthand notes by a system which enables them to be read by touch before being typewritten by the same blind operator. Some of these men are already much more efficient than the average stenographer.

What the peaceful communities at home must bear in mind is that these men are not rendered unfit for useful work, but that they are handicapped or forced by the loss of one limb to put more energy into their remaining abilities.

For Canada's Name.

All the ingenuity of this ingenious age should be employed, no matter at what cost, to enable the wounded soldier to earn his own living—which will not affect any pension he may receive.

When everything that human skill and sympathy can do is done, we shall still have some men to be entirely taken care of by the state. I hope that in creating soldiers' homes for these, as well as in finding good work for all not totally disabled, we shall completely revolutionize the past and make the name of Canada shine brightly for its wisdom and its humanity in caring for its crippled heroes.

Mr. M. J. Haney, C.E., has been elected to the presidency of the Home Bank, Senator James Mason, the former president, being made honorary president of the bank. Mr. R. P. Gough, of the board of directors, succeeds Mr. Haney as vice-president.

November Bank Statement Shows Striking Changes

Current Loans were increased by \$29,000,000 in November—Deposits payable after notice continue to increase, and now total \$836,000,000—Decline of \$30,000,000 in demand deposits was due to special transactions.

	November, 1915.	October, 1916.	November, 1916.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	\$406,735,171	\$454,148,049	\$459,277,454	+13.05	+1.1
Deposits after notice	714,219,286	816,374,171	836,593,269	+17.08	+2.4
Current loans in Canada	777,162,563	752,545,756	813,791,947	+4.6	+8.1
Current loans elsewhere	55,240,955	69,949,215	76,087,370	+37.6	+8.7
Loans to municipalities	41,064,550	38,708,745	32,945,963	-19.7	-14.9
Call loans in Canada	83,203,787	88,145,851	89,395,370	+7.3	+1.3
Call loans elsewhere	135,530,562	173,877,586	183,250,389	+35.5	+5.4
Circulation	124,153,685	135,285,031	148,197,971	+19.3	+9.6

The above are the principal changes in the November bank statement. The increase of \$22,000,000 during the month in savings deposits is the largest gain reported by the banks during the war period, although the increase reflects partly the transfer of funds from demand to notice deposits account. Loans to municipalities decreased nearly 15 per cent. Current loans in Canada increased 8 per cent., partly as a result of high commodity prices.

The following table shows the trend of the Canadian loans account for the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1915—November	\$777,162,563	\$83,203,787
December	775,517,947	84,228,155
1916—January	758,500,492	83,584,059
February	760,873,181	81,949,125
March	770,139,526	81,747,512
April	777,764,682	82,527,448
May	763,136,917	84,826,636
June	747,470,541	86,776,474
July	740,040,741	87,355,648
August	730,938,513	86,351,216
September	752,545,756	88,145,851
October	774,928,222	90,412,023
November	813,791,947	89,395,370

Current loans in Canada which increased \$36,000,000 last month, are nearly \$814,000,000, the highest total for many months. Another reflection of business activity is an increase in note circulation to \$148,000,000, a new high level.

The following table shows the course of the loan accounts for the past five years:—

No-	Current loans	Current loans	Call loans	Call loans
vember.	in Canada.	elsewhere.	in Canada.	elsewhere.
1912	\$874,721,593	\$40,925,744	\$70,668,521	\$111,812,858
1913	830,715,015	55,819,280	70,123,101	122,380,863
1914	794,269,220	42,066,275	69,394,407	74,459,640
1915	777,162,563	55,240,955	83,203,787	135,530,562
1916	813,791,947	76,087,370	89,395,370	183,250,389

All loan accounts last month, with the exception of current loans, were higher than in any November of the past five years. November current loans in 1912 and 1913 were greater than during last month but the volume of these loans is the highest during the war period.

The course of call loans abroad for the period beginning two months before the declaration of war, is of interest and is shown in the following table:—

	1914.	1915.	1916.
January		\$ 85,796,641	\$134,248,552
February		80,890,982	139,138,651
March		101,938,685	141,889,980
April		121,522,071	147,146,443
May		136,098,835	163,406,659
June	\$137,120,167	124,604,875	182,757,015
July	125,545,287	117,821,174	177,121,733
August	96,495,473	120,607,677	171,380,353
September	89,521,589	135,108,412	173,877,586
October	81,261,671	120,681,624	189,346,216
November	74,459,643	135,530,562	183,250,389
December	85,012,064	137,157,860	

Total loans of the banks in November were: Call loans in Canada \$89,395,370; call loans elsewhere, \$183,250,389; current loans in Canada, \$813,791,947; current loans elsewhere, \$76,087,370; loans to government, \$3,257,055; loans to provinces, \$1,317,195; loans to municipalities, \$32,945,963.

Domestic deposits for the past thirteen months are as follow:—

	On demand.	After notice.
1915—November	\$406,735,171	\$714,219,286
December	423,690,384	720,990,267
1916—January	387,002,926	714,264,486
February	380,825,667	728,242,609
March	380,165,388	738,160,212
April	402,060,955	748,359,957
May	412,301,481	765,064,041
June	428,117,340	767,598,130
July	431,958,188	780,363,919
August	443,317,275	806,774,687
September	454,148,049	816,374,171
October	489,230,234	814,297,404
November	459,277,454	836,593,269

The deposits record for the past five years for the month of November is given in the following table compiled by *The Monetary Times*:—

November.	On demand.	After notice.	Total.
1912 ..	\$376,820,372	\$635,810,703	\$1,012,640,075
1913 ..	384,480,046	625,803,150	1,010,480,898
1914 ..	350,884,153	625,094,852	976,879,005
1915 ..	406,735,171	714,219,286	1,120,954,457
1916 ..	459,277,454	836,593,269	1,295,870,723

ZINC SMELTING PLANT NOT FEASIBLE

Dr. Wilson Gives Reasons for That Conclusion— Electrolytic Zinc in Canada

The establishment of a zinc smelting plant in British Columbia at the present time does not appear feasible for the following reasons: (a) Inadequate supply of suitable ores. (b) Inadequate supply of suitable labor. (c) Lack of knowledge of suitability of local clays for retort purposes. (d) High cost of structural materials, including fire brick. (e) The retorting process is not especially adapted to treat the complex silver-lead-zinc ores which comprise the bulk of the British Columbia output, whereas developments now going on in electrolytic processes give promise of a solution of this problem. (f) The electrolytic processes also give promise of a greater adaptability to the peculiar needs of British Columbia ores. If these processes are successful, it may prove to be possible to treat some ores locally in plants of smaller unit size than are practicable in smelting by a retort process.

This personal opinion is expressed by Dr. Alfred W. G. Wilson in the concluding paragraph of a report on the production of spelter in Canada.

Dealing with electrolytic zinc in Canada, Dr. Wilson gives the following information:—

Electrolytic Zinc in Canada.

During the past year two plants to produce zinc by electrolytic processes have been planned and construction started.

In eastern Canada a plant was constructed to operate on the Watts process. A good deal of experimental work was done and a few tons of high-grade spelter were produced. The plant is closed down and additional experimental work is in progress elsewhere.

In British Columbia the Consolidated Mining and Smelting Company of Canada have been building a plant, which, when completed, will be capable of producing 100 tons of spelter per day. At present the generator capacity installed is sufficient to produce 50 tons per day. The actual output, in July, was only about half this amount, but the output is being increased as rapidly as possible.

During the last five years the French process for producing zinc electrolytically has been undergoing development, and has been tried out at three points in British Columbia. It has recently been announced that arrangements have been made to erect a plant for treating custom ores in the vicinity of Nelson, B.C. The government of British Columbia is also credited with interesting itself in the matter to the extent of guaranteeing the interest on a bond issue of \$40,000.

Little Said Regarding Cost.

As to the cost of producing zinc by an electrolytic process, little can be said at present. Electrolytic plants are in course of erection at a number of points in the United States as well as in Canada, and the total capital that is being invested in these plants is large. Both the promoters and the operators are satisfied that the initial difficulties have been overcome, and that these plants can be operated at a profit under normal conditions. It is expected that the cost per pound for producing zinc, all charges included, will be between 4 and 4½ cents. It is doubtful if any producers have yet attained this figure. It has not yet been attained in Canada, but it appears feasible to attain it. In this connection it must not be forgotten that the cost per pound of metal produced, charged to the zinc plant, must be in part controlled by the method of bookkeeping adopted. The complex silver-lead-zinc ores or copper-zinc-gold ores that can be utilized by this process, some of them of a quality or grade that could not be utilized economically by any of the other processes in use, also yield other valuable constituents. If the entire value of these constituents, after their recovery in marketable form, is credited to the zinc plant, it is probable that the actual cost of producing the zinc by an electrolytic process will be even less than that given above.

Interest in Kootenay.

The possibility of producing zinc commercially by an electrolytic process has altered the whole situation in western Canada. Hydro-electric power in abundance is available at a cost relatively much cheaper than heat from other fuels. The long haul of low-grade ores to a distant market can be

abolished; only the finished products have to be moved to market. It may prove that plants of relatively small capacity, when compared with an ordinary smelting plant, can be operated commercially. If so, certain isolated districts which are provided with abundant water power, may be able to become producers.

The zinc producers of the Kootenay district should have a special interest in the development going on at Trail, and the proposed plant at Nelson. The Consolidated Mining and Smelting Company of Canada own, in the Sullivan mine, one of the greatest lead-zinc mines that has been found in Canada up to the present time. This property has been extensively developed, and is capable of producing enough ore to operate the zinc plant at Trail.

Developed Lead Mining.

The development of lead mining in the Kootenays during the last ten or more years has been in a large measure due to the operations of this company. As soon as the numerous initial difficulties necessarily encountered in developing a new process are overcome, and the successful production of electrolytic zinc on a commercial scale has been started, it is the intention of the company to handle zinc custom ores in about the same way as they now handle lead ores. In fact, it must be obvious that this is the only course open to them, since the output of lead ores necessary to keep their lead plant in operation is so intimately associated with the output of zinc ores.

The Consolidated company is not in the market to purchase zinc ores, and no tariff for treating zinc ores has been announced. It is doubtful if they will be in the market for zinc ores before the summer of 1917.

The French Complex Ore Reduction Company have only recently announced that they propose to proceed with a plant at Nelson. This plant is primarily intended as a customs plant. It is not possible to predict when they will be ready to receive custom ores.

LIFE INSURANCE COMPANIES AND LIQUOR

Actuarial Returns Give Evidence That Abstainers Live Longer—Extra Premiums

Are you now, or have you ever been either directly or indirectly concerned in the manufacture or sale of any kind of alcoholic beverage? Do you ever drink wine, spirits or malt liquors? If so, which of these and to what extent. (Be explicit, general terms such as "temperate," "moderately," "occasionally," will not be accepted.) If a total abstainer, how long have you been so? Have you ever taken any medicine or treatment of any kind for alcoholic or narcotic habit? (If so, give full particulars.) These questions give an indication of life insurance companies' attitude to liquors.

Mr. L. M. Cathles, F.F.A., F.I.A., actuary of the South-western Life Insurance Company, of Dallas, in a recent address, stated that the attitude of life insurance companies toward the liquor business and those who indulge in intoxicating liquors may be roughly summed up as follows: Indulgence to the extent of the physiological limit stated by Dr. Abel (but not exceeding this limit) will not ordinarily disqualify for insurance if the applicant's other habits, personal health, family history, environment, etc., are good. Indulgence in excess of the physiological limit, say three glasses of beer a day or more, if a regular habit, disqualifies. All persons actively engaged in the sale or manufacture of intoxicating liquors are barred from insurance by the great majority of life insurance companies.

It has been found, he said, that, instead of indicating a strong constitution and improving a man's prospects of a long life, the indulgence in intoxicating liquors will materially shorten a man's life. This is not just an opinion held by some life insurance men; it is a conviction borne in upon all life insurance men by the actual, sad experience of their companies in the payment of an excessive number of death claims to the beneficiaries of men who have drunk more liquor than was good for them.

Around this question of how much liquor is good for a man, or rather, from the life insurance company's point of view, "How much liquor can a man drink without injuring his prospects of living out the average life time?" there still centers some difference of opinion; but the life insurance companies are a unit in recognizing the prime necessity for

Re-Investment of Maturing Funds

The repayment of securities coming due in January releases large sums for re-investment. Our

Guaranteed Investment

would combine the utmost in safety with a very satisfactory interest return. These investments represent first mortgage security besides our own guarantee. Let us explain them by letter or by personal interview.

The Standard Trusts Company

Notice is hereby given that a Dividend at the rate of Nine per cent. per annum on the paid-up Capital Stock of the Company has been declared for the half-year ending December 31st, 1916, and that the same will be payable at the offices of the Company in Winnipeg, on and after the 2nd day of January, 1917.

The Stock Transfer Books of the Company will be closed from the 16th to the 31st inst., both days inclusive.

By Order of the Board.

WILLIAM HARVEY,
Managing Director.

Winnipeg, December 1st, 1916.

knowing exactly to what extent each applicant for insurance does indulge in intoxicating liquors.

Drinking men are not good life insurance risks.

Liquor and liquor business are in bad repute among life insurance companies, and they insist upon knowing how much every applicant for life insurance is or has been contaminated by contact with or indulgence in liquor. Saloonkeepers cannot obtain life insurance protection at standard rates from any conservatively managed life insurance company in the United States. The companies which do accept saloonkeepers, bartenders, keepers of hotels in which liquor is sold, and men in similar close connection with the liquor business are few in number and accept such risks for insurance only upon special terms which the average man would consider extremely onerous. Any applicant for insurance who comes in contact with liquor, even in connection with its sale in bulk, is under suspicion as a life insurance risk and cannot obtain ordinary life insurance from the best life insurance companies at regular rates of premiums.

Extra Premiums.

There was, up to 1904, considerable difference of opinion as to whether moderate indulgence in liquor shortened a man's life. For many years before that time life insurance companies had by actual investigation from their own experience satisfied themselves that those who actually handled liquor by selling it to the public, or who drank to excess, were bad life insurance risks. Two investigations made in 1886 to 1888 resulted in recommendations regarding the terms upon which saloonkeepers and others handling intoxicating liquors might be insured. Here it is stated that at an extra premium of from \$3 to \$4 per \$1,000 (or 10 per cent. of the usual premium) grocers who sold liquor could be safely insured, while if keepers of hotels in which liquor was dispensed were insured they should be charged an extra premium of \$8.50 per \$1,000 (or a little more than 25 per cent. of the average premium), and if saloonkeepers were accepted for insurance they must be charged an extra premium of \$12.50 per \$1,000 (or approximately 40 per cent. of the average premium).

In Great Britain.

Another investigation based upon the experience of Scottish insurance companies and generally accepted of recent years in actual life insurance practice in that country gives the following rates of extra premiums:—

Grocers selling liquors, \$5 to \$7.50 per \$1,000.

Innkeepers and hotelkeepers, \$10 per \$1,000.

Saloonkeepers, \$12.50 per \$1,000.

In recommending this extra premium, the committee in charge stated that, if application were made for remittance of the extra premium on account of change in occupation after the policy had been issued, evidence of health would be required to make sure that the occupation had not had any bad effects. It was considered that part of the extra risk arose on account of the general unhealthy surroundings of those engaged in the occupations referred to, only part of the extra mortality experience being ascribed to actual personal indulgence in intoxicating liquors.

In 1904 there was published in England the mortality experience of the United Kingdom Temperance and General Provident Institution. This mortality experience and the deductions drawn from it at the time of its publication stand to-day as the great authority on the subject of the comparative mortality between abstainers on the one hand and on the other hand non-abstainers who nevertheless drink so moderately that they have been accepted for insurance. Mr. R. M. Moore, actuary of the institution referred to and author of the published experience, states in his introduction: "That excess, as compared with moderation in the use of alcohol, is prejudicial in every way is a proposition hardly to be disputed. And many authorities who have given the matter careful consideration contend that even as moderation is superior to excess, so is total abstinence from alcohol superior to moderation."

Having in mind the prevention of waste and the economic utilization of raw materials produced in Canada, Lord Shaughnessy has authorized Arthur D. Little, Limited, the Canadian branch of a well-known Boston organization of analytical chemists, to undertake a comprehensive research study on cereal straws in Canada to include the straw of wheat, oats, barley and rye, and having for its purpose the industrial utilization of the excess straw now commonly burned in the west.

MINING ACCIDENTS IN QUEBEC

Provincial Record and Analysis—Rockslides and Falls Account for Large Percentage

The number of accidents whereof the Quebec bureau of mines received notice during the year 1915 is larger than that of the previous year. In 1914, the statistics gave 139 accidents, nine of which were fatal, while in the past year 173 accidents were recorded, 13 of which had fatal consequences. Last year the compilation of the statistics in connection with accidents was made in a much more regular manner than in the previous years. Many cases, which would formerly have remained unnoticed, were reported. Assistance with such work of compilation was rendered by the coroners who notify the superintendent of the bureau of mines whenever an inquest is held in a case of violent death in a mine, quarry, sand-pit or clay-pit.

Number of Men Employed.

During the year 1915, the average number of workmen employed in the mines, quarries, clay-pits, sand-pits, ore-dressing works, etc., of the province of Quebec was 5,767. These figures correspond to the number of men who worked 300 days or the "man-year," which is the basis of the provincial statistics. Several of the provinces do not make out their accident statistics on this basis; for their compilation, they take the total number of men who have found employment in mines or the concentrators and mills connected with them, during the year. Any person comparing the statistical figures of two provinces must therefore bear in mind this difference in the compilation of the tables.

In 1915, 7,989 men gave 1,757,736 days' work while, in 1914, 9,168 worked for a total of 2,087,063 days. The total number of days' work divided by 300 (the number of working days in the year) gives us men-year: 5,767. This represents a decrease of 1,189, or 17 per cent., as compared with the previous year.

The workmen's wages in 1914 amounted to \$4,365,439, as compared with \$3,419,857 in 1915, being a decrease of \$945,582, or 22 per cent. The average wages in 1913, 1914 and 1915 were \$626, \$627 and \$593 respectively.

Number of Accidents.

The number of men and accidents are as follow:—

Workmen.	No. of men on 300 days' basis.	Accidents.		Per 1,000 employed.
		Fatal.	Non-fatal.	
Mines	2,990	10	141	50
Quarries, etc.	2,777	3	19	8
Totals ...	5,767	13	160	58

By non-fatal accident, the bureau of mines of the province of Quebec means any accident which incapacitates a man for work for a period of ten days or more.

For every 1,000 men-year in the mining industry in the province 2.25 fatal accidents were recorded. Last year there were three fatal accidents in quarries while none were reported in 1914.

In the mines there were, in 1914, nine fatal accidents for 3,046 men employed, a proportion of 2.95 per 1,000. In 1915, there were 2,990 men employed in mines and ten fatal accidents, a proportion of 3.34 per 1,000.

One fatal accident in concentration works was recorded in 1914, while there was not a single one in 1915.

Rock Slides and Falls.

Rock slides and falls are responsible for more than one-half of the loss of life and explosives account for 23 per cent. of the same.

The greater number of non-fatal accidents are also due to rock-slides and rock-falls. The others are due to cable-dericks, to the handling of ore-cars, to various pieces of machinery in the mills, to falling objects. Some accidents may have been caused by dangerous working methods.

Workmen between 56 and 60 years of age are responsible for more accidents than the adjoining classes. Among that class there were 11 accidents last year while there were only ten in the previous return.

As to rock falls and slides in open workings, the month of April still heads the list.

The Hamilton Provident and Loan Society

DIVIDEND No. 91

Notice is hereby given that a Dividend at the rate of Eight per cent. per annum has been declared for the half year ending December 31st, 1916, upon the paid-up Capital Stock of the Society, and that the same will be payable at the Society's Head Office, Hamilton, Ontario, on and after Tuesday, the 2nd day of January, 1917.

The Transfer Books will be closed from the 15th to the 31st of December, both days inclusive.

By order of the Board.

D. M. CAMERON, Treasurer.

Hamilton, November 29th, 1916.

A TIME-TRIED INVESTMENT

This is not only one of the largest and strongest, but also one of the oldest of the Canadian financial institutions. It has a record of more than sixty years of steadily increasing success, stability and strength. In this time an experience has been gained which entitles its Directors and Officers to be considered experts in the selection of choice, safe securities for the investment of its funds.

Its record, experience and strength constitute it an unusually safe Depository for Savings, and its Debentures have long held a very high place in the estimation of those conservative, cautious investors both in Great Britain and Canada, who prefer absolute safety to a high rate of interest. In Canada they are a LEGAL INVESTMENT FOR TRUST FUNDS, and are accepted by the Canadian Government as the Deposits required to be made by Insurance Companies, etc.

We shall be glad to send you a specimen Debenture, a copy of our last Annual Report, and full particulars on receipt of your address. Write for them to-day.

Charts, Curves and Diagrams

An unusually large number of charts and diagrams of great interest will be printed in The Monetary Times Annual. Among them are:

Six pages of curves and statistics illustrating Canada's development.

Chart illustrating Canada's financial position.

Charts illustrating some surprising economic changes in Canada in recent years.

Composite plot of Canadian conditions for a series of years to December, 1916, compiled for The Monetary Times by Roger W. Babson.

Chart showing notable price movements in the iron and steel market, including the unusually interesting movement of the present time.

Chart showing fluctuation in the Bank of England rate for a series of years.

Calendar for Rapid Note Computation.

Chart showing growth of gold per capita in United States, largely due to exports through Canada.

Chart showing trend of Canadian Railroad Earnings.

Diagram outlining Canadian production, past, present and future.

Chart showing course of our paper exports.

Map of our grain routes, from the Head of the Lakes.

Prosperity and War Orders

A story of facts and figures gathered from official sources and showing that the war orders placed in Canada to date have a value of over \$1,095,000,000. The subject is discussed from many instructive viewpoints. Another important and supplementary article is contributed by prominent manufacturers who discuss what may happen when war orders cease.

Statistics, Illuminative and in Simple Form

Another attractive feature of The Monetary Times Annual is the series of important statistical tables, in simple form. They constitute a reliable barometer of conditions. Among other tables are the following:

Stock Exchange Transactions
Bank Clearing House Returns
Fire Losses
Municipal Bond Sales
High and Low Prices of Municipal Bonds
Canada's Trade
Wheat Production
Railroad Earnings

Building Permits
Canadian Flotations in London
New Companies
Stock Issues in Canada
Corporation Bond Issues in Canada.
International Exchange
Banking Position
Bank Profits and Dividends

Bank Branches
Bank of England Rate
Price of Silver
British Consols
Life Insurance
Fire Insurance
Mineral Production
Immigration
Cash Wheat Fluctuations

THE MONETARY TIMES ANNUAL

OUT NEXT WEEK—OVER 300 PAGES

Every Section is Replete with Interest

The Monetary Times Annual will be classified in the following sections :

Banking. Investment. Insurance. Industrial.

Each section contains a vast amount of timely and readable information of immediate interest and permanent reference value.

There is room here for the names of only half a dozen of the many articles in each section :

Banking	Our Government's Banking Business Standard of Canadian Currency Banks and the War Loan When Von Spee Scared Canadian Banks Central Gold Reserves Canadian Credits for Britain	Industrial	What does F. O. B. Mean? Canadian Steel Situation Tariffs After the War Pulp and Paper Trade Canada's Growing Exports Canada's Commercial Balance Sheet
Investment	Canada's Domestic War Loans Short Term Financing Suggested Tax on Foreign Securities United States as our Money Market Outlook for Bond Prices Corporation Dividend & Interest Records	Insurance	Canadian Companies and War Mortality Heavy Unlicensed Fire Insurance Insurance of Canadian Contingents Marine Insurance Last Year Canadian Government Annuities Ontario's Many Barn Fires

Selling Canadian Bonds

The sales of Canadian securities during the past year are thoroughly dealt with in the form of articles, charts and statistics. The statistics of bond sales for 1916, with comparisons, will be the most complete published to date. The transfer of Canada's securities market from London to New York is covered from every view point.

Municipal Finance in the West

Government officials of Western provinces contribute businesslike articles as to the financing during 1916 of the municipalities west of Winnipeg.

Some of the Other Features

Every Province is Represented in the Monetary Times Annual as usual by a contribution specially penned by its Premier. These articles include one each from the pen of the new Premiers of Saskatchewan and British Columbia. "What of the outlook?" The question is answered by the Premiers of Canada's nine provinces.

Repurchasing our Bonds. The various phases of the movement to Canada of Canadian Securities held in England is described by Mr. E. R. Wood, recognized as the leading authority on Canadian Bonds. Mr. Wood gives an estimate of the amount of our Securities which have come back to Canada since war commenced.

Anglo-Canadian Financial Relations. While the United States has become the chief market for Canadian securities, important financing involving many millions has been accomplished between the Canadian and British governments. This article is written with an eye to future developments.

Canada's Special War Measures. This is a synopsis of the various measures enacted since the war commenced, with facts and figures showing how the legislation has worked. It gives a splendid analysis of the Canadian national financial position.

Canadian Trade at a Glance. An expert statistical analysis of Canadian trade, the first of its kind and printed for the first time in the forthcoming Monetary Times Annual. It shows at a glance the percentage shares of our import trade obtained in recent years by Great Britain, the United States and other countries, making a statistical panorama of Canadian trade.

Retrospect and Prospect. Editorial review of the year—its good things and its drawbacks. The outlook for nineteen-seventeen.

War Loans to Date. An article showing that war loans to date total over \$50,000,000,000.

SHRINKING DOLLAR IN LIFE INSURANCE

Decline in Purchasing Power of Money Makes Necessary
a Larger Amount of Protection

Owing to the operation of economic law we have the strange paradox that while the cost of life insurance the last ten years has steadily decreased, which means that a dollar will purchase more insurance to-day than it would have done ten years ago, the value of the same amount of insurance is less than it was ten years ago on account of the increase in the value of everything else which the insurance money provided is designed to buy. This statement was made by Mr. Alfred Hurrell, associate general solicitor of the Prudential Insurance Company, in a recent address before the Association of Life Insurance Presidents.

Conservative statistics from authoritative sources have recently been published which show that in the last ten years the purchasing power of the dollar has shrunk fully a third. This is when applied to the purchase of necessities only. If luxuries were included, the shrinkage would be much greater. In fact, one comparative compilation of prices as between this year and last as to some 25 articles of necessary food shows an increase in price of a third over last year. The meaning of this is very clear and should be brought home to every one who by life insurance is honestly trying to provide an adequate estate to support his dependents.

Policyholders must face the fact that the steady increase in the cost of living, for which neither they nor the companies are responsible, has steadily cut down the value of their insurance, even though the cost of the insurance itself has been cheapened by reduced premiums and the larger privileges and

guarantees in the policies. Leaving out the abnormal increases from last year to this and considering only the normal increases of the last decade, a thousand-dollar policy of to-day is actually and relatively worth no more than was one for about \$600 in 1906. The solution of the problem, of course, is for the policyholder to insure his dependents also against this increased cost of living by providing an additional amount to cover it. Being responsible by solicitation for these policyholders in the first instance, it is the duty of the companies to drive this fact home to them by every conceivable means in their power.

The foregoing, it seems to me, is very obvious in view of the creeping palsy which in the last few years has laid hold of our dollar. Equally important, however, is the necessity of making the great majority of the policyholders see that in any event, and without reference to the definite depreciation of the dollar about which we have been talking, the insurance carried by them falls far short of being sufficient to discharge the obligation they owe to their dependents.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended December 22nd:—

Hudson Bay Mines, 61,047; Penn-Canadian Mines, 42,964; Mining Corporation of Canada (Townsite City Mine), 62,083; McKinley-Darragh-Savage Mines, 170,343; Dominion Reduction Company, 88,000. Total, 424,437 pounds, or 212.2 tons.

The total shipments since January 1st, 1916, now amount to 30,268,680 pounds, or 15,134.3 tons.

OCEAN FREIGHTS WERE HIGH

Leading Factor Was Government Control of Ships —Strength of Shipping Combines

Ocean freights this year have been one of the most important factors in commerce. Many Canadian orders for export placed in Canada had to be refused as tonnage could not be obtained at reasonable figures. During the latter part of the year conditions improved somewhat, although rates were very variable. Rates from Montreal port are usually about the same as those from New York, although frequently on a slightly higher basis. The following chart of the Journal of Commerce shows the course of freight rates on wheat flour and wheat from New York to Liverpool during a period of four months last year:—

The weakness in grain freights was attributed to the slackness then prevailing in the export wheat market.

Two Important Factors.

A leading authority last summer gave the Canadian Bank of Commerce his views of the situation as to freights and tonnage. He said:—

"Two factors have been instrumental in causing the high freights and scarcity of tonnage. The first is the large number of steamers that the government have been using in the transportation of ammunition, supplies and troops not only to France, but to the Dardanelles, and later to Salonika, and from India to Persia, but conditions, I think, are now changing. (This was in May.) Apparently there is shortly to be a reduction in the quantity of ammunition and stores to be shipped and the government are releasing a number of steamers.

"A factor that will help conditions is that the British government have commandeered a number of ordinary freight steamers, which, with the German steamers, are being used in the transportation of Canadian and American grain to Europe, principally to England. In addition, they have appointed a commission of British grain merchants to buy grain f.o.b. In this way the rate of freight that is being paid is on the basis of, say, twelve shillings on the vessel's dead weight, whereas freights up to three months ago were about fifteen shillings or seventeen shillings and sixpence per quarter, or probably about 40 per cent. more than on the dead weight basis.

"As regards general produce, such as cheese, butter, flour, etc., I think rates will have to be considerably reduced. For instance, 200 shillings on cheese, or nearly two cents a pound, is so phenomenal a rate that, with 10 or 11 shillings for grain offered by the commandeered steamers, the regular lines will be forced to base their rates for cheese and other produce on the rate quoted for wheat."

State System for Canada?

It was stated unofficially last fall that after the war the Dominion government may establish a state-owned line of transatlantic steamers. This project presumably would depend somewhat upon the report of the commission now investigating the Canadian railway situation and upon the

action taken on the report. An Ottawa despatch stated that the proposed fleet would consist of a fleet of fast, well-equipped vessels, with ample capacity for passengers, cargo and mails, providing an uninterrupted service all the year round. It would be an important and perhaps necessary complement to the great railway system already in operation by the government, and which may be extended later. The railway system and the steamship service would thus provide business for each other. There are indications that when the time comes the proposal will find strong support among members of the government. The Australian government purchased several ocean vessels and is now operating them. The shortage in tonnage led to this enterprise. Since the outbreak of war to the beginning of September last 1,584 merchant ships had been destroyed with a total gross tonnage of approximately 2,939,915.

Strength of Combines.

No government yet seems to have been strong enough to interfere with shipping combines, although the British government has regulated shipping to a marked degree since the war commenced. When the late Mr. Richard Grigg, formerly chief Canadian trade commissioner, was acting as the British government's trade commissioner in Canada, he reported on the shipping question. "It is alleged," he said, "and very generally believed, that an understanding exists between the Canadian North Atlantic Westbound Freight Conference and lines of steamers from Great Britain and the continent to New York, Boston and Portland, and that freights are, therefore, regulated by combination. Such a condition of affairs cannot be expected to command the approval of shippers, who would prefer free competition, particularly in view of the fact that during the period covered by this report a system of deferred rebates has been in operation, designed to discourage shippers from forwarding goods by other lines or by tramp steamers, and thereby securing the advantage of lower rates. The system referred to has been carried out by a charge of 10 per cent. for primage, which is returned to the shipper at the end of six months, provided that he has not in the meantime forwarded goods by steamers other than those of the lines included in the conference.

Not Higher than Necessary.

"On the other hand, it is stated that the rates charged by the conference are not higher than are necessary in view of the cost of maintaining the desired service with fast, modern steamers having fixed dates of sailing, and with uniform and constant rates of freight. Only persons possessing a very intimate acquaintance with the subject are competent to pronounce an opinion of any value upon such a matter, and it may be better to submit well-known facts in as concrete a form as possible rather than to deal with so highly controversial a matter in a report such as this. It is only fair to say that in many instances primage has not been demanded during the past year, and it is anticipated that it will shortly be abandoned altogether. Whether it is possible in practice to maintain combination without using the powers conferred by it to increase rates, and thereby to affect adversely the trade carried on under that combination, must remain a matter of opinion.

"Without dealing at length with the question of tramp steamers proceeding to Canada for cargo and faced with the alternative of going out in ballast or accepting a cheap rate, it may be pointed out that in one way or another trade must pay for the service rendered to it by shipping. It is obvious that a ship obtaining cargo only one way must obtain a higher rate of freight on that cargo than if she carried cargo both ways. To the British manufacturer, who might have sold more goods because, with freight based on a tramp rate, he could have sold them cheaper, and to the Canadian producer, who could have obtained a better price for his produce because his freight charges would have been lower, it would appear an obvious advantage that tramp steamers or liners other than those in the combination should not in any way be prevented from obtaining cargo. On the other hand, if cargo were carried by such steamers to any great extent, the reduction of tonnage offered to fast, regular steamers would probably compel an increase in rates and affect the important matter of quick and regular delivery of goods. It will be seen that the question is one of balance of advantage and reasonable adjustment."

The resolutions of the Paris conference this year were merely general in their reference to preferential shipping policy and the possible measures thereof.

The Most Important Point

after making your will, is to arrange so that its provisions will be properly carried out, and that your estate will receive efficient and economical management.

If you appoint a friend or relative as your executor, you have only the good health, strength, and honesty of such individual to rely on.

By having a Trust Company administer your will, you overcome those risks, and give your heirs the benefit of the experience gained in the management of many estates.

One of our Officers will be pleased to arrange an interview or correspond with you in regard to your will or its administration.

OCCUPATIONS OF CANADA'S CITIZENS

Farmers Number Nearly 1,000,000 and about 400,000 are Engaged in Manufacturing

The population of Canada in 1911, as shown by the census, was 7,206,000. The Yukon and northern territories are not included in the recently issued section dealing with occupations. The people over ten years of age numbered 5,514,428, of whom 2,965,645 were males and 2,548,783 were females. The excess of males over females in the population, which has been increasing from decade to decade, is noted in the totals for Canada, as well as in the figures for the provinces. The disproportion is largest in the west, but is noted in the east also.

The figures for males and females by occupations in 1911 were as below:—

	Male.	Female.
Agriculture	917,848	15,887
Building trades	245,990	211
Domestic service	75,133	138,879
Civil government	72,531	4,073
Fishing and hunting	34,547	265
Forestry	42,901	13
Manufactures	392,781	98,561
Mining	62,706	61
Professional	62,781	57,835
Trade and merchandising	240,903	42,184
Transportation	210,692	6,852

Still More Farmers Wanted.

Agriculture, with 933,735 followers in 1911, is the principal occupation of Canada's citizens. In 1881 it was credited with being the direct support of 662,266. Its growth has been rapid. While in 1881 agriculture gave employment to 48 per cent. of all who followed gainful occupations, in 1911 it only had 34.3 per cent. The building trades, manufacturing industries and transportation, while all ranking behind the farm in the number of workers, increased at a greater ratio.

In 1911 the numbers by provinces included as possible gainful workers were:—

	Male.	Female.
British Columbia	218,646	108,547
Alberta	179,062	107,576
Saskatchewan	228,364	139,322
Manitoba	192,815	149,498
Ontario	1,043,188	974,632
Quebec	737,401	717,930
New Brunswick	136,196	120,453
Nova Scotia	193,141	184,989
Prince Edward Island	36,832	36,796

Women Less than Half.

Women, who in 1911 constituted 46.22 per cent. of the population of Canada, were only 33.18 per cent. of that of British Columbia, but in Prince Edward Island were 49.98 per cent. of the total. The provinces which most attract immigrants show the greater excess of men over women. In Europe the situation has its corollary, countries from which there is a large emigration showing an excess of women in their populations.

The proportion of male workers greatly exceeds that of the females where gainful occupations are concerned. In Saskatchewan the women toilers are slightly over 6 per cent. of all; in Ontario and Quebec they rise to over 15 per cent. In all Canada they are 13.39 per cent. By provinces the numbers are given as follows:—

	Male.	Female.
British Columbia	180,482	16,627
Alberta	149,687	11,923
Saskatchewan	195,247	13,275
Manitoba	155,900	22,206
Ontario	836,135	154,878
Quebec	552,140	101,101
New Brunswick	103,275	16,491
Nova Scotia	148,991	24,370
Prince Edward Island	27,956	3,950
	2,358,813	364,821

While domestic and personal service naturally gives employment to the larger number of women workers, they appear to some extent in every classification.

CANADIAN PACIFIC RAILWAY'S ASSETS

They Are Valued at Nearly a Billion Dollars

The Canadian Pacific Railway has assets valued at nearly one billion dollars, and classified in the company's balance sheet as follows:—

Railway, \$352,971,897; rolling stock equipment, \$153,605,367; ocean, lake and river steamers, \$24,211,713. Acquired securities at cost, \$111,793,714; advances on lines and steamships under construction, \$42,852,519; advances and investments, \$9,639,472; deferred payments on lands and townsites sales, No. 2, \$12,006,140. Special investment fund: deferred payments on lands and townsites, \$39,044,383; government securities, \$10,088,734; deposited with trustee, \$7,135,650, making a total of \$56,268,768, which is security for a note issue of \$52,000,000.

Working assets: material and supplies on hand, \$11,814,583; agents' and conductors' balances, \$1,819,709; net traffic balances, \$512,056; miscellaneous accounts receivable, \$8,737,605; temporarily invested in war loans, \$5,272,690; cash in hand, \$41,581,680; other assets, \$127,129,135.

Active and Inactive Assets.

These other assets are divided into active and inactive, the first class being Schedule "B": 143,570 shares Consolidated Mining and Smelting Company stock, cost \$1,320,016; 550 shares West Kootenay Power and Light Company, preferred stock, cost \$55,000; Hull Electric Railway Company, cost to date, \$1,067,602; company's collieries in Alberta and British Columbia, and company's interest in other producing coal mines, \$2,500,000.

The inactive assets consist of unsold lands and other properties as follows: Surplus lands and buildings available for sale in the provinces of New Brunswick, Quebec, Ontario, Manitoba and British Columbia, representing mainly those purchased in excess of the requirements when securing right-of-way, station grounds and shop sites, as being more economical than a resort to condemnation proceedings, \$2,390,360. Manitoba: Agricultural lands, 204,528 acres at \$10, \$2,045,280. Saskatchewan: Agricultural lands, 2,001,144 acres at \$13, \$26,014,872. Alberta: Agricultural lands, 3,164,654 acres at \$13, \$41,140,502; A.R. and I. (500,000 acre tract, under agreement with government), 43,689 acres at \$5, \$218,445. In Alberta there are irrigated lands valued at: Western section, 41,687 acres at \$25, \$1,042,175; eastern section, 413,506 acres at \$40, \$16,540,240; A.R. and I. section, 31,843 acres at \$40, \$1,273,720; land reserved in irrigation blocks or right-of-way and operating purposes, 57,357 acres at \$13, \$745,641.

The Canadian Pacific Railway demonstration farms: Strathmore, \$75,000; Tilley, \$15,000; Brooks, \$10,000; Cassils, \$5,000; mixed farms (13), \$123,000. Timber lands and mills: Timber and tie reserve in British Columbia, 552,350 acres at \$4, \$2,209,400; A.R. and I. timber limit in Alberta, 45,000 acres at \$1.50, \$67,500; Bull River mill and improvements, \$100,000. In British Columbia the company has Columbia and Kootenay lands, 20,923 acres at \$2, \$41,846; unsold portion of Esquimalt and Nanaimo land grant, 1,059,507 acres, \$5,000,000. The unsold lands in townsites is divided as below: Subdivided sites in Manitoba, Saskatchewan and Alberta, \$7,500,000; unsubdivided land adjoining town plots in Manitoba, Saskatchewan and Alberta, 137,868 acres, \$5,000,000; unsold lots in British Columbia, including Vancouver, \$4,500,000; unsubdivided land adjoining townsites in British Columbia, including Vancouver, \$5,000,000. Then the Northern Colonization Railway land grant in Quebec of 96,000 acres is valued at \$96,000.

Other classes of assets are—Coal lands: 3,000,000 acres of coalright, reserved under land sold and unsold in Alberta, to be developed on a royalty basis, \$1; 46,933 acres of coal land in British Columbia at \$10, \$469,330; iron property in British Columbia, \$25,000. Natural gas: Rights reserved in 100,000 acres of land sold and unsold in Alberta. (Revenue from area under lease to June 30th, \$100,901), \$1. Petroleum rights: Rights reserved in 50,000 acres of land sold and unsold in Alberta, to be developed on a royalty basis, \$1. Improved farms: Buildings and improvements on improved (ready-made) farms in Saskatchewan, Manitoba and British Columbia, investment being repaid with land instalments with interest at 6 per cent., \$416,020. Live stock: Live stock (horses, cattle, sheep and swine) advanced to farmers having land contracts with company on security lien notes, \$122,183.

8% NET FARM MORTGAGES

We want \$1,000 on each of thirty-two quarter sections of first-class land. Principal re-payable in five years; interest payable the First of January and the First of July. All expenses paid by the Mortgagors. Titles examined by MacDonald, Craig, Tarr & Ross.

LEGAL NOTICES

BISSEL CARPET SWEEPER COMPANY OF CANADA, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 28th day of November, 1916, incorporating Willis Bertram Sturup, law clerk; James White Bicknell, and Aubrey Thomas Maher, students-at-law; Thomas Stewart Hagan Giles, accountant, and John Steuart Duggan, barrister-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To manufacture, buy, sell, export and deal in carpet sweepers, vacuum sweepers and other sweepers, cleaners or house furnishing goods; (b) To carry on any other business (whether manufacturing or otherwise) which may seem to the company capable of being conveniently carried on in connection with its business or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or right; (c) To acquire or undertake the whole or any part of the business, property and liabilities of any person or company carrying on any business which the company is authorized to carry on, or possessed of property suitable for the purposes of the company; (d) To apply for, purchase or otherwise acquire, any patents, licenses, concessions and the like, conferring any exclusive or non-exclusive, or limited right to use, or any secret or other information as to any invention which may seem capable of being used for any of the purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop or grant licenses in respect of, or otherwise turn to account the property, rights or information so acquired; (e) To enter into partnership or into any arrangement for sharing of profits, union of interests, co-operation, joint adventure, reciprocal concession or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which the company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit the company; and to lend money to, guarantee the contracts of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (f) Notwithstanding the provisions of section 44 of the said Act, to take, or otherwise acquire and hold shares in any other company having objects altogether or in part similar to those of the company or carrying on any business capable of being conducted so as directly or indirectly to benefit the company; (g) To purchase, take on lease or in exchange, hire or otherwise acquire any personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, and in particular any machinery, plant or stock in trade; (h) To lend money to customers and others having dealings with the company and to guarantee the performance of contracts by any such persons; (i) To draw, make, accept, endorse, execute and issue promissory notes, bills of exchange, bills of lading, warrants and other negotiable or transferable instruments; (j) To sell or dispose of the undertaking of the company or any part thereof for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company having objects altogether or in part similar to those of the company if authorized so to do by the vote of a majority, in number of the shareholders present or represented by proxy at a general meeting duly called for considering the matter, and holding not less than two-thirds of the issued capital stock of the company; (k) To adopt such means of mak-

ing known the products of the company as may seem expedient, and in particular by advertising in the press, by circulars, by purchase and exhibition of works of art or interest, by publication of books and periodicals and by granting prizes, rewards and donations; (l) To acquire, hold, sell and convey any real estate requisite for the carrying on of the undertaking of the company; (m) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (n) To do all such other things as are incidental or conducive to the attainment of the above objects, and of the objects set out in the letters patent and supplementary letters patent. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Bissel Carpet Sweeper Company of Canada, Limited," with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Niagara Falls, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 29th day of November, 1916.

THE WALTER BITON COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 14th day of November, 1916, incorporating David Henderson, William Henry McGuire, George Francis Rooney and Nathan Phillips, barristers-at-law, and William Patrick O'Meara, student-at-law, all of the City of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To acquire and take over as a going concern the business and assets generally, including the good-will and liabilities, of the business now carried on by the Walter Biton Company, and to issue in payment or part payment therefor fully paid up and non-assessable shares of this company for such amounts as may be agreed upon to carry on the above-named business in all its branches; (b) To buy, sell, import and export and otherwise deal in rubber goods and combinations and substitutions thereof of all kinds, and to buy, sell, import and otherwise deal in woolen goods of all kinds; (c) To do all acts and exercise all powers and carry on all business incidental to the due carrying out of the objects for which the company is incorporated or necessary to enable the company to profitably carry on its undertaking. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Walter Biton Company, Limited," with a capital stock of forty thousand dollars, divided into 400 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario. Dated at the office of the Secretary of State of Canada, this 20th day of November, 1916.

THOMAS MULVEY,

Under-Secretary of State.

22-2

MANITOBA'S RURAL CREDITS SCHEME

The Monetary Times, commenting on the Manitoba scheme for rural credits, recently said:—

"One of the curious features of the scheme is the provision that repayments on principal, which, according to the schedule of payments, are immediately applicable on the original indebtedness, are to be paid into a sinking fund and bear interest at 3 per cent., which fund is to be invested in government or municipal securities. It is said that there will be a net profit of 2 per cent. on this financing. Inasmuch as this money costs the government 5 per cent., one would suppose that unless the repayments were immediately re-invested in mortgages there would be a distinct loss."

Discussing these comments, the Manitoba Free Press (Winnipeg) says

"The question of the sinking fund in connection with the Manitoba scheme has also been raised in the west, and some explanation is in order.

"When Manitoba, under this plan, offers its bonds to the buyer, it will state that there is, behind the bond, the guarantee of the province and the guarantee of the municipality, and also collateral in the form of the first mortgages, with a 10 per cent. margin.

"Manitoba will, however, according to the present plan, do more than this. It will not state that all the mortgages are indifferently back of all the bonds, but it will state that there are specific mortgages back of specific bonds. The bonds will be issued in series and the mortgages will be issued in corresponding series. There will be a million dollars worth of mortgages placed, and there will then be

nine hundred thousand of bonds sold. This will be series A, and will constitute a separate account. Payments from these mortgages will be used to retire the bonds, until finally this entire deal of series A is closed.

"It is possible that in series A ten million dollars in mortgages may be placed, in which case nine million dollars worth of bonds will be sold. Whatever the amount may be, the series will be kept distinct from those which follow.

"When the government says that the repayments from mortgages are to be invested in government securities, it may be taken for granted that the first investment will be in the mortgage bonds which holders may wish to sell. It is quite possible that under the new bill the government will take the privilege of recalling bonds, redeeming and cancelling them, the specific bonds to be redeemed being determined by lot.

"When the government states that the repayments from mortgages, invested in government securities, will bear interest at 3 per cent., it is meant that these repayments, if reinvested at 3 per cent. compounded, would at the end of the specified period, liquidate the entire original principal.

"The repayments on principal will, in fact, not be reinvested at 3 per cent. If they are invested in the bonds of the association, which are presented for redemption, the interest will be 5 per cent. The 3 per cent. will provide for the eventual liquidation of the principal, and the extra 2 per cent. will be available for the payment of expenses and profits.

"It is possible that some part of the repayments on principal may have to be invested in government securities other than those issued under the plan. If this is true, a still greater profit will probably be shown."

"BULAK"

Egyptian Cigarettes

"Bulak" Cigarettes are the supreme achievement of one of the greatest blenders of tobacco in Cairo, Egypt.

Their exquisite aroma is fully in keeping with their elegant appearance.

10 FOR 15^{C.}

OBJECTED TO FIRE INSURANCE FORMS

The objections of Mr. Mark Irish presented at the Ontario fire insurance rates enquiry in writing, were as follows:

"At the meeting on November 28th last, when we saw Messrs. McCarthy and Laidlaw in your chambers, you suggested that I place in writing the objections I raised to the regulation of forms by the Canadian Fire Underwriters' Association. Accordingly, I beg to say that this objection is adequately expressed as follows:—

"Insurance companies, members of the Canadian Fire Underwriters' Association, are bound to submit to the secretary or a committee all forms under which propositions of insurance are to be undertaken by them. If the secretary or committee rejected any form, or any clause in any form, no policy can be issued under that form, or governed by such rejected clause, the individual judgment of any company to the contrary notwithstanding. The result produced is twofold.

"1st.—In the rejection of the form in toto, a Canadian assured is frequently prevented from securing a cover readily obtainable by similar interests outside Canada, and by the Canadian assured in unlicensed companies.

"2nd.—In the rejection of a clause the assured's protection is reduced in scope and adequacy without any compensating reduction in cost.

"Both these results are produced by the combined action under the Canadian Fire Underwriters' Association. Whereas, in many cases the individual companies are ready and willing to afford to the assured the protection he requires, if permitted so to do by the association."

Mr. Irish suggested also that the rating bureau be obliged to "cost its goods."

In reply to Justice Masten's question: Have you any other suggestions to make? As regards improvement of the situation or the law relating to insurance?

Mr. Irish said: My written objection is my principal point. The other is the placing of a tax on the export of premiums. At the present time the situation is unfair. Both federal and provincial governments collect taxes from the companies. They paid wages and taxes, too, in the pro-

vince. The native companies ought to get off with an equal start to the other fellow.

There should be no distinction as to licensed or unlicensed companies, no restriction as to deposits. One or other of these plans is the only fair thing.

CANADA'S BANK CLEARINGS

The following are the returns of Canada's bank clearing houses for the weeks ended December 21st, 1916, and December 23rd, 1915, with changes:—

	Week ended		Changes.

DIVIDENDS AND NOTICES

THE ROYAL BANK OF CANADA

ANNUAL MEETING

The Annual General Meeting of the Shareholders of The Royal Bank of Canada for the election of directors and for other business will be held at the Head Office of the bank, in Montreal, on Thursday, the 11th day of January next. The Chair will be taken at 11 o'clock a.m.

C. E. NEILL,

General Manager.

Montreal, December 1, 1916.

SMART-WOODS, LIMITED

DIVIDEND NOTICE

Notice is hereby given that a Dividend of Eight and Three-quarters per cent. (8¾%) has been declared on the Preferred Stock of Smart-Woods, Limited, same comprising total arrears of Seven per cent. (7%) and One and Three-quarters per cent. (1¾%), for Quarter ending December 31st, 1916, payable January 2nd, 1917, to Shareholders of record December 20th, 1916. Books to be closed from December 21st to January 2nd, 1917, both days inclusive.

By order of the Board,

JOHN T. F. KEENE,

Secretary-Treasurer.

Montreal, December 14th, 1916.

THE REAL ESTATE LOAN COMPANY OF CANADA, LIMITED

DIVIDEND No. 60.

Notice is hereby given that a Dividend at the rate of three and one-half per cent. for the half-year ending 31st inst., has been declared upon the Capital Stock of the Company, and that the same will be payable at the Office of the Company in Toronto, on and after 2nd January, 1917. The Transfer Books of the Company will be closed from 20th to 31st December, both days inclusive.

By order of the Board,

E. L. MORTON,

Manager.

Toronto, 14th December, 1916.

PENMANS LIMITED.

Dividend Notice.

Notice is hereby given that a Dividend of one and one-half per cent. has been declared on the Preferred Shares of the capital stock of this Company for the quarter ending January 31st, 1917, payable February 1st, 1917, to shareholders of record of January 22nd, 1917, also a Dividend of one per cent. on the Common Shares for the quarter ending January 31st, 1917, payable February 15th, 1917, to shareholders of record of February 5th, 1917.

By Order of the Board.

C. B. ROBINSON,

Secretary-Treasurer.

Montreal, December 18th, 1916.

PENMANS LIMITED.

Bonus on Common Stock.

Notice is hereby given that a Bonus of one per cent. has been declared on the Common Shares of the capital stock of this Company, payable February 15th, 1917, to shareholders of record of February 5th, 1917.

By Order of the Board.

C. B. ROBINSON,

Secretary-Treasurer.

Montreal, December 18th, 1916.

TENDERS FOR PULPWOOD AND PINE LIMIT

Tenders will be received by the undersigned up to and including the 1st day of February, 1917, for the right to cut pulpwood and pine timber on a certain area situated on the Black Sturgeon River and other territory adjacent thereto, in the District of Thunder Bay.

Tenderers shall state the amount per cord on pulpwood, and per thousand feet board measure, on pine, that they are prepared to pay as a bonus in addition to dues of 40 cents per cord for spruce, and 20 cents per cord for other pulpwoods, and \$2.00 per thousand feet, board measure, for pine, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill and a paper mill on or near the area referred to.

Such tenderers shall be required to erect a mill or mills on or near the territory and to manufacture the wood into pulp and paper in the Province of Ontario.

Parties making tender will be required to deposit with their tender a marked cheque, payable to the Honourable the Treasurer of the Province of Ontario, for ten thousand dollars (\$10,000), which amount will be forfeited in the event of their not entering into agreement to carry out conditions, etc. The said \$10,000 will be applied on account of bonus dues as they accrue, but the regulation dues, as mentioned above, will require to be paid in the usual manner as returns of cutting of wood and timber are received.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned,

G. H. FERGUSON,

Minister of Lands, Forests and Mines.

Toronto, 1916.

N.B.—No unauthorized publication of this notice will be paid for.

DOMINION POWER AND TRANSMISSION COMPANY, LIMITED

Notice is hereby given that Dividend No. 35 at the rate of seven per cent. (7%) per annum on the Preference stock of this Company has been declared for the half-year ending 31st December, 1916, and that the same is payable on January 15th, 1917, to shareholders on record on the 31st day of December, 1916.

The Transfer Books for the Preference stock of the Company will be closed from 20th December, 1916, to 31st December, 1916, both days inclusive.

By order of the Board of Directors.

WM. C. HAWKINS,

Secretary.

Hamilton, Ont., 20th December, 1916.

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of one and one-half per cent. (1½%) on the Common Stock of the Dominion Textile Company, Limited, has been declared for the quarter ending 31st December, 1916, payable January 2nd, 1917, to shareholders of record December 15th, 1916.

By order of the Board.

JAS. H. WEBB,

Secretary-Treasurer.

DIVIDENDS AND NOTICES

PROVINCIAL PAPER MILLS COMPANY, LIMITED

DIVIDEND NOTICE

Notice is hereby given that a Dividend of One and Three-Quarters per Cent. on Preferred Stock and One per Cent. on Paid-up Common Stock of this Company, has been declared for the current quarter, both payable January 2nd, 1917, to Shareholders of record at the close of business on December 15th, 1916.

By order of the Board,

S. F. DUNCAN,
Secretary.

Dated Toronto, December 11th, 1916.

ILLINOIS TRACTION COMPANY

NOTICE OF DIVIDEND No 48.

The regular dividend of one and one-half per cent. (1½%) on the preferred stock of the Illinois Traction Company will be paid January 1st, 1917, for the quarter ending December 31st, 1916, to shareholders of record, December 15th, 1916.

By order of the Board,

GEO. M. MATTIS,
Secretary.

Champaign, Ill.

NIPISSING MINES COMPANY

165 Broadway, New York, December 18, 1916.

The Board of Directors has to-day declared a regular quarterly dividend of Five per Cent. and an extra dividend of Five per Cent., payable January 20, 1917, to shareholders of record as of December 30, 1916. The transfer books will close December 30, 1916, and reopen January 18, 1917.

P. C. PFEIFFER, Treasurer.

THE NOVA SCOTIA STEEL AND COAL COMPANY, LIMITED

DIVIDEND NOTICE

A Dividend of two per cent. on the Preferred shares of the Company, for the quarter ending December 31st, 1916, has been declared, payable January 15th, 1917, to shareholders of record of December 30th, 1916.

By Order of the Directors,

THOMAS GREEN,
Cashier.

New Glasgow, Nova Scotia, December 23rd, 1916.

NATURAL PRODUCTS ON CANADIAN NORTHERN

Development on Sudbury to Port Arthur Line—Supply of Railway Ties

Mr. D. B. Hanna, third vice-president of the Canadian Northern Railway, in a statement to *The Monetary Times*, discussing the operations of the Canadian Northern Railway between Sudbury and Port Arthur, points out that less than three years ago Sir William Mackenzie drove the last spike on the Sudbury-Port Arthur line. As the work of construction had been commenced in the late autumn of 1911, little more than two years had been required to span the 543 miles of hinterland lying back of the great inland sea by a new highway for commerce. In the country through which the new line runs there is sufficient raw material to satisfy the hungry presses of a metropolitan paper for more than 200 years. As the land is cleared of the forests of spruce and other timber, the expectation is that incoming settlers will find more to please them in these sections of New Ontario than has been the case up to the present time.

"The Canadian Northern," said Mr. Hanna, "have arrived at the conclusion that the preliminary work must be confined largely to the working up of the natural riches in the mineral and timber-bearing lands, and, in conjunction with the provincial government, to locate homes for settlers in the fertile agricultural lands, especially near the new divisional points. Maps have been prepared, giving all the information that is available for the guidance of prospectors, as a preliminary to the larger, and, of course, more exhaustive geological maps now being prepared. A careful inventory of the timber on each side of the railway has been completed. The land which may be classified as now open for farming, particularly in proximity to the towns in the making, is being surveyed; mining men are working over the mineral-bearing lands, and men are in lumber camps in the valleys of the rivers which will float the pulpwood to the mills at the strategic points.

Buying Railway Ties.

"We plan to purchase each year all of the railway ties the settlers can produce along the Sudbury-Port Arthur line," said Mr. Hanna. "In addition, there is this new call for 1,000 miles of railway to be constructed back of the fighting front in France and Flanders. That would involve the cutting of some 3,000,000 ties and a large portion could be supplied from the territory served by the Canadian Northern Railway north of Lake Superior. This would probably mean a total of several hundred thousand dollars expended by the company directly. In itself that comprises a fairly large opportunity. But in addition we calculate that some 60,000 cords of pulpwood will be cut each year along the line. Add to this the returns upon sawn lumber in connection with the logs out of which the ties are cut, and it will be seen that the cash distributed to the homemakers along the line each year, as a direct result of Canadian Northern activities, should approach a substantial total.

"During the past four months a considerable plant has been developed at Foley, the first divisional point on the Canadian Northern Railway, west of Sudbury.

"The Canadian Northern will move mills from the west to be installed at other points, the policy being to create a produce and labor market for settlers each 20 miles throughout the clay belt.

RAILROAD EARNINGS

A Free Course In "Salesmanship"

We have thought about the young man who sees no prospects ahead. Would you like to be in a business that will give you

A Good Living Wage
A Profitable Future
A Provision For Old Age

We teach a man the Insurance Business, which offers permanent success, does not fluctuate, is a professional occupation, and has been truly named "The best paid hard work in the world."

This is done by a correspondence course and personal assistance, free of charge.

When he is fully prepared for the work, we place him in a position and help him to make good

The first two lessons of the Company's correspondence course will be sent to anyone interested. It will pay young men who desire to get on in the world to look into this

All correspondence strictly confidential.

CANADA LIFE ASSURANCE CO.
HEAD OFFICE, TORONTO.

Prosperous and Progressive

Up-to-date business methods, backed by an unbroken record of fair-dealing with its policy-holders, have achieved for the Sun Life of Canada a phenomenal growth.

To-day, the Company operates actively in forty-two countries and upon five continents.

In the past six years its assurances in force have nearly doubled; in the past eleven years they have more than trebled.

More than 166,000 of its policies are now in force for assurances totalling over \$265,000,000—much the largest amount carried by any Canadian life company.

*Note: It will be noted that the figures relating to the imports and exports of coin and bullion for the twelve months ending Oct., 1916, were: imports 1916, \$49,464,853; 1915 \$56,531,364, and exports 1916, \$206,126,802; 1915, \$118,782,516. Although it has been customary to include these figures in trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

FIRE WASTE HERE AND ELSEWHERE

North America Makes Poor Comparison With Europe—
Some Causes of Our Waste

The high fire loss per capita in Canada is again illustrated in the appended table compiled by the National Board of Fire Underwriters. The number of Canadian cities reporting to the board are few, but the table contains many interesting comparisons. Mr. E. P. Heaton, Ontario's fire marshal, recently stated that in European countries, fires start in the ratio of 1 in 1,250 of the population. In North America, the ratio is 1 in 250 of the population. For years in Canada we have laid stress on our "per capita" fire loss of \$3, against an average of 30 cents in European countries. The gross loss in North America is appalling and inexcusable, but, says Mr. E. P. Heaton, we must cease harping upon the three dollar per capita idea and realize the evil in some other way.

The average annual fire waste in Canada of \$22,500,000, large as it is, does not include any indirect losses, such as the loss of profits by a business man or manufacturer, the loss of earnings by those whose place of employment was destroyed, nor the loss to property owners through vacancy of houses caused by removal of men forced to seek employment in some other place, nor the loss to the municipalities from destruction of taxable property. The figures given are just the amount of the value of buildings, machinery, merchandise and household furniture destroyed by fire each year in this country.

Carelessness, lack of adequate fire prevention methods and poor building construction are largely responsible for our fire waste. In New York, with a population of one-half that of London, they had in the same year four times the number of fire alarms, or 1 to 220 of the population. In Berlin, with a population of two millions, they had, in 1914, 2,068 alarms, or 1 in 1,000 of the population. In Toronto, in 1914, with a population of less than 500,000, they had practically the same number of alarms to respond to as the city of Berlin, that is, 2,026, against Berlin's 2,068, or fire alarms of 1 in 230 of the population:—

COMPARATIVE FIRE LOSSES.

The first week of the New Year is National Service Week. All male citizens are interested, because it is obligatory upon each of them, between the ages of 16 and 65 years, to fill out one of the cards which the government is sending to them through the post-office authorities. The women are interested because their co-operation is being invited, in seeing that their men-folk attend to this important duty. The children are interested because their school teachers have explained to them the meaning of national service and the way in which father and the big brothers at home have to reply to the various questions. To write in the answers and return the card promptly is a good New Year's resolution for every man throughout the Dominion.

BANK OF ENGLAND AS FOREIGN CORRESPONDENT

The Bank of England has been named as the foreign correspondent of the Federal Reserve Bank of New York, and authority has been given by the Federal Reserve Board to the eleven other reserve banks to participate in the agency relations. This action marks a radical departure from the previous financial policy of the country, inasmuch as it places the governments of the United States and Great Britain for the first time in direct, continual financial relationship.

It is understood that authorization of this appointment is a part of a general plan for establishing financial connections that will strengthen the United States as a creditor nation in the commercial competition which probably will result when the war closes, and to provide a ready means to offset any tendency on the part of foreign bankers to withdraw the huge supply of gold accumulated here during the war.

The section of the banking act under which this authorization is given permits any federal reserve board to open and maintain banking accounts in foreign countries, appoint correspondents and establish agencies in such countries wheresoever it deems best for the purpose of purchasing, selling and collecting bills of exchange and to buy and sell with or without its endorsement through such correspondents or agencies, bills of exchange arising out of actual commercial transactions, so that a broad field of operation is possible under it.

The first effect of the Bank of England connection, it is thought, will be noticeable in transactions which might otherwise involve the exportation of gold from this country, as the connection will afford a channel through which United States banks can readily purchase British notes and securities to meet any tendency towards gold exportation. It also will tend, officials believe, to bring about a closer understanding and better feeling between the bankers of the United States and Great Britain.

NATIONAL BANK OF SCOTLAND

The four leading Scotch banks have deposits as follows:—

National Bank of Scotland	£23,957,000
Commercial Bank of Scotland	22,873,000
Royal Bank of Scotland	21,966,000
Bank of Scotland	21,552,000

The annual report of the National Bank of Scotland, the first named on the list, shows profits of £266,540. Its total assets amount to £28,884,656. The bank paid a dividend of 15 per cent. for the year.
